Introduction

1. It has been well known throughout the industry that there are certain persons producing from Silkie and Taiwanese broiler breeder flocks that are operating without license or quota issued by the Commission. Whether through inadvertence, or for some forgotten rationale, the Commission did not take steps to enforce its orders against these persons.
2. In its September 1, 2005 report, the BCFIRB made it clear that all producers must be registered for the purposes of biosecurity, premise identification and food safety, at a bare minimum. Presumably, this “bare minimum” would be achieved by enforcing the requirement to hold a license for the purposes of biosecurity, premise identification and food safety, while granting a special exemption from the requirement to hold quota. Ultimately, the Commission came to the view that there was no rational and defensible basis to grant an exemption, and that it would need to go beyond the “bare minimum” by “regularizing” these producers into full compliance through allocations of quota reflecting their historical market shares.
3. After a length consultative process, the Commission promulgated *Amending Order 11* to the *Consolidated Order of September 30, 2013*. This amending order provided for the enactment of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*. In brief terms, the *Program* allows persons who have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without license or quota to apply for an allotment of Regularized Producer Chick Quota and/or an issuance of temporary revocable, non-transferable export permit. The amount of quota or permit would be based on the applicant’s proven chick placements and exports between January 1, 2009 and December 31, 2012.
4. The applications were each independently reviewed for accuracy by an independent accountant retained by the Commission. On February 27, 2015, the Commission issued its allocation decisions and indicated that detailed written reasons would follow. These are those reasons.

Impact of BCFIRB Rulings Made on Interlocutory Applications

5. At the outset, it is important to make some comment on the impact of rulings made by the BCFIRB on interlocutory applications that were advanced in the midst of the Commission’s “regularization” process.
6. Several appeals have been brought challenging the terms of the *Program* in general, and later, the allocation decisions made under the *Program* by the Commission. While it is unusual for a body to make key determinations on substantive issues in the context of interlocutory proceedings (i.e., before the matter is heard on its merits), the BCFIRB has made at least one substantive

determination that, in the Commission's view, may fundamentally undermine: (a) the *Program*; (b) the allocation decisions made by the Commission under the *Program*; and (c) the Commission's ability to administer and enforce the *Consolidated Order*. Indeed, the impact of this substantive determination may be so profound that the entirety of the Commission's *Program* may have been rendered moot even before any of the appeals are heard on their merits.

7. It is perhaps obvious that the *Program* is entirely premised on the concept that no person may engage in the production, transportation, packing, storage and marketing of broiler hatching eggs, saleable chicks or broiler breeders unless that person is the holder of a valid and subsisting license issued by the Commission; has an allotment of quota in accordance with the orders of the Commission; or is otherwise expressly exempted from either or both of those obligations by the Commission.
8. The legislative foundation for this view is derived from paragraph 8(1)(a) of the *British Columbia Broiler Hatching Egg Scheme*, paragraphs 11(1)(c), and (f) of the *Natural Products Marketing (BC) Act*, and section 37 of the Commission's *Consolidated Order*.
9. Section 37 of the Commission's *Consolidated Order* has been in effect, in one form or another, since the Commission's inception. It provides as follows:
 37. No Producer shall engage in the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks or broiler breeders unless the Producer:
 - (a) is the holder of a valid and subsisting licence issued by the Commission; and
 - (b) has an allotment of Quota in accordance with the Orders of the Commission.
10. Nevertheless, it has become clear that the Commission's view concerning the applicability of section 37 of the *Consolidated Order* is not shared by the BCFIRB. In its "stay" decision made on March 13, 2015, the BCFIRB said that "the Commission's characterization of the appellants as non-compliant producers is an oversimplification". The BCFIRB went on to state that "the Commission has not actively regulated Silkie and Asian broiler breeder flocks".
11. Though the Commission cannot presume to know what is required to "actively regulate" (beyond enacting orders as has always been its practice), it is important to note that the BCFIRB was drawing a distinction between the Commission's "oversimplified" characterization that there has been a failure to "actively enforce"

regulations that *do apply*, with its view that section 37 of the *Consolidated Order* is not entirely “active”, at least with respect to these persons.

12. It may be that the BCFIRB’s finding that “the Commission has not actively regulated Silkie and Asian broiler breeder flocks” was meant to suggest that the Commission had not formulated a detailed regulatory response to these persons prior to the promulgation of *Amending Order 11*. Even so, this would not explain the inapplicability of section 37, which provides the foundation for the entire regularization program. Indeed, it is the Commission’s view that the requirement to hold license and quota embodied in section 37 would provide the essential foundation *for any* of the three primary approaches available to the Commission:
 - (a) Enforcement: The Commission could apply under section 15 of the Act for injunctive relief to compel the non-compliant producers to bring themselves into compliance with the existing regulatory regime, and/or to enjoin further breach. However, there could be no enforcement if “the Commission’s characterization of the appellants as non-compliant producers is an oversimplification”, as found by the BCFIRB.
 - (b) Exemption: The Commission could grant an exemption to the non-compliant producers, freeing them from all or some of the requirements specified in section 37. However, no exemption is necessary if “the Commission’s characterization of the appellants as non-compliant producers is an oversimplification”, as found by the BCFIRB. In other words, if these producers are not non-compliant, they do not need an exemption.
 - (c) Regularization: *Amending Order 11* reflects the Commission’s decision to “regularize” these producers into full compliance through allocations of quota reflecting their historical market shares. In its submission on the stay application, the Commission clearly indicated to the BCFIRB that if these persons are not obliged to hold licenses and quota in accordance with section 37 of the *Consolidated Order*, the *Program* itself “is an exercise in futility”. Obviously, if “the Commission’s characterization of the appellants as non-compliant producers is an oversimplification”, then they do not need to be “regularized” through an allotment of quota. Furthermore, even if the Commission’s *Program* were to be endorsed by the BCFIRB after the appeals have been concluded, *it seems unlikely that the Commission could enforce any of the quota allocations made under the Program in the face of a pronouncement by the BCFIRB that undermines the applicability of section 37.*
13. It is possible, perhaps, that the BCFIRB’s finding that “the Commission’s characterization of the appellants as non-compliant producers is an oversimplification” was merely meant to convey that the application of section 37 is a complex matter and that a plain reading of the section leads to the

conclusion that persons are only sometimes, or in some circumstances, required to hold a license and quota. How the section could admit such ambiguity is not clear. However, even if the BCFIRB meant to state that the application of section 37 is complex and ambiguous, it is the Commission's view no reasonable regulatory response or enforcement proceeding could be predicated on such an uncertain foundation.

14. In short, the Commission is of the view that the BCFIRB's pronouncements concerning the applicability (or rather, the "inapplicability") of section 37 may have significantly undermined the Commission's process. The Commission is now in an awkward position. On the one hand, the BCFIRB has noted in its stay decision that "the Commission's responsibility as the first instance regulator [is] to determine... what manner of regulation is effective..." On the other hand, the BCFIRB has already rejected as an "oversimplification" the fundamental basis of the *Program*, even while recognizing that the "decision making process [of the first instance regulator] is not yet complete". Indeed, the BCFIRB foreshadowed in its stay decision that "there is a full range of possible outcomes on these appeals... [including] determinations of whether a quota regime in general or an allotment of quota in particular are in fact consistent with sound marketing policy." It would seem that whatever outcome might arise from the appeals, that outcome will not be the *Program* developed by the Commission (predicated as it is on the regularization of non-compliant producers).
15. The Commission accepts that, as the "first instance regulator", it is incumbent on it to complete its decision making process. Though the foundation for its decision may have already been dismissed as an oversimplification, it would not be prudent (or even possible) to abandon its responsibility as the first instance regulator and instead attempt to guess at the eventual outcome, out of the full range of possible outcomes, that will arise from any or all of the appeals already in existence. Consequently, the purpose of this decision is to fully articulate the rationale for the Commission's decisions even as it recognizes that the eventual outcome may well be predicated on reasoning other than that which has already dismissed by the BCFIRB as an oversimplification.

History of Program Development

BCFIRB's Supervisory Report

16. In its September 1, 2005 report, the BCFIRB released a comprehensive report concerning specialty products and markets in British Columbia's supply managed sectors.
17. At pages 2 to 5 of the report, the BCFIRB expressed the following policy principles:

Registration

- a. **Boards should have plans to register all producers regardless of size or type of license.**
- b. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.**

Designation of Specialty Product Markets

- c. **Designation of specialty product/market classes is to be based on clearly defined criteria.**
- d. **Certification is to be required as a condition of licensing for all designated specialty product classes. Certifiers are to be qualified by a skilled and reputable third party accreditation agency.**

.....

Production and Marketing Quota

- g. **Specialty classes of quota are to be designated. Each class of quota should be managed separately from other classes of quota. Quota administration policies should be the similar for all classes with exceptions only when necessary.**
-
- j. Boards are to provide annually renewable small lot permit programs authorizing production levels greater than the personal use exemption level and less than the quota incentives provided through the new entrant programs.
- k. The number of small lot permits issued should be unrestricted, subject to eligibility criteria which should include only one permit issued per property and that direct marketing by the permittee be encouraged.
- l. Permit programs for new innovations are to be provided, potentially through the small lot permit system.

18. At page 7, the BCFIRB referred to the recommendations contained in the report entitled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System*, which was commissioned by the Ministry in the fall of 2004:

- 1. **All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.**
- 2. **Specialty product definitions should reflect substantive farm level differentiation, 3rd party certification, and identity preservation through to the consumer.**
- 3. *Specialty production and marketing should be managed using a distinct and restricted class of quota.*

19. At pages 11 to 12, the BCFIRB noted:

The incentive to produce without quota is large because regulated prices provide attractive production margins. ...In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that “a chicken is a chicken” regardless of type. On this basis, the Boards are responsible to regulate all classes of product, including specialty.

20. Commencing at page 19, the BCFIRB issued the following policy directions:

5.1. Registration

With respect to Registration, the following policy directions are given:

1. **All producers, regardless of size or class of production, should be registered with the Boards.**
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

5.2. Specialty Definitions

With respect to Definitions for specialty products, the following policy directions are given:

1. **Designated specialty products are to respect the principles of farm-based differentiation with identity preservation, marketing and representation of the unique farm-based attributes to the end consumer. The designated product should also require extra effort to produce and market and it should receive market price premiums. The designated product will almost certainly require extra effort to produce and market and, as a result, should receive market price premiums.**

2. **Boards' Orders are to include procedures for the pursuit of new and innovative product/market segments in the future.**
3. **Boards should recognize local direct marketing efforts of individual producers and the efforts of individuals producing rare heritage breeds within the specialty production and marketing framework.**
4. Specialty Markets Advisory Committees should be charged with recommending amendments, if considered necessary, to the criteria for designation of future specialty classes.
5. Humane treatment of livestock is to be required of all producers, and SPCA certification should be viewed as a positive step to further demonstrate humane production practices. However, SPCA certification should not, by itself, be sufficient for designation as a specialty class for quota purposes.

5.3. Certification

With respect to Certification, the following policy directions are given:

1. **Designated specialty products are to be third party certified as such along the entire supply chain from farm to end consumer.**
2. **Approved certification standards are to be based on legitimate third party standards that meet provincial, national or international standards or approval. Where standards outside the AFCQA are adopted, FIRB prior approval will be required before those standards are recognized.**

5.10. Exemptions

With respect to Exemptions, the following policy directions and principles are given:

1. **There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.**
2. **Exemptions are to be very clear regarding which specific Orders from which an individual or group of individuals is being exempted.**
3. The Boards' positions that existing "personal use" exemption levels are adequate are acceptable subject to the introduction of small lot permit programs by Boards.
4. Boards are directed to develop and introduce small lot permit programs which provide for, among other things, product/market innovation, local/regional small lot agriculture, heritage breeds, and farmer-direct marketing initiatives.

5. Small lot permit levels should be set higher than the “personal use” exemption levels and lower than the quota incentives proposed through new entrant programs.
6. Government, FIRB and industry should work together to press for changes in the National Allocation systems so that personal use exemption and small lot permit amounts are not counted as part of the provincial allocation.

5.17. Food Safety & Biosecurity

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.**
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

21. With respect to the hatching egg industry in particular, the BCFIRB said:

The Commission’s belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

The Commission may wish to provide, if it has not already done so, a specific exemption for Asian specialty breeders. This exemption could take the form of an annually renewable license to produce Asian specialty breeders in any amount subject only to certain requirements such as humane production practices and marketing only for Asian specialty production.

.....

The Commission’s position that a specialty program is not required for broiler hatching eggs at this time is accepted subject to the condition that, should designated specialty chicken produced in accordance with the B.C. Chicken Marketing Board regulations require specialty chicks, the Commission should develop and introduce a specialty program.

[Appendix “A” – BCFIRB Supervisory Report
(September 1, 2005)]

Early Consultations with Silkie and Taiwanese Producers

22. Commencing in February, 2010, the Commission began to engage in consultations with producers of Silkie and Taiwanese broiler hatching eggs. Those early consultations were intended to serve primarily as a fact finding

mission, and to assess whether it would be reasonable or even possible to recognize that production as a specialty class. Nevertheless it is interesting to note that concerns with respect to a “race for base” surfaced at the first opportunity. In a letter dated February 25, 2010, Coastline Chicks wrote to the Commission as follows:

It is our opinion that consideration should be given to setting a past date for recognition of the above suppliers who have a historical record of specialty meat chick sales as set out by the regulations of the BCCMB.

.

If, as suggested, there have already been several requests or proposals to the BCBHEC by parties interested in placing “specialty” breeder flocks as a result of the potential review and subsequent imposition of regulations, the consequence of allowing any of these proposals to take place prior to completion of the review could be disastrous in an already flooded market.

The refusal by the BCBHEC to put an immediate moratorium on all proposals by new producers would jeopardize the financial investment and future business of the current recognized stakeholders. It could also have major legal implications that would put the BCBHEC in the position of allowing the production of eggs in excess of current requirements, which would then result in eggs being sold as table or breaker eggs.

[Appendix “B” - Letter dated February 25, 2010 from
Coastline Chicks]

23. A follow-up meeting was held on March 12, 2010 to solicit stakeholders’ views concerning the extent of regulatory intervention that should be applicable to “specialty” broiler breeders. All those who expressed a view on the subject were unanimous that regulation should extend only to premise identification and the application of biosecurity and food safety rules. Concern was again expressed that any ambiguity on this point could have a disruptive affect as persons might be inclined to place flocks in the expectation that doing so might result in an entitlement to an allocation of quota. Those who expressed a view on the matter were unanimous in requesting that the Commission provide a clear statement that regulation will extend only to premise identification and the application of biosecurity and food safety rules.
24. At the follow-up meeting, there was some discussion concerning the definition of a “specialty” broiler breeder. The consensus was that a “specialty” broiler breeder is one that is placed for the purpose of satisfying the unique “Asian” chicken

market. It was noted that approximately 80% of that market is chicken that is marketed to consumers with head and feet on. Silkies, Taiwanese and Leong Kong were identified as breeds typically placed for that purpose.

[Appendix “C” – Handwritten Notes dated March 12, 2010]

25. On or about March 17, 2010, the Commission circulated a memo to stakeholders which advised that there was no plan to allocate quota to those who are producing (or who may produce) “specialty” broiler breeders. Consistent with the views of meeting participants, the Commission also advised that it intended to introduce rules for “specialty” broiler breeders only in so far as is necessary to achieve the objectives of premise identification, biosecurity and food safety. Finally, the Commission indicated that it would be formulating a definition for “specialty” broiler breeders so as to clearly distinguish such breeders from mainstream breeders (which include those from Hubbard ISA, Cobb Vantress, or Ross) and that it would be preparing draft rules intended to implement premise identification, biosecurity and food safety requirements.

[Appendix “D” – Memo dated March 17, 2010]

The Polderside Inquiries

26. Shortly after the Commission’s follow-up meeting with stakeholders, the Commission received a series of informal inquiries from Virginia Jacobsen, principal of Polderside Farms Inc. (“Polderside”), which culminated in a formal request for special regulatory accommodation to produce broiler hatching eggs from a flock of 12,000 “RedBro” broiler breeders. This formal application was dated July 26, 2010. These inquiries, and the regulatory decisions made by the Commission as a result thereof, are significant here because they brought into focus the Commission’s views about whether it is sensible (or even possible) to define “specialty” production with sufficient precision to avoid undermining the orderly marketing system.
27. For present purposes, key aspects of the Commission’s decision of August 12, 2010 are reproduced below.

For the reasons that follow, the Commission is satisfied that some – but not all – aspects of Polderside’s plan are sufficiently unique to warrant special regulatory accommodation.

Innovation and diversification are to be encouraged. In some cases (and we believe this is one such case) innovation carries additional risks. Without some form of regulatory accommodation, risk-taking by innovators may be discouraged.

However, there are limits to the circumstances that may warrant regulatory accommodation. It is essential that special regulatory accommodation be granted only where the circumstances are truly unique. In other words, there must be a cogent, justifiable basis for the grant of special regulatory accommodation. The integrity of the supply management system as a whole must be maintained.

.

Despite the absence of any real detail in the “business plan”, the Commission believes that it has a sufficient understanding of Polderside’s intentions to come to a decision. Fundamentally, Polderside is a licensed, quota-holding chicken grower that wishes to self-market chicken grown under its quota and produced from an atypical strain of broiler breeder. Apparently, licensed British Columbia hatcheries have not yet recognized a demand for this strain of production, or if they are alive to a demand, they are apparently unable or unwilling to place flocks of this strain with existing producers. Consequently, Polderside wishes to place its own flock of broiler breeders for the principal purpose of satisfying its own demand (as a chicken grower) for this strain of production.

The Commission believes that an “ad hoc” decision (applicable only to Polderside) is to be avoided. In essence, an ad hoc decision really reflects a failure to identify with any precision the aspects that are truly unique and deserving of special regulatory accommodation. It is preferable to express the decision as a policy. If any other person were to present the same set of unique attributes they too should be able to access the same form of regulatory accommodation. Accordingly, the Commission’s decision is expressed in the “Small-Lot Innovative Self-Marketer Program” attached hereto.

.

The hatching egg sector is unique among supply managed commodities. Unlike every other supply managed commodity, hatching egg producers do not produce an “end product”. Hatching egg producers only produce an “input” to the chicken industry, namely: broiler hatching eggs. In effect, this means that hatching egg producers have only one customer – the hatchery. There is no demand for hatching eggs from wholesalers, retailers or consumers. There is only demand for hatching eggs from hatcheries.

In this environment, the potential for “niche markets” or “specialty production” is substantially more limited than it is in other commodities.

Furthermore, the hatching egg producer’s “customer” (the hatchery) is largely able to control the nature of the product that it receives. Broiler breeder flocks are ordered and arranged by hatcheries. If a hatchery desires a particular strain of broiler breeder, it may simply order and arrange for a flock of that strain to be placed with a registered producer.

Consequently, it is important to understand that Polderside’s inability to source atypical day-old chicks for its grower operations arises from an apparent inability or unwillingness of hatcheries to satisfy that demand (if there is one); not because registered producers are unable or unwilling to produce from that (or any other) strain of broiler breeder. Clearly, if any hatchery believed that there was an unsatisfied demand for day-old “RedBro” chicks, it could arrange for the placement of RedBro broiler breeders with registered producers. Hatcheries might do so in the future. But the fact remains that no British Columbia hatchery is responding to that demand (if there is one) at this time – which is the principle reason for Polderside’s request to place its own flock of RedBro broiler breeders.

.....

Polderside has placed a great deal of emphasis on the unique attributes of the broiler breeder strain that it wishes to place. There can be no doubt that every strain of broiler breeder has unique attributes, and it is obvious that Ms. Jacobsen is a particularly energetic proponent of the RedBro strain.

However, the Commission does not regard the strain of broiler breeder, in and of itself, as being a determinative factor when considering whether Polderside is deserving of some special regulatory accommodation. As already noted, licensed British Columbia hatcheries could require any registered producer to place any strain of broiler breeder if the hatchery perceived a demand for the resulting day-old chick offspring. What is unique about Polderside’s plan is not the strain of broiler breeder; but the fact that Polderside intends to self-market chicken grown under its own quota from day-old chicks that are apparently unavailable from any British Columbia hatchery. As a self-marketer of chicken, Polderside has ipso facto established a demand for day-old chicks originating from RedBro broiler breeders. If these day-old chicks

were currently available from licensed British Columbia hatcheries, there would be no sound basis for granting any special regulatory accommodations. However, it appears that licensed British Columbia hatcheries are either unable or unwilling to place flocks of this strain with existing producers, at least at the present time.

Polderside perceives significant demand for chicken derived from RedBro stock. Its perceptions about this demand may be accurate, or they may be entirely misplaced. In either case, Polderside has expressed a willingness to pursue this market, and to accept the risks associated with being a market innovator.

The Commission believes that innovation should be encouraged. The apparent inability or unwillingness of established hatcheries and processors to pursue this market (if one exists) might mean that day-old RedBro chicks are simply not available in British Columbia. The Commission does not think that this state of affairs should effectively preclude Polderside from pursuing its plans.

On the other hand, the Commission does not think that production of hatching eggs for purposes other than to satisfy its own requirements as a self-marketer of chicken (under the quota allotted to it by the Chicken Board) can properly be regarded as unique in any respect, or deserving of any special regulatory accommodation. For example, Polderside has applied to the Commission for special accommodations as would permit it to produce from a flock of 12,000 broiler breeders. As already noted, 240 broiler breeders would suffice for Polderside's own purposes as a self-marketer if adequate provision were made for the placement of broiler flocks once every week. If broiler flocks are to be placed once every eight week period (as is customary in the chicken industry) a flock of 2,000 broiler breeders would be more than sufficient for Polderside's purposes. With a breeder flock of this size, approximately 35,000 broiler hatching eggs would be produced in every eight week period that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board. On an annual basis, a broiler breeder flock of this size would generate approximately 227,500 broiler hatching eggs that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board.

To reiterate, a broiler breeder flock of 12,000 birds (two-6000 bird flocks growing within 6-7 months of each other) would produce approximately 1,560,000 broiler hatching eggs. On an annual basis, a broiler breeder flock of this size would generate approximately

1,365,000 broiler hatching eggs that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board.

Polderside's plan is to market production from broiler breeders that is surplus to its own requirements (as a chicken grower) to: (a) "Western Hatchery"; (b) "Pollon Group"; (c) "a commercial grower in Washington state"; (d) "one or two small quota holders that will grow the RedBro for the Asian markets"; and, possibly (e) "small permit holders and organic growers wanting chicken to pasture". However, the Commission does not think there is anything sufficiently unique about these aspects of Polderside's plan to warrant any special regulatory accommodation:

1. If any hatchery wanted to purchase broiler hatching eggs produced from an atypical strain of broiler breeder, it could simply place atypical broiler breeder flocks with registered producers. As already noted, this feature of the hatching egg industry is unique. Essentially, the hatching egg producer's customer (i.e., the hatchery) directly controls the nature of the product that it receives. There is no need for a mechanism to encourage producers to produce a "specialty product" to satisfy the demands of the hatchery/customer – as the hatchery already directly controls the nature of the product. Consequently, it is not necessary to provide an allocation of quota to Polderside (or to any other producer) in order to satisfy the demands of hatcheries for atypical production. To put the matter another way, if Western Hatchery could purchase 1,365,000 broiler hatching eggs produced annually by Polderside under a special regulatory accommodation granted by the Commission, Western Hatchery would naturally reduce its placements with existing producers. In the Commission's view, there could be no justifiable basis for such a reduction, as Western Hatchery is already able to place any strain of broiler breeder with the producers currently shipping to it.
2. The sale of day-old chicks by Polderside to third parties is fundamentally a "hatchery" business – not a "hatching egg producer" business. The Commission does not think there can be any justification for a regulatory accommodation to a hatching egg producer in order to facilitate its efforts to engage in what is fundamentally a hatchery business (the sale of day-old chicks). This aspect of Polderside's plan could be satisfied within the existing marketing system by simply entering the industry as a licensed hatchery. In that

event, Polderside could place flocks (of any strain) with producers and sell day-old chicks to third parties. Seen in this light, it becomes clear that the Commission could not grant a regulatory accommodation to Polderside (in the form of an allocation of quota) to facilitate its desire to engage in the sale of day-old chicks to third parties, without also granting similar regulatory accommodations to existing hatcheries (who already engage in the sale of day-old chicks to third parties). Furthermore, the Commission is of the view that it simply could not grant a regulatory accommodation to facilitate the marketing of custom-hatched day-old chicks to third parties without destabilizing the supply management system. If such an accommodation were granted, there could be no principled basis to deny similar regulatory accommodations to other prospective producers who would simply place broiler breeders (or “atypical” broiler breeders) to be custom-hatched as day-old chicks for marketing to third parties. In the Commission’s view, the ever-present incentive to produce without the cost burden of quota would result in a natural shift away from the sale of hatching eggs to hatcheries under quota, towards the custom-hatching of eggs under regulatory accommodations granted by the Commission. In such an environment, it is not difficult to see that the supply of hatching eggs and day-old chicks could no longer be effectively regulated. This would inevitably lead to the kind of market instability that the supply management system is designed to avoid.

In the Commission’s view, emphasis must be placed on the “self-marketing of chicken grown under quota” aspect of Polderside’s plan. It is this facet, above all others, that indicates that some special regulatory accommodation is both warranted and capable of being granted without destabilizing the supply management system. In the circumstances present here, there is both a demand and an apparent lack of availability. Because day-old RedBro chicks are apparently unavailable through domestic hatcheries, Polderside’s own demand as a self-marketer of chicken should not be thwarted. For the reasons expressed above, this is to be contrasted with production of broiler hatching eggs simply for the purpose of selling broiler hatching eggs to hatcheries, or the sale of day-old chicks to third parties.

To be sure, a special regulatory accommodation for Polderside (so that it can satisfy its requirements as a self-marketer of chicken grown under its own quota) will also ultimately displace existing “conventional” production. However, the Commission believes that

such displacement is justifiable in the interests of encouraging innovation. Conversely, the Commission does not think that displacement of conventional production is justifiable if it is unconnected with Polderside's own requirements as a self-marketer of chicken. For that reason, the Small-Lot Innovative Self-Marketer Program contemplates that all broiler hatching eggs surplus to the participant's requirements as a self-marketer of chicken grown under its own quota must go to the breaker to minimize unnecessary disruption of existing production.

Finally, it is necessary to comment on the nature and scope of regulatory accommodations, where they are warranted. The Commission is of the view that special regulatory accommodations should be limited in scope. Such accommodations are intended as a "leg-up" to encourage innovation and diversification – not as a permanent exemption of unlimited scope and duration. Large, commercial operations are most frequently associated with "conventional" production. Small, innovative "start-ups" are typically those that require a "leg-up". As is evident in the attached "Small-Lot Innovative Self-Marketer Program", the Commission does not contemplate an accommodation of unlimited scope. The Commission is of the view that it is appropriate to provide an accommodation sufficient to satisfy the applicant's self-marketing requirements according to the amount of grower quota issued to the applicant by the British Columbia Chicken Marketing Board, up to a maximum of 5,000 broiler breeder pullets. It may be noted that the maximum allotment permissible under the Commission's New Entrant Program is also 5,000 broiler breeders. If requirements go beyond that level, one can operate on the reasonable assumption that a sufficient "leg-up" had been given.

[Appendix "E" – Polderside Decision dated August 11, 2010]

28. It is clear that the production of broiler hatching eggs from Silkie and Taiwanese broiler breeder flocks does not satisfy the BCFIRB's requirements for "specialty" differentiation. In its September 1, 2005 report, the BCFIRB clearly indicated that "[c]ertification is to be required as a condition of licensing for all designated specialty product classes."
29. Perhaps more importantly, the BCFIRB report stated that "[d]esignation of specialty product/market classes is to be based on clearly defined criteria". Having regard to the unique nature of the broiler hatching egg industry (in which the hatcheries specify the strain of broiler breeder that is to be placed), the Commission's review of the Polderside application caused a shift in thinking regarding whether it was sensible (or even possible) to define "specialty"

production with sufficient precision to avoid undermining the orderly marketing system. In other words, the Commission came to the view that it would not be sound marketing policy to afford special regulatory accommodation to producers of Silkie and Taiwanese broiler hatching eggs *on the basis of the strain of broiler breeder*. If the Commission did so, on what rational basis could any person be denied a special regulatory accommodation? Unless, as the BCFIRB stated, the designation of a special class was based “on clearly defined criteria”, would any producer be free from the obligation to produce under quota if they started producing under a strain of broiler breeder that, in the final analysis, is not fundamentally distinguishable from any other strain of broiler breeder? Could the hatcheries themselves effectively dismantle the supply management system by directing producers to produce under some strain of broiler breeder? All these questions caused the Commission to think its failure to enforce against producers of Silkie and Taiwanese broiler hatching eggs had the effect of creating a vulnerability to the continued integrity of the system. After all, if these producers were officially recognized as being able to produce without license and quota, why should any producer be obliged to produce under license and quota? That question could only be answered if it was possible to distinguish producers of Silkie and Taiwanese broiler hatching eggs “on clearly defined criteria”.

30. From afar, concepts extrapolated from other commodities may have superficial appeal. Indeed, several of the applicant herein referred to their “specialty” broiler hatching egg production. It may be that some applicants (who either operate as vertically integrated producer / hatcheries, or as producers who custom hatch eggs and sell the resulting chicks to chicken growers) are more inclined to see themselves as sellers of specialty chicks to the chicken industry, rather than as broiler hatching egg producers. However, no specialty chicken has ever required a specialty broiler hatching egg, because broiler hatching egg producers have always placed whatever strain the hatchery / chick seller has desired. This is the usual mode of operation, and no broiler hatching egg producer has ever required a special accommodation to satisfy the strain desired by the hatchery, because the strain has always been selected and provided by the hatchery.
31. Most importantly, there can be no recognition of a “special” class unless it can be legislatively defined with sufficient precision so that it is perfectly clear what falls into the class, and what does not. Also, the definition of a “special” class of product must serve some legitimate policy objective. In other commodities, specialty products are recognized, at least in part, to make room for innovation so that market demands can be met and developed. In the hatching egg industry, hatcheries are the “market”, and they exercise control over the strain of breeder placed for the broiler hatching egg producer.
32. Of course, there may be rare occasions where there is a demand for a broiler chick that cannot be satisfied due to the inability or unwillingness of any hatchery to supply the appropriate strain of broiler breeder. In these circumstances special

accommodation can already be sought under the Commission's *Small-Lot Innovative Self-Marketer Program*.

33. In practical terms, it is the Commission's considered view that there is no policy case to be made for recognition of a "specialty" broiler hatching egg because the "market" for broiler hatching eggs (i.e., the "hatcheries") has always selected the strain that is to be produced by broiler hatching egg producers. More importantly, it is the Commission's considered view that there is no sensible way to legislatively define a special class with sufficient precision so that it is perfectly clear what falls into the class, and what does not. Though the "Silkie" bird (and the market it serves) is perhaps the most unique, it becomes considerably more challenging to articulate why a Taiwanese broiler breeder should be treated differently from a RedBro broiler breeder, or from a Hubbard ISA broiler breeder, or a Cobb Vantress broiler breeder, or Ross broiler breeder. Any lack of precision in the definition would have the potential to destabilize the entire regulatory underpinnings of regulated marketing. It might be tempting to think that the class could be defined in relation to the market that is served, but again it is essential to keep in mind that the Commission regulates the hatching egg industry. The "market" served by producers is the hatchery, not the consumer of chicken. Specialty chicken is a matter within the exclusive purview of the BCCMB.
34. Thus, the outcome of the "Polderside matter" caused a shift in thinking for the Commission. Specifically, the Commission became inclined to think that producers of broiler hatching eggs from Silkie and Taiwanese broiler breeders would need to be regularized for all purposes. In other words, if these persons were exempted from the requirement to hold license and quota, others would surely ask for similar exemptions, and it is not clear how such requests could be rationally distinguished. Thus, granting an exemption would sanction a loophole of indefinite scope that would have the potential to destabilize the supply management system. In addition, the "Polderside matter" caused the Commission to think that what was "special" (and rationally definable) for producers of broiler hatching eggs from Silkie and Taiwanese broiler breeders was the producers themselves (who had historically produced without the requisite license and quota and without the Commission taking enforcement proceedings against them); not the strain of broiler breeder.

Development of the "Regularization" Program

35. On May 2, 2011, informed by its analysis of the Polderside matter, the Commission circulated a memo to stakeholders in the following terms:

It is well known throughout the industry that there are certain persons producing from Silkie and "Asian" broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact, regulated in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, "Asian", or any other strain, of broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. The Commission is tentatively of the view that all persons should be made to comply with all of the Commission's orders, irrespective of whether they produce from Silkie, "Asian" or any other strain of broiler breeders. Certainly, any failure on the part of the Commission to enforce cannot be regarded as creating a de facto exemption.

Subject to consultation, the Commission envisions a process whereby these producers will be "regularized". To preclude any possibility of a "race for quota", the Commission expects that regularization will be available only to those "non-compliant producers who have been in production for the period January 1, 2010 to December 31, 2010, and who are currently engaged in production. Upon receipt of corroborated production data for the one-year period preceding January 11 2011, the Commission envisions that it may issue "Regularized Producer Certificates" and issue quota to holders of such certificates that is subject to the 10/10/10 and LIFO rules, provided that there is sufficient corroborative production data to justify an allocation based on that past production. Future flock placements would be as directed by the Commission in consultation with hatcheries. Any persons operating unlicensed hatcheries must obtain a licence from the Commission. The Commission would not take steps to enforce against holders of "Regularized Producer Certificates" for instances of past non-compliance. Conversely, the Commission expects that it will initiate enforcement proceedings where there is non-compliance by persons who do not hold a "Regularized Producer Certificate".

These concepts are tentative, and are set out here only to provide interested persons with some insight into the Commission's preliminary views. All these matters are subject to consultation with Industry.

In due course, the Commission will be holding a meeting to discuss this issue. All hatching egg producers who are currently non-

compliant, and all hatcheries receiving production from such persons, are invited and encouraged to attend to express their views on the proposed regularization process.

[Appendix “F” – Memo dated May 2, 2011]

36. It is useful to pause here to comment on the key features¹ of the Commission’s tentative “regularization” concept:
- (a) The approach is expressly premised on the idea that producers of broiler hatching eggs from Silkie and Taiwanese broiler breeders are prohibited under the Commission’s orders from engaging in the marketing of regulated product without license and quota.
 - (b) The approach reflects the Commission’s view, for all the reasons expressed in the Polderside decision and herein, that an effective regulatory response could not be premised on the idea that it is *the strain* of broiler breeder that is “special”. Instead, the Commission chose to proceed on the basis that it is *the producers* themselves who warrant a special regulatory response, having regard to their historical non-compliance. The alternative approach would require a defensible definition of a “specialty” breeder that is sufficiently precise that it would not undermine the integrity of the regulated marketing system (i.e., exactly how is a Taiwanese broiler breeder sufficiently distinct from a RedBro broiler breeder, or a Hubbard ISA broiler breeder, or a Cobb Vantress broiler breeder, or Ross broiler breeder?). Furthermore, an alternative approach would require a rational connection to a legitimate policy objective. In the hatching egg industry, the “customer” actually determines and places the strain of broiler breeder to be used by the hatching egg producer. In other commodities, recognition of specialty production may be a means of encouraging innovation to satisfy or create market demand. These considerations do not apply where the customer provides the strain of broiler breeder that is required. To the extent that there may be a market for broiler chicks that cannot be sourced because hatcheries are unable or unwilling to place the appropriate strain of broiler breeder with a hatching egg producer, accommodations are already available under the Commission’s “Small-Lot Innovative Self-Marketer Program”.

¹ Again, the Commission is acutely aware that almost every element of its analysis is inconsistent with the rulings made by the BCFIRB in the course of recent interlocutory proceedings. For example, it is almost impossible to imagine a scenario in which an enforcement action would not be met with the response that the application of section 37 to the applicants (i.e. the obligation to hold quota and license) is an “oversimplification”. In addition, to the extent that current levels of production are to be sanctioned as a production right (even pending appeal or further decision) there is no effective way to protect against a “race for quota” and its destabilizing effect (both with respect to other stakeholders, and the industry in general).

- (c) The approach is based on the idea that a failure to enforce cannot be regarded as creating a *de facto* exemption.
 - (d) The approach places critical importance on avoiding a “race for quota”. For that reason, the Commission very clearly indicated that quota would be “based on ...past production”. The Commission felt very strongly that it would not be fair to stakeholders to allot quota based on production that might be placed in the future, specifically as a means of maximizing entitlement to quota. Furthermore, the Commission recognized that any hint that entitlement might be based on activities after the announcement of a possible allotment of quota would be disruptive to the stability of the market in general.
 - (e) The Commission clearly indicated that it would not take steps to enforce against holders of “Regularized Producer Certificates” for instances of past non-compliance, but that it would initiate enforcement proceedings where there is non-compliance by persons who do not hold a “Regularized Producer Certificate”. Here too, the Commission’s approach is predicated on the idea that it is at least *possible* to enforce on the strength of the prohibition under the Commission’s orders against engaging in the marketing of regulated product without license and quota [s. 37].
37. Throughout the balance of 2011 and through 2012, the Commission continued to engage in internal deliberations and external consultations with stakeholders with a view to developing the detailed legislative structure for the proposed *Program*. To facilitate the consultations with stakeholders, the Commission engaged Mr. Peter Whitlock as an independent consultant to liaise with stakeholders and gather information. As part of that information-gathering process, Mr. Whitlock asked stakeholders to submit preliminary applications so that the Commission could obtain basic information about each prospective applicant’s production activities and the amount of production right tentatively sought.

[Appendix “G” – BCBHEC Minutes dated September 1, 2011]

[Appendix “H” – BCBHEC Minutes dated October 31, 2011]

[Appendix “I” – BCBHEC Minutes dated November 9, 2011]

[Appendix “J” – Handwritten Notes dated December 14, 2011]

[Appendix “K” – BCBHEC Minutes dated January 12, 2012]

[Appendix “L” – BCBHEC Minutes dated February 9, 2012]

[Appendix “M” – BCBHEC Minutes dated March 30, 2012]

[Appendix “N” – BCBHEC Minutes dated April 27, 2012]

[Appendix “O” – Handwritten Notes dated May 25, 2012]

[Appendix “P” – Handwritten Notes dated May 30, 2012]

[Appendix “Q” – Handwritten Notes dated June 12, 2012]

[Appendix “R” – BCBHEC Minutes dated June 21, 2012]

[Appendix “S” – Letter from Trevor Allen dated September 8, 2012]

[Appendix “T” – BCBHEC Minutes dated September 17, 2012]

38. Obviously, these consultations had with stakeholders informed the Commission's deliberations and helped to define the detailed terms of the program that would ultimately be developed. For example, the consultations revealed a desire on the part of the applicants to be free from the constraints of an official flock schedule. Specifically, stakeholders indicated that it is their practice to maintain breeders for both hatching egg production and for grandparent stock. Further, flocks are kept in production for varying periods of time, and often for much longer than is typically permitted under the Commission's Official Flock Schedule. For all these reasons, the Commission began to favour a chick-based quota over a broiler breeder-based quota.

The Draft Regulatory Amendments

39. By Memo dated November 8, 2012, the Commission circulated to all potential applicants, as well as to the BCCMB and the BCHEPA, a "redlined" version of the Consolidated Order showing all the changes that the Commission proposed to make to bring into force the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*. Initial feedback was provided by Casey Van Ginkel and Trevor Allen by letter dated November 21, 2012.

[Appendix "U" – Memo to Industry Stakeholders dated November 8, 2012]

[Appendix "V" – Redlined Consolidated Order]

[Appendix "W" – Letter from Casey Van Ginkel and Trevor Allen to BCBHEC dated November 21, 2012]

[Appendix "X" – BCBHEC Minutes dated February 21, 2013]

40. On March 11, 2013, the Commission further circulated a detailed Notice to Producers which attached a draft of the proposed Amending Order. Stakeholders were invited to submit their comments with respect to the proposed Amending Order within 30 days.

[Appendix "Y" – Notice to Producers with attached draft Amending Order dated March 11, 2013]

41. The Commission received submissions from Bill Friesen and Lillian Fehr, as well as from Ms. Hunter on behalf of Skye Hi Farms Inc. and V3 Farms. Ultimately, the Commission decided that it would not be fair or transparent to engage in one-on-one discussions with interested parties to the exclusion of others and asked the stakeholders who had made submissions whether they could be shared with other stakeholders. Submissions were subsequently received from Bradner Farms.

[Appendix "Z" – Questions from Bill Friesen and Lillian Fehr dated March 21, 2013]

[Appendix “AA” – Letter from Claire Hunter to BCBHEC dated April 3, 2013]

[Appendix “BB” – BCBHEC Minutes dated April 25, 2013]

[Appendix “CC” – Letter from Bill Friesen and Lillian Fehr dated April 25, 2013]

[Appendix “DD” – Letter from BCBHEC to Bill Friesen and Lillian Fehr dated May 1, 2013]

[Appendix “EE” – Letter from BCBHEC to Claire Hunter dated May 1, 2013]

[Appendix “FF” – Email from Bill Friesen and Lillian Fehr to BCBHEC dated May 6, 2013]

[Appendix “GG” – Letter from Claire Hunter to BCBHEC dated May 13, 2013]

[Appendix “HH” – BCBHEC Minutes dated May 16, 2013]

[Appendix “II” – Letter from Bradner Farms to BCBHEC dated May 28, 2013]

[Appendix “JJ” – BCBHEC Minutes dated June 21, 2013]

[Appendix “KK” – Letter from Robert Hrabinsky to Claire Hunter dated July 3, 2013]

[Appendix “LL” – Letter from Robert Hrabinsky to Claire Hunter dated July 8, 2013]

[Appendix “MM” – Letter from Claire Hunter to Robert Hrabinsky dated July 19, 2013]

[Appendix “NN” – BCBHEC Minutes dated August 22, 2013]

[Appendix “OO” – BCBHEC Minutes dated September 11, 2013]

42. After considering the feedback from stakeholders, the Commission made further modifications to its proposed Amending Order and communicated these to the stakeholders by way of a detailed Notice to Producers with attached Feedback and Draft Amending Order.

[Appendix “PP” – Notice to Producers with attached Feedback and Draft Amending Order dated September 13, 2013]

43. Counsel for Skye Hi Farms Inc. and V3 Farms requested a “redlined” version of the draft Amending Order identifying the further modifications that had been made by the Commission, and this request was accommodated.

[Appendix “QQ” – Letter from Claire Hunter to BCBHEC dated September 25, 2013]

[Appendix “RR” – Email from BCBHEC to stakeholders dated November 1, 2013]

Referral to PPAC

44. On November 15, 2013, the Commission referred the draft Amending Order to PPAC in order to solicit its non-binding recommendations (if any) with respect to the proposed Amending Order.

[Appendix “SS” – Letter from BCBHEC to PPAC dated November 15, 2013]

[Appendix “TT” – PPAC Reference Materials dated November 26, 2013]

[Appendix “UU” – PPAC Minutes dated November 26, 2013]

Passage of Amending Order 11

45. On November 28, 2013, the Commission passed Amending Order 11 and developed the associated application package. Passage of the Amending Order was communicated by newsletter dated December 20, 2013.

[Appendix “VV” – Amending Order 11]

[Appendix “WW” – Application Form]

[Appendix “XX” – Newsletter dated December 20, 2013]

The First Appeals

46. On January 6, 2014, Skye Hi Farms Inc. and V3 Farms initiated an appeal from Amending Order 11. The Appellants applied for a stay of the Amending Order, which was subsequently denied by the BCFIRB.

[Appendix “YY” – Notice of Appeal dated January 6, 2014]

[Appendix “ZZ” – BCFIRB Decision on Stay Application dated March 6, 2014]

[Appendix “AAA” – Corrigendum to BCFIRB Decision on Stay Application dated March 12, 2014]

Implementation of the Program

Receipt of Applications

47. In January and February, 2014, interested parties began to submit their applications in accordance with the terms of the newly enacted *Program*. To accommodate the applicants, the Commission extended the deadline for applications, first to February 1, 2014, and later to February 13, 2014.

[Appendix “BBB” – Application of Unger’s Chick Sales Ltd. dated January 27, 2014]

[Appendix “CCC” – Application of Bradner Farms dated January 28, 2014]

[Appendix “DDD” – Memo to Producers dated January 30, 2014]

[Appendix “EEE” – Application of Skye Hi Farms Inc. dated February 5, 2014]

[Appendix “FFF” – Application of V3 Farms dated February 5, 2014]

[Appendix “GGG” – Memo to Producers dated February 7, 2014]

[Appendix “HHH” – Application of W. Friesen Enterprises dated February 7, 2014]

48. On March 12, 2014, Bradner Farms submitted additional materials to supplement those already provided with its application.

[Appendix “III” – Materials Supplementary to the Application of Bradner Farms]

49. By letter dated April 4, 2014, counsel for Skye Hi Farms Inc. and V3 Farms submitted materials in support of their request for an extraordinary allocation of quota.

[Appendix “JJJ” – Particulars of Exceptional Circumstances dated April 4, 2014]

50. By letter dated April 4, 2014, counsel for Skye Hi Farms Inc. and V3 Farms submitted materials in support of their request for a decision concerning “virtual hatchery” status.

[Appendix “KKK” – Request for Decision Re Virtual Hatchery dated April 4, 2014]

[Appendix “LLL” – Book of Documents Re Virtual Hatchery]

Preliminary Review by the Commission (and “Virtual Hatchery” Decision)

51. By May 26, 2014, the Commission had conducted its preliminary review of each of the applications. On that date, the Commission wrote to each of the applicants to identify those areas in which it was tentatively satisfied, and to identify other areas in which further particulars and / or documentation was required. In addition, the Commission issued its decision and reasons therefor in relation to the request made by Skye Hi Farms Inc. and V3 Farms concerning a “virtual hatchery”.

[Appendix “MMM” – Letter from BCBHEC to Bradner Farms dated May 26, 2014]

[Appendix “NNN” – Letter from BCBHEC to Skye Hi Farms Inc. dated May 26, 2014]

[Appendix "OOO" – Letter from BCBHEC to Unger's Chick Sales Ltd. dated May 26, 2014]

[Appendix "PPP" – Letter from BCBHEC to V3 Farms dated May 26, 2014]

[Appendix "QQQ" – Letter from BCBHEC to W. Friesen Enterprises dated May 26, 2014]

52. In response to the Commission's request for further particulars and / or documentation, applicants submitted additional materials.

[Appendix "RRR" – Response from Unger's Chick Sales Ltd. dated May 28, 2014]

[Appendix "SSS" – Notarized pages of Application of Unger's Chick Sales Ltd. dated May 29, 2014]

[Appendix "TTT" – Response from Skye Hi Farms Inc. and V3 Farms dated June 3, 2014]

[Appendix "UUU" – Response from Bradner Farms dated June 19, 2014]

[Appendix "VVV" – Response from W. Friesen Enterprises dated July 2, 2014]

53. In addition, the Commission made inquiries of the BCCMB concerning the best "proof" available of chick placements, so that it could evaluate the veracity if the information submitted.

[Appendix "WWW" – Letter from BCBHEC to BCCMB dated June 20, 2014]

[Appendix "XXX" – Letter from BCCMB to BCBHEC dated June 24, 2014]

Questions Concerning the Form of Corroborative Evidence

54. The response received by the BCCMB raised serious questions about the veracity of the various forms of data submitted by the applicants. Consequently, by Memo dated July 21, 2014, the Commission invited the applicants to submit a brief written statement of position concerning the form of corroborative evidence that would provide the most reliable basis to determine the number of chicks placed.

[Appendix "YYY" – Letter to Applicants dated July 21, 2014]

55. In accordance with the Commission's request, applicants submitted their positions concerning the most reliable form of corroborative evidence.

[Appendix "ZZZ" – Supplementary Response from W. Friesen Enterprises dated July 27, 2014]

[Appendix “AAAA” – Supplementary Response from Bradner Farms dated July 30, 2014]

[Appendix “BBBB” – Supplementary Response from Unger’s Chick Sales Ltd. dated July 31, 2014]

[Appendix “CCCC” – Supplementary Response from Skye Hi Farms Inc. and V3 Farms dated July 31, 2014]

56. The Commission met with the Applicants on August 19, 2014 to discuss the corroborative evidence issue. An Executive Summary of that meeting was prepared, circulated among the applicants, and considered by the Commission at its August 21, 2014 meeting. At that meeting, the Commission decided that it would assess each application having regard to the following corroborative evidence: (1) hatchery invoices from the hatchery to the hatching egg producer; and (2) invoices from the hatching egg producer to the purchaser (except in the case of W. Friesen Enterprises, and only then with respect to chicks grown by them). In the case of W. Friesen Enterprises, the volume of chicks produced for their own growing operation would be compared against their BCCMB quota expressed in kilograms.

[Appendix “DDDD” – Agenda dated August 19, 2014]

[Appendix “EEEE” – Executive Summary dated September 2, 2014]

Final Data Submitted by Applicants

57. As a result of the decisions made by the Commission concerning the form of corroborative evidence, applicants submitted their final supplementary material as they thought appropriate.

[Appendix “FFFF” – Email from Fehr to BCBHEC dated September 6, 2014]

[Appendix “GGGG” – W. Friesen Supplementary Materials dated September 11, 2014]

[Appendix “WWWW” – Email from Lillian Fehr dated January 28, 2015]

Independent Accountant’s Report

58. To facilitate its review of the records submitted by the applicants, the Commission retained an independent accountant to review those records for accuracy. On February 19, 2015, the independent accountant submitted his report.

[Appendix “XXXX” – Accountant Recalculation Report dated February 19, 2015]

The Allocation Decisions

General

59. The Commission met on February 27, 2015 to review the report submitted by the independent accountant; to complete its deliberations; and to make its allocation decisions under the terms of the *Program*. On that date, the Commission issued its allocation decisions to applicants as follows:

The Commission is writing to all of the applicants under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program to communicate its decisions with respect to the allotment of Regularized Producer Chick Quota and the issuance of temporary, revocable, non-transferrable export permit.

Processing the applications was time-consuming, and was delayed in part by the recent outbreak of AI. Given the delay, the Commission has decided that it would be prudent to communicate its decisions in an abbreviated manner with detailed written reasons to follow.

Based in part on a review of the applications conducted by an independent accounting firm, the Commission makes the following decisions:

1. Bradner Farms will be allotted 4,420,644 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. This is 81,395 units more than Bradner Farms requested. Their application total was reported as 8,678,498, and the difference between the independent accounting firm's tally and the application was 162,789 chick placements;
2. Unger's Chick Sales (1974) Ltd. will be allotted 1,151,090 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. Unger's Chick Sales (1974) Ltd. will also be issued 1,482,497 units of temporary, revocable, non-transferrable export permit. This amounts to 0.5 Silkie or Taiwanese Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. Both numbers are very slightly higher than what was sought by Unger's Chick Sales (1974) Ltd. as they apparently under-reported by 4,110 chick placements and 69,453 chick exports.
3. W. Friesen Enterprises will be allotted 439,062 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. Note that this allocation reflects an acceptance of the "special circumstances" application, but

only to the extent that their numbers included chick placements from the Foon Kan Farm leased by the applicant. The Commission has decided that it will not grant an extraordinary allocation to the applicant based on any of the other grounds advanced by it as “extraordinary circumstances”.

4. V3 Farms will be allotted 66,488 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. The Commission is prepared to receive and consider further submissions from V3 Farms and the other applicants concerning a supplemental allotment to V3 Farms as may be necessary to ensure a “minimum efficient farm size”. The Commission has decided that it will not grant an extraordinary allocation to the applicant based on any of the other grounds advanced by it as “extraordinary circumstances”.
5. Skye Hi Farms Inc. will be allotted 48,072 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. The Commission will reject the “special circumstances” application. The Commission is prepared to receive and consider further submissions from Skye Hi Farms Inc. and the other applicants concerning a supplemental allotment to Skye Hi Farms Inc. as may be necessary to ensure a “minimum efficient farm size”. The Commission has decided that it will not grant an extraordinary allocation to the applicant based on any of the other grounds advanced by it as “extraordinary circumstances”.
6. W. Friesen Enterprises asked that its allocation be made retroactively and retrospectively so that it is not subject to the weight of the surrender assessment rules. The Commission will defer making any decision on the application of the surrender assessment rules at this time. If

and when W. Friesen Enterprises applies to transfer some or all of its quota, it may make an application for dispensation of the usual surrender assessment rules at that time.

7. The Commission will consult with the successful applicants and will consider increasing or decreasing the allocations on a pro rata basis to best reflect the current, aggregate market conditions if it is thought necessary or desirable to do so.

Thank you for your attention to this matter.

[Appendix “YYYY” – Allocation Decisions dated February 27, 2015]

Requests for Extraordinary Allocations

60. Paragraph 3(1)(j) of the *Program* permits applicants to submit “particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2)”.
61. In their application materials, Skye Hi Farms Inc., V3 Farms Inc. and W. Friesen Enterprises each applied for extraordinary allotments under paragraph 3(1)(j). The application materials are extensive, and the arguments made by these applicants will not be reproduced here. However, it may suffice to say that each of these applicants sought an extraordinary allocation on the ground (among others) that any allocation that is premised on historical production between January 1, 2009 and December 31, 2012 would not be sufficient to accommodate present and future “commitments” for the supply of chicks.
62. As expressed in its Allocation Decisions dated February 27, 2015, the Commission decided that it will not grant extraordinary allocations on the ground that such extraordinary allocations are required to accommodate present or future “commitments” for the supply of chicks.
63. While these applicants cannot be faulted for advancing this position as an “extraordinary circumstances” claim, the Commission does not regard this position as one that *properly* falls within the scope of paragraph 3(1)(j). It is perfectly clear that it is a cornerstone principle of the *Program* that allotments will be made on the basis of historical production. To that extent, the Commission regards the position advanced by these applicants as a direct challenge to the *Program* itself, which is a policy matter that is better addressed in the first appeals initiated by Skye Hi Farms Inc. and V3 Farms.
64. Regardless of whether this “extraordinary circumstances” claim is best regarded as a direct policy challenge to the *Program*, the Commission is firmly of the view that a program of this nature must be based on an examination of historical

production in order to avoid promoting a “race for base” and the obvious potential for disruption to orderly marketing, not to mention unfairness among the applicants themselves.

65. It is to be noted that concerns with respect to a “race for base” surfaced at the first opportunity. In a letter dated February 25, 2010, Coastline Chicks wrote to the Commission as follows:

It is our opinion that consideration should be given to setting a past date for recognition of the above suppliers who have a historical record of specialty meat chick sales as set out by the regulations of the BCCMB.

.

If, as suggested, there have already been several requests or proposals to the BCBHEC by parties interested in placing “specialty” breeder flocks as a result of the potential review and subsequent imposition of regulations, the consequence of allowing any of these proposals to take place prior to completion of the review could be disastrous in an already flooded market.

The refusal by the BCBHEC to put an immediate moratorium on all proposals by new producers would jeopardize the financial investment and future business of the current recognized stakeholders. It could also have major legal implications that would put the BCBHEC in the position of allowing the production of eggs in excess of current requirements, which would then result in eggs being sold as table or breaker eggs.

[Appendix “B” - Letter dated February 25, 2010 from Coastline Chicks]

66. The first hint that there may be a possible allocation of quota creates a powerful incentive for persons to expand their production capacity in the hope that doing so might maximize their ultimate entitlement to quota. Any signal by the regulator that such behavior might be rewarded has the potential to cause significant disruption to orderly marketing. Furthermore, it would not be rational for the regulator to effectively punish applicants who conduct themselves in accordance with the expectation that allotments will be based on historical production, while rewarding those who increase production capacity in the hope that allotments will be made having regard to present or future “commitments”, despite the express terms of the *Program*. Indeed, if the *Program* were to make allocations based on the “commitments” that could be secured by applicants, it would only be fair to do so if all were provided with the same opportunity. It is not difficult to see that this would result in a chaotic war among the applicants which would most likely result

in the largest applicant (in this case, Bradner Farms) undercutting its competitors so as to secure the greatest market share (and therefore, the greatest allocation).

67. For these reasons, the Commission was unwilling to make extraordinary allotments premised on present or future “commitments” that were not grounded in historical marketings.
68. Having said that, the Commission knew that allocations grounded in historical production might result in the aggregate allocations either being excessive or deficient having regard to current market conditions. It is for that reason that the Commission decided to “consult with the successful applicants and ...consider increasing or decreasing the allocations on a pro rata basis to best reflect the current, aggregate market conditions if it is thought necessary or desirable to do so.”

The Second Appeals

69. On March 4, 2015, Skye Hi Farms Inc. and V3 Farms initiated appeals from the Commission’s Allocation Decisions. The Appellants applied for a stay of the Allocation Decision, which was subsequently granted by the BCFIRB.

[Appendix “ZZZZ” – Notice of Appeal dated March 4, 2015 (Skye Hi Farms Inc.)]

[Appendix “AAAAA” – Notice of Appeal dated March 4, 2015 (V3 Farms)]

[Appendix “BBBBB” – BCFIRB’s Decision on Stay Application with Corrigendum dated March 18, 2014]

Minimum Farm Size and Pro Rata Increase or Decrease

70. In their application materials, both Skye Hi Farms Inc. and V3 Farms sought extraordinary allocations on the grounds that their historical production was less than that which would be necessary to establish a minimally viable farm.
71. In its Allocation Decisions dated February 27, 2015, the Commission indicated that it was prepared to receive and consider further submissions from the applicants concerning a the “minimum efficient farm size”.
72. By Memo dated March 4, 2015, the Commission wrote to each successful applicant as follows:

On Friday February 27, 2015 you received a letter detailing the Commission’s decisions with respect to the allotment of Regularized Producer Chick Quota and the issuance of temporary, revocable, non-transferrable export permit.

In that decision, the Commission stated that it is prepared to receive and consider further submissions from V3 Farms and Skye Hi Farms Inc., together with submissions from the other applicants, concerning the “minimum efficient farm size”.

The Commission also indicated that it would consult with the successful applicants and will consider increasing or decreasing the allocations on a pro rata basis to best reflect the current, aggregate market conditions if it is thought necessary or desirable to do so.

The purpose of this communication is to ask each of you to provide any submissions that you may have concerning the “minimum efficient farm size” and the prospect of increasing or decreasing the allocations on a pro rata basis to best reflect the current, aggregate market conditions.

These submissions must be made in writing and must be received by the Commission not later than March 19, 2015. It would be useful if your submissions touched on the following points:

1. What is the minimum efficient farm size for the production of Silkie or Taiwanese Chicks expressed in chicks per year?
2. What are the details of the economic analysis to support your submission concerning minimum efficient farm size?
3. If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?
4. Are the allocation made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis t best reflect the current, aggregate market conditions? If so, what percentage increase or decrease is recommended?

These submissions will be circulated among the applicants, and applicants will be given until April 3, 2015 to reply in writing to any submission made by any other applicant.

[Appendix “CCCCC” – Memo to Applicants dated March 4, 2015]

73. In response, the Commission received submissions from Bradner Farms, W. Friesen Enterprises, Skye Hi Farms Inc. and V3 Farms. These submissions were circulated and the applicants were invited to provide any addition reply by April 3, 2015.

[Appendix “DDDDD” – Letter from Bradner Farms dated March 18, 2015]

[Appendix “EEEEEE” – Letter from W. Friesen Enterprises dated March 18, 2015]

[Appendix “FFFFFF” – Letter from Hunter dated March 19, 2015]

[Appendix “GGGGG” – Memo to Applicants dated March 24, 2015]

74. On April 2, 2015, Skye Hi Farms Inc. and V3 Farms submitted a reply submission which focused primarily on the submission of Bradner Farms.

[Appendix “HHHHH” – Letter from Hunter dated April 2, 2015]

75. On April 3, 2015, W. Friesen Enterprises submitted its reply submission. For the most part, W. Friesen Enterprises adopted the positions advanced by Skye Hi Farms Inc. and V3 Farms. .

[Appendix “IIIII” – W. Friesen Enterprises dated April 3, 2015]

76. With respect to the possibility of a pro rata increase or decrease to the allocations, Bradner Farms submitted that a pro rata increase is warranted to reflect an aggregate increase in demand for production from 3,062,678 chicks at the end of 2012 to about 3,800,000 chicks at present. This represents a percentage increase of about 24%.

77. W. Friesen argued that there should be no increase or decrease to the allocations until “all producers have obtained sufficient quota and allocation to meet their current commitments.” Similarly, Skye Hi Farms Inc. and V3 Farms rejected the notion of any pro rata increase or decrease to allocations based on historical market share and reiterated their case that allocations should be based on “production volumes for the most recent twelve month period or nearest applicable period.” In their reply submission, Skye Hi Farms Inc. and V3 Farms argued that “[a]llocations ought to be made to those producers who are producing at a level below the 10,000 breeder hen minimum farm size first in order to top up their quota to reach minimum farm size.”

78. For reasons already expressed, the Commission is unwilling to allocate quota based on market maneuverings taking place after December 31, 2012. Without

repeating its earlier analysis, the Commission is very firmly of the view that it should not sanction any conduct that could be considered a “race for base” given the very disruptive implications for orderly marketing. The only applicant that provided any analysis at all having regard to aggregate production volumes was Bradner Farms. The Commission has recognized that its allocation decisions, based as they are on historical productions volumes, may either be excessive or inadequate having regard to current conditions. The Commission has no reason to doubt the analysis of Bradner Farms, Consequently, the Commission has decided to increase the allocations (excluding temporary, revocable, non-transferrable export permit) by 24% effective the date hereof. Unless and until all broiler breeder quota is expressed as chick quota, the Commission intends to liaise with the applicants as necessary to ensure that pro rata increases or decreases to the allocations are made to suitably reflect market conditions from time to time.

79. On the topic of “minimum farm size”, the submissions of the applicants were far less helpful. Bradner Farms argued that Skye Hi Farms Inc. and V3 Farms should be regarded as a single entity for the purpose of considering the minimum farm size, and otherwise argued against allotting a minimum amount of allocation to reflect a minimum viable farm.
80. The Commission does not agree with this analysis. While Skye Hi Farms Inc. and V3 Farms profess to work together for the purpose of custom hatching their production and marketing the resulting chicks, there is no reason to consider them as anything other than separate broiler hatching egg producers. Furthermore, the Commission is satisfied Skye Hi Farms Inc. and V3 Farms were legitimately in production at the time of the announcement of the *Program* (which is to say that the Commission is satisfied that neither got into the business for the purpose of receiving an allocation). This at least admits of the possibility that their production between 2009 and 2012 could be regarded as a start-up phase in which their production volumes fell below whatever might be the level necessary to sustain economically viable production.
81. However, no applicant provided any truly meaningful data concerning their own economic viability. At a minimum, the Commission expected that applicants would provide “details of the economic analysis to support [their] submission concerning minimum efficient farm size.” Instead, Skye Hi Farms Inc., V3 Farms and W. Friesen chose to extrapolate inferences concerning what a minimum farm size should be from existing Commission rules. Skye Hi Farms Inc. and V3 Farms even went so far as to argue that the Commission should “retain a consultant who is qualified to conduct a more detailed economic analysis in order to determine minimum efficient farm size.” The Commission regards this as an unacceptable failure on the part of those applicants to provide the economic analysis (based, presumably, on their own financial records) as would show the extent to which they are viable (or not). It was incumbent on the applicants to

provide this information, and there is no “consultant” who would be in any better position than the Commission in the absence of that information.

82. Furthermore, the Commission does not think that any useful conclusions can be drawn by extrapolating inferences concerning what a minimum farm size should be from existing Commission rules.
83. Paragraph 8(2)(d) of the Consolidated Order provides as follows:
 - (d) “No Producer shall be permitted to hold an allotment of Placement Quota of less than 12,000 broiler breeder pullets per Quota Period, except where the Producer is:
 - (i) an entrant under the New Producer Program Rules set out in Schedule 1; or
 - (ii) an entrant under the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8
84. It is important to note that 12,000 broiler breeders per Quota Period is equivalent to 6,000 broiler breeders per year. Furthermore, paragraph 8(2)(d) of the Consolidated Order has nothing at all to do with the minimum efficient farm size. The minimum farm size specified in that paragraph was only imposed, at the request of the hatcheries, to accommodate their pick-ups of broiler hatching eggs from the farm.
85. On the other hand, the New Producer Program Rules provides for an allotment of 5,000 broiler breeder pullets per quota period (i.e., 2,500 broiler breeder pullets per year). Similarly, the Small-Lot Innovative Self-Marketer Program provides for the allotment of up to a maximum of 5,000 broiler breeder pullets per quota period (i.e., 2,500 broiler breeder pullets per year). Nevertheless, these provisions cannot logically be applied to Regularized Producers.
86. The *Program* provides the Regularized Producers with substantially more freedom and flexibility than is available to other producers. For example, Regularized Producers are not obliged to place flocks in accordance with the Commission’s Official Flock Schedule (which, as noted, was the principle reason for adopting a chick-based quota). Regularized Producers are not subject to a Commission-ordered kill age and they may keep their flocks in production for as long as they like. Regularized Producers are not obliged to market broiler hatching eggs having a minimum weight of 52 grams. For all these reasons and more, no useful comparisons can be drawn from other rules. What was required was real financial data from the parties who were asserting a right to a minimum

allotment. No such data was provided and the Commission has decided that there is no basis to alter the allocations to provide for a minimum allotment.

87. The Commission is at least comforted by the fact that Skye Hi Farms Inc. and V3 Farms have been in operation now for several years. Prior to December 31, 2012, there was nothing that ought to have acted as an impediment to their ability to reach a viable scale of operation. Unlike other producers, the applicants did not feel bound to acquire quota on the marketplace before expanding their production (though it is the Commission's view that they were so bound). That being so, it seem more likely than not that Skye Hi Farms Inc. and V3 Farms had obtained a viable scale (having regard to their market share) by the end of 2012.
88. These are the decisions and reasons of the Commission as "first instance regulator". A person aggrieved by this decision may appeal the decision to the BCFIRB.

DATED AT ABBOTSFORD, BRITISH COLUMBIA, THIS ___ DAY OF _____.

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

Casey Langbroek - Chair

**British Columbia
Farm Industry Review Board**

1 Executive Summary

1. The British Columbia Farm Industry Review Board (FIRB) has been undertaking a review of specialty products and markets in the province's supply managed sectors.
2. This document outlines a series of FIRB directions and principles to be implemented by the five supply managed Marketing Boards in B.C. (Boards) concerning proposed Specialty and New Entrant Programs.

1.1. Context

3. B.C.'s supply management system is designed and operated to manage and control the production and marketing of several commodities, including the five that are the subject of this review: eggs, chickens, turkeys, hatching eggs and milk. Each of these five commodities is managed as part of an integrated national supply management plan.
4. In 2003, FIRB initiated a review of specialty production and marketing across all Boards.
5. In July 2004, the then Ministry of Agriculture, Food and Fisheries, now the Ministry of Agriculture and Lands (MAL) released a *Regulated Marketing Economic Policy*. Among other things, it recognized that one role of the regulated marketing system is to ensure that British Columbian industries serve the developing demand for organic food and other specialty products. (See Schedule 1)
6. In August 2004, FIRB suspended its review and provided the Boards and Government with its proposed principles for specialty programs within B.C. supply management system. (See Schedule 2)
7. In January 2005, the Minister of Agriculture (Minister) released a recommended policy framework for managing specialty agri-foods within the regulated marketing system based on a report titled *Recommendations for Managing Specialty Agri-Food Products in B.C.'s Supply Managed System* dated December 2004.
8. In January 2005, FIRB resumed its review of specialty and new entrant programs, and subsequently issued several process letters to govern the review.
9. In April and May 2005, following a required consultation process with interested stakeholders, specialty and new entrant program proposals were submitted by all Boards to FIRB.
10. Following submission of the Boards' proposals, a further round of comments was received from interested persons, closing in June 2005.

1.2. Assessment Principles

11. The Boards' specialty and new entrant submissions have been assessed on the basis of the following policy principles, which are more fully discussed at Section 5.

Registration

- a. Boards should have plans to register all producers regardless of size or type of license.
- b. All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.

Designation of Specialty Product Markets

- c. Designation of specialty product/market classes is to be based on clearly defined criteria.
- d. Certification is to be required as a condition of licensing for all designated specialty product classes. Certifiers are to be qualified by a skilled and reputable third party accreditation agency.

Allocation

- e. Provincial allocation received from the National Agencies is to be allocated among the various quota classes based on the market needs for each class.
- f. Allocation to producers within each quota class is to be pro rata to quota holding within that class.

Production and Marketing Quota

- g. Specialty classes of quota are to be designated. Each class of quota should be managed separately from other classes of quota. Quota administration policies should be the similar for all classes with exceptions only when necessary.
- h. Marketing a product other than the designated product type intended to be marketed by a specific class of quota should be authorized only in extraordinary situations and then only on a temporary basis.
- i. Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced, except in the case of small lot programs (see j below). Production volumes recognized for quota should be equal to the permittee's

production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004.

- j. Boards are to provide annually renewable small lot permit programs authorizing production levels greater than the personal use exemption level and less than the quota incentives provided through the new entrant programs.
- k. The number of small lot permits issued should be unrestricted, subject to eligibility criteria which should include only one permit issued per property and that direct marketing by the permittee be encouraged.
- l. Permit programs for new innovations are to be provided, potentially through the small lot permit system.
- m. Personal use exemption levels should remain unchanged.
- n. Government, FIRB and the Boards should jointly take all necessary steps at the national level to ensure that the provincial allocation is not unfairly impacted by personal use and small lot production.

Quota Transfer

- o. All quota, including specialty quota, is to be transferable subject to the terms and conditions set out below.
- p. Quota should be transferable within, and not between, classes of quota.
- q. New quotas issued through permit conversion, specialty program establishment and new entrant programs are to be subject to license conditions, including a declining transfer assessment schedule.
- r. The assessment schedule should provide for 100% of the issued quota to be automatically retracted (i.e., non-transferable) in the first year following issuance if the producer ceases production or purports to engage in commercial quota transfer. Subsequently, the amount retracted declines by 10% per annum until it reaches a minimum assessment of 10% in year 10. Transferability, therefore, commences in year two, at 10% of the quota allocation, and increases by 10% per year, until it reaches 90%.
- s. The starting point for the declining transfer assessment schedule should be the date on which the new quota was issued, or in the case of permit conversion, a date reasonably established between the Board and the permittee.

- t. A condition of quota transfer should be that the last quota issued is the first quota to be authorized for transfer by the Board.
- u. Exceptions to transfer assessment for all classes of quota are to be permitted only for transfers among direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.

Levies

- v. Specialty production levies assessed by the Boards should be service-based. Boards should examine assessing levies separately for different quota classes based on the costs incurred to manage each class of quota.
- w. Subject to the discretion of the Boards, all levies and fees charged for permits or temporary quota up to December 31, 2004 should be due and payable.
- x. Levies and fees assessed specifically for permits or temporary quota use, not including regular administration and marketing fees charged by a Board on all regular quota production, are to be terminated from January 1, 2005 forward.

New Entrants

- y. New entrant programs are to be established. They are to provide a mechanism to determine the number of new entrants on a periodic basis.
- z. New entrant programs should provide priority to new producers seeking and/or willing to produce a designated specialty product or serve a regional market when there are identified specialty and/or regional market needs.
- aa. Eligibility criteria for new entrant status should include, at a minimum: residency, not having previously owned supply management quota, and a commitment by the applicant to be actively involved in the farming operation.
- bb. New entrant waiting lists are to be established where they do not currently exist. Existing new entrant waiting lists are to be renewed in accordance with the eligibility criteria established by each Board.
- cc. New entrant quota incentives should be funded by transfer assessments and growth in provincial allocation.
- dd. To retain any quota received as a new issuance by a Board, whether specialty or mainstream, the licensed producer is to be actively engaged in the production and marketing of the farm product.

Representation

- ee. Specialty Markets Advisory Committees are to be established with clear terms of reference. The Committees should be comprised of an equal number of specialty producers and specialty processors or graders, a Board member, and an independent Chair appointed by the Board.

1.3. Program Monitoring

- 12. FIRB is directing Boards to prepare draft Orders applying the principles summarized above.
- 13. Government, FIRB and the Boards should develop a clear understanding among themselves concerning compliance and enforcement of Board Orders regarding specialty product/market programs.
- 14. FIRB intends to closely monitor the individual Board specialty and new entrant programs on an ongoing basis.
- 15. The FIRB plans to formally review the specialty and new entrant program performance after three years.

2 Specialty Review Process

2.1. Ministry Economic Policy Statement

MAL's July 2004 economic policy statement recognizes that, among other things, the regulated marketing systems are to accommodate specialty production and developing demand from specialty markets. This policy statement is provided at Schedule 1.

2.2. FIRB Principles for Specialty Production and Marketing

On August 25, 2004, FIRB issued its document *Principles for Considerations in Support of Specialty Production and Marketing in the British Columbia Supply Managed System*. These principles included:

1. Clarity in specialty product and market definition;
2. A requirement to operate within the National Allocation provided to the province;
3. Provision of access to non-quota holders;
4. Provision of exemptions where appropriate;
5. Service-based costs to producers;
6. Clear rules for permit and/or quota transfer;
7. Fair, transparent, effective, and accountable administration and governance, which must operate in a flexible and timely fashion;
8. Accountability, including compliance with terms and conditions by both the Board and specialty producers;
9. Allocation to specialty production such that existing demand is met and development of new markets is promoted; and,
10. Potential expansion of specialty production through assessments on quota transfers.

A copy of FIRB's Principles is provided at Schedule 2. Along with the release of these Principles, FIRB temporarily suspended its supervisory review pending the outcome of the Government's review regarding the appropriate policy solutions to key specialty production issues.

2.3. Policy Framework

A report titled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System* was commissioned by the Ministry in the fall of 2004. This report recommended a policy framework for accommodating specialty production and marketing in B.C.'s supply management system and included summary recommendations that:¹

¹ Report prepared for the then Minister of Agriculture, Food and Fisheries, December 2004. This report was released to the industry in January 2005 and is available on FIRB website at www.firb.gov.bc.ca/.

1. *All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.*
2. *Specialty product definitions should reflect substantive farm level differentiation, 3rd party certification, and identity preservation through to the consumer.*
3. *Specialty production and marketing should be managed using a distinct and restricted class of quota.*
4. *Allocation procedures should ensure fair treatment of both specialty and mainstream producers, and Board allocation decisions should require prior approval of FIRB.*
5. *Small producer exemption levels should be increased.*
6. *A phased permit system should be developed to foster innovation and to progressively advance specialty producers to become holders of specialty quota.*
7. *Levies should reflect services provided. There should be no extra fees for specialty permits or quota, such as “quota lease fees”, that are not service-based.*
8. *Specialty producers should have Board representation, and Specialty Product Advisory Committees should be established.*
9. *New entrant programs should be revised to include clear financial commitment and permit issuance criteria, and incentive amounts issued should be non-transferable.*
10. *New entrant programs should be funded, in part, by a minimum 5% assessment on all transfers of quota.*

2.4. Provincial Board Supervisory Process

On January 7, 2005, FIRB issued a letter to the Minister and the Boards advising that the December 2004 report “*not only complement[s] the [FIRB policy principles], but also offer[s] very useful advice and information in support of implementing those principles. Accordingly, the Provincial board has decided to resume its own supervisory review in order to commence such an implementation process in consultation with the Ministry, the commodity boards and with industry stakeholders.*”

2.5. Minister’s Announcement

Also in January 2005, the Minister of Agriculture met with representatives of the five supply management Boards. The Minister endorsed the policy framework and encouraged the industry, under the supervision of FIRB, to prepare plans that would better accommodate pursuit of specialty markets by specialty producers from within the supply management system.

2.6. Development of Board Plans

FIRB supervisory review process directed the Boards to submit draft specialty and new entrant plans by March 31, 2005. Development of these plans was to include consultation with specialty and mainstream producers. Draft plans were submitted on or about March 31st by all five Boards.

On April 18, 2005, FIRB provided each Board with specific questions concerning its proposal, and directed the Boards to revise their plans for submission by May 18, 2005. FIRB also notified each Board that their revised plans were to be copied to industry stakeholders and posted on their websites, with notice that further input on the plans should be provided in writing directly to FIRB by May 31, 2005.

All Boards submitted revised plans and/or additional material to FIRB by May 18, 2005, following which FIRB received written submissions pertaining to those proposals from industry stakeholders.

2.7. Assessment of Board Submissions

A synopsis and description of each Board's submission was prepared in late May, and these descriptions were reviewed and affirmed by each Board as being accurate. These descriptions were subsequently distributed among all parties involved with the specialty review. FIRB also provided opportunity for all interested parties to make written submissions concerning the Board's proposals by early June 2005.

FIRB reviewed the Boards' submissions and the input received from interested parties. FIRB then prepared this report articulating the policy principles, with rationale, that FIRB intended to apply in assessing Boards' plans, and which would in due course be required to be legislated into force by way of Board Orders.

This document is designed to reflect the review of the Board plans, stakeholder submissions and FIRB's deliberations respecting these issues. The present document articulates FIRB's directions regarding policy issues at the heart of this review, with rationale. Appendices "A" to "E" are focused on addressing the specific proposals put forward by each Board as part of the review as follows:

- Appendix 1 – Broiler Hatching Eggs
- Appendix 2 – Chicken
- Appendix 3 – Eggs
- Appendix 4 – Milk
- Appendix 5 – Turkey

3 Definitions

This section provides definitions for selected terms used in this report.

Certain industry-specific terms are at times used differently by different people. This section provides definitions for selected terms used in this report.

Act	The <i>Natural Products Marketing (BC) Act</i> (the <i>Act</i>) unless otherwise stated.
Allocation	The volume of a regulated product authorized to be produced within a defined period of time. Provincial allocation is used to refer to B.C.'s authorized volume issued by a National Agency. Producer allocation is used to refer to the authorized volume issued by a Board to a licensed producer through quota or certain types of permits.
Boards	The five supply managed marketing Boards in B.C.: B.C. Broiler Hatching Egg Commission (BCBHEC), the B.C. Chicken Marketing Board (BCCMB), the B.C. Egg Marketing Board (CEEMB), B.C. Milk Marketing Board (BCMMB), and the B.C. Turkey Marketing Board (BCTMB).
Commodity	A product with broadly recognized and accepted standards where the supplier or brand is irrelevant to the buyer.
Direct marketing	Farm operations that market, sell, and distribute on their own account to retail consumers and local retailers. The farm product may be processed on-farm or custom processed for the producer.
First receiver	The processor or grader who purchases from a producer. Processor often includes grader in this report. While the BCMMB serves as the "first receiver" for milk pooling purposes, the Board also regulates milk processors and the supply and the price to these processors.
Identity preservation	The situation where the identity of a farm product is preserved intact through processing and distribution and is represented as a food product with this farm-based pedigree.
Incentive quota	New quota that is issued by the Board to a producer. In general, incentive quota is restricted to quota issued to new entrants. New quota issued to established quota holders is typically not considered to be incentive quota by the Boards.

Permits	Temporary permits issued by a Board to authorize production for certain volume of a regulated product. Permits may or may not be renewable, and are not transferable from producer to producer.
Quota	The license to produce a defined amount of a regulated product within a certain period of time. Quota licenses are annually renewable and may, in accordance with various terms and conditions, be transferred from producer to producer upon approval of the Board. Can be considered synonymously with producer allocation in some situations.
Quota accounts	When a supply allotment, or provincial allocation, is received from an Agency, this authorized supply level is intended to be distributed among the different quota classes. The amount determined for each quota class can be considered to be placed into a quota account from which this authorized supply is then intended to be distributed among producers in accordance with Board policies and procedures for the management of that quota class.

4 The Context for Change

4.1. The System

Provincial marketing boards operate together and with federal agencies as a national coalition controlling the production and marketing of milk, eggs, hatching eggs, chicken or turkey. In each product group, this coalition is legally constituted through the Federal Agricultural Product Marketing and Farm Product Agencies Acts, Federal-Provincial Agreements and Provincial Acts. These Acts and Agreements give Boards considerable power to intervene in the market, including the authority to determine volumes that will be produced and the minimum prices that will be paid by first receivers for the regulated products. The rationale for supply management has been repeated several times, in court decisions and various other sources, and will not be reviewed here.

Boards are delegated authorities through their Schemes (Cabinet regulations) to license producers and processors, establish market volumes required, distribute production (quota), establish production and marketing rules, establish minimum prices, and set levies. In general, market volumes are established nationally, quota is administered provincially, pricing is based on cost of production and the price[s] established in other provinces, and levies are set at levels required to fund the Board and its share of National Agency costs.

Some producers have circumvented the system and produced one or more of the five regulated products without a quota license or permit issued by the Boards. Others have found creative ways to stretch quota through manipulation of production in a manner that maximizes quota production but might not necessarily reflect market needs.² The incentive to produce without quota is large because regulated prices provide attractive production margins. In the case of mid-to large-size commercial producers, attempts to circumvent the rules have been rooted in pursuit of margin without incurring the cost of purchasing quota rights. In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase

² A case in point is milk whereby quota is issued as kilograms of butterfat yet producers ship milk. If they can increase the volume of milk shipped without increasing the butterfat content, and still retain a suitable mix of other components upon which they are paid, producers can maximize the revenue from a unit of quota.

expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that “a chicken is a chicken” regardless of type. On this basis, the Boards are responsible to regulate all classes of product, including specialty.

The legal authority to regulate all classes of product imposes a corresponding responsibility to ensure that this authority is exercised in a sound and principled manner. Consideration must be given as to whether or to what extent exemptions should be granted, and where regulation exists, whether and how the policy rules should accommodate the realities of the particular class of product being regulated. At the highest level, these are the key questions at issue in this review, and these are the issues this review is seeking to address in a fair and balanced manner.

4.2. The Border

The Canadian supply management system operates behind border controls which include minimum access levels and import tariffs. Minimum access levels are 5.0 - 7.5% of the domestic market³ and are managed by import quotas. Import tariffs for volumes above the minimum access level are very high.⁴ The impact of these two Canadian market access restrictions is that supply management can establish and control domestic volumes and domestic prices sheltered from international competition. As the current World Trade Organization (WTO) round unfolds, possible changes to import tariffs and minimum access levels have the potential to materially impact the determination of supply and the setting of price in Canada.

Some Boards (chicken, turkey) have developed programs that permit production of the regulated farm product for export, while others (milk) have had export programs challenged at the WTO. Nevertheless, the volume of export has remained relatively small in relation to the overall production in the country.

4.3. Producing for B.C.'s Market

Supply management establishes a share of the national market for each province. However, the provinces are not, today, equal in terms of their production advantages. For instance, a major production input is feed grain which some provinces produce very competitively while others must source their requirements from other regions or countries. Nor do all provinces have similar

³ Minimum access levels for broiler hatching eggs are quite a bit higher at 20%.

⁴ Import tariffs were established at the WTO in 1993 at 284% for milk, 289% for cheese, 351% for butter, 237% for skim milk powder, 280% for chicken, 182% for turkey, 192% for eggs, 280% for chicks and 280% for hatching eggs. Tariffs were required to decline by a minimum of 15% over the course of the agreement. Current WTO negotiations include Canada's trading partners seeking substantial improvements in access to the Canadian market for poultry and milk products.

consumer markets, yet each province has a market share in each product based on a combination of historic share and population. These provincial market shares are jealously guarded.

B.C.'s advantages lie in the areas of a diverse consumer market, an active small lot agriculture sector, and the most temperate climate and diverse microclimates and bioregions in the country. B.C. does not have a feed input cost advantage. As a result, when viewed from the perspective of commodities versus specialties, B.C. is disadvantaged in the area of commodity production, yet may have advantages in the area of specialty production.

Differentiation is a strategy chosen by many businesses. Since the founding of supply management programs in Canada in the 1960s, integration of markets, access to information, global supply chain logistics, containerized transportation systems, and ease of global travel have dramatically changed markets. Producers and processors in B.C. may have opportunities to compete by differentiating and developing products to meet the needs of niche markets.

Consumers have a wide range of needs and preferences. Specialty markets for supply-managed products have developed swiftly in B.C. over the past decade. Organic products have been the most visible and readily recognizable specialty product category. Other specialty products have also established market demand (e.g. Asian chicken, free range and free run eggs) or are seeking to develop market demand (e.g. SPCA). In many cases producers of these products have operated outside the supply management system or have been authorized to produce under a variety of temporary permits.

4.4. The Parties' Interests

Specialty and new entrant policies must be assessed in light of the established market relationships in the supply management system. These include:

1. **Producer to Producer.** Producers compete with one another for production share. Production shares are managed by quota systems. Competition for production share has resulted in quota being transferred among producers for cash.
2. **Producer to Processor.** Producers sell to processors. Processors have buyer power by virtue of there being few processors, many producers and a perishable farm product. Processors are obligated to pay producers a minimum price established by the provincial Board.
3. **Producer to Board.** In classic supply management theory, producers band together as Boards to improve their selling power to processors. They are authorized to work together and coordinate the production and marketing of their farm product by the *Act*. Individual production shares are determined by a quota system established and managed by the Board.

4. Board to Producer. Boards are governed by members/directors elected from all registered producers and/or appointed by Government. Boards approve Orders, authorized under a Scheme and the *Act*, which set down the rules for production and marketing of the regulated product. Boards hire staff to administer the Orders.
5. Board to Processor. Boards manage the marketing of the regulated farm product from producers to processors. They establish the terms and conditions, including but not limited to price, by which processors purchase from producers.
6. Board to Agency. Boards coordinate their behaviour nationally through the National Agencies. The Federal Acts and the Federal-Provincial Agreements authorize the coordination of production and marketing in interprovincial and export trade. At the Agency level Boards compete with one another themselves for provincial market shares.
7. Processor to Producer. Processing plants purchase from producers operating in accordance with Board Orders. In many cases, processors are also affiliated with the supply of key inputs such as chicks, poults, pullets and feed to producers.
8. Processor to Board. Processors are regulated by Boards for the minimum terms and conditions of sale and purchase of the farm product. In most respects their individual proportions of the production allocated are determined by Board policies and procedures.
9. Processor to Processor. Processors compete for supply as buyers from producers. Several processing plants in different provinces may operate jointly through common ownership or established contractual relationships. Processors are free to sell interprovincially and in export trade, and increasingly serve buyers seeking supply for more than one province.

The degree to which each Board is involved and intervenes in product sale and purchase transactions for the farm product varies. There are three general ways in which a Board may be involved:

1. The Board sets only the minimum price and leaves the terms and conditions for scheduling production, quality criteria and delivery for direct negotiation between the producer and the processor. Payments are made by the processor directly to the producer, with levies deducted by the processor and remitted to the Board. This occurs in B.C. with turkeys.
2. The Board, in addition to setting the minimum price, may direct product from a producer to a processor and schedule production to assure processor supply. Payments are made directly to the producer by the processor. Variations of this occur in B.C. with chickens, hatching eggs and, to some extent, eggs.
3. The Board not only sets price, but also works directly with processors on behalf of all producers by directing and transporting product to processors, by billing and collecting funds from processors, and by distributing net proceeds to producers. This occurs in B.C. with milk.

Whenever supply allocations at the national or provincial level are changed, economic interests are affected. Producers' production shares are determined and managed by quota. Processors' supplies are not as clearly determined and managed, although boards often do provide varying degrees of supply assurance to processors.

This brief summary makes it clear that any policy change requires careful consideration of a multitude of sometimes competing interests. Any policy resolution will affect the economic interests of someone, and it is therefore natural that there will be tensions and at times serious differences of opinion regarding the proper policy outcome.

4.5. Quota

Quota is the license to produce and/or deliver a certain amount of a regulated product in accordance with terms and conditions as established by a Board. National Agencies establish the total supply for the country which is then authorized, or allocated, to each province based on the application of principles and formulae agreed to in advance by the signatories to National agreements. Each provincial Board receives its allocation and distributes it to its producers. To be eligible for a portion of the provincial allocation from the Board, a producer must hold a quota license issued by the Board and must agree to produce the amount allocated to him or her.

The limits on provincial allocation received from the Agency necessarily results in limits on the Boards' ability to distribute production to its licensed producers. Therefore, the license to produce has evolved an economic value in the marketplace: quota is traded for value between licensed producers. Over many years, quota has attained a sizable monetary value.⁵ Business people have invested money in quota based on expectations of future returns. Banks have extended financing to producers to purchase quota on the basis of cash flow and asset value. It is obvious that the Boards' decisions regarding production allocation to established quota licensees also have financial implications.

Quota has been used primarily to produce commodities as this is by far the largest market segment. Innovation and differentiation to develop or serve new market segments has occurred within quota and, for the most part, has been undertaken by direct contract between a producer and a processor. In other words, the Boards have provided the minimum standards of product acceptance and minimum prices and the participants have been free to develop additional standards and price premiums.

Boards take the position that differentiation continues to be possible within quota. They also point out that some existing quota holders who have innovated and produced differentiated products have paid for quota to enter the system. Accordingly, they suggest that providing "free" entry to new specialty producers by way of issuing specialty quota would be unfair.

⁵ Based on current purported quota values, farm cash receipts and direct input costs, it is clear that there is a substantial market premium built into the value of quota. This value suggests expectations of attractive margins, capital appreciation, saleability, and favourable tax management, all of which are linked to a regulatory instrument – the quota license.

The amount of quota issued has increased over time as Boards have issued new quota units to existing quota holders as markets grew. Additionally, some quota holders have sought to grow their businesses faster than the growth provided by new quota issuance and allocation increases. These producers have purchased quota licenses from those who received quota when the system was first established, from quota holders who received additional quota issuance from the Board as markets grew, or from those who had purchased quota from other producers.

4.6. Commodity Approaches

The Boards have understandably approached the specialty market question in this review from the standpoint of the established supply management rules, procedures and perspectives of commodity production and markets. Management of the system is based on consensus decision making by producers with the advice of advisory committees and FIRB oversight, product standards characterized by objective, scientific measures, pricing based on cost of production, pooling of production rights and, in some cases, pooling of returns. These common-denominator approaches may not be fully effective or efficient in serving all market segments.

The Boards have faced challenges dealing with differentiation, which is the foundation of specialty production and marketing. In some cases certain market segments have been under-served as quota holders have found production of a specialty product to be economically disadvantageous. And, while quota holders have objected to incentives being provided to encourage specialty production, specialty producers have found it financially impractical to purchase quota for the purpose of producing higher cost specialty products. Not surprisingly, it has been difficult to achieve consensus and establish sustainable, growth-oriented programs based on innovation and serving new markets.

The Boards' specialty submissions respect the interests of existing producers, the majority of whom produce commodities and rely on a Board to assure market access, sales and a minimum price for their products. In their submissions, the Boards have tried to accommodate specialty producers by proposing procedures that are based, in large measure, on their experience managing commodities for over thirty years.

To capture the opportunities afforded by segmentation in the market, the Boards will need to shift from being exclusively focused on commodities to embracing difference. This may prove to be difficult as it is a cultural shift that will take time, energy and leadership, as well as a different approach to Board administration.

4.7. Constraints to Change

Making changes to B.C.'s supply management systems to better accommodate specialty markets and specialty producers will be constrained by a number of factors, which need to be realistically understood and addressed in the context of reform:

1. *Conformity vs. differentiation.* The established systems have developed detailed policies and procedures that tend to treat all producers and all products essentially the same. Specialty operations, products and markets focus on variety and differentiation, and the existing commodity-oriented procedures are unlikely to be directly applicable in all specialty circumstances.
2. *Different markets, different rules.* Developing markets are less predictable, and therefore regulation needs to be responsive and accommodating. This may pose difficulties for Board administration since the procedures or rules for differentiated markets may need to be different from those used for commodity markets, yet the relationships among all producers within the Board require principles of equity and fairness.
3. *The National Allocation System.* The National Allocation system sets a cap on the amount of production that may be produced in a province. Provincial allocations are a province's share of total production in Canada. Markets, however, are local, regional, provincial, national and international.
4. *Processor supply.* Processors' supplies are materially impacted by the Schemes and Orders. Supply is tightly controlled and managed by producer Boards and there are no alternative sources of supply. Any change to quota allocation by producers may result in product movement between processors which will, in some cases, impact a processor's supply of local product.
5. *Lack of trust between the parties.* There is a lack of trust between some specialty producers and some Boards. Whether this mistrust is based on reality or perception is not important in this context. The fact is that it will take considerable time and effort by all parties to build trust.
6. *Illegal actors.* There are situations where certain specialty producers have operated in contravention of Board Orders. It will be difficult to accommodate all specialty producers equitably when most have followed the rules while a few have not. It will also be difficult for Boards to accommodate producers who have consciously and in some cases conspicuously broken the rules.
7. *Incomplete market information.* Specialty markets, which are segments of the overall market, are often less understood than mainstream markets. This may lead to difficulties administering the Orders that are developed by each Board for specialty markets and new entrants.
8. *Entitlements.* Established producers may feel a sense of entitlement to production and production growth based on holding quota and paying levies over the years. Specialty producers feel entitled to new market segments because in their view they have established these market segments, sometimes in spite of the Boards.

9. *Regulatory burden.* Some supply management rules may not appropriately apply to all producers by virtue of there being different market needs. Applying unnecessary rules may put an unreasonable compliance cost on small producers and cause the Boards to incur extra administrative costs, both of which will constrain economic activity.

4.8. Structure and Systems

Successful implementation of a policy which develops and accommodates specialty production is a strategic initiative to ensure that the supply managed systems responsively serve the market. This initiative will require supportive organizational structures and systems.

In most cases, Board governance is quite operational. Board members are active on numerous provincial and national committees and the separation of Board and management is, at times, unclear. Boards should be primarily governing and focused on policy, while management should be operational and focused on procedures, implementation, and compliance.

Boards often make decisions that quite naturally focus on the interests of the majority of the industry. Specialty markets comprise a small proportion of the overall market and it is easy for these markets to be overlooked or subordinated. Boards and their management will need to examine the different needs of the various market segments and the producers serving these markets.

Operationally, management must prioritize its efforts. Specialty producers today comprise a small percentage (0 – 5%) of the production yet have the potential to represent a larger percentage of the total producers. Different amounts of staff resources may be required for managing different classes of production and marketing. Boards may need to determine which activities are shared versus those that are segment specific. This may lead to a need to allocate resources and reorganize staff workloads or add staff.

In accommodating and integrating specialty production and marketing into the established Board systems, the established systems, including Board orders, will benefit from a review of structural and systems matters such as producer representation, governance, management organization structure, and administrative policies and procedures. FIRB is willing to provide assistance and guidance to the Boards.

5 Principles for Assessing Board Submissions

This section outlines the policy principles used to assess each of the Board's specialty and new entrant plans.

5.1. Registration

The *Act* provides the authority to promote, control and regulate the production, transportation, packing, storage and marketing of regulated products in British Columbia, including prohibiting all or part of that production, transportation, packing, storage and marketing. These are broad powers.

To fulfill the responsibilities associated with the authorities provided by the *Act*, Boards must have a sound knowledge of producers and first receivers. Without complete records of who produces and who buys from producers (first receivers) it is difficult to effectively regulate the production and marketing of a farm product. Moreover, with global integration of markets, the increasing importance of food safety, the potential for disease outbreaks within animal populations and for animal borne diseases to spread from animals to humans, as well as the potential impact of the actions of individual producers on all other producers, it is important that authorities be able to find and communicate with all producers. Accordingly, registration of all producers is important.

The Boards are highly sensitized to disease risk, especially in light of the recent avian influenza outbreak in B.C. They recognize that all production must be in accordance with appropriate biosecurity standards so that an entire industry is not put at unnecessary risk due to actions of one or a few producers. This requires knowing who produces, where they produce, and under what conditions they produce. Registration is also required so that food safety assurance and traceback systems can be effectively administered.

Some producers see registration as an affront to their independence or an avenue for unreasonable administrative interference by Boards. It is asked, "Why should I register with a Board that will tell me how much and when I may produce, and at what price and through whom I must sell my product, when all I am trying to do is produce a food product and make a living?" Or, "Why would I register when it will expose me to enforcement action by the Board now that it knows where I am?" These are reactions based on objections to supply and price controls and fear of the Boards exercising their authorities, exacerbated in some cases by historical conflicts among the parties.

Registration does not mean all producers have identical requirements under the system. There are also issues of administrative burden and applicability of some rules on some categories of producers. This is why Boards have powers of discretion and exemption, and why different policies and procedures are established in the Board Orders to address differing needs of classes of producers and marketers. In short, registration does not prevent a Board from granting an exemption for specific purposes and activities.

Philosophical resistance to regulated marketing, inconsistent enforcement actions in the past, lack of awareness of the regulations among some small producers, and the administrative cost of registering all producers will make it difficult to obtain 100% registration. However, Boards need to know they have the full support of FIRB and Government in pursuing registration as completely as is reasonable and practical.

With respect to Registration, the following policy directions are given:

1. All producers, regardless of size or class of production, should be registered with the Boards.
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

5.2. Specialty Definitions

The Boards' submissions require that specialty products have distinct attributes that reflect differentiation based on unique or special farm practices. These unique attributes are required to be preserved and marketed to consumers, effectively differentiating specialty products from mainstream products in the marketplace. A specialty product can be reasonably expected to require extra or specialized effort and receive a premium price in the market.⁶ Beyond the general definition, however, there is a lack of clarity concerning when designation of a specialty class may be warranted.

The BCEMB proposes to require that a defined market exists before designating a new specialty category, which may be difficult unless there is an effective innovation permit system. It is not possible in all cases to define a market very clearly before designating a new specialty class. This is particularly true for new markets where it is not possible to know what is not yet known. Boards must provide for innovation. Most proposals are unclear regarding how innovation will be fostered and encouraged.

More problematic is the overlap between specialties, and the potential use of specialty designation to gain low cost access to established mainstream markets. SPCA certification may fall into this category. All producers should be encouraged to follow humane practices. In fact, Board Orders require this and detailed protocols are well established. The SPCA apparently seeks to work with all producers, regardless of class of production, to assist them in becoming SPCA certified. It is reasonable that all Boards and all producers should be encouraged to continue developing their standards for humane practices. Many mainstream and other specialty producers may already meet SPCA standards, or could do so with relatively little extra effort.

⁶ It is possible that specialty products may, at certain times, be priced lower than commodity products. Price premiums and pricing are discussed in section 5.8.

It is unclear whether SPCA production requires extra effort, incurs higher production costs, certifies identity preservation, or enjoys sustainable market premiums. While the efforts of the SPCA to promote humane treatment of animals are admirable and helpful, it does not appear, on the basis of evidence provided, that SPCA certified production constitutes a principled basis by itself for identifying a specialty market category for the purposes of designating a specialty class of quota.

Direct marketing and heritage breeds are two areas that emerged during discussions with the Boards and specialty producers that had not previously been considered as specialty products or markets. It seems reasonable that producers who direct market to end consumers or maintain and produce heritage breeds could be defined as specialty producers.

The criteria for designating new specialty classes in the future needs further work by the Boards. The submissions have accepted the general definition of specialty products, and they have provided for Board discretion in designating new specialty classes. However, the criteria for designation may, in some cases, be too broad and general to be of value in considering designation of a new class of specialty product.

With respect to Definitions for specialty products, the following policy directions are given:

1. Designated specialty products are to respect the principles of farm-based differentiation with identity preservation, marketing and representation of the unique farm-based attributes to the end consumer. The designated product should also require extra effort to produce and market and it should receive market price premiums. The designated product will almost certainly require extra effort to produce and market and, as a result, should receive market price premiums.
2. Boards' Orders are to include procedures for the pursuit of new and innovative product/market segments in the future.
3. Boards should recognize local direct marketing efforts of individual producers and the efforts of individuals producing rare heritage breeds within the specialty production and marketing framework.
4. Specialty Markets Advisory Committees should be charged with recommending amendments, if considered necessary, to the criteria for designation of future specialty classes.
5. Humane treatment of livestock is to be required of all producers, and SPCA certification should be viewed as a positive step to further demonstrate humane production practices. However, SPCA certification should not, by itself, be sufficient for designation as a specialty class for quota purposes.

5.3. Certification

Certification is a key component in providing integrity to specialty programs. Without certification, the potential for cheating is increased. Most Boards have accepted the *Agri-Food Choice and Quality Act (AFCQA)* or other nationally or internationally recognized certification plans. However, some propose to restrict certification to the *AFCQA*, and others have proposed that, in addition to any nationally or internationally recognized standard, the Board may at its discretion accept alternative certification plans. It may be too restrictive to limit certification agencies to those accredited in accordance with the *AFCQA*. However, because there are risks in making Boards the sole arbiters of what constitutes an acceptable certification plan, any such discretion should be subject to FIRB approval.

With respect to Certification, the following policy directions are given:

1. Designated specialty products are to be third party certified as such along the entire supply chain from farm to end consumer.
2. Approved certification standards are to be based on legitimate third party standards that meet provincial, national or international standards or approval. Where standards outside the *AFCQA* are adopted, FIRB prior approval will be required before those standards are recognized.

5.4. Allocation

Allocation is at the heart of supply management. It determines a province's market share, an individual producer's quota, and the supply available to processors.

Allocation is both a process and an asset. As an asset, allocation represents the volume of production authorized to be produced by a quota holder in a defined period of time. As a process, allocation attempts to balance supply with demand. The changes required for allocation to different quota classes mean that market forecasting and distribution of approved supply need to more explicitly consider market segments.

It is important that there be oversight of allocation decisions. This involves two primary activities – pushing for positive change at the National Agency level and prior approval by FIRB of Board allocation decisions.

Government needs to take an active role with the Boards at the National level to ensure that B.C. is constantly pushing for an improved allocation. It will take time to redress allocation shortfalls to the province. Boards are highly protective of their provincial market shares. It will take a concerted, sustained, and cooperative effort on the part of Boards, FIRB, and the MAL working with good market information and a clear, principle-based goal to realize success.

Some Boards have proposed establishing separate allocation accounts for specialty production⁷. In general, these accounts will pose at least two questions: how will a Board allocate the growth available to a specialty account among existing specialty producers and new entrant specialty producers, and what will happen when the specialty account is fully utilized yet there is still unfilled market demand?

In most instances it is intended that specialty new entrants will be accommodated through the new entrant program. This has the potential to leave the growth available in any specialty accounts to be distributed among the existing specialty participants. Since the specialty quota proposed to be issued is, in some cases, more than the existing specialty permit amounts, it is important that protocols be established for how growth will be allocated to existing specialty producers; otherwise there could be short-term oversupply and price collapse. Additionally, is it appropriate that all growth directed to an account be distributed among existing quota holders in that class, or should some amount be set aside for new entrants? It seems reasonable that some amount of growth should be set aside to encourage new entrants.

If specialty markets are in fact growing at 20-25% per annum, as asserted by several parties to the Review, then the proposed amounts set aside for specialty accounts by the BCCMB, BCEMB and BCTMB will last about three years. It is unclear how additional amounts will be added to these accounts. The Boards recognize there will be differential growth between mainstream and specialty market segments, yet they propose that allocation will be pro rata to quota holding across all quotas. What is actually required is differential allocation to the different accounts based on differential market requirements, and then pro rata allocation of amounts within an account to the holders of that class of quota. Without this, differential market segment growth will not likely be realized.

FIRB intends to prior approve Board allocation decisions.⁸ Boards receive periodic allocation (provincial allocation) from their National Agencies. They can “slice and dice” the volume for distribution among producers based on their determination of market needs. Practically speaking, it is much easier to simply allocate pro rata to quota holding if there is one class of quota. However, with the designation of certain specialty classes, it will become necessary to first distribute quota among the different product classes. It is important that this distribution be based on criteria, including market response and differential growth, determined in advance.

⁷ The BCEMB is proposing to utilize most of the volume in the Market Responsive Allocation Pool (MRAP), which has the potential to provide a 75% increase above existing permit levels for specialty production. The BCCMB’s plan has provided for up to a 50% increase in permitted specialty production and will give priority to specialty new entrants to fill additional specialty market needs. The BCTMB is proposing to increase the amount available to Grower-Vendor Program (GVP) permittees by almost 100%, plus grandfathering the existing unregistered organic producers at existing production levels. The BCMMB is proposing to fill organic milk demand from growth in allocation and Domestic Dairy Product Innovation Program (DDPIP) quota granted to the program at the termination of existing contracts.

⁸ The Egg Scheme currently requires that the BCEMB obtain FIRB approval for Board allocation decisions.

Supervisory oversight will provide a degree of accountability to the allocation process by ensuring Boards have appropriately considered allocation criteria. It should be a relatively straightforward process for FIRB to approve the allocation decisions of all Boards by simply assessing each Board's discussion of the principles it followed in reaching its recommendation. In practical terms, this should be largely a governance matter.

With respect to Allocation, the following policy principles and directions are given:

1. All BC signatories to the National Agreements should take an active role in assisting the Boards achieve positive change in National Allocation formulae.
2. Boards are to establish principles and procedures for distributing the provincial allocation received from the National Agencies to the different quota accounts based on differential market growth.
3. Boards are to establish clear principles for allocation of amounts in the specialty quota accounts among specialty producers within each quota class.
4. FIRB is to prior approve Board allocation decisions, with approval based on the Board demonstrating how the decision meets the allocation criteria or principles.

5.5. Quota

If allocation is the heart, quota is the life-blood of the supply management system. Quota is the tool used by the Boards to manage production within provincial allocation. Each quota holder is authorized to produce a certain amount of the regulated product.

Integration of specialty producers within the system requires a distinct class of quota for production and marketing of each designated specialty product. Boards can issue different quota licenses for different classes of production. Different quota licenses would authorize production from the allocation account to which the license was linked.

Policies should generally be consistent throughout all quota classes, with procedural differences related to specific production or market requirements of the class. Quota rules for different classes of quota should respect the principle of reciprocity. For instance, the criteria for authorizing a switch from one class of production to another should be based, at a minimum, on market needs and the circumstances of established producers in the class to which the producer proposes to switch.

With a designated specialty class and restricted switching between classes, different rules for the distribution of allocation can be established for quota management within a class. For instance, specialty quota might be managed such that some defined amount of growth in allocation would be directed to innovation or new entrants.

The nature of the rules, in addition to production and market economics, will determine the value of specialty quota to specialty producers while used by them and upon eventual transfer.

With respect to Quota, the following policy directions are given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity.

5.6. Conversion of Existing Permits

Specialty producers have been granted a variety of permits to produce regulated products. Permit agreements have had various terms and conditions, and in most cases have been more restrictive than regular quota rights in terms of the type or category of product eligible to be produced, the amount that can be produced, and the time during which it can be produced. Practically speaking, permits are simply temporary quota licenses that cannot be transferred.

The Boards are proposing to convert some existing permits to specialty quota. The approaches being proposed vary, partly due to existing permit contractual agreements. In general, the Boards are proposing permit conversion that would make any quota incentives non-transferable, provide for continuation of levies in return for transferable quota, and provide for short-term growth in specialty production. In some cases, non-transferable quota will also be ineligible for pro rata increases in allocation in the event of changes in the provincial allocation. Special levies or permit fees that provide for the issuance of transferable quota at some point in the future resemble an installment purchase plan whereby the Board converts the permit to quota upon receiving payment in full of the special levies. Going forward, growth is provided for specialty permittees in the form of either percentage allocations greater than 100% of the original permit amount or ability for the permittee to expand up to a fixed amount.

As noted above, permit conversion raises issues of transferability, levies and growth incentives. Transferability and levies are discussed separately at section 5.7 and 5.14 respectively while growth incentives are discussed below.

Growth incentives have been proposed by some Boards whereby permittees, subject to certain choices, may receive an amount of quota greater than their current permit amount. The BCEMB proposal provides that all existing permittees will be offered up to 5,000 units. Some permittees are presently at 1,000 units and may or may not wish to expand, while at least one producer is currently permitted at over 5,000 and the conversion amount proposed will result in a reduction in volume. The BCTMB program is similar to the BCEMB program in that it is offering all Grower Vendor Program participants the opportunity to increase to the same level regardless of their current permit level. The BCCMB is offering a 50% volume incentive if the permittee elects to receive specialty rather than mainstream quota. The BCMMB is basing its incentive amounts on

the amounts already established in the Graduated Entry Program (GEP), or in the case of established organic milk producers, an amount up to 10,000 kg.

There are two approaches being proposed for permit conversion. In egg, turkey and milk, all permittees are offered the opportunity to receive up to a fixed amount, while in chicken permittees are offered a percentage increase on their permit amount. The fixed amount approach treats all permittees equally regardless of size of operation, while the percentage approach treats all producers equally on the basis of their established operation and volume. In some fixed amount cases, the proposed quota amount is less than the amount already in production, while in others the permittee may have no interest or ability to increase to the fixed amount. It seems reasonable that permittees' established operations should be recognized.

With respect to Permit Conversion, the following policy directions are given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period.

5.7. *Transferability*

There was considerable debate among the parties to the specialty review concerning whether specialty quota should be transferable. Specifically, should quota received directly from the Board as a new issuance of quota, which is granted without the grantee being required to pay "market value", be transferable from one producer to another, subject to Board approval? In general, the Boards take the position that any incentive quota amounts provided to specialty producers and new entrants must be non-transferable. They base this position on the belief that everyone should pay to have the right to produce.

Quota is a license to produce. Transferability refers to the transfer of quota between producers. "Transferable" quota is transferred from one producer to another with Board approval, and the producer receiving the quota typically pays some amount of money to the producer who previously held the quota. "Non-transferable" quota is assumed to carry no monetary value in the marketplace.

In addition to quota, a producer must also have a suitable facility and sufficient working capital to produce the regulated product. The fixed assets required to produce the regulated product cannot be easily converted to the production of other products. For instance, poultry production facilities are not readily convertible to other unregulated livestock. Accordingly, a poultry or dairy facility without quota is of less value than one with quota.

Boards typically provide an exception to non-transferability for intra-family transfers. This is based on a policy objective to promote the family farm. Definitions of “family” vary among Boards, ranging from sons, daughters and spouses to also include nieces, nephews, grandchildren and others if none of the preceding is available. The intent is to provide for efficient transfer of the farm within the family.

Specialty producers have differing opinions regarding transferability. Some have no interest in having a transferable quota for its cash transfer value and are only interested in being able to produce and market the regulated farm product. Others believe that they should have the same specialty quota transfer rights as holders of mainstream quota.

Specialty producers, in some instances, argue that their efforts have built the segment in spite of the Boards, and that they therefore have indeed “earned” quota. Their supporting argument is that they have directly marketed their products to create and fill new demand while mainstream producers have had assured markets and returns. Specialty producers argue that they have direct relationships with customers and do not rely on the Board for marketing.

Businesses build equity over time and at some point the owners seek liquidity at an acceptable return on their equity. If a business is built around producing and marketing a regulated product and the ability to transfer the production rights is not available, the value of the business is negatively impacted. It seems reasonable that specialty producers, like any other producer who builds a farm business, should have the ability to realize a return on their investment.

Boards understand that quota values have risen in the marketplace, yet they decline to acknowledge that quota price is often an insurmountable barrier to entry. They have argued that the cash margins available from producing the regulated product, the potential for incremental quota issuance (stock dividends) and the salvage value of quota upon eventual sale all confer substantial financial benefits upon a quota holder. They have also argued that mainstream quota holders have purchased their quota and therefore have a “right” to the values, while those who have not paid the entry cost of purchasing quota should not be eligible for the stock dividends and salvage value.

Board opposition to transferability of incentive quota amounts is based on the potential for a windfall for the recipient, the creation of an inequity between existing producers and new entrants, and opportunity for serious abuses by those not wishing to be farmers of the regulated product, but merely opportunists farming quota. These arguments are all based on the monetary value that is realized by a quota holder when the Board authorizes the transfer to another producer.

The matter of quota value is complex and controversial, particularly as the Boards themselves are not to attach monetary value to quota they issue. Some Boards (milk, chicken, eggs and hatching eggs) have issued new quota units to existing quota holders when the provincial allocation has been increased in the past. This is similar to issuing stock dividends. Recipients of these dividends have not paid for these additional quota units; they received them by virtue of being quota holders in good standing with the Board. Some will argue that these dividends are

windfalls, and that the amounts of these windfalls over time have been substantial while the amounts being offered to new entrants are modest in comparison.

Another argument against transferability is that recipients of incentive quota will have a cost advantage over producers who have previously paid for quota. This presumes, in part, that quota value is captured in cost of production formulae upon which regulated pricing is based, yet this is not supposed to be the case. Nevertheless, if one person has to purchase quota and the other does not, one has a financial advantage.

The third argument that transferability may lead to serious abuses is based on Board experience whereby recipients have sold or leased quota received through previous new entrant programs. It is important that the Boards establish clear requirements for recipients to be actively engaged in the farming operation, and they should be prepared to enforce these requirements. This requires integrity of the new entrant eligibility and invitation process.

In some cases, Boards propose to require that all non-transferable quota be surrendered before the Board will authorize the transfer of any transferable quota that the producer may have purchased to expand his or her business above the incentive amounts. The logic for this position is unclear. It fails to recognize that people may simply wish to cut back the size of their operation for any number of reasons, personal or financial, and essentially says that if one wished to cut back production, all non-transferable quota must first be returned to the Board.

The issue of transferability is made more difficult by the Chicken and Turkey Boards' proposals to continue special permit levies in return for receiving transferable quota at the end of some period of time. These levies are seen by some as requiring producers to "buy" quota from the Board on an installment plan, albeit at very attractive discounts to current purported quota prices. Since a number of producers have entered into permit contracts with the Boards, unilaterally terminating these contracts seems unacceptable. At the same time, directing that non-transferable amounts could become transferable in the future would confer an unfair advantage on permittees choosing not to continue paying the special permit levies so that they remain eligible to receive transferable quota.

Creating a practice where non-transferable quota becomes transferable after a vesting time could be problematic. If quota has the potential to be transferable in the future, it is subject to being transferred earlier through commercial arrangements that do not involve authorization of the transfer by the Board until a future date when vesting is complete. In this situation, non-transferability will merely be optics and transfers will occur through commercial agreements. In practical terms, there are likely very few, if any, means to prevent enterprising individuals from finding ways to work around rules that are or may be established if there are sufficient monetary incentives to do so.

Interestingly, some submissions provided for non-transferable quota to become transferable after a period of time (see Egg and Turkey Submissions). Also, the existing chicken permit system provides that permits already issued can be transferred after six years, this being six years prior

to the issuance of primary quota in accordance with the permit contracts. And, some Boards have provided that non-transferable quota could be transferable within families. Clearly, the matter of non-transferability in the submissions is not absolute.

There are two basic options: make all incentive quota non-transferable in all situations; or make it transferable in principle from the day it is issued. Between these two options are a number of variants concerning exceptions to non-transferability, demonstrating active involvement in the farming operation, and the timing of transfer.

With respect to Transferability, the following policy directions are given:

1. Specialty quota is to be transferable in the same manner as mainstream quota.
2. All specialty and new entrant incentive quota is to be subject to a declining transfer assessment schedule described in section 5.8.

5.8. *Transfer Assessment*

It is a matter of sound marketing policy that, on the transfer of quota from one producer to another, the Boards require a surrendering back of some amount of the seller's quota. This gives the Boards flexibility by allowing them to utilize that quota, which is by definition limited, for other marketing purposes.

All Boards have put forward transfer assessment proposals. It is understood that the purpose of assessment is to provide for a degree of redistribution of quota rights to allow Boards to distribute a scarce resource (quota) in a manner that will improve market responsiveness to specialty markets and provide additional access to the system.

Four of five Boards propose that the assessment would be levied on the transferor (the party selling the quota), and effectively reduce the amount of quota that would be eligible for transfer by 5%. The BCCMB put forward an alternative "deemed transfer assessment" whereby the amount of assessment would be calculated as 5% of the total transfers in a period and the amount realized from this calculation would then be deducted from the provincial allocation prior to its distribution among all quota holders.

In practical terms, the BCCMB is proposing to set aside a portion of growth to distribute among new entrants, and it intends to determine the amount to set aside from the amount of quota transferred. A question that emerges is whether the Board will sustain the approach if there is no growth in provincial allocation from the Chicken Farmers of Canada. If there were no growth, remaining producers would fund the assessment by a reduced individual allocation while those leaving would retain the full benefit of their quota.⁹

⁹ Chicken producers have apparently supported the Board's planned approach. Does this provide any indication of the perception of quota value by producers? For instance, could it mean that the potential "cost" of a 5% assessment on sale of the quota is greater than the expected

The BCCMB approach has distinct advantages in that it avoids exceptions – it is simple. Other Boards' proposals provide for exceptions to transfer assessment for family members, corporate reorganization and Board discretion, all of which create opportunities for assessment avoidance. It is critical that clear criteria for any exceptions be provided.

It seems reasonable to let the Boards decide whether they prefer the direct or deemed assessment approach. Once established, the approach should be required to be left in place for sufficient time to determine its effectiveness prior to a review of program performance.

In designating and providing for the transfer of specialty quota, Boards also need to establish assessment policy rules regarding specialty quota transfers. Specialty quota is intended to be issued beginning at a point in time. The amount initially issued is proposed to be based on the total amount of production in effect at this point in time, and it will change over time as specialty markets expand or contract. Transfer assessment policies for specialty quota transfer need to be established from the outset.

If specialty quota is issued and becomes instantly transferable, there is a real possibility of windfall gains. It is a basic principle of the Boards that producers should be actively engaged and committed to being in the industry. If a specialty producer simply applied to transfer (i.e. sold or flipped) their quota immediately upon receiving it, this would not seem to indicate engagement and commitment. Some specialty producers argue that they have been in the industry for years and therefore transfer rights should recognize this involvement. This is offset, in some circumstances, by the manner in which they have participated. For instance, did they operate legally within the system?

Transfer assessment may be a way of addressing the windfall and engagement issues for both mainstream and specialty quota incentives. A schedule whereby the amount of the assessment declined over time would provide an earn-in approach. Assessment could be 100% in year one (effectively, non-transferability) and subsequently reduced by 10% per annum until it reached 10% in the 10th year. It could then remain at 10% thereafter.¹⁰ A declining transfer assessment schedule, with clear rules around being actively involved, is proposed as a solution to the debate over transferability.

future margins realizable from using that quota? If so, does this mean there are many producers looking to sell quota in the near term? It could mean a lot of things, but the bottom line is that quota value is at the heart of transfer assessment.

¹⁰ Assessment schedule. One may think of the declining transfer assessment schedule through the analogy of a redeemable, retractable, convertible preferred share. Common shares (transferable quota) and preferred shares (new quota issued) both have the responsibility to produce the issued volume of the regulated product and both enjoy the opportunity to earn operating dividends (production margins). Each year 10% of the preferred shares are redeemed and converted to common shares. Preferred shares are non-transferable and retractable by the issuer (the Board) upon no longer being used by the shareholder.

The Boards have, from time to time, issued additional quota units to existing quota holders where the National Agencies have allocated growth to the province for the particular commodity. It is possible that these “stock dividends” could also be subject to the declining assessment schedule. Administratively, it would be necessary to establish a “last-in, first-out” policy whereby a producer seeking to transfer some, but not all, quota would be required to transfer the dividend quota before any other quota would be authorized for transfer.

The effectiveness of transfer assessment will hinge on the exceptions provided. The Boards, with the exception of the BCCMB, are proposing that any non-arm’s length transfers within families, transfers for corporate reorganization purposes, and, in the case of the BCMMB, transfers through the quota exchange will be exempt from the assessment. What this means in practical terms remains to be seen. Current quota values provide an incentive for sellers of quota to find ways to avoid the transfer assessment.

It is necessary to determine the start date for the declining transfer assessment for those individuals issued specialty quota pursuant to permit conversion. Due to the time differences at which specialty producers were issued permits or when mainstream new entrants were provided an invitation to enter the industry, it seems reasonable that the start date should be the original date of permit or incentive quota issuance for the amounts provided at that time. For additional amounts permitted or offered by the Board to licensed producers subsequent to the original permit or incentive amount, the start date should be the date on which the additional amount was permitted. In practical terms, each recipient of additional quota could have a register indicating dates and amounts, and transfer assessment would be calculated based on the different dates and times in production.¹¹

Some permittees may argue that they should be recognized for time and volumes produced prior to the issuance of permits by the Boards. This will be difficult since the production may have been unauthorized and may not be verifiable.

With respect to Transfer Assessment, the following policy directions are given:

1. The BCEMB, BCBHEC, BCTMB and BCMMB proposals to implement a 5% transfer assessment or make modifications to existing transfer assessment procedures, as in the BCEMB case, on quota already issued is acceptable to FIRB subject to the following points.
2. The BCCMB deemed assessment approach is acceptable providing that there are no exceptions in determining the total volume of quota transferred for the purposes of calculating the assessment.

¹¹ There may be arguments by some that this is a complex system. It seems reasonable that with database information systems each licensed producer would have a register indicating dates and amounts of quota issued and transfer assessment would be easily calculable from the register. This should be a relatively straightforward arithmetic and accounting exercise.

3. In the cases where direct assessment has been proposed, exceptions to assessment are to be limited to direct family members only – these being defined as spouse, sons and daughters – and for business reorganization where the ownership percentages do not change.
4. All specialty and new entrant quota issued, regardless of how it is issued now or in the future, should be subject to a declining transfer assessment schedule. In the first year following issuance 100% of the quota should be automatically retracted should the producer cease production or purport to engage in commercial quota transfer. In year two and subsequently the amount retracted would subsequently decline by 10% per annum until it reaches a minimum assessment of 10% in year 10. Transferability therefore commences in year two, at 10% of the quota allocation, and increases by 10% per year, until it reaches 90%.
5. The start date for the declining transfer assessment schedule upon permit conversion to specialty quota should be the date on which the authorized amount was permitted.
6. All producers holding quota that is subject to the declining transfer assessment schedule should be specifically required to be actively engaged in the farm operation at all times or be subject to immediate retraction of all unearned quota.

5.9. Pricing

A central pillar of supply management is minimum price controls. No producer is permitted to sell below the minimum price, and no licensed buyer is permitted to pay a producer less than the minimum price. Price premiums above the minimum prices have also been established by the BCEMB and the BCMMB for specialty products.

To maintain order and prevent predatory behaviour it is important that all specialty producers be required to abide by any established minimum price regulations. If specialty producers aggressively competed to take market share from mainstream segments by selling at or below the minimum price, this could cause difficulties for sellers (i.e. processors) of mainstream products or cause general price erosion to unsustainable levels.

If specialty producers determine, through their Advisory Committees, that a specific minimum price for a specialty product is required to facilitate market order, then this should be established as and when required. In general, specialty products require extra effort to produce and market. As such, they can be expected to cost more to produce. In theory, therefore, they should receive higher market prices. This theory may, however, be inoperable in certain circumstances. For instance, a specialty product class may experience either a sudden increase in production or a reduction in market demand after production has been initiated. In these cases processors may be forced to lower their prices in order to sell their product, and this price erosion can be expected to result in reduced premiums. If the market erodes sufficiently that price drops to the minimum

regulated price, this would seem to indicate a reduction in demand that should be reflected in lower allocations.

With respect to Pricing, the following policy directions are given:

1. Specialty product minimum prices should be established when required as determined by recommendation of the Specialty Markets Advisory Committee to the Board.
2. All products should be subject to the minimum price established for the commodity.

5.10. Exemptions

Exemptions provide a tool by which Boards may authorize individuals, or groups of individuals, to produce and/or market outside certain of the Boards' Orders. Exemption does not necessarily (or even usually) mean exemption from all regulation. Section 11 (1)(e) of the *Act* provides a Board with the power "to exempt from a determination or order a person or class of persons engaged in the production, packing, transporting, storing or marketing of a regulated product or a class, variety or grade of it." It is important that any exemptions provided be clear regarding which parts of the Orders are included in the exemption.

As the markets for supply managed products have evolved, average farm sizes have increased and the number of producers representing a significant majority of the production has decreased. Smaller production units can experience greater difficulty remaining viable as market pricing established by the Boards recognizes scale efficiencies through productivity variables in cost of production models. Smaller and mid-sized producers may exit the industry, generally by selling their quota to larger producers seeking to expand and having greater financial capacity by virtue of higher productivity and therefore higher margins under a fixed price scheme.

Many specialty producers are smaller producers serving local or regional markets, often by direct marketing efforts. For them, regulation – particularly regulation that is not calibrated to the realities of the class of production being regulated – can constrain their ability to produce and market their products. The administrative burden imposed by the regulation may tempt small producers to operate illegally outside the system or to simply quit. In the first case, illegal operation threatens the integrity of the regulated system while enforcement of the regulations can subject the Boards to unconstructive criticism. In the second case, withdrawing from operation may result in local direct market segments not being served, innovation being constrained and regional economic activity being curtailed. Sound marketing policy as articulated by FIRB and the Ministry is clear that markets must be served and innovation must be fostered.

In general, the Boards have declined to increase exemption levels¹². They base this position on exemption having been provided for "personal use", not for commercial production and sale of a regulated product. The term "personal use" implies the product is being produced for

¹² Existing exemption levels are <50 turkeys placed, <99 laying hens housed, and <200 broiler chickens placed. The BCMMB and BCBHEC do not provide exemptions from the requirement to hold quota to market.

consumption by the producer's family and perhaps friends. Nevertheless, the personal use levels that have been established appear, by most reasonable estimates, to be greater than personal use requirements. For example, the BCEMB exemption level is 99 layers which could technically provide upwards of 35 dozen eggs per week year round¹³. This appears to be more than a family and friends would reasonably consume in a week.

There is a practical minimum level below which it makes little sense to try to regulate. This becomes a question of what level of production is sufficient to justify the administrative cost of regulation.

"Personal use" exemption levels may not effectively provide for innovation and small lot agriculture. Some argue that nothing prevents a mainstream quota holder from serving an emerging, innovative or new market segment, and that nothing prevents a small lot producer or innovator from purchasing a small volume of quota to produce the amounts required for either a new innovation or a specialty market segment. Others argue that mainstream quota holders have tended not to develop certain specialty market segments while at the same time preventing others from doing so by virtue of the quota system.

Two Boards, the BCEMB and the BCCMB have proposed small flock permit programs. These permits would be limited to a small amount of production on each site, would not be quota licenses, would be annually renewable, and would not be transferable. Levies would not be charged on these permit amounts when the producer directly markets to consumers. These small flock permits are proposed forms of exemption from certain parts of the Orders, but with the proviso that all permittees would still be required to register and be licensed by the Board annually.

The BCCMB small flock program would be open to any producer seeking production of less than 3,000 kg per year, although the Board reserves the right to limit the number of permits issued. The BCEMB small flock proposal is dedicated exclusively to the Certified Organic Associations of British Columbia (COABC) certified organic producers, proposes to provide permits for up to 399 layers/permittee, and is limited to 10,000 layers in aggregate. This will put a cap on the number of permits issued and may become, in due course, fully utilized leading to allegations by those wishing to obtain a permit that the system is unnecessarily restricting small lot agriculture. The proposal to restrict eligibility would also exclude those certified organic producers who operate under certification plans other than the COABC standards. The BCTMB, BCMMB and BCBHEC submissions did not provide for small lot programs.

The small flock permit program volume limits are a point of contention. If set too high, they will materially impact mainstream markets as production from multiple units is consolidated and directed through mainstream processors. If it is set too low, small lot producers will feel they have been unnecessarily constrained by the system.

¹³ Realistically, the productivity of many small flocks is often less than that found in larger mainstream commercial operations, and many small flocks exhibit distinct seasonal production fluctuations.

A case has been made that certain areas of the province should have regional exemption from the regulations. This is based on the absence of mainstream commercial production in the region and local market demand for locally produced products. Regional market demand for locally produced farm products, sold directly to consumers by producers, could be defined as a specialty channel. Production of small amounts that are sold directly by the producer to a consumer or small retailer (farm market or independent outlet) will logically reduce the amount of mainstream production purchased by local consumers from mainstream market channels. The questions are: whether the market needs for local product are served; whether the amounts produced locally are significant; and whether the product meets other legal requirements such as food safety. Clearly, if consumers prefer locally produced product, and it is not available, some part of the market has been underserved. Amounts produced would clearly be significant if producers in the region, having supplied local markets, were selling their products outside the region and thereby impacting producers in other regions.

Since provincial allocation is focused on the total supply, some will argue that any amount produced, no matter how small, should count toward the global production authorized in a province. In this context, the Egg case is interesting. The Canadian Egg Marketing Agency (CEMA) deducts from the global allocation to B.C. an amount estimated to be the unregulated production in the province as reported through the Canadian Census. Registering small producers, whether as “personal use” exempt or as small lot permittees, will in some cases merely capture production amounts already considered in the CEMA allocation process. Therefore, no additional deduction need be made by CEMA or the BCEMB, and exemptions and small flock permits will have little if any impact on the regular quota holders unless there is a proliferation of new personal use and small lot permittees. This seems unlikely given estimates that there are already thousands of small unregistered egg producers.

Nevertheless, any amounts produced are part of the total supply. It is critical that Government and FIRB, working with the Boards and specialty groups, press for changes in national allocation methodology that recognize provincial jurisdiction over exempt and small lot production amounts. In other words, these amounts should not count toward the national allocation system.

Taking “personal use” exemptions, small lot permit programs, new entrant programs and designated classes of quota together, it is apparent that the Boards are developing what could be viewed as a phased entry system. This suggests the small lot permit volumes fit somewhere between exemption levels and new entrant quota incentive levels. It seems reasonable that the small lot levels, once established with these system changes, be reviewed in the future to ensure they are operating as part of the phased entry system.

With respect to Exemptions, the following policy directions and principles are given:

1. There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.

2. Exemptions are to be very clear regarding which specific Orders from which an individual or group of individuals is being exempted.
3. The Boards' positions that existing "personal use" exemption levels are adequate are acceptable subject to the introduction of small lot permit programs by Boards.
4. Boards are directed to develop and introduce small lot permit programs which provide for, among other things, product/market innovation, local/regional small lot agriculture, heritage breeds, and farmer-direct marketing initiatives.
5. Small lot permit levels should be set higher than the "personal use" exemption levels and lower than the quota incentives proposed through new entrant programs.
6. Government, FIRB and industry should work together to press for changes in the National Allocation systems so that personal use exemption and small lot permit amounts are not counted as part of the provincial allocation.

5.11. New Entrant Programs

All Boards have proposed new entrant programs or amendments to existing new entrant programs.

In general, Boards are proposing to use the new entrant programs to satisfy, in part, unfilled specialty and/or regional market needs. This seems to be a reasonable approach. Mainstream markets are national markets and provincial shares are jealously protected. If a province is short in filling its provincial demand, the extra supply comes from another province. Specialty market needs may also be filled from other provinces or imports. In this case, how will it be determined that the market is short? It will be important to clarify how a market will be considered satisfied or not. This is a role that could be filled by the appropriate Advisory Committee.

Most Boards have moved away from the concept of requiring new entrants to purchase some amount of quota in order to receive an incentive amount. The exception is the BCMMB which provides a base incentive of 5,000 kg of quota and then matches purchases one to one (1:1) for another 2,000 kg.¹⁴ This is a good decision on the part of the Boards, given the difficulties accessing quota to purchase and the extra challenges new entrants might have raising capital to buy quota at the same time as they finance the fixed asset and working capital needs associated with establishing their operation.

There is a question concerning the size of the new entrant incentive to be provided. While each Board is different, comparing them is illustrative. The table below summarizes the new entrant incentives proposed. The BCBHEC has chosen a relatively large number of breeders based on

¹⁴ Graduated Entrant Program (GEP) entrants in milk receive 5,000 kg without having to purchase any quota. They then receive up to 2,000 additional kg providing they purchase 2,000 kg. This provides up to a 7,000 kg quota incentive.

production unit size and egg pick-up logistics for hatcheries. The BCTMB has retained an incentive amount equivalent to their Grower-Vendor program and based on seasonality of demand and low turnover in quota which will limit the amount available from assessments. The BCMMB has retained their existing Graduated Entry Program incentive levels. The BCCMB has established an incentive level based on the existing 4,000 unit permit level. And the BCEMB has selected an incentive level similar to the existing TRLQ and Special Permit volumes that it projects will be sustainable for providing two new entrant opportunities per annum based on allocation trends and assessment expectations.

	New Entrant Incentives	Average Quota Holding ¹⁵	Incentive as % of Average holding
Eggs	Up to 3,000 layers over 7 years	17,000 layers	17.5%
Chickens	Up to 4,000 units/cycle	47,000/cycle	8.5%
Hatching Eggs	10,000 breeders/quota cycle	30,000/cycle	33%
Turkeys	Up to 15,000 kg/year	548,000 kg/yr	<3%
Milk	5,000 kg plus 2,000 kg matched to 2,000 kg purchased quota	34,000 kg	20.5%

What is the right amount for a new entrant quota incentive? The challenge faced by Boards in determining the amount is finding a balance in providing for a number of new entrants, providing a meaningful incentive amount, ensuring the operation has a chance to be viable, and respecting the rights of established producers. The BCBHEC proposal stands out from the others as being a very sizable incentive. This is based primarily on the need for a hatching egg production unit to be viable not only for the producer but also the hatchery and an attempt to avoid criticism that small lots of quota are not readily available for purchase to match incentive amounts or to top up to an amount required for a viable unit. Note also that the BCBHEC is different than the other Marketing Boards in not presently having a designated specialty class of hatching eggs.

With respect to New Entrant Programs, the following policy directions are given:

¹⁵ Average quota holding may be different than average farm size. It is possible that several quota holdings are owned by the same individual or entity and are produced together on one site. However, data on average farm size is not readily available so average quota holding is a suitable proxy. Farms have generally increased in size over time. This is causing the industry structure to follow that of many agri-food sectors wherein a small percentage of the producers comprise an increasingly significant majority of the production. In terms of governance and management of these systems, this poses interesting challenges. Larger economic players can be shut out of the governance of the system, and management must continually balance between the needs of many small producers and those of a few large producers when these needs may not be similar.

1. The Boards' proposed new entrant programs are to provide for a defined minimum number of new entrants per year, or per quota cycle in the case of the BCBHEC.
2. The incentive quota amounts offered are sizable in most cases, and care should be exercised that there is integrity in the programs and that entrants remain actively engaged.
3. All incentive quota provided by the new entrant programs is to be subject to the declining transfer assessment schedule.

5.12. New Entrant Eligibility

The Boards' submissions have addressed eligibility for new entrant programs. In general, eligibility criteria include being a Canadian citizen or landed immigrant, a permanent resident of B.C., and over 19 years of age, not having previously held an interest in any supply management quota, and being prepared to be actively engaged in the operation of the farm. Variations exist regarding whether previous quota ownership was in B.C. or anywhere in Canada. An unanswered question is whether it is possible to restrict access to new entrant programs on the basis of having held quota in another province.

The BCEMB proposes that children of quota holders will be eligible, providing they operate independent of their family. This poses an interesting question in relation to the exceptions provided for family members in the area of transfer assessment. In any event, the eligibility criteria seem to be reasonable and focused on trying to ensure that new entrants are truly new entrants and not previous producers emerging in a new incarnation.

With respect to New Entrant Eligibility, the following policy direction is given:

1. Eligibility criteria for new entrant status should include, at a minimum, residency, not having been previously involved in supply management quota ownership, and a commitment by the applicant to be actively involved in the farming operation.

5.13. New Entrant Waiting Lists

Boards intend that the number of new entrants invited to enter the industry will be determined, for the most part, by the amount of quota raised from transfer assessments. Demand will likely exceed supply. Accordingly, the Boards intend to have procedures for putting applicants on waiting lists and priorities for offering invitations from the waiting list.

Some Boards are proposing to maintain existing lists with dozens of applicants, while others are proposing to have shorter lists and repopulate the lists using a lottery draw system. To provide invitations to waiting list applicants, Boards intend to rely on a combination of seniority (time on the list) and market needs. Market needs include those required to meet specialty market and regional demands. This leads to priorities in making invitations whereby the most senior person on the list may not be the first choice by virtue of the market needs priorities.

The important matter from an oversight perspective is whether there is integrity in the application, waiting list and invitation procedures. To provide objectivity, most Boards are proposing to let their auditors or an independent third party manage the waiting list process.

In the case of new entrant waiting lists, the following policy directions are given:

1. New entrant waiting lists are to be established where they do not currently exist.
2. Where Boards have existing waiting lists, they are to be reviewed and modified to reflect the new eligibility and invitation criteria developed by the Boards.
3. Boards are encouraged to provide priority to specialty and regional market needs in issuing new entrant opportunities.
4. The Specialty Markets Advisory Committees should be charged with assisting to develop criteria, research and reporting procedures regarding the unfilled specialty market needs that would give priority to specialty new entrants.

5.14. Levies

Levies are the basis on which Boards fund their operations, their share of National Agency operations, and any costs associated with product distribution programs such as pooling in milk or industrial product direction in eggs. Boards also have the authority to charge special levies.

The BCTMB and the BCCMB are proposing that permittees who wish to complete their current contracts and receive transferable primary quota at the end of the special levy period, in these cases 12 years, will continue to pay special levies. Permittees not wishing to receive transferable primary quota, may elect to have their levies reimbursed, and they would receive non-transferable quota rather than transferable quota as a result.

This is an interesting proposal. It puts the permittees in the position of having to decide whether they wish to have transferable or non-transferable quota. But if continuation of special levies in return for receiving transferable quota is sustained, while at the same time incentive quota is transferable at some point in time, why would anyone continue to pay special levies in return for transferable quota? To get an indication of the values involved, the BCCMB charges \$0.18/unit/cycle for 12 years, or \$14.04/quota unit. Present broiler quota values are reported to be in excess of \$60/unit. Interestingly, the permits are transferable after six years and accordingly it is possible that some permits could be transferable as early as 2006.

The BCEMB proposes that special levies will be terminated. The Board intends that amounts paid to date that were intended to be deposits for future quota purchases will remain "on deposit" with the Board for use by the permittee for the eventual purchase of quota. This means a permittee who does not wish to expand beyond the permit amount and has no intention of purchasing quota to expand, effectively forfeits the special levies while a permittee who purchases quota has the funds returned. This does not seem to be a practical solution.

Some permittees have been delinquent in paying their levies while others have made their payments as required. It seems reasonable that permit fees due and payable should be paid by all permittees on the basis that permittees had entered into a contractual agreement with the Board.

Another issue with levies is the disconnect, in some cases, between the levy and the product sold. For instance, the BCEMB assesses levies on the basis of hens housed while the producer sells eggs. There are differences in hen productivity among different classes of production, meaning those with lower productivity are incurring a higher per unit cost for levies. It is difficult to understand the logic for this unless some extra service is provided to those with lower productivity levels. It seems levies should be levied on the product sold.

There are also issues with levies concerning the benefit received by all producers from levies. For instance, CEMA has an industrial egg program whereby levies assessed on table eggs are used to bring the cost of eggs to processors to a lower price point. In essence, this is a two-price system funded by levies on the higher-priced product. However, specialty eggs may not receive the specialty egg price (i.e. table egg price) for eggs directed to the industrial market when there are "surplus" specialty eggs. Nevertheless, the levy on specialty eggs includes charges for operating the industrial product redistribution program. Similarly, the BCMMB is contemplating Board-operated pools for the marketing and distribution of organic milk. Costs are pooled, and all producers are charged equally, pro rata to volume, regardless of their individual costs within the pool.

Despite specific program levies, some argue that the levies help manage the overall system and provide price supports from which all producers benefit, including specialty producers. Since specialty producers can price above mainstream products, they enjoy the same returns as mainstream producers, providing they price in a manner to recover their direct, incremental costs incurred above mainstream production costs. If they do not price in this manner, that is a personal business decision and not a matter of adjusting levies.

It is likely that Boards will incur some costs that are solely and directly attributable to individual quota classes. It seems reasonable that direct costs associated with a class of quota should be incurred by holders of that quota. At the same time, there will be shared infrastructure and administration costs across all classes of quota. The Boards should examine their costs and determine how these are to be apportioned when they establish levies for each class of quota. It seems reasonable that each quota class should pay the costs incurred by the Board to deliver the services required to administer that class.

With respect to Levies, the following policy directions are given:

1. Levies and fees assessed specifically for permits or temporary quota use, not including regular administration and marketing fees charged by a Board on all regular quota production, are to be terminated from January 1, 2005 forward.
2. Subject to the discretion of the Boards, all levies and fees charged for permits or temporary quota up to December 31, 2004 should be due and payable.

3. Each permittee should be fully paid up for all levies owed to the Boards up to December 31, 2004 or the nearest applicable quota period ending after December 2004, prior to any permit conversion to quota of any class.
4. All levies established should be based on the cost of providing the service. Different levies should be considered for different quota classes based on class specific services and a pro rata share of infrastructure and administration costs.
5. Where practical, levies should be charged on the basis of product sold rather than quota units.

5.15. Representation

Board members are elected to Boards to establish regulations and to oversee the management of the Marketing Board as it administers the regulations. Electoral procedures provide for registered producers to select from among themselves those who will become directors. In certain cases, directors are appointed by Government; in all cases, the Chairs are appointed by Government.

Specialty producers have indicated a desire to have a dedicated seat on the Board of directors. It seems reasonable that all directors, regardless of class of product or market served in their personal businesses, should attempt to the best of their ability to represent all producers and the industry. Reserving seats for special or dedicated interests could easily be counter-productive to efficient and effective Board governance. Boards should be ensuring their policies and procedures serve specialty markets with products produced in B.C. This is a goal for all directors regardless of the type of product they produce and market or the size of their operation.

Boards propose that all registered producers who hold quota licenses should have the right to vote, and that personal use and small lot permits will not be quota licenses. This seems a reasonable approach by establishing a minimum size in cases where a one-producer, one-vote electoral procedure is used. Boards could, however, examine voting by production share or a double hurdle based on producer and production numbers. However, such changes might not be achievable by the Boards unilaterally, and might well require Scheme amendments in some cases.

Board governance is a matter that FIRB intends to carefully monitor, particularly given the potential frictions and tensions arising from the realities of producer elected members, the typical one-producer, one-vote electoral procedures, the trend to fewer, larger farm operations, and the larger number of small specialty producers.

With respect to Representation, the following policy directions and principles are given:

1. All Board directors should represent the entire industry, not special or dedicated interest groups within the industry.

2. All registered producers holding quota licenses should be eligible to vote on any matters requiring decision by all producers.

5.16. Specialty Markets Advisory Committees

Boards have indicated a willingness to establish Specialty Markets Advisory Committees where applicable due to numbers of specialty producers. However, the composition and roles for these Committees are not fully developed in the Boards' submissions.

Based on the need for development of policies and procedures focused on specialty production and marketing, Specialty Markets Advisory Committees have an important role to play. The Committees will need clear guidelines concerning composition, roles and responsibilities.

The BCCMB proposes that the Specialty Markets Advisory Committee be comprised of an independent Chair appointed by the Board plus three specialty producers and three specialty processors. While the BCCMB has provided for additional membership, the basic model seems reasonable and practical. Arguments may be made for additional representation from others such as input suppliers, distributors, and bankers. This should be avoided since the Committees are intended to have meaningful responsibilities and accountabilities around the management and administration of specialty production and marketing.

In an effort to build trust and understanding between specialty and mainstream producers, it would be useful to have mainstream producer representation on the Specialty Market Advisory Committee. Such mainstream representation should be a director from the Board. Reciprocally, there should be a specialty representative on any mainstream Advisory Committee.

Among the roles and responsibilities that could be established for Specialty Markets Advisory Committees are the following:

- To make policy recommendations to the Board of Directors concerning specialty markets and specialty production.
- To monitor market conditions, including supply, demand and price, and make recommendations to the Board to ensure the orderly marketing of specialty products.
- To provide recommendations to the Board concerning periodic allocation requirements that can be incorporated into the National Agency allocation setting process.
- To ensure policies and procedures are established and maintained for the distribution of allocation in a specialty pool among specialty quota holders and specialty permittees (where applicable).
- To recommend clear criteria for the designation of new specialty classes.
- To provide advice to the Board concerning when and where exemptions may be warranted.
- To monitor development and maintenance of specialty market information systems by the Board.

- To assist in development of on-farm food safety and biosecurity protocols appropriate for specialty producers that meet the objectives of providing safe food and a safe environment for livestock production.
- To recommend to the Board when minimum pricing needs to be established for specialty products.
- To participate with Management of the Board in specialty product price determination procedures, when applicable.
- To work with Management to ensure specialty product levies are service based and determined by the cost of providing the services required for the orderly marketing of specialty products.
- To monitor the effectiveness of the new entrant program in meeting specialty market needs and in providing access to the system, and to recommend policy or procedure changes to the Board as required.
- To monitor and provide advice to the Board concerning the need for enforcement action and the implementation of progressive penalties for non-compliance.

With respect to Advisory Committees, the following policy directions are given:

1. Specialty Markets Advisory Committees are to be established.
2. Specialty Markets Advisory Committees should be comprised of an equal number of specialty producers and specialty first receivers, a mainstream producer representative of the Board, and an arm's length, independent Chair appointed by the Board.
3. Boards, in consultation with the Specialty Markets Advisory Committees, are to develop terms of reference for the Committees.

5.17. Food Safety & Biosecurity

The Boards recognize that all producers, including small-scale specialty producers, must follow appropriate on-farm food safety and biosecurity protocols. Their preference is that all growers follow the guidelines developed by their National Agencies. They have also put forward that there is need for greater clarity regarding food safety and biosecurity matters including the authority to establish and enforce standards in these areas.

Some Boards have indicated a willingness to engage specialty producers to adapt the established on-farm food safety guidelines as appropriate for smaller operations that follow different production practices. Some Boards have also suggested that certifiers (e.g. organic Certifying Bodies' Verification Officers) could be trained by the Board to attest to compliance with on-farm food safety and biosecurity standards established by the Board.

The Boards feel strongly that all producers should be required to conform to food safety and biosecurity protocols as a condition of licensing. It seems reasonable that producers should follow appropriate production standards, including those established for food safety and

biosecurity, because the potential impact of the actions of a few on the results of many can be significant. The production protocols, however, must be reasonable and recognize that many specialty producers have production practices that are materially different than mainstream producers.

It is important that policy direction concerning on-farm food safety and biosecurity responsibilities and authorities be provided for the industry. Boards should engage specialty producers through the Specialty Market Advisory Committees to assess the applicability of existing programs to specialty production, and to make amendments so that the programs are appropriately adapted to specialty production.

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

5.18. Enforcement and Compliance

There are perceptions among some participants that Boards have inconsistently enforced their Orders. Determining whether this perception is based on fact or fiction was not part of this review.

The immediate concern for FIRB and the Boards is what happens going forward. Will the Boards be able to enforce and, at the extreme, seize flocks that are not properly licensed? If not, then there can be little integrity in the system. And if they do seize a flock, are all parties ready for the potential implications of enforcement action?

It seems reasonable that Advisory Committees could provide assistance to management and the Board concerning the enforcement actions to take in compliance situations. Progressive enforcement would seem to be a reasonable standard, and the steps would need to be set down and communicated in advance. Increasing financial penalties before moving to seize a flock or herd would be one way to implement progressive enforcement. Involvement of the Committee would ensure that staff has industry support for the enforcement action.

Enforcement and compliance are also issues for FIRB and Government. It is critical that all parties – the Boards, FIRB and Government – have a common understanding concerning compliance and enforcement. Notwithstanding how enforcement is coordinated within the Board, it is critical that there be consistency. Discretionary enforcement can lead to problems for the organization.

With respect to Enforcement and Compliance, the following policy directions and principles are given:

1. FIRB intends to monitor the Boards' enforcement of Orders, and, in the extreme, is prepared to take action in cases where enforcement is inconsistent or inadequate.
2. Advisory Committees should be provided a role in assisting to develop progressive enforcement policies for compliance situations.
3. Government and FIRB intend to provide meaningful support to the Boards when managing potential reactions from enforcement action.

5.19. Program Review

It is not possible to anticipate the full range of consequences arising from the adoption of specialty and new entrant programs. Some changes may result in unintended consequences, and others may take time to become established, particularly given the challenges in altering existing administrative frameworks.

It is important that there be active, ongoing monitoring of the specialty and new entrant programs. This is a role for the supervisory organization, FIRB. FIRB will need to establish clear performance measures for monitoring the effectiveness of programs designed to meet the needs of specialty markets.

It is also reasonable to anticipate that several quota periods will be required to determine if the programs are having a real impact, and if and where changes may be required. Boards and FIRB should not be inflexible to changing procedures as experience is gained, but they should be careful not to make changes every time an issue materializes. At the same time, there should be a formal review after a reasonable period of time to ensure that the intended results are being realized.

With respect to Program Review, the following policy principles are given:

1. FIRB intends to conduct a formal program performance review after three years.
2. FIRB needs to establish criteria and capacity for ongoing monitoring of specialty program performance.

6 Schedule 1. Regulated Marketing Economic Policy

Ministry of Agriculture, Food and Fisheries

Public Interest Statement

1. The regulated marketing system operates in the interests of all British Columbians. Boards and Commissions operating under the authority of the *Natural Products Marketing (BC) Act* are responsive to the needs of British Columbia producers, as well as to processors, consumers and other participants in the British Columbia food system.

National Systems

2. The Government of British Columbia supports the participation of British Columbia producers in national supply management systems when the provisions of the national agreements are consistent with the growth and prosperity of the agri-food industry.

The British Columbia Farm Industry Review Board and the Government of British Columbia proactively support supply managed boards in national and regional negotiations, in order to secure agreements which will provide:

- ongoing opportunities for industry growth and new opportunities in primary and further processing; and
- sufficient allocations for the development of specialty markets, such as organic and other products differentiated at the farm level.

Maintaining and Gaining Markets, and Serving British Columbia Demand

3. The British Columbia regulated marketing system supports the development of new markets identified at the production, marketing, and processing level to facilitate industry growth and competitiveness.

The regulated system encourages regulated industries to serve the British Columbia demand for their product and to capture markets outside of British Columbia where these markets can add strength and stability to a regulated industry.

To the extent that British Columbia regulated industries serve the British Columbia demand for commodities, the regulated marketing system ensures that British Columbia industries serve the developing British Columbia demand for organic food and other products differentiated at the farm level.

Boards and Commissions ensure policies and practices pertaining to pricing, levying, marketing, and production requirements provide the producer with the ability to pursue new markets and to capture market premiums for products differentiated at the farm level.

Boards and Commissions accommodate financially viable, competent sales agencies and processors who wish to pursue new markets for existing products, as well as markets for new value-added processed products and for products differentiated at the farm level.

**Entry of
New Producers**

4. The British Columbia regulated marketing system facilitates the entry of new producers to sustain and renew regulated industries in new and existing markets.

The Value Chain

5. The British Columbia regulated marketing system facilitates cooperation among producers, marketing agencies, input industries, processors, and retailers, with a view to achieving efficiencies throughout the entire system, and enhancing value in the marketplace.

Safety and Quality

6. The British Columbia regulated marketing system builds consumer preference for British Columbia product by encouraging the production of high quality, safe food.

**Recognition of
Standards**

7. Boards and Commissions recognize, and encourage producers to participate in, the voluntary standards programs sanctioned by the Province (under the *Agri-Food Choice and Quality Act*) and national standards sanctioned by the Federal Government (for example, those established under the Canadian General Standards Board) as standards for identifying and labeling specialty products.

Regional Industries

8. The British Columbia regulated marketing system contributes to economic activity and stability in all regions of British Columbia.

Boards and Commissions ensure their policies and decisions do not inhibit the economic viability of regional industries. Boards and Commissions consider the need for appropriate mechanisms to sustain regional industries.

Boards and Commissions strive to accommodate producers and processors who pursue innovative or specialized market opportunities that are available in a region because of the region's location or natural characteristics.

7 Schedule 2. FIRB Principles, dated August 25, 2004.

BRITISH COLUMBIA FARM INDUSTRY REVIEW BOARD

DRAFT

**Principles for Consideration in Support of
Specialty Production and Marketing
In the British Columbia Supply Managed System**

August 25, 2004

Definition of Specialty Production and Marketing

Each board should be responsible for determining the specific and objective criteria through which eligibility for a specialty program is established in its commodity. In defining such production, boards could look at such factors as: niche or regional demand not being met through conventional channels; product clearly defined at the farm level; or product which meets the requirements of nationally or provincially accepted certification programs.

National Systems

It must be recognized that the five supply managed commodities operate under federal-provincial agreements which place limits on the total amount of production available to British Columbia. To the extent that under national programs the regulated industries are to serve the overall demand for commodities, boards must also serve the growing British Columbia demand for differentiated products. Specialty production policies must recognize that production is accountable as part of the province's allocation for each commodity. In this context, the division of production within the province and the related issue of affordability are critical factors, as is the need for the boards to pursue and obtain additional allocations to meet all market demands.

Public Interest

Priority should be given in all specialty programs to producers who have not previously been issued quota by a board. Quota producers may, however, be eligible to participate in circumstances where market demand for specified specialty products is not being adequately met.

In those circumstances where a board determines it is appropriate to exempt producers of a specialty product from regulation applicable to conventional producers, exemption

criteria must be clearly set out and the board should provide for appropriate compliance, monitoring and risk management (such as bio security requirements) through the exercise of its licensing authority. Criteria should also be established to review whether the exemption of a class of producers or a class of the regulated product continues to be appropriate, or should be revoked.

Affordability

Quota and permits will remain the exclusive property of the board or commission, to which the board or commission should not attach any monetary value. As with conventional products, license, permit fees and levies should be based only on the costs to administer the specialty program, the costs to maintain the marketing scheme generally; and on the services provided to the permit holders.

Transferability

In general, permit issued under a specialty program should be non-transferable and revert to the board if it is not being used for the specified purposes of the program. Special circumstances may warrant allowing certain permits to be transferable or to acquire quota status, but this should only occur if a board has established clear policies that define the rules and limitations of such transfers.

Administration

The administration and governance of specialty production programs, including the receiving and approval of applications, must be designed to be fair, transparent, effective, and accountable, and must operate in a flexible and timely fashion.

Accountability

To maintain eligibility under a specialty program, a person must demonstrate, at any time required by the board and to the board's satisfaction that they are actively involved in the production and marketing of a specialty product that is distinct and separate from conventional production and that they are in compliance with the terms of the program.

Sustainability

In recognition that the availability of quota fluctuates, boards should ensure that their specialty production programs do not require the surrender of permit or the replacement of permit with quota while a producer is in compliance with the program and/or the demand for the product exists.

In order to sustain specialty programs, boards should allot to such programs appropriate portions of the provincial allocation and increases to the provincial allocation. The percentage of the allocation allotted to specialty production programs and to individuals

in that program may vary from time to time, subject to the need to ensure there is adequate production to meet existing demand and the need to promote the development of new markets for specialty products.

A percentage of quotas transferred between producers could be collected by each board, with a portion of this being dedicated back to specialty programs. A board could consider exemptions to this requirement if a province-wide quota exchange has been instituted and is operating effectively.

Appendix 3 – Eggs

Appendix 4 – Milk

Appendix 5 – Turkey

Appendix 1. Response to BCBHEC Specialty and New Entrant Submission

This appendix provides an overview of the BCBHEC's specialty and new entrant program submissions at Section 1. This is followed in Section 2 by FIRB's understanding and analysis of the Commission's submission. Finally, Section 3 provides FIRB's response to the Commission's Specialty and New Entrant Submission.

1 Synopsis of BCBHEC Submission

The Commission has determined that there is no demand for a specialty product plan on the basis that:¹

1. its products, hatching eggs, are sold to hatcheries;
2. hatcheries produce chicks for sale to producers; and,
3. producers of proposed designated specialty chicken do not require certified specialty breeders.

The Commission has proposed a new entrant program offering a 10,000 layer incentive quota to new entrants from quota made available from a 5% assessment on transfers of placement quota. The incentive quota, called Production Permits, will be the same as Placement Quota except it will be non-transferable.

This proposal funds new entrants from those exiting the industry, and distributes all changes in allocation pro rata to all registered producers.

2 Analysis of BCBHEC Submission

In this section the Board's specialty and new entrant proposals are assessed by comparing them with FIRB's policy principles for specialty and new entrant programs based on FIRB's general understanding of the Commission's submission or position.

BCBHEC Submission

FIRB Assessment

2.1 The Market

Hatching eggs are sold to hatcheries for production of broiler chicks that are sold to commercial chicken producers.

Increasing average broiler weights in commercial production have grown the meat/egg ratio by 5% over the past five years. Average breeder hen productivity has increased from 130 to 145 eggs/hen placed over the past five years resulting from genetic improvements and longer lay cycles. As a result, growth in chicken production does not directly translate into increased hatching egg demand.

The hatching egg market in B.C. is determined by the broiler chicken market and hatching egg imports. The three main hatcheries in the province are owned and controlled by the province's three major chicken processors.

Changes in productivity and processor requirements have combined to yield little or no growth in hatching egg quota allocation.

¹ See Commission's March 31, 2005 submission in which they suggest that a specialty program is not required in broiler hatching eggs at this time.

BCBHEC Submission**FIRB Assessment****2.2 The Specialty Market**

The BCBHEC takes the position that a specialty program is not required for hatching egg production in B.C. The Commission bases this position on its understanding that producers do not require certified specialty chicks for their specialty chicken production.

The Commission does not enforce the Scheme in relation to Asian specialty breeders, and the Commission is not aware of a need to regulate Asian specialty hatching eggs and chicks at this time.

The Commission will consider the need for a specialty program if, in the future, certified specialty chicken production in B.C. requires certified specialty hatching eggs.

The Commission's belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

The Commission may wish to provide, if it has not already done so, a specific exemption for Asian specialty breeders. This exemption could take the form of an annually renewable license to produce Asian specialty breeders in any amount subject only to certain requirements such as humane production practices and marketing only for Asian specialty production.

2.3 Quota

The Commission issues Placement Quota as an authorized number of laying hens that may be placed in a breeder facility. There are presently 1,812,782 units of placement quota issued.

The Commission intends that it will issue Production Permits for incentive quota provided to successful new entrants. Production Permits will operate exactly the same as Placement Quota except they will not be transferable.

All registered producers may purchase Placement Quota to expand their operations.

The Commission's approach of having Production Permits operate in all ways similar to placement quota is sound except that its position regarding non-transferability does not meet FIRB's policy principles.

2.4 Quota Transferability

The Commission authorizes the transfer of Placement Quota between producers. The Commission does not accept that quota price is an insurmountable barrier to entry to the hatching egg business in B.C.

Production Permits, issued as new entrant incentive quota, will be non-transferable under any circumstances. The Commission is

The Commission has made a number of arguments opposing transferability of quota received as an incentive. However, FIRB has determined that all quota is to be transferable and that new quota issued by the Board to new entrants is to be subject to a declining transfer assessment schedule.

BCBHEC Submission**FIRB Assessment**

opposed to any transferability of Production Permits issued under the proposed new entrant program on the basis that:

- It will provide a windfall bonanza for the recipient that is not, and was not, available to all other producers.
- It will create an inequity between existing producers and new entrants in that new entrants have a significant cost advantage since they need not purchase an amount of quota equal to the incentive provided.
- It would be tantamount to quota redistribution from those that purchased quota to those who were being offered an incentive to enter the industry.
- It would open the door for serious abuses by those not wishing to be farmers of hatching eggs, but merely opportunists farming quota.

New entrants having been issued Production Permit volumes must return all Production Permits to the Commission prior to being authorized to transfer any Placement Quota that the new entrant may have purchased subsequent to being a new entrant except in cases of demonstrated financial distress.

2.5 Allocation

B.C.'s hatching egg production levels are determined by the provincial allocation received from CBHEMA. This allocation is based on projected chicken production and hatching egg imports.

B.C. hatching egg producers have experienced a 12% reduction in allocation compared to the 2001/02 quota period and they are still operating at this reduced level in the current quota period.

Both Placement Quota and Production Permits will be eligible for changes in allocation based on the allotment received from CBHEMA.

The Commission need not make any changes in its allocation procedures since new entrants will be the same in all respects as existing quota holders with the exception that any incentive quota they receive will be subject to the declining transfer assessment schedule.

BCBHEC Submission**FIRB Assessment****2.6 New Entrants**

The Commission proposes a new entrant program with clear application, eligibility and invitation criteria.

The Commission intends to provide a Production Permit equivalent to a notional quota allotment of 10,000 units per quota period. This incentive amount was determined as being required to establish an economically viable farm unit and at the same time avoid problems associated with options that would require the purchase of Placement Quota or involve clawbacks in the future.

Production Permits will be annually renewable subject to the producer:

- Permitting facility audits by the Commission.
- Being in good standing with Commission Orders.
- Being actively engaged in the farm operation.

The Commission allows that holders of Production Permits:

- May purchase additional transferable Placement Quota.
- Will receive adjustments to quota allocation in the same pro rata manner as Placement Quota.
- Must return their Production Permits prior to selling any Placement Quota they might have purchased.

To sustain the incentive Production Permit provided, successful applicants must be actively engaged in the farm operation. Being actively engaged includes:

- Operating the farm for the benefit of the holder;
- Being involved in day to day farm operation, including animal husbandry;
- Being in control of the farm operation;
- Owning, renting or leasing the

The Commission has done a good job developing criteria that require a recipient of incentive quota to be active and engaged in the broiler hatching egg farming business. This is sound and reasonable.

The Commission's proposal is, however, challenged by the size of the incentive offered (10,000 units) and the time it will likely take to accrue sufficient volume in the transfer assessment account to provide an invitation. This has been proposed, in part, to avoid the problems associated with requiring the purchase of quota in order to receive incentive quota (i.e. matching incentive amounts to purchased amounts). Based on reasonably anticipated quota transfer amounts, net of exceptions for direct family, it is unlikely there will be more than one new entrant every three to four years based on transfer assessments making 10,000 units of quota available.

The Commission requires a minimum farm size of 12,000 units, and therefore an incentive of 10,000 units would require the new entrant to purchase 2,000 units of Placement Quota. However, since quota does not usually trade openly it can be difficult for new producers to find quota to purchase regardless of the price. Accordingly, the Commission is proposing to provide an exception in its Orders for new entrants by allowing them to have a minimum farm size of 10,000 quota units compared to the existing regulations of 12,000 units.

It seems reasonable that the 10,000 unit incentive should be revisited by the Commission. It could consider relaxing its minimum farm size for new entrants or re-examining ways quota could be made available for new entrants by transfer. While there is no easy answer, the size of the incentive and the time required to raise sufficient units to provide a new entrant invitation suggest that more thinking should be done concerning how smaller holdings might work in the industry

BCBHEC Submission	FIRB Assessment
<p>facility;</p> <ul style="list-style-type: none"> - Paying for feed and farm supplies; and, - Taking the risk and reward of the operation. 	<p>and how quota might be made available to new entrants.</p>
2.7 New Entrant Eligibility	
<p>Applicants must provide proof of:</p>	<p>The Commission's eligibility criteria are reasonable.</p>
<ul style="list-style-type: none"> - Being 19 years of age; - A genuine intent to be actively engaged in broiler hatching egg production; - Canadian citizenship or permanent residency; - B.C. residency; and, - Not having ever held supply management quota in B.C. 	
<p>Applicants must submit an application with a \$250 non-refundable fee.</p>	
2.8 New Entrant Waiting Lists	
<p>The Board has an established waiting list which will be eliminated.</p>	<p>The Commissions waiting list procedures seem reasonable, with the possible exception of the “economic access” requirement. Is there some reason that a producer cannot enter into a mutually agreeable pick-up of delivery arrangement with a hatchery?</p>
<p>The Board will establish a new Prospective Producer list. The list will be comprised of 10 eligible applicants. Initial population of the list will be provided by the top 10 eligible applicants on the existing waiting list.</p>	
<p>When the list drops below five applicants, the Commission will repopulate the list using a third party to conduct a lottery to choose among prospective applicants to increase the list back to 10 eligible applicants.</p>	
<p>Applicants on the waiting list will lose their position on the waiting list if:</p>	
<ul style="list-style-type: none"> - They are in violation of Commission Orders; - Their personal situation changes such that they are no longer eligible; or, - Legislation changes adversely impact the new entrant program. 	

BCBHEC Submission**FIRB Assessment**

Positions on the waiting list will be required to be renewed annually by completion of a renewal form and a \$100 renewal fee.

Once the Commission has 10,000 units in the new entrant account, it will provide an invitation to the top applicant on the Prospective Producer list.

Within 60 days of being provided an invitation, a producer must demonstrate financial ability to establish a production unit, an economically viable business plan, ability to be in operation within 12 months, and that the proposed unit is within economic access of a licensed hatchery.

2.9 Transfer Assessment

The Commission intends to introduce a transfer assessment equal to 5% of the Placement Quota transferred, except for transfers to immediate family (spouse, child or child and child's spouse) or transfers into a partnership where the partnership interest is proportionate to the Placement Quota contributed by the registered producer.

From a practical perspective, assessments will provide one new entrant for every 200,000 units of placement quota transferred to an arm's length buyer. 200,000 units represent ~11% of the placement quota currently issued. Over the past five years the average annual transfer has been 108,870 units. On this basis, it seems reasonable to forecast that there will be one new entrant every two to three years.

The Commission's 5% direct transfer assessment approach meets the policy principles. Exceptions to assessment should be limited to spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change. From a practical perspective, transfer to a son or daughter, and the exception for transfer to spouses, automatically flows the exception through to a child's spouse.

The Board will need to establish the declining transfer assessment schedule for all quota issued pursuant to the establishment of specialty quota and new entrant quota incentives.

3 Response Summary

FIRB is giving policy direction to the BCBHEC that its specialty and new entrant submission is acceptable subject to the following changes and/or clarifications being reflected in the Board's draft Orders which are to be prepared and submitted to FIRB on or before October 31, 2005:

1. The Commission's position that a specialty program is not required for broiler hatching eggs at this time is accepted subject to the condition that, should designated specialty chicken produced in accordance with the B.C. Chicken Marketing Board regulations require specialty chicks, the Commission should develop and introduce a specialty program.
2. The Commission should issue any new entrant incentive quota as transferable Placement Quota rather than as non-transferable Production Permits as proposed, and this quota should be subject to the declining transfer assessment schedule.
3. The Commission's proposed 10,000 unit incentive should be revisited as being too large.
4. The Commission's proposal to levy a 5% direct transfer assessment on all quota transfer except direct family and business reorganization transfers is acceptable, subject to affirming that exceptions to transfer assessment are limited to spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.

Appendix 2. Response to BCCMB Specialty & New Entrant Submission

This appendix provides an overview of the BCCMB’s specialty and new entrant program submissions at Section 1. This is followed in Section 2 by FIRB’s understanding and analysis of the Board’s submission. Finally, Section 3 provides FIRB’s response to the Board’s Specialty and New Entrant Submission.

1 Synopsis of BCCMB Submission

1. Specialty chicken, defined as Asian, organic and SPCA, represents approximately 3% of the B.C. chicken market. Asian chicken is the largest specialty segment. This production is managed through a permit system.
2. The Board proposes to offer existing permittees a menu of conversion options that have the potential to double the production of specialty chicken in B.C. over the next few years.
3. The Board has urged FIRB and the MAL to address on-farm food safety regulatory authority and administrative approaches.
4. The Board’s proposal protects the interests of existing quota producers and encourages specialty production through the permit conversion and new entrant plans.

2 Analysis of BCCMB Submission

In this section the Board’s specialty and new entrant proposals are assessed by comparing them with FIRB’s policy principles for specialty and new entrant programs based on FIRB’s general understanding of the Board’s submission or position.

BCCMB Submission	FIRB Assessment
<p>2.1. The Market</p> <p>B.C.’s chicken industry operates within a national chicken market. In 2004 approximately 148 million kg (eviscerated weight) of chicken was grown in B.C., representing about 14% of Canadian chicken production.</p> <p>97% of B.C. production is mainstream chicken. The balance, or 3%, is comprised of 80% Asian specialty and 20% other specialties such as organic and S.P.C.A.</p> <p>The market is growing at 2-3% per year, and the Board expects this rate of growth to continue for the foreseeable future.</p> <p>There are four mainstream processors and four specialty processors in B.C.</p>	<p>In 2004 the Board commissioned Serecon to study B.C.’s specialty chicken markets, and the report was released in the fall of 2004. The Board has worked to understand specialty markets and recognizes they are growing.</p> <p>The Board needs to develop tools for monitoring the development and growth of specialty markets moving forward.</p>

BCCMB Submission	FIRB Assessment
<p>B.C. producers and processors take full advantage of the Chicken Farmers of Canada's (CFC) export program, and the industry currently represents roughly 40% of Canadian chicken exports.</p>	
<p>2.2. Definitions</p>	
<p>Specialty chicken is defined as chicken that is differentiated from mainstream chicken by having unique farm-based attributes which are preserved and traceable to the consumer, and which are marketed, represented and certified as a defined specialty.</p>	<p>Certified organic and Asian chicken have developed as clear market segments and warrant being designated as specialty classes.</p>
<p>The Board intends initially to recognize certified organic, SPCA, Asian, and pure bred heritage breeds as designated specialty classes. The Board does not recognize dietary or medication changes alone as qualifying for specialty designation.</p>	<p>It is unclear from the documentation that SPCA certified chicken is a sustainable market segment enjoying market price premiums and repeat customer buying. It is also unclear whether SPCA production is substantively different than mainstream production. SPCA should be recognized as an innovation class of production until such time as it can demonstrate sustainable market demand. This can be accommodated through the small flock program until sustainable market demand can be better established.</p>
<p>2.3. Certification</p>	
<p>Designated specialty classes will require third party certification of specialty production and marketing. Certification status and production and marketing reports will be required to be submitted annually upon license renewal. Certification plans will be required to be operated in accordance with the <i>Agri-Food Choice and Quality Act (AFCQA)</i> standards, or generally recognized national or international accreditation organizations.</p>	<p>Certification requirements appear to be adequately considered. They are based on competent third party certification and provide that certifiers will also be third party accredited.</p>
<p>Loss of certification requires immediate Board notification and submission of a plan for re-establishing certification. Lack of certification for >6 months and/or an unacceptable action plan to re-establish certification may result in revocation of specialty production rights.</p>	<p>The Board does not thoroughly address certification of Asian specialty chicken. The Board should establish procedures with Asian specialty producers and processors to ensure that purported Asian specialty production is not simply a quota dodge.</p>
<p>2.4. Food Safety</p>	
<p>All production, regardless of class or type of license, will be required to meet OFFSAP guidelines as applicable. OFFSAP</p>	<p>The Board will need to work with specialty producers, and possibly the Specialty Markets Advisory Committee, to ensure that</p>

BCCMB Submission	FIRB Assessment
<p>guidelines for small lots are felt to need additional work to be practical for smaller operations.</p>	<p>the on-farm food safety programs developed for specialty classes are appropriate for those classes of production.</p>
<p>All chicken offered for sale to the public is required to be slaughtered in accordance with provincial and/or federal meat inspection regulations.</p>	<p>There is a need for government to clarify Board authority regarding the requirement that all producers follow OFFSAP as a condition of licensing.</p>
<p>2.5. Biosecurity</p>	
<p>All production, specialty and mainstream, will be subject to biosecurity audits as applicable.</p>	<p>The Board will need to work with the Specialty Markets Advisory Committee and specialty producers, perhaps through the certifying agencies, to develop biosecurity protocols appropriate to the different classes of production.</p>
<p>The Board intends to work with certifying agencies to achieve biosecurity compliance.</p>	
<p>2.6. Registration</p>	
<p>All persons producing chicken for sale are required to be registered with the Board and are subject to the Scheme and Orders. The Board registers all producers by way of an annually renewable license. License fees are currently \$20/year, and only one license will be issued per property.</p>	<p>The Board will have multiple license types covering different classes of production and size of operation. The Board recognizes there will be logistic difficulties achieving 100% registration, particularly of production at or below the personal exemption level of 200 chickens. From a practical perspective, it seems reasonable to establish a minimum production level below which registration is encouraged but voluntary.</p>
<p>Specialty producers will be required to provide confirmation of certification together with specialty production and marketing records for the prior year as part of annual license renewal.</p>	
<p>2.7. Quota</p>	
<p>The Board presently has several classes of quota, including primary, transitional, and faint hope (collectively called “regular” here), and permits. The Board limits the amount of quota that may be held by a registered producer to 250,000 units of quota, referred to as the maximum farm size.</p>	<p>The Board’s intent to create specialty quota classes to manage designated specialty production and marketing is appropriate.</p>
<p>The Board intends to create new quota classes for specialty chicken. Specialty quota will originate from the conversion of the existing permit program and through new entrant quota issuance.</p>	<p>The Board should develop rules for specialty quota that reflect similar principles to those underpinning primary quota while at the same time recognizing the unique characteristics of specialty production and marketing. For instance, different production cycles are recognized by providing for annualized production.</p>
<p>Regular quota will be eligible to produce any class of chicken, including specialty chicken upon approval of the Board.</p>	<p>The Board should apply the principle of reciprocity in establishing rules by which one class of quota is permitted to</p>

BCCMB Submission	FIRB Assessment
<p>Specialty quota will only be eligible to produce the designated class for which it is issued, and it may be annualized while regular quota must be produced within the standard eight week cycles.</p> <p>Quotas may be transferable or non-transferable. Non-transferable quotas may not be leased, may not be transferred, except within immediate families, and may be subject to regional prioritization through the new entrant program.</p>	<p>temporarily switch its production to another class.</p>
<p>2.8. Quota Transferability</p>	
<p>Quota will only be transferable, where applicable, within its class.</p> <p>The Board intends that all quota issued through the new entrant program or through conversion of the existing permit system, at no extra cost to the entrant, will be non-transferable except within immediate families. Immediate family is defined as spouse, son, daughter, grandson, or granddaughter.</p> <p>All non-transferable quota reverts to the Board upon not being used by the original holder, or their immediate family, and will be redistributed through the new entrant program.</p> <p>Section 42 of the Orders provides for quota to be transferred to a new premises owned by the quota holder.</p>	<p>FIRB's policy principles direct that all quota is to be transferable and subject to transfer assessment. Therefore, specialty quota and new entrant quota incentives need to be transferable just as regular quota is transferable.</p>
<p>2.9. Quota Transfer Assessments</p>	
<p>The Board is proposing to calculate a deemed transfer assessment based on 5% of the three year moving average of all quota transfers. All transfers, with no exceptions, will be included in the three year moving average. Each year the deemed assessment will be placed into a new entrant account for distribution to eligible new entrants on the waiting list.</p> <p>The deemed assessment amount will be deducted from the provincial allocation received from CFC, and will be made available regardless of the level of industry growth experienced in any year.</p>	<p>The Board's deemed assessment proposal is different from the direct transfer assessment in that all remaining producers share the cost of funding the assessment under a deemed assessment approach while only the departing producer incurs the assessment under a direct approach. FIRB understands the Board has general support from producers for the deemed assessment approach. Therefore, it will be acceptable to FIRB for all quota existing prior to the establishment of specialty and new entrant incentive quotas subject to it being put in place for a minimum of three years, that there be no</p>

BCCMB Submission	FIRB Assessment
	<p>transfers left out of the calculation, and that the amount assessed being made available regardless of changes in the provincial allocation.</p> <p>The Board will need to establish the declining transfer assessment schedule for all quota issued pursuant to the establishment of specialty quota and new entrant quota incentives. The only exception to the declining assessment schedule should be to direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.</p>
<p>2.10. Exemptions</p> <p>Personal use exemptions will be maintained at the current level of 200 birds/year. This amount is considered sufficient for personal use and is not intended to be production for sale to third parties.</p> <p>The Board proposes to issue Permits for up to 3,000 kg for small lot growers (See Section 2.14).</p> <p>Spent fowl is currently exempted from the Board's policies and procedures.</p>	<p>It is acceptable to retain the personal use exemption level on the basis that a small flock program is proposed (see Section 2.14).</p>
<p>2.11. Allocation</p> <p>The Board receives a provincial allocation from CFC for every eight week period. The Board intends to honour and meet its obligations as a signatory to the FPA for Chicken.</p> <p>All classes of quota, regular and specialty, transferable and non-transferable, will be eligible for pro rata growth within their class based on increases in the provincial allocation received from CFC, subject to the producer having adequate barn space. The Board recognizes there may be differential market demand for different classes of product. Allocations for specialty classes will be based, in part, on recommendations from the(Specialty Products Advisory Committee) SPAC.</p>	<p>The Board needs to work within the constraints of the National Allocation system. If there are shortfalls in provincial allocation available to meet continued growth of B.C.'s specialty markets, the Board should work with FIRB and provincial Government to seek change to the National Allocation procedures.</p> <p>Allocation received from CFC should be split among the different accounts for each designated class of quota based on the market growth experienced and projected in each class. Allocation of amounts in a quota account should be distributed pro rata among quota holders in the designated class.</p> <p>Since it is not possible to produce and</p>

BCCMB Submission	FIRB Assessment
<p>All classes of quota will be eligible for Market Development allocation in accordance with Part 28 of the Orders.</p>	<p>market precise weights, the Board should consider a production sleeve on a periodic or annual basis when reconciling specialty quota production.</p>
<p>The Board intends to provide for near term specialty market growth by encouraging existing permittees to choose receipt of specialty quota at a rate of 150% of permit volumes compared to primary quota at 100%, and by giving priority to specialty new entrants based on processor demand.</p>	<p>The Board should work to ensure that the export procedures under the Market Development program do not constrain export growth in Asian specialty production and marketing.</p>
<p>Quota issued pursuant to the 150% conversion incentive will be allocated at a percentage of the amount issued to manage growth in production in response to market demand.</p>	<p>The Board should work with the Specialty Markets Advisory Committee to ensure that growth in allocation to specialty quota pursuant to the 150% incentive provided upon program establishment is managed and does not, to the extent possible, result in short term surpluses and disorderly markets.</p>
2.12. Product Integrity	<p>The Board needs to work with the Specialty Markets Advisory Committee to establish procedures for estimating specialty market needs and ensuring these needs are appropriately considered in the national allocation process so that sustainable allocation can be provided to specialty production.</p>
<p>Specialty products will not be permitted to be shipped as another class of product except under exceptional circumstances and then only with the prior approval of the Board. If approved by the Board, chicken produced under specialty quota and shipped as mainstream product may be subject to penalties and costs.</p>	<p>The requirement to market specialty chicken as specialty requires consideration of marketing chicken cuts. It seems reasonable that cuts from specialty chicken could easily be marketed as mainstream chicken. The Board needs to consider how specialty marketing requirements apply to specialty cuts.</p>
<p>All production and marketing is subject to inspection and audit by the Board.</p>	<p>The Board should establish the penalties for shipping product outside a class, and the Board may wish to consider applying penalties progressively whereby repeat offences incur increasing levels of penalty.</p>
2.13. Production Switching	
<p>Holders of regular quota may apply to the Board to switch production to a designated specialty class by providing evidence of market demand.</p>	<p>Quota holders should be restricted from shifting their production between designated product classes except under exceptional circumstances. This means the rules by which regular quota may produce specialty chicken should be</p>
<p>Holders of specialty quota may only</p>	

BCCMB Submission	FIRB Assessment
<p>produce the specialty product assigned to that quota.</p>	<p>applied reciprocally except as required to maintain product and market integrity.</p>
<p>2.14. Permits</p> <p>The Board is proposing to suspend its existing permit program, which was established in 2000, establish a new permit program for small lot growers, and will consider innovation permits as required for new product/market initiatives.</p> <p><u>Small Lot Grower Permits (Permits)</u></p> <p>The Board proposes to establish annually renewable Permits to grow up to 3,000 kg/yr of chicken, subject to the following terms and conditions:</p> <ul style="list-style-type: none"> - Permittees must be licensed with the Board; - Permits will be issued and renewable annually; - Only one permit will be issued per property; - Placements and shipments must be reported to the Board; - Production must comply with applicable OFFSAP, biosecurity and meat inspection regulations and guidelines; - There will be no levies; - Permittees will not be listed on the Register of Growers and will not be eligible to vote; and, - Permits will be non-transferable. <p>While the Board intends to issue Permits upon application, it reserves the right to limit the number of permits issued.</p> <p>Amounts produced under Permits will not count against the provincial allocation.</p>	<p>The Board's small flock permit program is a reasonable approach for managing small lot production within the regulated system.</p> <p>The maximum level of 3,000 kg seems reasonable at this time. The Board will need to assess whether the 3,000 kg level is adequate upon review of program performance after three years.</p> <p>Since the small lot program will also be used for innovation and heritage breed permits, the Board needs to reserve the ability to issue amounts greater than 3,000 kg for innovation and maintenance of heritage breeds based on the merits of each individual application.</p> <p>Some specialty chicken has different processing yields compared to mainstream chicken. The Board may need to review permit levels for specialty breeds having lower yields. This is a matter that could be directed to the Specialty Markets Advisory Committee.</p>
<p>2.15. Permit Conversion</p> <p>The Board currently has a Permit program which was established in 2000 to meet specialty market demand. This program was originally funded with a special allocation of 929,000 kg from CFC. At Jan 2005, approximately 518,187 kg was permitted for specialty chicken and 343,641 kg was permitted for non-specialty chicken.</p>	<p>FIRB's policy principles require that all quota be transferable which will cause the Board's permit conversion proposal to be changed.</p> <p>It is necessary that the Board reconsider its permit conversion proposal in light of this change.</p>

BCCMB Submission

FIRB Assessment

The Board intends to provide permittees several options regarding the balance of their permit contracts. The Board does not intend to issue any further permits, and will replace this permit program with the specialty new entrant program.

Permit 2000

Permits issued in accordance with the 2000 permit program will be called Permit 2000 permittees.

For permittees producing regular broilers there will be two options:

- Continue on with the existing terms and conditions of the 12 year program, including paying monthly permit fees, and receive primary quota at the end of the program.
- Elect to receive non-transferable regular broiler quota, continue to meet all other terms and conditions of the agreement, and be reimbursed for all permit fees, less GST, marketing levies, license fees and over marketing levies paid to date.

For permittees producing specialty broilers there will be three options:

- Continue on with the existing terms and conditions of the 12 year program, including paying monthly permit fees and continuing to supply specialty product as contracted, and receive primary quota at the end of the program.
- Elect to be declared as a specialty producer, continue on with the existing terms and conditions of the 12 year program, including paying monthly permit fees, and receive permits for up to 150% of the original permit amount. At the end of the 12 year program, the permit amounts will be issued as transferable specialty quota.
- Elect to be declared as a specialty

BCCMB Submission	FIRB Assessment
<p>producer and receive non-transferable specialty quota at 150% of the original permit amount, and be reimbursed for all permit fees, less GST, marketing levies, license fees and over marketing levies paid to date.</p>	
<p>The amount of specialty quota issued, both transferable and non-transferable, will depend upon the elections made by permittees. If none elect the 150% options the amount of specialty quota will be 518,187 kg/cycle and if all elect the 150% options the amount of specialty quota will be 777,280 kg/cycle.</p>	
<p>2.16. Pricing</p>	
<p>Board ordered minimum price(s) in effect at the time of shipment will apply to all classes of chicken. The Board will consider new minimum price categories for specialty product as recommended to the Board by the SPAC.</p>	<p>The Board should charge the Specialty Markets Advisory Committee with monitoring market prices and recommending if, when and how specialty prices should be established in the future.</p>
<p>2.17. Levies</p>	
<p>Marketing levies and license fees will apply to all classes of quota and production.</p>	<p>The Board may wish to examine different levies for different quota classes to the extent that special or extra services are required by that quota class.</p>
<p>Over/under marketing sleeves, levies and penalties will apply to all classes of quota on the same basis.</p>	<p>FIRB's policy principles require that specialty permit levies be terminated. Subject to Board discretion, levies due and owing by permittees to the Board should be collected from each permittee prior to permit conversion.</p>
<p>Permit fees will be retained in those cases where existing permittees choose to continue on the current program and obtain a transferable quota at the conclusion of the 12 year period (see Permit 2000 options).</p>	
<p>2.18. New Entrants</p>	
<p>The Board proposes to establish a new entrant program. The new entrant program will be used to meet specialty market demand as identified by specialty processors and provide opportunities for producers wishing to enter the chicken industry.</p>	<p>The Board's new entrant program provides a defined process for determining quota available for distribution to new entrants and establishes a quota incentive of 4,000 units (or 7,716 kg) per cycle. This should fill many specialty and regional market needs, and provide a significant incentive for mainstream new entrants.</p>
<p>The new entrant program will provide successful applicants with incentive quota up to 7,716 kg/cycle, either as specialty or</p>	<p>Quota amounts offered as a new entrant incentive will need to be transferable and</p>

BCCMB Submission	FIRB Assessment
<p>regular quota depending upon market needs. All incentive amounts issued pursuant to the new entrant program will be non-transferable, except to immediate family. New entrants seeking to grow above 7,716 kg/cycle will require regular quota for the additional production volumes.</p> <p>Quota to fund the new entrant program will come from the provincial allocation received from CFC, and will be calculated based on the deemed assessment on transfers. For 2005, the pool will be 77,301 kg/period (~40,000 units). In future, amounts of non-transferable quota returned to the Board will also be added to the new entrant pool for redistribution to new entrants.</p> <p>The Board recognizes that it may need to offer more specialty than regular new entrant opportunities at the start to fill current demand.</p> <p>For specialty new entrants, the Board recognizes the need to provide the necessary time for a grower to achieve certification, and it will make the necessary accommodations.</p>	<p>subject to the declining transfer assessment schedule.</p> <p>The Board's proposal to provide new entrant opportunities based on specialty processor and regional market demand is reasonable.</p>
<p>2.19. New Entrant Eligibility</p>	<p>The Board's eligibility criteria are reasonable, with the possible exception that excluding individuals who have had interests in supply management in other regions of the country may not be enforceable. The Board should ensure it places reasonable requirements on new entrants to be actively engaged in the production and marketing of chicken.</p>
<p>2.20. New Entrant Waiting Lists</p>	<p>The Board's waiting list procedures seem reasonable for establishing the program. They should be reviewed after three years to ensure they are working as intended.</p> <p>The Board should consider, in advance, how it will balance the different priorities proposed.</p> <p>Successful applicants should, in addition to the criteria established by the Board, be</p>

BCCMB Submission	FIRB Assessment
<p>Replenishing the waiting list will include advertisement, receipt of applications, and performing a lottery draw of the number of names required to bring the list back to 10. All applicants not selected in the lottery will have their applications returned and will be eligible to re-apply for the next draw.</p>	<p>required to enter into an undertaking to be actively engaged in the management and daily operation of the farm business</p>
<p>Waiting lists will be posted on the BCCMB website.</p>	
<p>Upon determining that sufficient quota is available to offer new entrant opportunities, the Board will establish the market needs based on specialty and regional market needs, new innovations, and small lot grower permittees converting to new entrants. The Board reserves the right to give priority in offering new entrant spots when they are available, and there will only be one successful applicant permitted per property and/or family.</p>	
<p>Successful applicants will be required to demonstrate commitment and intent by submitting a refundable \$5,000 application fee and viable business plan, providing proof of land ownership, undertaking to meet OFFSAP, biosecurity, meat inspection, and certification (if applicable) protocols, and demonstrating ability to be in operation within 12 months.</p>	
<p>All waiting list procedures will be overseen by the Board's auditors.</p>	
<p>2.21. Representation</p>	
<p>Only growers listed on the "Register of Growers" will be eligible to vote at BC Chicken Growers Association (BCCGA) meetings or for election as Board members. Small lot growers (Permit growers) will not be listed on the Register of Growers.</p>	<p>The Board's approach that all quota holders vote is reasonable. If, however, it is considered appropriate that all producers regardless of type of license be eligible to vote, the Board should consider establishing either a double hurdle or a one vote/quota unit voting system. A double hurdle would require a majority of both producers and production volume for a decision.</p>
<p>The Board will constitute a Specialty Products Advisory Committee. The Committee will initially be comprised of three specialty processors, three specialty producers, and an independent Chair, appointed by the Board, and others will be added as deemed appropriate by the SPAC.</p>	<p>The Board's proposed composition of a Specialty Markets Advisory Committee is reasonable except that it should add one Board member to the Committee. The Board should leave the composition of the</p>

BCCMB Submission	FIRB Assessment
2.22. Transparency	<p>Committee at eight for at least one year.</p> <p>The Board should charge the Committee with developing terms of reference for monitoring specialty markets and providing the Board with policy recommendations concerning specialty production and marketing.</p>
<p>The Board intends that new entrant application procedures be administered by the external auditor.</p> <p>Information is posted on the website.</p>	<p>The Board has committed to a number of procedures to ensure independence and transparency including an independent Chair on the Advisory Committee, utilizing a third party to manage the new entrant procedures and its willingness to work with specialty producers to adapt on-farm food safety and biosecurity protocols for specialty production.</p>

3 Response Summary

FIRB is giving policy direction to the BCCMB that its specialty and new entrant submission is acceptable subject to the following changes and/or clarifications being reflected in the Board's draft Orders which are to be prepared and submitted to FIRB on or before October 31, 2005:

1. The Board should continue to develop its understanding of B.C.'s specialty markets, and should rely on a Specialty Markets Advisory Committee (see pt. 18) to assist in this endeavour.
2. Certified Organic and Asian chicken should be designated as specialty classes at this time.
3. The criteria for designating new specialty classes in the future should be reviewed by the Specialty Markets Advisory Committee, and any changes considered appropriate should be recommended by the Committee to the Board.
4. The Board, working with the Specialty Markets Advisory Committee, needs to establish procedures to ensure the integrity of Asian specialty chicken production where a certification protocol is not currently available.
5. The Board should work with specialty producers to adapt on-farm food safety and biosecurity guidelines so that they are appropriate for the different classes of production.
6. Quota administration procedures should clearly indicate where policies are uniform across all classes of production, and where policies vary to respect the unique requirements of individual classes of production.
7. Quota holders should not be permitted to switch their production between designated classes. To the extent that switching is required for certain extraordinary circumstances, the same rules should be applied reciprocally to all classes of quota.
8. All quota should be transferable.

9. The Board's proposed deemed 5% assessment based on the three year moving average of all regular quota transfers should be implemented. This approach should be followed for a minimum of three years before any changes are contemplated.
10. Transfer assessment on all specialty and new entrant incentive quota issued by the Board to permittees and new entrants should be subject to the declining transfer assessment schedule. The start date for the assessment schedule should be the original permit date or the date of issuance of additional quota amounts. The only exception to direct assessment of quota received as an incentive should be for transfers among direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.
11. Allocation procedures should seek to meet specialty processor needs in the same manner as mainstream processor needs are currently established and put into the national allocation process.
12. Allocation received from CFC should be distributed among the different classes of quota recognizing differential growth between designated market segments.
13. Allocation to specialty quota holders should be pro rata to specialty quota holding.
14. Product should not be marketed outside its class without prior approval of the Board. The Board should develop progressive penalties whereby repeated requests to market outside a class for production reasons incur increasing penalties: authorizing switching to meet market needs should not normally be permitted as this should be covered through allocation procedures.
15. The Board's small lot program should be established and used to facilitate small flocks, heritage breeds and innovation requests. The amounts produced under the small flock program should not accrue against the provincial allocation. The Board should exercise discretion in providing for greater than 3,000 kg/yr in heritage breed and innovation situations based on the merit of each individual case.
16. Existing permits should be converted to either primary or specialty quota. Subject to Board discretion, all levies payable to the date of permit conversion should be paid by permittees. Special permit levies should be terminated upon conversion of the permit to quota.
17. The Board should charge the Specialty Markets Advisory Committee with monitoring market prices and advising the Board concerning the effectiveness of the single minimum regulated price.
18. All producers should be subject to the same levies at the present time. In the future, the Board may wish to examine the feasibility of differential levies for each class based on the costs of providing certain services to one class of production that are not required by another class.
19. The Board's new entrant program is acceptable subject to the Board ensuring that successful applicants are required to be actively engaged in both the management and operation of the farm. The Board should also carefully review how it will balance the priorities established for making new entry invitations.
20. The Board's proposed Specialty Markets Advisory Committee structure comprised of an equal number of specialty producers and specialty processors plus an independent Chair appointed by the Board is acceptable except that the Board should also delegate one Board member to sit on the Committee. The Board should establish clear terms of reference for the Committee.

Appendix 3. Response to BCEMB Specialty & New Entrant Submission

This appendix provides an overview of the BCEMB's specialty and new entrant program submissions at Section 1. This is followed in Section 2 by FIRB's understanding and analysis of the Board's submission. Finally, Section 3 provides FIRB's response to the Board's Specialty and New Entrant Submission.

1 Synopsis of BCEMB Submission

1. The table egg market in B.C. is segmented. The Board estimates 15% of the table egg market is comprised of specialty eggs which it has generally defined as eggs other than those produced by caged layers.
2. The Board will meet specialty market demand by converting existing permittees to a new specialty program, exercising priorities in the proposed new entrant program, levying transfer assessments on regular quota transfers, allocating incremental Canadian Egg Marketing Agency (CEMA) allocations based on market demand, and redistributing non-transferable quota returned to the Board in accordance with program rules.
3. The Board's proposal provides for growth of designated specialty egg production from 2.5% to 4.3% of total B.C. production. This growth will come from distribution of amounts available in the Market Response Allocation Pool (MRAP) to existing permittees.
4. The Board will designate quota as being either regular (unrestricted) or specialty (restricted).
5. The Board intends to convert all existing permittees to a new program that eliminates clawbacks and special levies.

2 Analysis of BCEMB Submission

In this section the Board's specialty and new entrant proposals are assessed by comparing them with FIRB's policy principles for specialty and new entrant programs based on FIRB's general understanding of the Board's submission or position.

BCEMB Submission	FIRB Assessment
<p>2.1. The Market</p> <p>BCEMB estimates the market for table eggs in B.C. to be 60 million dozen. This market is already well segmented with a number of product types including white cage, brown cage, certified organic, free range, free run, veggie diet, and diet enhanced eggs.</p> <p>The BCEMB felt the major market channels were reasonably in balance in early 2005, with the possible exception of need for an additional 5,000 organic layers.</p>	<p>Some specialty producers and the Board have said the market is currently oversupplied with specialty eggs while others have suggested the market is short. The Hart Report (October 2003) suggested up to 50,000 additional specialty layers were required to meet B.C. specialty market needs.</p> <p>Clearly the number of specialty layers required to meet B.C. specialty market needs has changed since October 2003, specialty production has been impacted by avian influenza depopulation and repopulation</p>

BCEMB Submission	FIRB Assessment
	<p>timing, and there is a lack of consensus among producers concerning market needs. It seems market needs vary based on differing market perspectives and time.</p> <p>The Board should find ways to improve its knowledge and understanding of specialty egg market needs, and it should also examine ways to better communicate market conditions to producers.</p>
<p>2.2. Definitions</p> <p>To be designated as a specialty egg, the product must have:</p> <ul style="list-style-type: none"> - An unfilled market demand; - Substantive farm based differentiation; - Farm-based attributes consumers seek; - Identify preservation of the attributes; - Extra on-farm effort and investment in production; - A significant price premium in the market; and, - An established third party certification plan. <p>The Board recognizes certified organic eggs as meeting the criteria to be designated as a specialty at this time. The Board may recognize additional products to be designated as specialty in the future subject to the above criteria and certification. The Board will not recognize as designated specialty eggs those produced by changing only feed or genetics.</p>	<p>The Board has included price premiums and unfilled market demand as criteria for designating a specialty class of eggs. This presumes the segment exists and is clearly identified and targeted by marketers and producers, which appears to be the case in the table egg market.</p> <p>The Board proposes to designate organic eggs as a specialty egg. The Board also intends to designate additional types of eggs as specialty eggs in the future, provided they can meet the designation criteria and certification.</p>
<p>2.3. Certification</p> <p>Certification of specialty attributes as per the definition of the designated specialty egg is to be provided by an accredited third party certifier. Certifiers must be established under the Agri-Food Choice and Quality Act (AFCQA), a nationally or internationally recognized agency, or other standards acceptable to the Board.</p> <p>BCEMB auditors will be expected to audit the certification status of individual specialty producers from time to time.</p>	<p>The Board should be very careful setting its own standards for approving a certifying agency rather than relying on provincial or national standards. In essence, the Board would be setting itself up as an accreditor of certifiers, an activity for which it is not likely skilled.</p> <p>Providing proof of certification should be part of annual licensing for all specialty producers, and the BCEMB needs to be able to verify the authenticity of certification as necessary.</p>

BCEMB Submission	FIRB Assessment
<p>The BCEMB will require that specialty producers losing certification immediately advise the Board and provide plans to correct the deficiencies and re-establish certification. Failure to re-establish certification within two flocks may result in retraction of non-transferable specialty quota.</p>	
<p>2.4. Food safety</p>	
<p>The Board recommends producers follow the CEMA food safety program as set down in the “<i>Start Clean Stay Clean HACCP-based On-farm Food Safety Program for Shell Egg Production and Spent Hens in Canada.</i>”</p> <p>The Board requires that all eggs sold to the public must comply with approved government food safety protocols.</p> <p>For <u>Certified Small Flock Program (CSFP)</u> flocks (see Section 2.14), the Board will consider permitting organic certifiers to attest to on-farm food safety standards provided the certifier meets the on-farm food safety training requirements of the Board.</p>	<p>The Board is proposing to work with specialty egg producers to ensure all producers do their part in contributing to food safety. To do this the Board should work with producers to adapt the on-farm food safety standards, which have been established primarily for larger production facilities, so they are appropriate for smaller scale production. This could be a task delegated to the Specialty Markets Advisory Committee by the Board.</p>
<p>2.5. Biosecurity</p>	
<p>The Board recommends all producers follow the “<i>B.C. Poultry Industry Biosecurity Initiative,</i>” and it requires that all producers meet any government approved biosecurity standards.</p> <p>For CSFP flocks, the Board will consider permitting organic certifiers to attest to biosecurity standards provided the certifier meets the training requirements of the Board.</p>	<p>The Board is proposing to work with specialty egg producers to ensure all producers do their part contributing to industry biosecurity. To do this, the Board may wish to consider tasking the Specialty Markets Advisory Committee to recommend biosecurity protocols appropriate for specialty egg production.</p>
<p>2.6. Registration</p>	
<p>The Board intends that all producers of eggs, regardless of size of operation, should be recorded with the Board.</p> <p>CSFP permittees will be required to confirm COABC status and flock size upon permit renewal.</p> <p>The Board believes establishing and maintaining a record of all producers is not possible without substantial assistance from BCMAL.</p>	<p>The Board makes a clear distinction between registration and recording whereby recording means the producer is known to the Board while registration is associated with production licenses, quota and voting protocols.</p> <p>The Board will have a challenge recording many small producers operating below the personal exemption level for both logistic and perceptual reasons. First, it will be difficult to identify or find all small egg producers, and</p>

BCEMB Submission	FIRB Assessment
	<p>second some small producers are strongly opposed to becoming subject to Board authorities simply to produce a few dozen eggs a week.</p> <p>The Board may wish to consider some web-based or electronic ways of delivering general production and market information to small producers in response for registration. This presumes that the Board sees value in registering and trying to mitigate risk by making production and market information broadly available on a low cost basis.</p> <p>In any event, the Board should work closely with government to find an acceptable and cost effective means to achieve full registration of all egg producers.</p>
<p>2.7. Quota</p> <p>The Board will have two quota designations: regular quota which is unrestricted and specialty quota which is restricted in terms of the eggs that can be produced. Regular quota may be used to produce any class of product, including designated specialty eggs. Specialty quota may only be used for the production of specialty eggs and will remain as specialty quota. Specialty quota will originate from the conversion of existing TRLQ and Specialty Permittees, and by the issuance of specialty quota to future new entrants.</p> <p>The Board recognizes one of the criticisms of the previous programs has been the inability of permittees to access quota in the event they seek to acquire regular quota. The Board is seeking approval from FIRB to sell quota to new entrants at a reduced market value to assist entrants increase their production above the incentive amounts proposed to be provided.</p> <p>The Board also intends to strengthen the existing quota exchange (QE) to provide for greater volumes of quota to be transferred through the exchange, and it intends to provide priority access to the QE to new entrants. Quota transfers will be required to be transacted through the QE except full farm transfers, in-family transfers, name changes, and merges and splits of quota. For practical</p>	<p>The Board intends to have only one class of specialty (restricted) quota for the management of all types of designated specialty eggs. The Board has taken a position against having different classes of specialty egg quota, preferring instead to issue a specialty quota having restrictions on, among other things, what types of eggs may be produced. This position appears to intend that different types of specialty eggs are freely interchangeable among themselves for the purposes of managing production and marketing.</p> <p>By declining to consider different specialty classes, the Board will need to develop policies and procedures for specialty quota recognizing that quota rights span a number of designated specialty eggs. The Board and the Specialty Markets Advisory Committee should carefully consider if, and how, this position may contribute to disorder in specialty egg markets.</p> <p>The Board intends to authorize regular quota holders to produce any class of egg, while specialty quota holders will only be authorized to produce certain classes of eggs. This position violates the principle of reciprocity.</p> <p>Providing for greater quota access through the QE is sound in principle. However, in practical terms it is likely that the only</p>

BCEMB Submission	FIRB Assessment
<p>purposes, only arm's length transfers of quota not tied to a facility will be through the QE.</p>	<p>transfers through the QE will likely be arm's length, partial quota transfers since full farm transfers may be excluded. Whether this will provide any meaningful volume for the QE is unknown. It is also unclear how the Board will manage first order priority being provided to new entrants, particularly if there is a bid process. Considerably more detail is required to determine if the QE has the potential to improve the availability of quota for specialty new entrants.</p> <p>The Board's request for approval to sell quota would appear to require that government change its view that quota has no value. The fact is that while producers exchange money upon the transfer of quota from one to another, the Board does not get involved in the financial parts of the transfer. Since there is no evidence that government is prepared to consider changing its view that quota has no value, FIRB is not prepared to approve the BCEMB selling quota.</p>
<p>2.8. Quota Transferability</p> <p>Specialty quota must be transferred as specialty quota, and regular quota must be transferred as regular quota.</p> <p>The Board intends all new entrant incentive quota will be non-transferable in perpetuity except for a one time transfer to the adult children of the non-transferable quota holder.</p> <p>A holder of non-transferable quota will have this quota retracted should they sell transferable quota they have previously purchased.</p>	<p>FIRB's policy principles require that all quota be transferable. The Board's proposal that quota issued by the Board to new entrants would be non-transferable does not conform to these principles. The Board will need to establish that specialty quota will be transferable.</p> <p>The Board intends that quota only be transferred within its class, not between classes. This conforms to FIRB's policy principles.</p>
<p>2.9. Transfer Assessments</p> <p>The BCEMB currently levies a 5% transfer assessment on quota transfers subject to exceptions for full farm, family, name change, merger and quota split transfers. The Board proposes to remove the exception for full farm transfers, and also to provide an exception for new entrants selling purchased transferable quota if their total quota holdings are less than 5,000 units. For practical purposes, only arm's length transfers will be subject to transfer assessment.</p>	<p>The Board's proposal is to continue with a 5% assessment while making changes to remove the exception for full farm transfers. This will conform to FIRB's policy principles.</p> <p>Exceptions to transfer assessment will need to be limited transfers among direct family members defined as spouse, sons, and daughters; and for business reorganization where the quota ownership percentages do not change.</p>

BCEMB Submission	FIRB Assessment
	<p>The Board will need to institute a declining transfer assessment schedule for all specialty quota issued and for any quota incentives provided through the new entrant program.</p>
<p>2.10. Exemptions</p>	
<p>The BCEMB proposes to retain the existing “personal use” 99 layer exemption level. The Board proposes that heritage breed producers may be provided an exemption for >99 layers if it can be shown that <100 is inadequate to sustain the heritage flock.</p>	<p>The Board’s current 99 layer exemption level can provide far more egg production than is required for “personal use”. Clearly, many producers operating at <100 layers must be marketing eggs in some fashion.</p>
<p>The Board intends to introduce a Certified Small Flock Program for COABC certified organic producers. This program will be capped at a total of 10,000 layers.</p>	<p>The CSFP is aimed at smaller producers of certified organic eggs. This will provide for licensing of these producers without them being required to hold quota for amounts less than a certain number. However, the Board’s proposal to limit eligibility to COABC producers is not reasonable. Any certified producers of a designated specialty egg should be eligible for the CSFP.</p>
	<p>The Board’s CSFP is a reasonable approach for managing small lot production greater than the “personal use” exemption level and less than the new entrant quota incentive levels. Whether the cap of 399 layers per permit is the correct level for small lot production, and whether the 10,000 layer account established to fund these permits is adequate to meet demand, are unknown. It seems reasonable that experience over the next couple years will help assess these limits.</p>
<p>2.11. Allocation</p>	
<p>BCEMB is constrained in provincial allocation availability due to CEMA policies, including its practice of taking all unregistered layers identified in Census reports and deducting this volume from B.C.’s allocation. The Board intends to seek additional allocation from CEMA for specialty and new entrant programs.</p>	<p>The Board has endeavoured to work within the significant constraints of CEMA’s allocation policies and approaches. It is important for the ongoing operation of the specialty egg programs that the Board, FIRB and the Ministry work hard to get improved allocations to better meet B.C.’s specialty egg market needs.</p>
<p>The Board gives first priority to meeting market needs. The Board is required to balance the needs of market demand, new entrants, existing producers, graders and processors in allocating production volumes authorized by CEMA.</p>	<p>The Board intends to utilize the MRAP to convert all existing permittees to the quota system and to provide for new entrant opportunities in the future. This appears to almost fully utilize the amounts available in the MRAP.</p>
	<p>The unanswered question is how specialty</p>

BCEMB Submission	FIRB Assessment
<p><u>Market Responsive Allocation Pool (MRAP)</u></p> <p>The Board maintains a Market Responsive Allocation Pool (MRAP) of quota into which all increases in provincial allocation are placed. The Board intends to fund TRLQ and Special Permit conversion and the CSFP from the MRAP. Allocation for the new entrant program will be from balances remaining in the MRAP, quota transfer assessments, future CEMA allocations, and future recoveries of non-transferable quota returned to the MRAP in accordance with the terms and conditions of non-transferability.</p>	<p>producers can grow other than by purchasing specialty or regular quota. This is the situation in which regular quota holders already find themselves. However, the availability and cost of quota will provide significant hurdles for specialty producers wishing to grow.</p>
<p>2.12. Product Integrity</p> <p>Producers, processors and graders will be required to keep all specialty eggs separate from mainstream eggs, and to market them as certified specialty. The Board intends that the industry will need to consider traceback systems to ensure separation is managed and maintained.</p> <p>Certifiers will be required to attest that the product is produced and distributed in accordance with a certification plan. The Board will conduct audits of grading stations to verify separation.</p>	<p>The Board's proposal to ensure strong first receiver monitoring and reporting requirements through to market are necessary regulatory functions of the Board. The Board needs to be able to verify that specialty eggs are kept separate and distinct through to market, and it will need to establish audit procedures to reconcile specialty quota issued with volumes shipped and sold.</p>
<p>2.13. Production Switching</p> <p>The Board intends to develop procedures by which regular quota holders may switch to specialty production that may include grader requirements and binding contracts between the quota holder and a grader. The Board also intends to allow specialty producers to switch between different specialty products subject to shifts in the market for specialty eggs.</p> <p>The Board will require any specialty producer temporarily losing certification and having marketable eggs to apply to the Board for authority to market them as an alternate product, and any approval will be subject to, at a minimum, compliance with food safety regulations, biosecurity regulations, and Board General Orders.</p>	<p>The Board needs to do further work concerning the rules for switching between regular and specialty eggs and between one class of specialty egg and another. The Board appears to intend that specialty producers may switch freely between different types of specialty eggs, and that mainstream producers can readily switch into any class of specialty eggs. This will make coordination of supply and demand and management of supply difficult.</p> <p>The requirement that a regular quota holder have a binding contract with a grader before being considered for switching seems reasonable. It also seems reasonable, based on the principle of reciprocity, that specialty quota should have the same right. In this event, it seems that any authorized switching should only be for one flock to meet temporary changes in market demand.</p>

BCEMB Submission	FIRB Assessment
<p>2.14. Permits</p>	
<p><u>TRLQ & Special Permits</u></p> <p>The Board intends to replace the existing TRLQ and Special Permit programs with a graduated new entrant program (see section 2.15).</p> <p><u>Certified Small Flock Program (CSFP)</u></p> <p>The Board intends to introduce a Certified Small Flock Program that provides for up to 399 layers in production, is restricted to COABC producers, has no requirement to hold quota, applies levies only on eggs sold through a registered grading station, and gives priority to CSFP permittees in accessing the new entrant program.</p> <p>CSFP producers will be required to comply with food safety and biosecurity regulations, report flock size and volumes produced annually, and submit to Board audits. The Board may consider allowing a third party certifier to perform certain audit functions.</p> <p>The BCEMB intends to provide a quota account within the MRAP of 10,000 layers to fund the quota required for this CSFP. The Board will review the 10,000 layer account after three years.</p>	<p>The CSFP is a good proposal for small lot production that is well above “personal use” exemption levels which recognizes and encourages small scale agricultural enterprise. While some have promoted levels higher than 399 layers, this amount seems as reasonable as any other put forward. For instance, assuming that someone manages the 399 layers well and is able to yield more than 20 dozen eggs/hen/year, which is substantially less than commercial flocks, this amounts to an average production of 150 dozen/week or 8,000 dozen per year.</p> <p>Limiting eligibility to designated specialty producers has merit in light of apparent specialty market needs and the CEMA allocation system. The Board should not, however, limit eligibility only to COABC certified producers since it has proposed that it will accept other certifying agencies.</p> <p>The more problematic part of the Board proposal is that the aggregate total of all permits will be capped at 10,000. Given the current constraints in the CEMA allocation system setting a cap on the total amount that can be issued under the CSFP program is unfortunate but seems necessary. Whether the number should be 10,000 or something else is unknown until program demand is better understood. Moreover, some amount of the production under the CSFP may already be accounted under the “unregistered production” as compiled through the Census and which is subsequently deducted from the provincial allocation by CEMA.</p> <p>The Board should work with the Specialty Markets Advisory Committee to seek recommendations concerning CSFP administration and program performance monitoring.</p> <p>The Board needs to be more explicit concerning how it will foster innovation at the farm level to test market potential for new types of eggs. The Board should establish protocols for innovation permits, and the CSFP may provide a vehicle for innovation.</p>

BCEMB Submission	FIRB Assessment
------------------	-----------------

2.15. Permit Conversion

TRLQ & Special Permit Conversion

The existing TRLQ and Special Permit systems will be terminated, and existing TRLQ and Special Permit permittees will be brought into the quota system. There are a total of 20 permittees presently allocated 62,000 layers. All existing permittees will be offered up to 5,000 units of non-transferable specialty quota upon conversion.

The amount of TRLQ and Special Permit production on January 1, 2005 will be issued as transferable specialty quota up to a maximum of 2,500 units. This specialty quota will be issued on the fourth anniversary of permit conversion to specialty quota.

Special lease levies will be discontinued. Monies currently on deposit with the Board under the lease levy program will be capped at the current level and held by the Board for use by the permittee for the future purchase of transferable regular or specialty quota.

The Board intends to issue specialty quota to all existing permittees, including some who are not certified organic and are therefore not producing a designated specialty product as presumably required by all holders of specialty quota. The Board's proposal to offer everyone up to the same level (5,000 layers) treats everyone equally but not necessarily equitably. In some cases the permittee is already at or above 5,000, while others are well below this level and have no real intention to increase to 5,000 layers.

The Board should consider distributing the 97,500 layers set aside in the MRAP for TRLQ and Special Permit conversion as follows:

- issue specialty quota in the amount of TRLQ and Special permit production for the 12 month period ending Dec. 31, 2004, or other reasonable 12 month period, to all permittees;
- take the balance remaining in the MRAP and provide each permittee not already at 5,000 layers the opportunity to increase up to that level within a defined time frame, for example, three years; and,
- place any remaining amounts in the small flock (CSFP) account.

For the purposes of the transfer assessment schedule, the start date for the schedule should be the original TRLQ or Special Permit date for the base amount, and the date of issuance for any additional amounts subsequently issued.

If the Board is going to issue Specialty Quota to free range and free run producers who are currently permittees, yet have no accredited certification plan, then it should consider clear timelines for establishment of a certification plan. Failing this, the quota issued would be fully retracted by the Board. Developing the terms of this agreement should be done mutually between the producers involved and the Board. Any quota so issued should be assessed at 100% for transfer purposes (i.e. it is non-transferable) until such time as an accredited certification plan is in place.

BCEMB Submission	FIRB Assessment
<p>2.16. Pricing</p> <p>The Board has established pricing procedures that include setting and publishing minimum producer prices for specialty eggs. The Board intends that the Specialty Products Advisory Committee will provide advice on pricing matters.</p>	<p>The Board should be encouraged to direct the Specialty Markets Advisory Committee to provide recommendations and advice concerning specialty egg pricing.</p> <p>Since egg pricing is based, in large part, on cost of production methodology and prices in other provinces, the Board should work with the Specialty Markets Advisory Committee to develop processes for determining reasonable incremental costs of production for specialty compared to mainstream eggs to assist it in setting specialty egg pricing.</p>
<p>2.17. Levies</p> <p>The Board intends that the National and Provincial levies for all producers will be the same, whether specialty or non-specialty. All eggs, regardless of class, will be subject to Industrial Product levies on the basis that the industrial product program supports the price for all table eggs.</p> <p>The Board is terminating special levies related to the TRLQ program. The Board will retain the banked amounts to the account of the permittee for the producer’s eventual use in purchasing quota.</p>	<p>The Board assesses some levies on a “per hen housed” basis rather than on an eggs shipped basis. This disadvantages specialty producers who often have lower production levels on a per hen basis. As the Board develops different levy schedules for the different quota classes, this matter should be addressed.</p> <p>The Board has charged special levies on TRLQ and Special Permits, and it has required that permit producers place funds on deposit with the Board for use to purchase quota in the future. The Board should be entitled to reasonable permit administration fees and regular administration and marketing fees. These fees should be paid in full prior to permit conversion to Specialty Quota. However, amounts paid “on deposit” for eventual quota purchase should be reimbursed. There is no requirement to purchase quota, and the Board does not need to serve as a producer’s savings institution.</p> <p>The egg system provides for removal of eggs surplus to the table egg market to the breaker market. This program is funded by industrial product levies. If specialty egg producers are to pay industrial product levies it seems reasonable they should have access to the program. One of the arguments made in support of specialty producers paying industrial product levies even if they cannot access the program is that this program supports the table egg price and specialty eggs are priced above cage-produced table</p>

BCEMB Submission	FIRB Assessment
	<p>eggs. However, if specialty eggs cannot have access to the program, then it seems unreasonable that they should pay these levies.</p> <p>Despite the Board’s attempts to manage production so that surpluses do not materialize, there will be times when the markets are not balanced. There are questions left unanswered concerning how these surplus eggs will be handled. For instance, will specialty producers or graders caught with a temporary surplus maintain pricing levels in the table egg market when they do not have access to an industrial product redistribution program, and if they do not how will a drop in prices impact other market segments? The matter of how to handle temporary surpluses of specialty eggs in the table markets should be addressed by the Specialty Markets Advisory Committee.</p>
<p>2.18. New Entrants</p> <p>The Board intends to establish a new entrant program. The program will be a graduated program involving three stages:</p> <ul style="list-style-type: none"> - 0-2 yrs – up to 1,000 layers, non-transferable - 3-5 yrs – up to 1,000 additional layers, non-transferable - 6-7 yrs – up to 1,000 additional layers, non-transferable <p>For clarity, the maximum amount of layers offered will be a total of 3,000 quota units, provided over a seven year period. There will be no requirement for a new entrant to grow beyond 3,000 layers, and amounts allocated will not be subject to clawback.</p> <p>The Board intends to provide two new entrant opportunities annually. Priority in issuing new entrant invitations will be provided to fill unmet specialty market demand.</p>	<p>The Board requires up to 16,000 layers in the next five years to start up to 10 new entrants, and will require an additional 6,000 layers per year after year five to sustain the program. The program will, by its design, appeal primarily to small lot and specialty producers seeking to get a little larger. It is reasonable that the Board provide priority to specialty producers based on specialty market demand. The Board may also wish to give a second order priority to meeting regional needs.</p> <p>The relatively small levels of production covered by new entrant incentive quota could be problematic for economic egg pick up and grading by mainstream graders, particularly if the recipients do not acquire additional quota units to increase the size of their operation. It seems reasonable that producers can reach individual, direct egg pick up arrangements with graders. These arrangements may include delivery to the grader or variable pick up fees to cover the higher per unit cost of picking up small volumes.</p> <p>The Board should consider a criterion that new entrants be required to remain actively engaged in the management and operation of the flock or be subject to receiving no further quota issuance on the graduated system and</p>

BCEMB Submission	FIRB Assessment
	<p>be subject to retraction of any quota not having converted under the declining transfer assessment schedule.</p>
<p>2.19. New Entrant Eligibility</p> <p>The Board has established that new entrant applicants must be over 18 yrs of age, resident in B.C., that they may not have previously held supply management quota of any type, and that they meet the criteria for certification (in case of specialty new entrants).</p> <p>Children of existing mainstream producers may apply to be new entrant specialty producers, subject to the restriction that they must operate independently of their parents.</p>	<p>The Board's proposed eligibility criteria are reasonable. It will be difficult to determine "independence" among children of existing quota holders and the Board should develop some criteria for this in advance of having to make such a determination.</p>
<p>2.20. New Entrant Waiting Lists</p> <p>Applications to be a new entrant will require a \$250 non-refundable application fee. Eligible applicants will be placed on a waiting list, and they will be required to renew their applications annually upon payment of a \$100 renewal fee.</p> <p>The Board already has a waiting list for new entrants. The list will be revised to reflect the new eligibility criteria.</p> <p>Invitations to enter will be made on a seniority basis, subject to priority to meet unfilled specialty market demand and priorities provided to CSFP producers wishing to expand beyond 399 layers. Upon receiving an invitation, the new entrant must provide a business plan to the Board and be in operation within one year. Business plans must include the product intended to be produced, the market requirement as indicated by a grader agreement, and a demonstration of financial commitments.</p> <p>The waiting list will be managed by an independent third party.</p>	<p>The Board's approach to waiting lists seems reasonable.</p> <p>Objections have been raised concerning the application fees. The initial fee of \$250 may be high if there is also an annual renewal fee of \$100. It seems reasonable, however, to require annual renewal to ensure continued eligibility and interest. The Board should consider a more nominal annual renewal fee. Such fees could be determined in consultation with the Specialty Markets Advisory Committee.</p> <p>The Board's proposal to provide priority to CSFP producers seeking to grow above the 399 layer limit seems a reasonable approach subject to determining the demand for CSFPs. It is possible that the Board will need to develop waiting list procedures for the CSFP program if the demand exceeds 10,000 layers in aggregate, and until such time as a greater allocation can be provided to the CSFP account.</p> <p>The Board should ensure it is clear on the business plan requirements in advance.</p>
<p>2.21. Specialty Representation</p> <p>All registered producers holding quota are eligible to vote at BCEMB annual and special meetings. Holders of CSFPs will not be</p>	<p>The Board's approach to electoral rights seems consistent with other Boards. The right to vote is aligned with ownership of quota</p>

BCEMB Submission	FIRB Assessment
<p>eligible to vote as they are not considered to be quota holders. Election procedures are currently under review by the Board.</p> <p>The Board will establish a Specialty Egg Producers Advisory Committee (SPAC). To ensure broad representation on the SPAC, the Board will appoint all types of specialty producers as well as graders, breakers, bankers and hatcheries to serve on the Committee. The SPAC will provide advice to the Board concerning market conditions, allocations, pricing, research and promotion.</p>	<p>(voting shares) while CSFP permit amounts are non-voting shares. This approach seems reasonable. An alternative would be to establish voting on the basis of licensed production volumes whereby there would be one vote per unit of production rather than one vote per licensed producer.</p> <p>The Board's proposed Specialty Markets Advisory Committee should be comprised of an equal number of specialty producers and specialty graders, a member of the Board and an independent Chair appointed by the Board. The Board should develop, in conjunction with the Advisory Committee, terms of reference for the Committee.</p>

2.22. Transparency

The Board will provide for waiting lists to be managed by a third party and will make information available on the website.

There is a long history of contention between specialty egg producers and the Board. There are also significant constraints in the egg system's allocation and levy practices. All parties have work to do to build stronger relationships. Both specialty producers and the Board need to demonstrate a willingness to work with each other. Perhaps instead of focusing on each other they could focus on working together to change the allocation system to better serve B.C.'s specialty markets.

3 Response Summary

FIRB is giving policy direction to the BCEMB that its specialty and new entrant submission is acceptable subject to the following changes and/or clarifications being reflected in the Board's draft Orders which are to be prepared and submitted to FIRB on or before October 31, 2005:

1. The Board should ensure that there is clarity in its proposed specialty egg designation criteria.
2. The Board should rely on generally recognized third party accreditation of certification agencies.
3. The Board should ensure it has information collection and monitoring procedures and capabilities necessary so it can verify specialty certification through the supply chain.
4. The Board should work with specialty producers to adapt required food safety and biosecurity standards so they are appropriate for specialty and small scale production.
5. The Board should work with government to find cost effective means to achieve more complete registration of all egg producers.

6. The Board should be prepared to subdivide Specialty Quota into different classes in the future, if necessary.
7. The Board should ensure that the policies and procedures for Specialty Quota are similar to Regular Quota, except as specifically required to maintain specialty product/market integrity.
8. The Board should ensure its draft Orders clearly outline how the Quota Exchange will operate.
9. The Board's request to sell quota should be declined.
10. Both Regular and Specialty Quotas should be transferable within their class.
11. Rules for production switching between classes should be established in consultation with the Specialty Markets Advisory Committee, and should respect the principle of reciprocity between classes.
12. The Board should institute the declining transfer assessment schedule on all specialty and new entrant quota issued on, or after, the implementation of the specialty and new entrant programs.
13. The Board should implement the 5% transfer assessment program on all existing Regular Quota.
14. The only exceptions from transfer assessment should be for transfers among direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.
15. The Board's small flock program (CSFP) should be implemented subject it to being available to all designated specialty producers regardless of certification agency. The Board should also consider using the CSFP for innovation and heritage breed permits.
16. The Board should use the MRAP as proposed by allocating 107,500 layers to Specialty Quota and the CSFP.
17. The Board should convert existing TRLQ and Special Permit permittees to Specialty Quota as proposed, except that permittees should be given adequate time to choose to grow to the 5,000 layer level and that those permittees having greater than 5,000 layers permitted should be issued their existing permit level as Specialty Quota.
18. Existing permittees who produce free range and free run eggs, for which an approved certification plan is not yet established, should be given three years to have a certification plan in place or be subject to retraction of all specialty quota issued.
19. Subject to Board discretion, the BCEMB should receive payment in full for reasonable permit service levies and regular marketing levies for all permit production up to Dec. 31, 2004.
20. Any quota purchase deposits on account with the Board for future quota purchase should be reimbursed to the permittees by the Board upon conversion.
21. The Board should consider establishing levies separately for each class of quota based on the cost of providing special services required by each class.
22. The Specialty Markets Advisory Committee and the Board should jointly determine the applicability of the industrial product program to specialty eggs.

23. The Board should review its levy practices to ensure that levies do not unfairly discriminate between different classes of production due to differences in laying hen productivity.
24. The Board's proposed graduated new entrant program should be implemented as proposed, except that the incentive quota offered should be transferable and subject to the assessment schedule, and that recipients should be required to be actively engaged in the farm business.
25. A Specialty Markets Advisory Committee should be established and comprised of an equal number of specialty producers and specialty graders, a member of the Board and an independent Chair appointed by the Board. The Board and the Committee should develop terms of reference for the Committee as a first order of business.
26. The Board should find ways to improve its communication of market trends and market needs to industry stakeholders, and it should find ways to improve its reporting of allocation accounting to growers.

Appendix 4. Response to BCMMB Specialty & New Entrant Submission

This appendix provides an overview of the BCMMB’s specialty and new entrant program submissions in Section 1. This is followed in Section 2 by FIRB’s understanding and analysis of the Board’s submission. Finally, Section 3 provides FIRB’s response to the Board’s Specialty and New Entrant Submission.

1 Synopsis of BCMMB Submission

1. Milk marketing is managed through milk pools. The Board manages the pools and serves as the first receiver of all milk shipped in B.C.
2. The Board recognizes that organic milk has developed into a distinct market segment in B.C., and is designating organic milk as a separate class of milk and establishing an organic milk pool.
3. The BCMMB has provided and managed innovation (DDPIP), cottage industry (CIP), and new entrant (GEP) programs for some years.
4. The Board recognizes a current opportunity and need to grow B.C. organic milk production to meet market demands.
5. To meet this demand the Board intends to offer short term incentives to established organic producers, conversion incentives to established mainstream producers, and utilize the new entrant program to invite new producers willing to produce organic milk to enter the industry.

2 Analysis of BCMMB Submission

In this section the Board’s specialty and new entrant proposals are assessed by comparing them with FIRB’s policy principles for specialty and new entrant programs based on FIRB’s general understanding of the Board’s submission or position.

	BCMMB Submission	FIRB Assessment
2.1. Market	<p>Milk production in Canada is determined by the Canadian Dairy Commission (CDC), is shared among provinces and producers through quota systems, and is marketed by the Boards through interprovincial pooling agreements.</p> <p>The BCMMB serves as the first receiver of all milk shipped in B.C., and as such it arranges milk pick-up, delivery, revenue collection, expense pooling, and payment to producers.</p> <p>There are 33 licensed processors in B.C.</p>	<p>The Board has a good understanding of the market for milk, including organic milk. The Board has polled processors and focused its attention to finding ways to ensure the required amounts of organic milk projected are provided by B.C. producers.</p> <p>Some organic producers believe the Board does not understand the market for organic milk. The opposing positions of certain organic producers and the Board concerning the market may be related to the perspective from which the market is viewed. The Board relies primarily on</p>

BCMMB Submission	FIRB Assessment
<p>Seven fluid processors and five industrial processors account for the vast majority of milk demand in the province.</p>	<p>processors to advise of their market needs, while some organic milk producers take their market understanding from direct marketing to consumers.</p>
<p>Total Provincial Quota (TPQ) was 22.94 million kg for the year-ending Aug 2004. TPQ has grown by 8% over the past five years.</p>	
<p>TPQ is presently comprised of provincial fluid milk (56%) and industrial milk (44%) used to produce non-fluid dairy products. Provincial fluid demand has declined 7% in the past five years, while industrial milk production in B.C. has increased by 37% in the last five years due in large part to a change in the national Market Sharing Formula (MSQ).</p>	
<p>Organic milk production is currently provided by four producers using TPQ and Domestic Dairy Product Innovation Program (DDPIP) quota. Organic milk currently comprises 162,000 kg of quota, or ~0.7% of current supply.</p>	
<p>Organic milk demand is projected to grow at 6% p.a. (10,000 kg) for the foreseeable future. The Board is seeking to fill current and future organic milk demand by:</p>	
<ul style="list-style-type: none"> - encouraging existing producers to convert to organic production; - giving priority to new entrants agreeing to produce certified organic milk; and, - providing quota incentives to existing DDPIP and Cottage Industry Program (CIP) permittees already producing organic milk. 	
<p>2.2. Definitions</p>	
<p>The Board is designating organic milk as a Specialty Product on the basis that it is substantively different than mainstream milk and that it is not a variant of an existing product. The Board is not recognizing any other Specialty Products at this time. The Board proposes that all producers may be SPCA certifiable, and therefore SPCA does not represent substantive differentiation.</p>	<p>The Board's approach that organic milk is to be designated as a specialty product class seems reasonable. The Board has not examined other specialty classes on the basis that there does not appear to be demand for another class of milk.</p>
<p>Future specialty milk designations will</p>	<p>Recognizing SPCA milk as a designated specialty class of milk has been declined by the Board on the basis that humane treatment is a production standard all</p>

BCMMB Submission	FIRB Assessment
<p>require an Advisory Committee (SMPAC) recommendation to the Board.</p>	<p>producers are required to meet, that many existing producers could likely be SPCA certified at present, and that processors are not requesting SPCA certified milk for their marketing programs.</p>
<p>2.3. Certification</p>	
<p>Any producer of a designated Specialty Product will be required to produce and market in accordance with a certification plan. Certifiers must have third party accreditation. The Board intends to work with certifying organizations to bring equality to the certification process, thereby ensuring equitable and acceptable compliance criteria.</p>	<p>The Board requirement that certification be a licensing condition for producers of designated specialty milk is reasonable.</p>
<p>The Board intends that a producer losing certification will cause a review of the situation by the SMPAC resulting in recommendations to the Board.</p>	<p>The Board's approach of seeking to have any accredited certification agencies proposed to be used in B.C. meet an equivalent standard of inspection and integrity is sound.</p>
<p>2.4. Food Safety</p>	
<p>All milk producers are required to be licensed under the <i>Milk Industry Act</i> which prohibits the sale of non-pasteurized, raw milk to consumers. The Board does not directly police all safety of milk issues.</p>	<p>FIRB supports that all milk sold to consumers must be produced and processed in accordance with applicable food safety regulations.</p>
<p>2.5. Biosecurity</p>	
<p>Not Addressed.</p>	
<p>2.6. Registration</p>	
<p>All producers who ship milk in B.C. are obligated to hold a Producer License issued by the Board and a Dairy Farm License issued under the <i>Milk Industry Act</i>.</p>	<p>Registration does not appear to have been raised as a concern in the milk system. FIRB expects that the Board has or will register all milk producers shipping fluid milk or processing milk on-farm to produce manufactured dairy products for sale to consumers.</p>
<p>2.7. Quota</p>	
<p>Quota is referred to as Total Production Quota (TPQ). It is determined by the Canadian Dairy Commission (CDC), and is comprised of industrial milk (MSQ) and provincial fluid milk. There are two classes of TPQ held by producers – transferable (TTPQ) and non-transferable (NTPQ) –</p>	<p>The Board's approach of transferable and non-transferable quota does not comply with FIRB's policy principles.</p> <p>The Board needs to establish different quota licenses and quota accounts for each designated product class. These are</p>

BCMMB Submission	FIRB Assessment
<p>based on the origin of the quota. Any quota provided as an incentive, whether as a new entrant or a product/market incentive, will be non-transferable except to exempt persons (i.e. family) in certain circumstances.</p>	<p>administrative and management tools within the province and are not intended to cause challenges for the Board with its National Agency.</p>
<p>Since all milk is pooled, the Board distributes quota allotted by CDC pro rata among all producers holding transferable TPQ. Holders of NTPQ are allocated a fixed amount of production and this amount does not adjust with changes in the TPQ allotment received from CDC.</p>	
<p>The Board proposes to issue NTPQ to specialty product producers, and these licenses will be restricted to the producing of the designated specialty product. The Board also allows that TTPQ may be used to produce any class of milk, including specialty milk, upon approval of the Board.</p>	
<p>2.8. Quota Transferability</p>	
<p>The Board operates a Quota Exchange (QE) to facilitate transfer of quota between producers.¹</p>	<p>FIRB's policy principles provide that all quota should be transferable within its class, and that it will carry with it any production or marketing terms and conditions associated with the class of product licensed. Accordingly, all incentive quota provided, whether through the new entrant, DDPIP or CIP conversion, or other Board incentive programs, should be transferable.</p>
<p>TTPQ is transferable between producers, with approval of the Board, either directly or through a Quota Exchange. NTPQ is non-transferable, except to exempt persons defined as family members including spouse, child, child and child's spouse, grandchild, grandchild and grandchild's spouse, or if none of these are available, nephew, niece, nephew and nephew's spouse, niece and niece's spouse, or if none of these are available, such other person as the Board may determine.</p>	
<p>The Board is opposed to making quota incentives transferable when they were provided to producers at no cost as this would confer a windfall gain on any recipients.</p>	

¹ Quota traded – In 2003/04, 563,529 kg was through the exchange, 234,464 kg was transferred as full farm (going concern) or partial transfers, and 720,794 kg was transferred within families, by name change and as a merger or split of an existing holding.

BCMMB Submission	FIRB Assessment
<p>2.9. Transfer Assessments</p> <p>The Board has an established transfer assessment policy in place. The Board requires a seller of TPQ to surrender 5% of all quota transferred, except for family transfers, name changes, corporate or partnership mergers or splits, or sales transacted through the exchange. For practical purposes, only sales that are arm's length, third party, full farm (going concern) or partial transfers transacted outside the QE are assessed.</p> <p>In the past six years, the Board has assessed 85,800 kg of quota and has distributed 172,000 kg through the new entrant program.</p>	<p>The Board's existing transfer assessment is in place and applies a 5% assessment on certain quota transfers.</p> <p>The Board will need to limit transfer assessment exceptions to direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.</p>
<p>2.10. Exemptions</p> <p>All shippers of milk in the province must obtain both a Milk Board Producer License and a Dairy Farm License, and no one may sell unpasteurized raw fluid milk to consumers.</p> <p>The Board requires licensed producers to have a minimum of 1,500 kg of quota (~five cows).</p> <p>The Board is opposed to any exemption from the requirement to be licensed on the basis of food safety regulations and economic viability.</p>	<p>FIRB's policy principles support registration of all producers by the Board together with licensing in accordance with applicable government regulation. FIRB also encourages that the Board be very clear to state which parts of the Orders are excluded from which licenses.</p> <p>The Board's requirement that anyone shipping milk into the pool must have a minimum of five cows seems reasonable on the basis of the economics of managing pooled milk pick-up and delivery. However, this does not address situations where someone keeps a couple of milking cows for personal use.</p> <p>Presuming there are people who keep a small number of milk cows for personal use, the Board needs to determine if and how it will register or record these producers. It seems reasonable that such "personal use" producers would be exempt from the requirement to hold quota.</p> <p>The Board has previously introduced the CIP. FIRB's policy principles require that the Board have an annually renewable small herd permit program. It seems reasonable that the Board could adapt its CIP to provide a small herd permit program limited to non-fluid dairy products manufactured from milk produced on-site.</p>

BCMMB Submission	FIRB Assessment
<p>2.11. Allocation</p> <p>The Board's total authorized production, or TPQ, is received from CDC comprised of provincial fluid and market sharing (industrial) amounts. The Board allocates this provincial allocation pro rata to each producer's TTPQ holdings. NTPQ is issued in fixed amounts, and is not adjusted up or down with changes in allocation.</p> <p>All milk is pooled. The Board manages milk supply to meet processor requirements, first by giving priority to fluid market demands and secondly by distributing the remainder available among industrial markets. This is done in conjunction with the Western Milk Pool.</p> <p>Organic milk production will be provided from the TPQ received from CDC. The Board proposes that it will meet regularly with processors to determine their organic milk requirements in advance so that it can take steps to fill the demand through both existing producers and new entrants.</p>	<p>FIRB recognizes that the Board must operate within the CDC provincial allocation and the Western Milk Pool.</p> <p>The Board needs to be clear concerning how volumes will be allocated from the TPQ to an organic milk quota account, and from there how it will be distributed among organic milk producers on the basis of licenses and quota holdings. In doing so, the Board needs to develop allocation procedures for distributing the TPQ allotted by the CDC to the province between the different classes of production, mainstream and organic milk.</p> <p>The Board is presently earning TPQ through the DDP contracts that are requiring organic milk. It seems reasonable that these volumes should be reserved for organic milk production rather than being distributed as quota among all holders of TPQ, providing there is unfilled market demand for organic milk.</p>
<p>2.12. Product Integrity</p> <p>Certified organic milk will be required to operate within separate transportation and processing pools.</p> <p>The Board provides that skim milk resulting as a by-product from organic milk processing may be sold as mainstream skim milk.</p>	<p>The Board clearly requires product integrity, which is appropriate.</p> <p>Whether this product integrity needs to be provided by a common pool or by direct contracts between producers and processors is a different issue.</p>
<p>2.13. Production Switching</p> <p>Holders of TTPQ may apply to the Board to produce organic milk while holders of NTPQ are restricted to producing organic milk. NTPQ may not be used to produce mainstream milk.</p>	<p>The Board needs to apply the principle of reciprocity. If mainstream quota can be used to produce organic milk, then organic quota should be able to be used to produce mainstream milk. Clearly, this could lead to a breakdown of any distinction between the classes of quota.</p> <p>It seems reasonable that a quota holder should be able to apply to convert their production unit from one class to another under certain circumstances which may include, at a minimum, market requirements and benefit to the industry.</p>

BCMMB Submission	FIRB Assessment
<p data-bbox="228 407 435 436">2.14. Permits</p> <p data-bbox="342 470 862 590">The Board relies on the Domestic Dairy Product Innovation Program (DDPIP) and the Cottage Industry Program (CIP) to meet specialty market demands.</p> <p data-bbox="342 623 435 653"><u>DDPIP</u></p> <p data-bbox="342 686 862 953">The DDPIP is a national program administered by CDC that commits the province to supply milk to an approved processor licensed to manufacture innovative dairy products. Typically, milk to supply DDPIP contract requirements are provided by the Board from the pool and the production is therefore shared pro rata by all producers.</p> <p data-bbox="342 987 862 1593">DDPIP contracts are currently helping grow organic milk production in B.C., and the Board is anxious to maximize the production within these contracts so that it can expand B.C.'s production. There presently four organic milk producers shipping milk for DDPIP contracts – two are direct shipping to licensed dairies and two are processing on-farm as CIP participants. These direct marketing relationships were established due to the state of certified organic milk market development and the requirement that CIP participants process only milk produced on farm. Accordingly, producers serving these particular DDPIP contracts entered into an Undertaking and Declaration with the Board outlining, among other things, the terms and conditions upon which the producer would return temporary production allocations to the Board.</p> <p data-bbox="342 1627 862 1864">These organic milk DDPIP contracts provide quota for up to five years to a processor and by extension to a producer. At the end of five years, the Board retracts that quota 20% per year for the next five years. Producers must buy quota if they wish to maintain volumes under the DDPIP contracts.</p>	<p data-bbox="888 260 1401 405">Once converted, the producer should not be permitted to switch back for some amount of time and then only subject to the criteria determined for switching between classes.</p> <p data-bbox="888 470 1401 678">The Board's ability to access the DDPIP provides an established program for future innovation. Unless it can be shown that the DDPIP is insufficient for encouraging innovation, there seems little need for additional program enhancements for innovation.</p> <p data-bbox="888 714 1401 1289">The Board has established the Cottage Industry Program. This program could be adapted to meet FIRB's requirement for a small lot program which provides for product/market innovation, local/regional small lot agriculture, and farmer-direct marketing initiatives. The restrictions, including that the milk stay out of the fluid market, that it be produced and processed on the farm, and that only industrial milk products be produced and sold, all seem reasonable given the fluid milk safety regulations and the milk pool. The CIP is, however, constrained by having a quota clawback condition. CIP producers are required to purchase quota or reduce the size of their operations following start-up. At the same time, they are restricted from buying milk from the pool.</p> <p data-bbox="888 1323 1401 1470">The Board could consider establishing the CIP as its small lot program. The Board could provide up to 10,000 kg of annually renewable CIP permit, which would be, in essence, a form of quota.</p> <p data-bbox="888 1503 1401 1749">It seems reasonable that the Board may need to consider CIP applications in a manner similar to a new entrant program (eligibility, waiting lists). The Board needs to revisit the CIP account and find a mechanism for funding CIP initiatives that do not rely on clawbacks from the existing CIP participants.</p> <p data-bbox="888 1782 1401 1896">The Board has proposed conversion numbers of 10,000 kg of quota for organic producers using DDPIP contracts and operating as CIP producers. This is a</p>

BCMMB Submission	FIRB Assessment
<p><u>CIP</u></p> <p>The CIP is a Board program introduced to assist start-up producer-processors who wish to produce milk and process it into a manufactured milk product, excluding fluid milk, on the farm. The Board issues up to 10,000 kg of temporary quota, and then retracts 20% per year for five years. To maintain and grow production, participants are expected to acquire TTPQ.</p> <p>The Board has set aside 30,000 kg of quota to fund the CIP.</p>	<p>DDPIP-organic conversion, not a CIP conversion.</p>
<p>2.15. Permit Conversion</p>	
<p><u>Organic Milk Incentives for DDPIP participants</u> - The Board intends to provide DDPIP producers of organic milk up to 10,000 kg of NTPQ-S. For these producers, all production above the 10,000 kg level will be retracted over five years beginning upon termination of the existing DDPIP contract.</p>	<p>The Board's intent to expand organic milk production to meet market demand and to decrease risk by having organic milk production spread over a greater number of producers than at present is sound risk management. However, this does not mean that existing organic milk producers should be cut-back so other existing milk producers can be incented.</p>
<p><u>Encouraging More Organic Milk from TTPQ holders already producing organic milk</u> - The Board intends to provide an incentive to holders of TTPQ that are currently recognized to be producing certified organic milk using TTPQ. The incentive will be 5,000 kg NTPQ-S, plus up to an additional 2,000 kg of NTPQ-S matching the purchase of 2,000 kg of TTPQ (called the 5/2/2 program herein).</p>	<p>The Board will receive TPQ from the CDC equal to the production of qualifying milk (organic) in the fifth year of each five-year DDPIP contract. The provision of 10,000 kg of quota to each DDPIP contractors will be less than the amount of quota received by the Board from the CDC. The Board appears to intend that the remaining quota will be distributed pro rata among all other quota holders after providing for incentives to existing organic milk producers and existing mainstream milk producers who are authorized by the Board to switch to organic milk production. It seems reasonable that quota earned from organic milk programs should remain available for organic milk programs.</p>
<p><u>Encouraging conversion by existing mainstream milk producers to organic milk production</u> - The Board believes it is essential to increase the number of organic milk producers so that supply to processors is less vulnerable to a small number of producers. The Board intends to offer incentives, including offering the 5/2/2 program plus funding the organic milk price premiums as payments to the producer during the transition time to becoming certified organic.</p>	<p>The Board needs to revisit its organic milk DDPIP conversion plans. It needs to consider the amounts in production under each contract in the 12 months ending Dec. 31, 2004, the issuance of organic milk quota to these producers, and the terms and conditions by which growth in volume after January 1, 2005 is used by the producer and subsequently returned to the</p>
<p><u>Pooling of Organic Milk Premiums</u> - The Board will also establish a pool for organic milk premiums and expenses (i.e. transportation) with the proceeds and costs shared among the pool participants.</p>	

BCMMB Submission	FIRB Assessment
	<p data-bbox="889 254 1406 585">Board. The Board should consider issuing organic quota equal to the production in the 12 months ending December 2004, allowing the producer to produce the additional amounts by which the DDPIP contract grows after December 2004 until the contract terminates. At contract termination, it seems reasonable that the amount in excess of the amount granted as organic quota at January 1, 2005 would be retracted over a reasonable period of time.</p> <p data-bbox="889 621 1406 1163">The reasoning behind the proposed 5/2/2 quota issuance to existing organic milk producers using TPQ is unclear. It may be based on a principle of fairness and equity, or it may simply be a way to increase organic milk production rapidly to meet demand and maximize quota earned under the DDPIP program since these farms are already certified. The 2/2 matching proposal is inconsistent in this case since the Board appears to intend to allow holders of transferable quota to apply existing quota already owned by the farm to receive the matching amount. In other words, no quota purchase is required in this instance. Any quota issued under this existing organic producer growth incentive should be organic milk quota.</p> <p data-bbox="889 1199 1406 1530">The Board's offer of 5/2/2 for existing mainstream milk producers is also intended to increase organic milk production by providing additional organic quota (7,000 kg) together with the volumes from conversion from mainstream to organic milk production for the balance of the recipient's production. Like TPQ organic producers, mainstream converters will be able to assign 2,000 kg of existing quota to receive the additional 2,000 kg incentive.</p> <p data-bbox="889 1566 1406 1898">In either case where the 5/2/2 incentive is being offered to existing quota holders to stimulate a quick increase in organic milk production, the Board should apply restrictions to the sale of quota by recipients. It seems reasonable that such recipients should be required to transfer all of the 5/2/2 incentive quota received before any other quota held by the producer would be authorized for transfer. This is to avoid situations where the producer receives the</p>

BCMMB Submission	FIRB Assessment
	<p>5/2/2 incentive and then sells an equivalent amount of other quota held thereby realizing an immediate gain and limiting the expected amount of organic milk production.</p> <p>The Board needs to be careful in the product switching implications of this proposal. If a mainstream producer is offered this opportunity and converts they should not be permitted to switch back to mainstream production with their mainstream quota for a significant period of time. If they do switch back, they should be required to dispose of their organic quota.</p> <p>The Board is proposing to pay a substantial portion of the organic milk premium during transition from mainstream to organic milk production for mainstream producers authorized to convert. The intent appears to be to further encourage conversion. There is apparently a precedent for this as the Board provided premium assistance to some organic milk producers in the late '90s. However, organic milk is now an established product class and it seems unnecessary that premium assistance be provided to either mainstream converters or organic milk new entrants.</p> <p>Additionally, the Board has not addressed how it will determine which mainstream producers will be offered the conversion opportunities if there are more applicants than need. This is a potential point of contention and dispute.</p> <p>The Board needs to rework its DDPIP conversion plan and its proposed programs to stimulate additional organic milk production among existing mainstream and organic producers.</p>
<p>2.16. Pricing</p> <p>The Board is the first receiver of all milk shipped in the province, and it pools revenues and expenses. Milk pricing is regulated and prices are established by the CDC.</p> <p>The Board has not to date established an organic milk pool. Organic milk producers</p>	<p>The Board has not demonstrated that pooling of organic premiums is required or has the support of organic milk producers. Therefore, pooling should not be pursued until organic milk producers and processors seek pooling.</p> <p>FIRB is not aware of any representations</p>

BCMMB Submission	FIRB Assessment
<p>are paid the pool price by the Board plus an organic milk premium by the processor. The Board established an organic milk price premium of \$0.30/litre in 1998. This premium remains in force today.</p> <p>The Board intends to establish an organic milk pool. The Board views this as a natural maturing of the market having evolved beyond direct relationships between individual processors and producers to one requiring coordination of all producers of organic milk in a common pool. All revenues received from processors for organic milk will be pooled, and net proceeds will be distributed on the basis of organic quotas. Any costs associated with an overflow of milk into the mainstream will be shared pro rata by all producers.</p> <p>The Board intends to seek advice from the Specialty Milk Product Advisory Committee (SMPAC) on price premium matters.</p>	<p>that the \$0.30/litre organic milk premium is insufficient. It is larger than that paid in other provinces, and is apparently quite lucrative for some producers. It seems reasonable to charge the Specialty Markets Advisory Committee with a responsibility to monitor the premium and recommend amendments to the Board as appropriate.</p>
<p>2.17. Levies</p>	<p>The Board may wish to look at administration and marketing levies from the perspective of cost of service. As organic milk production grows and is managed by the Board, there may be services unique to either mainstream or organic milk production and marketing that are not required or used by the other class[es]. Therefore, the Board should work with the Specialty Markets Advisory Committee to examine assessing levies separately for the different quota classes to the extent that different services are provided.</p>
<p>The Board will continue to levy the same administrative levies on all production. There are no special levies in place currently, and none are proposed.</p> <p><u>Transportation</u></p> <p>The Board intends to establish an organic milk transportation pool. Incremental transportation costs will be to the account of the organic milk pool. The Board envisions the organic transport pool will operate in the Lower Fraser Valley, while costs associated with the transportation of organic milk produced outside this region and needing to be shipped to processors in the Lower Fraser Valley would be to the account of the individual producers outside the transportation pool region.</p>	<p>Pooling of organic milk premiums and transportation needs further justification and explanation by the Board. Organic milk premiums are presently paid directly from the processor to the producer and it is not clear why these premiums need to be pooled. Some existing organic producers have established independent transportation and may have little need for pooled transportation. There are also complaints from existing producers that the current transport pooling costs placed</p>

BCMMB Submission	FIRB Assessment
2.18. New Entrants	<p>against organic milk producers, which are in addition to direct transport costs paid by the processor, are overcharging for transportation.</p> <p>The Board should work with the Specialty Markets Advisory Committee to determine if and how pooling should be established in the management of organic milk programs.</p>
<p>The Board has had a new entrant program in place for twenty years. This program is called the Graduated Entry Program (GEP). Details of the program are provided at Schedule 1 of the Orders.</p>	<p>The Board's GEP program was last modified in May 2004 and approved by FIRB at that time. FIRB accepts that the program amendments need time to be applied before determining if further changes are required. Therefore it should be left largely unchanged, except that incentive quota provided should be transferable and subject to the declining transfer assessment schedule.</p>
<p>FIRB approved amendments to the GEP in May 2004, including establishment of the 5/2/2 program, providing for a minimum of three new entrants per year, and providing for preference to be given to specialty new entrants. The 5/2/2 program provides a 5,000 kg incentive as NTPQ, plus a matching 2,000 kg NTPQ incentive upon the purchase by the new entrant of 2,000 kg of TTPQ. Quota for the GEP is provided, in part, from transfer assessments, with the additional amount required provided from the total TPQ allotted by CDC before distribution among other programs and holders of TTPQ.</p>	<p>Incentive quota issued previously under the GEP, which is currently non-transferable, should also be transferable and subject to the declining transfer assessment schedule. The start date for determining the level of transfer assessment should be either the original quota issuance date or August 1, 2000, whichever is the more recent. August 1, 2000 is chosen as the five-year point meaning any retroactive adjustment in the incentive quota rules would be limited to going back five years. For any entrants prior to this time that still hold non-transferable quota, their position on the declining transfer assessment schedule would be established at the five-year point.</p>
<p>If additional organic milk production beyond that provided by the DDPIP conversion, existing organic producer incentives and mainstream conversion incentives is required, the Board will consider one additional GEP entrant for organic milk production, above the three mainstream new entrants each year. If a GEP organic new entrant opportunity is provided, the successful applicant will have the organic milk price premium paid to them by the Board during transition to certified organic.</p>	<p>The Board intends that organic milk production be increased through DDPIP and mainstream conversion, with organic new entrants being considered only if these programs fail to provide sufficient organic milk volume to meet demand. The Board should consider giving priority to organic milk new entrants if there is unfilled organic milk demand. This priority should be ahead of providing quota incentives to existing mainstream quota holders to convert their existing herds to organic milk production. The Board should also reconsider whether it is fair and reasonable to pay the organic milk premium during transition.</p>

BCMMB Submission	FIRB Assessment
2.19. New Entrant Eligibility	
<p>Eligibility criteria are established in Schedule 1 of the Consolidated Orders and include the intent to be actively engaged in the farm operation, being a Canadian citizen or permanent resident of Canada, being a permanent resident of B.C., being over 19 years of age, and not having previously held supply management quota.</p>	<p>The eligibility criteria proposed by the Board are consistent with those of other Boards and seek to recruit truly new participants to the system.</p> <p>The Board does, however, need to consider eligibility criteria for the mainstream conversion incentive program.</p>
2.20. New Entrant Waiting Lists	
<p>Waiting list criteria are established in Schedule 1 of the Consolidated Orders. The Board's existing waiting list has 77 applicants. The list is a public document. The Board intends to update and maintain the existing waiting list.</p>	<p>The waiting list seems long given the Board intends to offer only three or four new entrant opportunities each year.</p> <p>The Board needs to consider priorities in making new entrant invitations. If market demand for organic milk is to be met, it seems reasonable that applicants prepared to produce the certified organic milk should be given priority.</p> <p>While the Board asserts there have been no complaints regarding administration of the waiting list, it might be prudent for the Board to have the list and invitation process managed by an independent third party.</p>
2.21. Representation	
<p>All licensed producers, including specialty producers, are registered producers and are therefore entitled to vote.</p> <p>The Board proposes to establish a Specialty Milk Product Advisory Committee (SMPAC) comprised of producers, processors and distributors. A director of the Board will Chair the SMPAC. The SMPAC's responsibilities will be to provide advice concerning specialty market requirements, designation of new classes of specialty milk, and pricing, production, quota allocation, transportation and levy policies for specialty products.</p>	<p>A Specialty Markets Advisory Committee will be established by the Board. The Committee should be comprised of an equal number of organic milk producers and processors, one member of the Board, and an independent Chair appointed by the Board.</p> <p>The Committee needs to have clear terms of reference, and the Board should ensure these are developed when the Committee is formed or as the first order of business for the Committee.</p>
2.22. Transparency	
<p>Not explicitly addressed.</p> <p>The BCMMB already has established innovation and new entrant programs, and</p>	<p>The Board does have established programs for new entrants and innovation and should be commended for this. However, there are feelings among some organic milk</p>

BCMMB Submission	FIRB Assessment
<p>appears satisfied that existing decision making and administrative procedures are adequate.</p>	<p>producers that the Board does not listen to or care for dissenting opinions.</p> <p>The Board needs to do some work to improve its relationship with organic milk producers. It is unlikely all demands of organic milk producers, or mainstream producers for that matter, can be met within the terms and conditions of the various regulations and allocation agreements. However, the Board needs to continue to work to understand and communicate with organic milk producers.</p>

3 Response Summary

FIRB is giving policy direction to the BCMMB that its specialty and new entrant submission is acceptable subject to the following changes and/or clarifications being reflected in the Board's draft Orders which are to be prepared and submitted to FIRB on or before October 31, 2005:

1. Organic milk should be a designated specialty class of milk.
2. Approved certification agencies for organic milk should be in accordance with reasonable provincial or national standards.
3. Organic milk quota should be established as a specialty class of quota.
4. All quota should be transferable within its class.
5. For all specialty and new entrant quota issued on or after the implementation of the specialty and new entrant programs, the Board should institute the declining transfer assessment schedule.
6. The 5% direct transfer assessment program should be continued as proposed for all TPQ issued prior to establishment of the declining transfer assessment schedule subject to limitations on the exceptions from transfer assessment.
7. Family related exceptions to transfer assessments should be limited to direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change.
8. The Cottage Industry Program should be amended to meet the requirements of a small herd program to manage on-farm, value-added manufactured milk production or heritage breed needs.
9. The Board should develop allocation procedures to ensure the TPQ received from CDC is distributed among the mainstream and organic quota accounts based on differential growth in each market segment.
10. The Board should allocate the quota earned from the CDC pursuant to organic milk DDPIP initiatives to the organic quota account.

11. The Board should develop clear guidelines for authorizing the switching of production between quota classes, and should apply the principle of reciprocity between the different classes of quota.
12. DDPIP organic milk producers should receive organic specialty quota equal to their 12 month production ending December 31, 2004.
13. Quota amounts above the December 31, 2004 amount that are produced and earned through the DDPIP program between January 1, 2005 and the end of each DDPIP contract should be produced, if possible, by the existing contractors up to the end of the DDPIP contract. At the conclusion of each contract, the amounts above that issued as quota based on production up to December 2004 should be retracted over a reasonable period of time.
14. The proposal to issue up to 7,000 kg of organic quota to existing organic milk producers using mainstream quota for organic milk production is acceptable on a one-time basis to assist increased organic milk production quickly to meet current demand projections.
15. The Board should only provide incentives to get mainstream quota holders to convert to organic milk production if organic milk demand cannot be met by the other programs, including the GEP. The incentives offered to mainstream producers to convert to organic milk production should be limited to the 5/2/2 organic quota incentive and should not include payment of the organic milk price premium during transition.
16. The Board should not proceed with organic milk premium pooling until it can be shown that the organic milk producers are in favour of changing from direct processor contracts to a pooling system.
17. Transport pooling should be considered only if organic milk producers are in favour of such pooling.
18. The Board's Graduated Entry Program (GEP) program should continue unchanged except that organic milk entrants should be given priority when there is an unfilled organic milk demand, and incentive quota issued should be transferable. The Board should not subsidize the organic milk premium during transition.
19. The Board should consider having an independent third party administer the new entrant waiting list, subject to the recommendation of the Specialty Markets Advisory Committee.
20. A Specialty Markets Advisory Committee should be established and comprised of an equal number of organic milk producers and processors, a member of the Board, and an independent Chair appointed by the Board. Clear terms of reference for the Committee should be established.
21. The Board should take steps to build trust with specialty producers.

Appendix 5. Response to BCTMB Specialty and New Entrant Submission

This appendix provides an overview of the BCTMB’s specialty and new entrant program submissions at Section 1. This is followed in Section 2 by FIRB’s understanding and analysis of the Board’s submission. Finally, Section 3 provides FIRB’s response to the Board’s Specialty and New Entrant Submission.

1 Synopsis of BCTMB Submission

1. The Board has had a new entrant program since 2002. It is called the Grower-Vendor Program (GVP), and is designed to provide opportunities for producers wishing to enter the turkey industry and direct market turkey products to consumers.
2. The Board has allocated up to 0.8% of its base allocation to the new entrant program, and is proposing to increase this to 1.5% over the next four years.
3. The Board is proposing to designate certified organic turkey production as a specialty class, and to manage this production through a specialty class of quota.
4. The Board intends to expand its new entrant program to provide for both new certified organic and grower-vendor producers, and to fund a new entrant account through a transfer assessment levy on primary quota holders selling their quota on an arm’s length basis.

2 Analysis of BCTMB Submission

In this section the Board’s specialty and new entrant proposals are assessed by comparing them with FIRB’s policy principles for specialty and new entrant programs based on FIRB’s general understanding of the Board’s submission or position.

BCTMB Submission	FIRB Assessment
<p>2.1. The Market</p> <p>The turkey market exhibits distinct seasonality, with peaks in demand at Easter, Thanksgiving and Christmas. In recent years, whole bird sales have been declining while further processed and fresh cut-up turkey meat sales have been increasing.</p> <p>The Board surveyed retailers and did not hear a strong retail demand for specialty turkey due to high price points. At the present time, most specialty turkey in B.C. is either direct marketed, certified organic, or other specialty not meeting the criteria proposed by the Board for specialty designation.</p>	<p>The Board recognizes there are farm direct and organic market segments, and that these segments are quite small presently.</p> <p>The distinct festive market demand spikes around Easter, Thanksgiving and Christmas are important to all turkey producers, and the returns realized from these markets are important to all turkey producers and marketers.</p> <p>The Board is justifiably concerned for the shortfalls in provincial allocation received from the CTMA.</p>

BCTMB Submission	FIRB Assessment
<p>There are five known processors: one processor slaughters >80% of the B.C. production.</p>	
<p>B.C. turkey producers are estimated to supply 67% of the provincial market. The BCTMB receives a provincial allocation equal to approximately 11.7% of the National Allocation as determined by the Canadian Turkey Marketing Agency (CTMA).</p>	
<p>2.2. Specialty Definitions</p>	
<p>Mainstream turkey is any turkey not designated as specialty by the Board. The Board proposes to designate specialty classes of turkey if they are certified as meeting all of the following criteria:</p>	<p>The Board proposes to recognize both certified organic and farmer direct marketing as specialty production. Certified organic would be a designated specialty product while farmer direct marketing would be based on the market channel.</p>
<ul style="list-style-type: none"> - Unique farm-based attributes; - Preservation of attributes to the consumer; - Consumer marketing and labeling of the attributes; - Require significant extra on-farm effort and specialized attention; and, - Receive a price premium in the market. 	<p>The Board should further define the farmer direct marketing category. The Board should consider that farmer direct marketing is where the individual producer personally sells the vast majority or all of his or her production directly to consumers or through local consumer outlets. In most cases this will require the producer to have the turkey custom slaughtered and processed at a registered poultry processing facility.</p>
<p>Certified organic turkey is the only recognized specialty class at this time. The Board will consider additional classes in the future in accordance with the criteria. Turkey produced under protocols of differing diet, genetics and/or production density alone will not qualify as specialty.</p>	
<p>The Board recognizes that farmers marketing direct to consumers are, in many cases, serving a specialty market channel.</p>	
<p>2.3. Certification</p>	
<p>All specialty producers must have accredited 3rd party certification that their turkeys are produced and marketed under the terms and conditions of designated specialty quota. Certification must be enabled under the Agri-Food Choice and Quality Act or other nationally or internationally recognized certification standards.</p>	<p>It is reasonable for the Board to rely on government recognized 3rd party accreditation of certification agencies.</p>

BCTMB Submission	FIRB Assessment
<p>The responsibility to sustain certification is on the producer. Should a producer temporarily lose certified status, they must immediately notify the Board and submit a plan for marketing the current flock and re-establishing certification. Should the producer be unable or unwilling to re-establish certification within 12 months, the Board may revoke the quota.</p>	
<p>2.4. Food Safety</p>	<p>It is reasonable for the Board to rely on government approved processing for all licensed production.</p>
<p>The Board requires that all turkey products offered for sale to the general public must be either slaughtered in a government inspected poultry processing facility or have verification from a local health authority that the product is in compliance with the meat regulations.</p> <p>The Board proposes that all licensed growers will be subject to OFFSAP audits and certification.</p>	<p>The Board will need to work with organic and small lot growers to adapt, if necessary, the OFFSAP standards to be appropriate to small scale and specialized production.</p> <p>Requiring OFFSAP certification as a condition of licensing will be subject to government direction concerning authorities in regards to food safety.</p>
<p>2.5. Biosecurity</p>	<p>It is reasonable for the Board to be concerned for disease outbreaks causing economic damage to the industry. The Board will, however, need to work with organic and small lot growers to adapt, if necessary, the biosecurity protocols so they are appropriate for different production methods.</p> <p>Requiring compliance to the protocols as a condition of licensing will be subject to government direction concerning authority to enforce such protocols.</p>
<p>2.6. Registration</p>	<p>The Board's registration and licensing requirements seem reasonable. The Board recognizes there are some producers that may not presently be registered or licensed. The Board will need to develop ways to encourage registration of small producers.</p>
<p>All persons producing turkey are required to be registered in accordance with the Scheme and General Orders, and are subject to the <i>Act</i>, Scheme and Orders.</p> <p>All sellers of turkey must obtain an annual license from the BCTMB. All licensed growers are subject to production and marketing audits by the Board.</p>	

BCTMB Submission	FIRB Assessment
<p>Certified specialty producers must file records demonstrating certification status as part of annual license renewal.</p>	
<p>2.7. Quota</p>	
<p>The Board already manages two categories of quota – Primary Quota and Secondary Quota.</p>	<p>The Board already has established systems for managing different classes of quota.</p>
<p>Primary quota is used to produce mainstream turkey. Primary quota may be transferred and/or leased, and may produce any class of turkey, including designated specialty turkey, upon application and approval of the Board.</p>	<p>FIRB's policy principles require that designated specialty products be managed by a specialty quota, in this case certified organic quota. The Board intends to issue certified organic quota as a secondary quota which means it will have restricted rights compared to primary quota.</p>
<p>Secondary quota is used to produce a specific class of turkey determined by the Board to be different and unique from the mainstream domestic market. Secondary quotas include multiplier breeder, breeder by-product, export re-grow, incentive and grower-vendor quotas. Secondary quota may not be transferred or leased, and may produce only the designated specialty class for which it is issued.</p>	<p>The policy principles require that designated specialty quota be transferable subject to the declining transfer assessment schedule and a minimum transfer assessment of 10%. The Board's proposal to make organic quota transferable with a facility after five years is not sufficient in terms of quota transfer conditions.</p>
<p>The Board has established a maximum farm size of 1,375,000 kg of primary quota, with exceptions for larger holdings that were in place prior to the maximum limit being established.</p>	<p>The Board's existing Grower-Vendor Program is designed such that permit volumes convert to primary quota after 12 years. The Board may wish to establish its small flock program along the principles of the Grower-Vendor Program (see Section 2.14), except that special levies would not be applicable (see Section 2.17).</p>
<p>Certified Organic Quota will be a secondary quota. It will have the following terms and conditions:</p>	
<ul style="list-style-type: none"> - Certified organic quota may only be used to produce certified organic turkey. It may not produce mainstream product. - The producer must be certified annually, and certification reports must be filed with the Board for license renewal. - Certified organic turkeys must be slaughtered in a government inspected poultry processing facility. - Leasing of certified organic quota is not permitted. - After a defined period of time, certified organic quota will be transferable as part of the transfer or sale of the holder's facility. 	

BCTMB Submission	FIRB Assessment
<p>2.8. Quota Transferability</p> <p>The Board intends that quota incentives provided to mainstream new entrants will be non-transferable in perpetuity.</p> <p>The Board intends that new entrants seeking to produce a designated specialty class of turkey would have their specialty quota become transferable, with the production facility, after five years in operation.</p> <p>Grower-vendor quota is non-transferable, and is intended to convert to primary quota after 12 years depending upon the conversion option chosen by the GV quota holder (see Section 2.15).</p>	<p>FIRB's policy principles require that specialty and new entrant incentive quota be transferable within its class. This requires changes to the Board's proposed certified organic quota and GVP permit conversion plans.</p>
<p>2.9. Quota Transfer Assessments</p> <p>The Board intends to establish an assessment of 5% on all primary quota transfers, subject to the following exceptions:</p> <ul style="list-style-type: none"> - transfers to immediate family; - mergers of quota held in common; and, - splits of quota where the subdivided holdings have common ownership. <p>If this assessment had been in place over the past three years, 27,000 kg/yr of quota would have been assessed and added to the new entrant pool.</p>	<p>The Board's proposed 5% direct transfer assessment reflects FIRB's policy principles, with exceptions for direct family members, defined as spouse, sons, and daughters; and for business reorganization where the ownership percentages do not change</p> <p>The Board will need to establish the declining transfer assessment schedule for transfers of certified organic quota and any quota provided as a new entrant incentive.</p>
<p>2.10. Exemptions</p> <p>Individuals placing <50 turkeys per year for personal consumption are exempt from levies and the requirement to hold quota.</p> <p>The Board has, to date, accommodated producers seeking to direct market through the GVP.</p> <p>The Board is not aware of needs for higher exemptions or a small flock program that are not currently being met by the GVP.</p>	<p>FIRB's guidelines require that a small flock program be established authorizing production amounts greater than the "personal use" exemption and less than the new entrant incentive.</p> <p>It is not known how the new entrant program will perform in the future. The Board's existing Grower-Vendor Program has accommodated more than 20 small lot producers with varying amounts of production up to a maximum of 15,000 kg authorized in accordance with the producers' individual needs. The Board's proposed new entrant program will also</p>

BCTMB Submission	FIRB Assessment
<p>2.11. Allocation</p>	<p>provide each successful applicant with up to 15,000 kg of quota. Based on the transfer assessment pool that can be reasonably projected, the number of new entrants will be one or two a year. This may not meet the demands for small lot production.</p>
<p>The BCTMB receives its provincial allocation from the CTMA in accordance with Agency allocation policies. B.C. produces only 67% of B.C.'s estimated market demand for turkey products under allocation received from the CTMA.</p>	<p>A small flock permit program would provide interested producers an annually renewable license authorizing the placement of a certain number of turkeys. It seems 300 turkeys would be a reasonable placement number, and this could result in up to 3,000 +/- kg of production. Such a permit program may well accommodate many direct marketers and heritage breed producers.</p>
<p>CTMA does not recognize specialty production, and does not provide an allocation, base or conditional, for specialty production.</p>	<p>The Board should also consider the potential needs of producers of heritage breeds. If a heritage flock cannot be sustained on the basis of 300 turkeys placed/year, then the Board should be prepared to increase the authorized production level for these producers to a level demonstrated to be required to sustain the heritage flock.</p>
<p>The base allocation, excluding conditional allotments, dropped from 16.4 million kg in 2001/02 to 15.1 million kg in 2004/05, a drop of 8.3%. The Board believes primary quota holders have a reasonable expectation to grow back to the base allocation volumes they produced in 2001/02 as soon as CTMA allocation increases are made available to the BCTMB.</p>	<p>The Board's proposal is to increase the allocation for Grower Vendors and to establish an allocation for certified organic growers. The amounts are based on increasing each Grower Vendor to 15,000 kg and to issue 15,000 kg to the one known organic producer.</p>
	<p>The proposal to provide each Grower Vendor the opportunity to grow to 15,000 kg treats each permittee equally. Some are already at 15,000 while others may have no desire to grow to that level. The Board intends to set aside up to 270,000 kg to allow each existing Grower-Vendor licensee to grow to the maximum level within four years. This is a conservative approach.</p>
	<p>The one known certified organic grower is proposed to receive 15,000 kg of organic quota. However, it is apparent this grower is already producing above this level. The</p>

BCTMB Submission	FIRB Assessment
<p>The Board initially established an allocation account of 150,000 kg for the GVP in 2002. The Board intends to increase this account up to 285,000 kg over the next four years to provide for growth and to meet existing and known commitments to permittees and the one certified organic producer known to the Board.</p>	<p>Board will need to determine the producer's production level in the 2004/05 quota period and issue organic quota accordingly.</p>
<p>Growth allocations for certified organic quota will come from the provincial allocation and will be provided pro-rata in same manner as primary quota. The Board recognizes there may be differential market demand requirements between mainstream and specialty production.</p>	<p>The Board's proposal to allocate pro-rata to quota holding across mainstream and specialty quota accounts will not provide for differential growth based on different rates of growth in each product/market segment. The Board needs to establish allocation policies and procedures for managing differential growth in at least two distinct classes of quota – primary and organic.</p>
<p>BCTMB intends to honour and uphold its obligations under the FPA for turkey. Due to concerns for the existing CTMA allocation policies, the Board, working with MAL and FIRB launched a complaint with the National Farm Products Council. The parties are currently working to realize improvements in CTMA's allocation policies.</p>	<p>Small flock licensee volumes should be recorded, but they should not accrue against the provincial production for the purposes of managing the provincial allocation with CTMA.</p>
<p>2.12. Product Integrity</p>	
<p>The Board requires that turkey produced as certified specialty be marketed in accordance with the criteria established for being a designated specialty class.</p>	<p>The Board will need to monitor and audit the records of organic producers and processors to ensure that all marketings are in accordance with the class of quota held by the producer.</p>
<p>The Board may approve marketing of a specialty flock as a mainstream product in the event that it fails to achieve certification but meets all OFFSAP and generally accepted production standards, subject to prior approval and possible over-production penalties and costs.</p>	<p>The Board should discuss the penalties for marketing outside a class with its Advisory Committee and specialty producers before establishing these regulations.</p>
<p>2.13. Production Switching</p>	
<p>Growers holding primary quota will be permitted to grow any class of turkey, including certified organic, upon approval of the Board.</p>	<p>The policy principles for specialty quota management require the principle of reciprocity to be honoured. Therefore, allowing primary quota to produce designated specialty products but not allowing specialty quota to produce mainstream turkey is not acceptable.</p>
<p>Holders of certified organic quota, or any future specialty quota, will only be permitted to produce the designated specialty class related to the quota.</p>	<p>The Board needs to develop rules by which a holder of one class of quota could receive authorization to produce product managed</p>
<p>Product that cannot be shipped as specialty</p>	

BCTMB Submission	FIRB Assessment
<p>may not be disposed of on the regular market without prior approval of the Board and may be subject to penalties and costs.</p>	<p>by another class of quota. It seems reasonable that allowing an organic producer to market as a mainstream product in the event that organic certification is temporarily suspended should provide that a mainstream producer could produce organic turkeys under certain circumstances. In either case, approval of the Board should be required. The Board should develop criteria by which it will allow marketing of product managed by a quota class other than the one held by a producer. This should be developed with the Advisory Committee and specialty producers.</p>
<p>2.14. Specialty Permits</p>	
<p><u>The Grower–Vendor Program</u></p>	
<p>The Board established the GVP in 2002 as a new entrant program targeted to farm direct marketers, and created a secondary class of grower-vendor quota. The GVP was originally intended as a new entrant program to expand turkey consumption and provide an opportunity for producers wishing to direct market. The original GVP provided the opportunity for up to 15,000 kg (live) of G-V quota, incurred a special levy of \$0.1925/kg, and included a right to convert the G-V quota to primary quota after 12 consecutive years in the program.</p>	<p>The Board's Grower-Vendor Program appears to have been successful for licensing a number of small producers who direct market. The permittees are paying a "special quota lease" fee of \$0.1925/kg as part of a \$0.23/kg levy assessed on all secondary quota, which includes grower-vendor quota.</p>
<p>Presently there are 18 licensees in the GVP. These licensees will be allocated approximately 137,000 kg in 2005/06. The amount of grower-vendor production has increased since the program was established.</p>	<p>The Board will need to develop a small flock permit program. Small flock permits should be annually renewable upon application and reporting of the prior year's production and marketing records. Permittees should be licensed by the Board, permits should be issued upon request, permittees should be subject to government approved food safety and biosecurity regulations, and permittees should be required to direct market their production.</p>
<p>The Board has suspended bringing new producers into the program pending the outcome of the specialty review.</p>	<p>The production authorized under a small flock permit should be limited to placement of 300 turkeys each year. Some unregistered producers may argue this level is too low. However, with a new entrant program and conversion of all existing grower vendors to new entrants licensed for up to the 15,000 kg level, it seems reasonable to work with the 300 placement limit until program demand and performance can be assessed. The amount produced under the small flock permit program should not accrue against the provincial allocation, should not be</p>

BCTMB Submission	FIRB Assessment
<p data-bbox="228 373 573 405">2.15. Permit Conversion</p> <p data-bbox="337 436 537 468"><u>Grower Vendors</u></p> <p data-bbox="337 495 850 709">The Board has entered into agreements with 18 producers under the GVP, and the Board believes it is right and reasonable to honour these agreements. To the Board's knowledge, all existing GVP permittees are producing mainstream and non-certified specialty turkeys.</p> <p data-bbox="337 737 862 1014">The Board intends to provide each GVP licensee who wishes to do so the opportunity to increase their production from existing levels to the maximum allowed under the program of 15,000 kg over four years beginning with the 2006/07 quota year. Licensees will have the option to cap the amount of G-V quota required at less than 15,000 kg.</p> <p data-bbox="337 1041 850 1224">To meet these obligations to existing licensees, the Board must make available up to 270,000 kg of allocation by the end of the four year period. This represents an increase of almost 100% from 2005/06 levels.</p> <p data-bbox="337 1251 850 1499">The Board also intends to provide GVP licensees two options. Option A involves continuing with the special levy and receiving primary quota after 12 years. Option B involves having any special levies paid to date reimbursed and receiving non-transferable secondary quota (G-V quota) having no conversion rights after 12 years.</p> <p data-bbox="337 1526 672 1558"><u>Certified Organic Producers</u></p> <p data-bbox="337 1585 850 1894">The Board knows of only one certified organic producer in B.C. at this time. This producer is not registered with the Board. The Board intends to issue certified organic quota up to 15,000 kg to this producer based on a plan to be submitted to the Board by the producer. The Board is not aware of the established production of this producer, but estimates it to be 8,000–10,000 kg based on discussions with the</p>	<p data-bbox="889 254 1338 348">deducted from provincial allocation by CTMA and should not be subject to overproduction penalties.</p> <p data-bbox="889 436 1382 558">The Board's proposed conversion plans include an option of non-transferability of quota, which does not meet FIRB's policy principles.</p> <p data-bbox="889 590 1089 621"><u>Grower Vendors</u></p> <p data-bbox="889 653 1406 1199">To convert the Grower-Vendor Program to quota in accordance with the policy principles, the Board will need to consider issuing quota to each permittee in an amount equal to their production, up to a maximum of 15,000 kg, based on the most recently completed quota year ending April 2005. Additionally, for those grower vendors not already at the 15,000 kg level, the Board will need to develop a plan with each such producer by which they will grow up to this level within a defined period of time. Any quota issued pursuant to permit conversion will need to be subject to the declining transfer assessment schedule. All levies owing to April 2005 will, subject to Board discretion, be due and payable prior to the issuance of quota.</p> <p data-bbox="889 1230 1094 1262"><u>Certified Organic</u></p> <p data-bbox="889 1293 1406 1654">The Board also needs to issue organic quota to the one known certified organic producer who has come forward and been recognized during the specialty review process. Since this grower's production level is already above the 15,000 kg level proposed by the Board, it will be necessary for the Board to determine the amount produced in the quota year ended April 2005. The Board will need to issue organic quota in the amount produced in the 2004/05 quota year.</p>

BCTMB Submission	FIRB Assessment
<p>producer during the consultation phase of the specialty review.</p>	
<p>Certified organic quota issued will be non-transferable for the first five years, after which it will be transferable with the production facility.</p>	
2.16. Pricing	
<p>Certified organic live turkey prices must be in accordance with Board ordered minimum prices.</p>	<p>The Board should monitor prices of grower-vendor and organic producers to ensure that their prices conform to the Board ordered minimum prices. The Board may also be able to assist some grower vendors with pricing, although most direct marketers likely sell well above wholesale prices.</p>
<p>The Board believes no minimum price is required specifically for certified organic turkeys at this time since the only known specialty producer is a direct marketer.</p>	
2.17. Levies	
<p>The same marketing levies and license fees will be applied to all classes of quota.</p>	<p>The Board will not be able to maintain the \$0.1925 special lease levy on grower-vendor or organic quota going forward.</p>
<p>All classes of quota will be subject to over/under marketing sleeves, levies and penalties.</p>	<p>All levies due and payable to the end of the 2004/05 quota period should, subject to Board discretion, be collected by the Board prior to permit conversion or license renewal.</p>
<p>The Board intends to maintain the \$0.1925/kg levy on GVP permits that are contracted to convert to primary quota after 12 years.</p>	<p>The Board may wish to examine assessing levies on a fee for service based on the cost of providing the different services required by each class of quota. This means that primary quota and specialty quotas may be assessed different levies. This matter should be considered by the Advisory Committee and any differential levies determined should be based on actual costs and activity costing.</p>
<p>The Board is eliminating the special administrative levy for GVP permittees who choose the option of having their special levies reimbursed and thereby elect to forego their rights to receive primary quota after 12 years.</p>	
2.18. New Entrants	
<p>The Board proposes to enhance its existing new entrant program to accommodate certified organic (specialty), grower vendor and mainstream new entrants. Priority will be given to certified organic and grower-vendor new entrants over mainstream new entrants.</p>	<p>The introduction of a small flock program will accommodate some current and future grower vendors. This permit program could be viewed by the Board as an entry point for producers, and it may merit consideration that small flock permittees be provided a priority ranking on the new entrant waiting list.</p>
<p>New entrants will each be provided up to a maximum of 15,000 kg of secondary quota.</p>	<p>The Board has established that specialty</p>

BCTMB Submission	FIRB Assessment
<p>To grow above 15,000 kg, producers, regardless of class of quota held, will be required to acquire primary quota.</p>	<p>and grower-vendor new entrants will be provided priority over mainstream new entrants. This is reasonable in promoting production to serve B.C.'s specialty markets.</p>
<p>The new entrant quota account will be funded, above the 285,000 kg estimated to be required to convert and accommodate existing grower vendors and known certified organic producers, by transfer assessments and redistribution of retracted and/or uncommitted non-transferable quota.</p>	<p>The incentive amount provided (15,000 kg) is relatively small in relation to average quota holdings and commercial farm sizes. However, the Board has reasonably taken the position that its new entrant program is directed first to developing specialty markets in B.C. Most producers for these markets are quite small and the 15,000 kg should accommodate them. For individuals wishing to become commercial operators 15,000 kg will provide some assistance but will not go very far in establishing a commercial operation. The numbers should be monitored annually and the program performance reviewed in three years.</p>
<p>The number of new entrants invited to enter the industry each year will depend on the amounts available in the new entrant pool.</p>	

2.19. New Entrant Eligibility

Eligibility for application to the new entrant program will include:

- B.C. resident over 19 yrs of age;
- Canadian resident or landed immigrant;
- A non-refundable application fee of \$100;
- Completion of a Board application form;
- Not previously a holder of supply managed quota; and,
- An applicant and their spouse/partner is considered one applicant.

Eligibility for issuance of quota under the new entrant program will include:

- Provision of a business plan within sixty (60) days of invitation from the Board;
- Demonstrated intent to use a licensed hatchery and processor;
- Proof of land ownership;
- OFFSAP certification, when available to the industry and as appropriate to the class of production;
- Maximum of one new entrant quota

The Board's eligibility criteria seem reasonable, and they are similar to those of all other Boards in requiring residency and excluding anyone who has previously held an interest in supply management quota.

The Board should ensure that all applicants fully understand they must be actively engaged in the farm operation or be subject to having their quota retracted. In this case, if the Board were to determine that a recipient of incentive quota was no longer actively engaged, the Board would have the right to retract the quota at that time and the quota holder would forfeit the opportunity for lower future assessment levels in accordance with the declining assessment schedule.

BCTMB Submission	FIRB Assessment
<p>per property; and,</p> <ul style="list-style-type: none"> - In the case of certified organic, the successful applicant will need to demonstrate certified status or a plan to achieve certification. 	
<p>2.20. New Entrant Waiting Lists</p>	
<p>The Board proposes to:</p> <ul style="list-style-type: none"> - Maintain one waiting list for new entrants; - Limit the number of persons on the list to six; - Advertise and update the list when it has been drawn down to three in the queue; and, - Place people on the list in the order their names are drawn randomly from a pool of applicants. 	<p>The Board's approach to the new entrant waiting list seems reasonable.</p> <p>The Board does not explicitly require that applications be renewed periodically. To ensure that applicants on the list have sustained interest and continue to meet the eligibility criteria, the Board should require annual renewal by applicants on the waiting list.</p> <p>The Board will need to be clear in terms of priorities in offering invitations when sufficient quota is available from the transfer assessment account. For instance, if grower vendors and certified organic producers are to be given priority, in a situation where there is only one spot available and both grower-vendors and certified organic producers are on the list, how will the Board determine which one gets the invitation?</p> <p>If the Board determines that small flock permittees will also have a priority on the new entrant waiting list, it would be advisable for the Board to consider the hierarchy of priorities it will apply when making invitations.</p>
<p>2.21. Representation</p>	
<p>All growers licensed by the Board are members of the B.C. Turkey Association and have voting rights at the Association. Eligibility to vote at the BCTMB level requires a licensed grower to hold a minimum of 0.25% of the quota issued in the province.</p> <p>The Board presently receives advice from two organizations – the B.C. Turkey Association and the B.C. Turkey Advisory Committee. All growers licensed by the Board are eligible for representation through the Advisory Committee. The Board intends to appoint a specialty grower to the B.C.</p>	<p>Some grower vendors are seeking a forum to share information and ideas about their operations. In light of this, the Board may wish to revisit establishing a Specialty Markets Advisory Committee. In the event the Board determines to establish a Specialty Markets Advisory Committee, it should ensure that clear terms of reference are established from the outset.</p> <p>As an alternative to voting on the basis of a minimum quota holding, the Board may wish to consider establishing voting rights, either completely or in part, on the basis of quota held. For instance, the Board could</p>

BCTMB Submission	FIRB Assessment
<p>Turkey Advisory Committee.</p> <p>The Board intends to consider establishing a Specialty Product Advisory Committee in the future when there are sufficient specialty producers to justify a committee.</p>	<p>establish a double hurdle for voting whereby decisions require both a majority of producers and a majority of production.</p>
<p>2.22. Transparency</p>	
<p>The Board intends that new entrant program waiting lists will be managed by the Board's auditor and that waiting lists will be published on the BCTMB website.</p>	<p>The Board will have several programs to operate – the small flock program, the new entrant program and several classes of quota. Administration can be made efficient by the use of data management systems and web-enabled communication and registration. However, the effectiveness of the programs will depend upon how well the Board and producers work together. The Board is regulatory and is required to enforce its regulations. It will be useful for the Board to develop some means for communicating and working with specialty and smaller producers, perhaps through an Advisory Committee focused on their interests.</p>

3 Response Summary

FIRB is giving policy direction to the BCTMB that its specialty and new entrant submission is acceptable subject to the following changes and/or clarifications being reflected in the Board's draft Orders which are to be prepared and submitted to FIRB on or before October 31, 2005:

1. The Board should develop clear criteria for what constitutes direct marketing by producers.
2. The Board should plan to work with small scale and certified organic producers to adapt and develop OFFSAP and biosecurity guidelines to be appropriate to these types of operation.
3. The Board should create a specialty quota class for managing certified organic turkey production and marketing. This quota should be transferable as specialty quota and subject to the declining transfer assessment schedule.
4. The Board should institute the declining transfer assessment schedule for all specialty and new entrant quota issued on or after the implementation of the specialty and new entrant programs.
5. Direct transfer assessments on existing primary quota should be 5%
6. The only exceptions from transfer assessment should be limited to direct family transfer to spouse, sons or daughters; and for corporate reorganization where the percentage quota ownership does not change.
7. The Board should introduce a small flock program authorizing up to 300 turkeys to be placed annually. Permits should be annually renewable upon application and should be intended for

direct marketers. Amounts produced under the new small flock program should not accrue against the provincial allocation.

8. The Board should develop procedures to distribute the provincial allocation received from CTMA among primary quota and specialty quota accounts based on different market growth in each segment. Allocation to producers within a class should be pro-rata to quota ownership within the class.
9. Allowing production of a product other than that managed by the class of quota held should be a temporary measure (i.e. 1 year) approved by the Board based on demonstrated production or market needs.
10. Special lease levies (\$0.1925/kg) on grower-vendor quota should be terminated effective the end of the 2004/05 quota year (April 2005). Subject to Board discretion, all levies due and payable to April 2005 should be paid by the permittees prior to permit conversion to quota.
11. All existing Grower Vendors should be issued quota in the amount of their 2004/05 production for the 2005/06 year. The start date for the transfer assessment on this newly issued quota should be the year in which the permittee entered the Grower-Vendor Program, providing they have produced continuously since that time, otherwise the start date should be the 2004/05 quota period.
12. Existing Grower Vendors not presently at the 15,000 kg limit should be provided the opportunity to grow to this level within a defined period of time (i.e. four years). There should be no obligation to grow to this 15,000 kg level.
13. The Board should issue the one known certified organic producer an amount of organic quota equal to the 2004/05 production.
14. For producers to grow beyond volumes initially issued, the Board will need to develop allocation procedures for the different quota accounts. This could be done in consultation with specialty producers or through an Advisory Committee.
15. The Board's new entrant program should build on a small flock program and give priority to specialty market and grower-vendor requirements.
16. The Board should ensure its new entrant and grower-vendor policies and procedures require licensees to be actively engaged in the farming operation.
17. The Board should determine if the existing Advisory Committee approach will work for grower vendors and specialty producers; if not, it should set up a Specialty Markets Advisory Committee comprised of an equal number of specialty producers, specialty processors, a Board member and an independent Chair.

B.C. Broiler Hatching Egg Commission
#180-32160 South Fraser Way
Abbotsford, BC
V2T 1W5

Attention: Dave Cherniwchan

Dear Sir,

After having met with you on the morning of February 22, 2010, to discuss the B.C. Broiler Hatching Egg Commission's (BCBHEC) future plans for the specialty breeder industry, as per instructions from the Farm Industry Review Board (FIRB), we feel the need to have our concerns registered with the commission.

The specialty meat bird industry, as regulated by the B.C. Chicken Marketing Board (BCCMB), consists of two types of products: organic chicken and Asian chicken. The chicks used for the organic market are supplied by mainstream broiler hatcheries and are regulated under the present orders of the BCBHEC. Asian chicken, however, is split into two categories: Silkies and Asian. The definitions for both types of Asian style specialty meat bird have been approved by both the BCCMB and FIRB. Also, for the past several years all chicks placed on licensed, specialty chicken farms have been registered with the BCCMB and have been grown, processed and marketed under the guidelines set out by the BCCMB.

To the best of our knowledge, the companies or individuals who have been recognized by the BCCMB as suppliers of Asian style chicks are Coastline Chicks, Bradner Farms, John Giesbrecht, and Bill Friesen.

It is our opinion that consideration should be given to setting a past date for recognition of the above suppliers who have a historical record of specialty meat chick sales as set out by the regulations of the BCCMB. All future proposals for breeder flocks to be placed as "specialty breeders" should be placed on a list for review by the BCBHEC only after guidelines and regulations are in place and a business plan has been approved by the FIRB.

The reasons for these proposed guidelines are as follows:

- As per the regulations of the BCCMB, the production of specialty meat chicken has been limited to those licensed producers that hold specialty quota. There is no likelihood for growth in the Asian chicken market in the near future.

- The individuals and/or companies listed above have put a great deal of time (10 years or more) and money into ensuring that the specialty Asian chicken industry is supplied with chicks that meet the requirements of the definitions currently approved by FIRB.
- According to the precedents set by all of the other regulatory agencies (chicken, egg, turkey and dairy), the financial investments and future livelihood of all producer stakeholders that were on record prior to the reviews being undertaken, were protected.

If, as suggested, there have already been several requests or proposals to the BCBHEC by parties interested in placing "specialty" breeder flocks as a result of the potential review and subsequent imposition of regulations, the consequence of allowing any of these proposals to take place prior to completion of the review could be disastrous in an already flooded market.

The refusal by the BCBHEC to put an immediate moratorium on all proposals by new producers would jeopardize the financial investment and future business of the current recognized stakeholders. It could also have major legal implications that would put the BCBHEC in the position of allowing the production of eggs in excess of current requirements, which would then result in eggs being sold as table or breaker eggs.

We appreciate your review of the proposed guidelines and look forward to your response.

Thank you.

General information regarding "Specialty Broiler Breeders"

On March 12, 2010, the British Columbia Broiler Hatching Egg Commission hosted a meeting to discuss the regulation of "specialty" broiler breeders.

Excluding the General Manager of the BC Chicken Marketing Board and Commission representatives, 12 individuals attended the meeting.

The views of stakeholders were solicited as to the extent of regulatory intervention that should be applicable to "specialty" broiler breeders. All those who expressed a view on the subject were unanimous in the view that regulation should extend only to premise identification and the application of biosecurity and food safety rules. Concern was expressed that any ambiguity on this point could have a disruptive affect as persons might be inclined to place flocks in the expectation that doing so might result in an entitlement to an allocation of quota. Those who expressed a view on the matter were unanimous in requesting that the Commission provide a clear statement that regulation will extend only to premise identification and the application of biosecurity and food safety rules.

Accordingly, the Commission is hereby communicating that there is no plan to allocate quota to those who are producing (or who may produce) "specialty" broiler breeders. Consistent with the views of meeting participants, the Commission intends to introduce rules for "specialty" broiler breeders only in so far as is necessary to achieve the objectives of premise identification, biosecurity and food safety. A copy of this notice will be published on the Commissions' website.

There was some discussion concerning the definition of a "specialty" broiler breeder. The consensus expressed at the meeting was that a "specialty" broiler breeder is one that is placed for the purpose of satisfying the unique "Asian" chicken market. It was noted that approximately 80% of that market is chicken that is marketed to consumers with head and feet on. Silkies, Taiwanese and Loong Kong were identified as breeds typically placed for that purpose. The Commission will be formulating a definition for "specialty" broiler breeder so as to clearly distinguish such breeders from mainstream breeders (which include those from Hubbard ISA, Cobb Vantress, or Ross and will be preparing draft rules intended to implement premise identification, biosecurity and food safety requirements.

**Decision Re:
Polderside Farms Inc.
Wednesday, August 11, 2010**

What is (and is not) “Unique” about Polderside’s Plan	10
The “Small-Lot Innovative Self-Marketer Program”	13

Introduction

Following a series of informal inquiries from Virginia Jacobsen, principal of Polderside Farms Inc. (“Polderside”), and a request by the Commission for a detailed business plan, Ms. Jacobsen formally applied to the Commission for special regulatory accommodation to produce broiler hatching eggs from a flock of 12,000 broiler breeders. This formal application was dated July 26, 2010.

In an effort to encourage Polderside to provide sufficient detail, the Commission invited Ms. Jacobsen to utilize her legal counsel to ensure that her plan was communicated in a way that would not cause concern with respect to matters that Polderside might consider to be sensitive or confidential. In the formal application dated July 26, 2010, Ms. Jacobsen expressed her expectation that the information in the application should be treated as confidential¹. For that reason, the formal application is not included as an appendix to this decision. Furthermore, the Commission is of the view that this decision should not be published or shared with any third party (other than the BCFIRB) until such time as Ms. Jacobsen has had an opportunity to review it and express a position with respect to anything in it which she might regard as being confidential.

Brief Summary of Decision

For the reasons that follow, the Commission is satisfied that some – but not all – aspects of Polderside’s plan are sufficiently unique to warrant special regulatory accommodation.

Innovation and diversification are to be encouraged. In some cases (and we believe this is one such case) innovation carries additional risks. Without some form of regulatory accommodation, risk-taking by innovators may be discouraged.

However, there are limits to the circumstances that may warrant regulatory accommodation. It is essential that special regulatory accommodation be granted only where the circumstances are truly unique. In other words, there must be a cogent, justifiable basis for the grant of special regulatory accommodation. The integrity of the supply management system as a whole must be maintained.

Polderside’s “business plan” was lacking in detail. Much of the “business plan” was focused on the attributes of the strain of broiler breeder that Polderside wishes to place. Though it is often said that the Commission “regulates” broiler breeders and broiler hatching eggs, such a statement cannot be taken too literally. The Commission regulates persons engaged in the production and marketing of broiler breeders and broiler hatching eggs – not the chickens and eggs themselves.

¹ However, it is to be noted that Ms. Jacobsen copied her application to the BCFIRB, the Minister of Agriculture and Lands, and *The Province* newspaper.

Consequently, the question before the Commission is not whether “RedBro” broiler breeders should be exempted from regulation, but whether the proposed activities of Polderside warrant some special regulatory accommodation.

Despite the absence of any real detail in the “business plan”, the Commission believes that it has a sufficient understanding of Polderside’s intentions to come to a decision. Fundamentally, Polderside is a licensed, quota-holding chicken grower that wishes to self-market chicken grown under its quota and produced from an atypical strain of broiler breeder. Apparently, licensed British Columbia Hatcheries have not yet recognized a demand for this strain of production, or if they are alive to a demand, they are apparently unable or unwilling to place flocks of this strain with existing producers. Consequently, Polderside wishes to place its own flock of broiler breeders for the principle purpose of satisfying its own demand (as a chicken grower) for this strain of production.²

The Commission believes that an “ad hoc” decision (applicable only to Polderside) is to be avoided. In essence, an ad hoc decision really reflects a failure to identify with any precision the aspects that are truly unique and deserving of special regulatory accommodation. It is preferable to express the decision as a policy. If any other person were to present the same set of unique attributes they too should be able to access the same form of regulatory accommodation. Accordingly, the Commission’s decision is expressed in the “Small-Lot Innovative Self-Marketer Program” attached hereto.

Polderside

Polderside is a licensed chicken grower. It has been issued an allotment of conventional grower quota equivalent to 50,154 live-weight kilograms annually, or 7,716 live-weight kilograms per period³. At present, licensed growers are permitted to produce at 94.59% of the production level authorized under their quota allotment.

Polderside applies for “an exemption from breeder quota in order to grow a breeder flock of RedBro chickens available to [it] from Group Grimaud in France.”

Though Polderside only has an allotment of conventional grower quota equivalent to 50,154 live-weight kilograms annually, it has indicated in its application that it wishes “to increase the amount of product from a breeding flock of 12,000 birds (two-6000 bird flocks growing within 6-7 months of each other).” To provide context, Polderside

² Polderside has not provided the Commission with evidence of any efforts to obtain day-old “RedBro” chicks from a licensed hatchery. If a hatchery was willing and able to supply such day-old chicks to Polderside, the case for special regulatory accommodation would probably not be met.

³ Eight week cycle.

currently requires approximately 4,000 day old chicks once every eight weeks⁴ to satisfy the quota allocation issued to it by the British Columbia Chicken Marketing Board.

With suitable growing facilities, a chicken grower could place day-old chicks on a weekly basis. In Polderside's case, its allotment of conventional grower quota could be satisfied by the placement of 500 day-old chicks each week ($4000 \div 8$). Approximately 625 broiler hatching eggs per week would be required to generate that volume of day-old chicks. This translates to approximately 240 broiler breeders.

Without growing facilities that would permit the placement of day-old chicks on a weekly basis, Polderside would require 4,000 day-old chicks once every eight weeks⁵. Approximately 5,000 broiler hatching eggs (*once every eight weeks*) would be required to generate that volume of day-old chicks. Obviously, a flock of broiler breeders produces continuously (not just once every eight weeks). Consequently, a flock of 2,000 broiler breeders would be required to produce 5,000 broiler hatching eggs *each* week. With a breeder flock of this size, approximately 35,000 broiler hatching eggs would be produced in every eight week period that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board. On an annual basis, a broiler breeder flock of this size would generate approximately 227,500 broiler hatching eggs that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board.

A broiler breeder flock of 12,000 birds (two-6000 bird flocks growing within 6-7 months of each other) would produce approximately 1,560,000 broiler hatching eggs. On an annual basis, a broiler breeder flock of this size would generate approximately 1,365,000 broiler hatching eggs that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board.

The Commission is fully aware that Polderside's plan is to market production from broiler breeders that is surplus to its own requirements (as a chicken grower) to: (a) "Western Hatchery"; (b) "Pollon Group"; (c) "a commercial grower in Washington state"; (d) "one or two small quota holders that will grow the RedBro for the Asian markets"; and, possibly (e) "small permit holders and organic growers wanting chicken to pasture". Nevertheless, it is important to bear in mind the relationship between continuous production from a broiler breeder flock (on the one hand), and the placement of a small number of day-old chicks under quota issued by the British Columbia Chicken Marketing Board (on the other).

The Regulatory Context

For the purposes of this decision, it is important to comment on the regulatory context in three respects: (a) the unique nature of the broiler hatching egg industry; (b) historical

⁴ Polderside might well place pullets over a longer cycle (such as a twelve week period) in which case the numbers would be adjusted accordingly.

⁵ Ibid.

anomalies with respect to persons engaged in production from “Silkie”, “Taiwanese” and “Loong Kong” broiler breeders; and (c) the directions of the BCFIRB with respect to specialty products and markets in British Columbia’s supply managed sectors. Each of these will be briefly discussed in turn.

A. The Nature of the Broiler Hatching Egg Industry

The hatching egg sector is unique among supply managed commodities. Unlike every other supply managed commodity, hatching egg producers do not produce an “end product”. Hatching egg producers only produce an “input” to the chicken industry, namely: broiler hatching eggs. In effect, this means that hatching egg producers have only one customer – the hatchery. There is no demand for hatching eggs from wholesalers, retailers or consumers. There is only demand for hatching eggs from hatcheries.

In this environment, the potential for “niche markets” or “specialty production” is substantially more limited than it is in other commodities.

Furthermore, the hatching egg producer’s “customer” (the hatchery) is largely able to control the nature of the product that it receives. Broiler breeder flocks are ordered and arranged by hatcheries. If a hatchery desires a particular strain of broiler breeder, it may simply order and arrange for a flock of that strain to be placed with a registered producer.

Consequently, it is important to understand that Polderside’s inability to source atypical day-old chicks for its grower operations arises from an apparent inability or unwillingness of hatcheries to satisfy that demand (if there is one); not because registered producers are unable or unwilling to produce from that (or any other) strain of broiler breeder.⁶ Clearly, if any hatchery believed that there was an unsatisfied demand for day-old “RedBro” chicks, it could arrange for the placement of RedBro broiler breeders with registered producers. Hatcheries might do so in the future. But the fact remains that no British Columbia hatchery is responding to that demand (if there is one) at this time – which is the principle reason for Polderside’s request to place its own flock of RedBro broiler breeders.

B. Historical Anomalies (Silkie, Taiwanese and Loong Kong)

It is well known throughout the industry that there are certain persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks that are operating without licence or quota issued by the Commission.

⁶ Polderside has not provided the Commission with evidence of any efforts to obtain day-old “RedBro” chicks from a licensed hatchery. If a hatchery was willing and able to supply such day-old chicks to Polderside, the case for special regulatory accommodation would probably not be met.

It is important to note that all such persons are, in fact, regulated in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, Taiwanese or Loong Kong broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. It may be that persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks should be made to comply with all of the Commission's orders. On the other hand, it may be that the Commission will need to develop modified requirements for such persons. Quite possibly, some of these persons may be eligible under the very program that has been developed in response to Polderside's request. In any event, the Commission's failure to enforce against these persons cannot be regarded as creating a de facto exemption. We regard non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks as an important but ultimately unrelated matter for determination at another time. While it would have been preferable to develop a comprehensive policy addressing these issues too (if the policy established hereunder is not sufficient to do so), Ms. Jacobsen has repeatedly emphasized that she requires a decision on her application without delay. For that reason, the Commission has decided that the best course of action is to establish the "Small-Lot Innovative Self-Marketer Program", and then examine in greater detail whether that program is sufficient to address the currently non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks.

C. BCFIRB Directions

On September 1, 2005, the BCFIRB released its comprehensive report concerning specialty products and markets in British Columbia's supply managed sectors.

At pages 2 to 5 of the report, the BCFIRB expressed the following policy principles:

Registration

- a. **Boards should have plans to register all producers regardless of size or type of license.**
- b. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.**

Designation of Specialty Product Markets

- c. **Designation of specialty product/market classes is to be based on clearly defined criteria.**
- d. **Certification is to be required as a condition of licensing for all designated specialty product classes. Certifiers are to be qualified by a skilled and reputable third party accreditation agency.**

.....

Production and Marketing Quota

- g. Specialty classes of quota are to be designated. Each class of quota should be managed separately from other classes of quota. Quota administration policies should be the similar for all classes with exceptions only when necessary.
- j. Boards are to provide annually renewable small lot permit programs authorizing production levels greater than the personal use exemption level and less than the quota incentives provided through the new entrant programs.
- k. The number of small lot permits issued should be unrestricted, subject to eligibility criteria which should include only one permit issued per property and that direct marketing by the permittee be encouraged.
- l. Permit programs for new innovations are to be provided, potentially through the small lot permit system.

At page 7, the BCFIRB referred to the recommendations contained in the report entitled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System*, which was commissioned by the Ministry in the fall of 2004:

1. All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.
2. Specialty product definitions should reflect substantive farm level differentiation, 3rd party certification, and identity preservation through to the consumer.
3. *Specialty production and marketing should be managed using a distinct and restricted class of quota.*

At pages 11 to 12, the BCFIRB noted:

The incentive to produce without quota is large because regulated prices provide attractive production margins. ...In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that “a chicken is a chicken” regardless of type. On this basis, the Boards are responsible to regulate all classes of product, including specialty.

Commencing at page 19, the BCFIRB issued the following policy directions:

5.1. Registration

With respect to Registration, the following policy directions are given:

1. **All producers, regardless of size or class of production, should be registered with the Boards.**
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

5.2. Specialty Definitions

With respect to Definitions for specialty products, the following policy directions are given:

1. **Designated specialty products are to respect the principles of farm-based differentiation with identity preservation, marketing and representation of the unique farm-based attributes to the end consumer. The designated product should also require extra effort to produce and market and it should receive market price premiums. The designated product will almost certainly require extra effort to produce and market and, as a result, should receive market price premiums.**
2. **Boards' Orders are to include procedures for the pursuit of new and innovative product/market segments in the future.**
3. **Boards should recognize local direct marketing efforts of individual producers and the efforts of individuals producing rare heritage breeds within the specialty production and marketing framework.**
4. Specialty Markets Advisory Committees should be charged with recommending amendments, if considered necessary, to the criteria for designation of future specialty classes.
5. Humane treatment of livestock is to be required of all producers, and SPCA certification should be viewed as a positive step to further demonstrate humane production practices. However, SPCA certification should not, by itself, be sufficient for designation as a specialty class for quota purposes.

5.3. Certification

With respect to Certification, the following policy directions are given:

1. **Designated specialty products are to be third party certified as such along the entire supply chain from farm to end consumer.**

2. **Approved certification standards are to be based on legitimate third party standards that meet provincial, national or international standards or approval. Where standards outside the AFCQA are adopted, FIRB prior approval will be required before those standards are recognized.**

5.10. Exemptions

With respect to Exemptions, the following policy directions and principles are given:

1. There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.
2. Exemptions are to be very clear regarding which specific Orders from which an individual or group of individuals is being exempted.
3. The Boards' positions that existing "personal use" exemption levels are adequate are acceptable subject to the introduction of small lot permit programs by Boards.
4. **Boards are directed to develop and introduce small lot permit programs which provide for, among other things, product/market innovation, local/regional small lot agriculture, heritage breeds, and farmer-direct marketing initiatives.**
5. **Small lot permit levels should be set higher than the "personal use" exemption levels and lower than the quota incentives proposed through new entrant programs.**
6. Government, FIRB and industry should work together to press for changes in the National Allocation systems so that personal use exemption and small lot permit amounts are not counted as part of the provincial allocation.

5.17. Food Safety & Biosecurity

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.**
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

With respect to the hatching egg industry in particular, the BCFIRB said:

The Commission's belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

The Commission may wish to provide, if it has not already done so, a specific exemption for Asian specialty breeders. This exemption could take the form of an annually renewable license to produce Asian specialty breeders in any amount subject only to certain requirements such as humane production practices and marketing only for Asian specialty production.

.

The Commission's position that a specialty program is not required for broiler hatching eggs at this time is accepted subject to the condition that, should designated specialty chicken produced in accordance with the B.C. Chicken Marketing Board regulations require specialty chicks, the Commission should develop and introduce a specialty program.

What is (and is not) "Unique" about Polderside's Plan

Polderside has placed a great deal of emphasis on the unique attributes of the broiler breeder strain that it wishes to place. There can be no doubt that every strain of broiler breeder has unique attributes, and it is obvious that Ms. Jacobsen is a particularly energetic proponent of the RedBro strain.

However, the Commission does not regard the strain of broiler breeder, in and of itself, as being a determinative factor when considering whether Polderside is deserving of some special regulatory accommodation. As already noted, licensed British Columbia hatcheries could require any registered producer to place any strain of broiler breeder if the hatchery perceived a demand for the resulting day-old chick offspring. What is unique about Polderside's plan is not the strain of broiler breeder; but the fact that Polderside intends to self-market chicken grown under its own quota from day-old chicks that are apparently unavailable from any British Columbia hatchery⁷. As a self-marketer of chicken, Polderside has *ipso facto* established a demand for day-old chicks originating from RedBro broiler breeders. If these day-old chicks were currently available from licensed British Columbia hatcheries, there would be no sound basis for granting any special regulatory accommodations. However, it appears that licensed British Columbia hatcheries are either unable or unwilling to place flocks of this strain with existing producers, at least at the present time.

Polderside perceives significant demand for chicken derived from RedBro stock. Its perceptions about this demand may be accurate, or they may be entirely misplaced. In either case, Polderside has expressed a willingness to pursue this market, and to accept the risks associated with being a market innovator.

The Commission believes that innovation should be encouraged. The apparent inability or unwillingness of established hatcheries and processors to pursue this market (if one exists) might mean that day-old RedBro chicks are simply not available in British

⁷

Polderside has not provided the Commission with evidence of any efforts to obtain day-old "RedBro" chicks from a licensed hatchery. If a hatchery was willing and able to supply such day-old chicks to Polderside, the case for special regulatory accommodation would probably not be met.

Columbia⁸. The Commission does not think that this state of affairs should effectively preclude Polderside from pursuing its plans.

On the other hand, the Commission does not think that production of hatching eggs for purposes other than to satisfy its own requirements as a self-marketer of chicken (under the quota allotted to it by the Chicken Board) can properly be regarded as unique in any respect, or deserving of any special regulatory accommodation. For example, Polderside has applied to the Commission for special accommodations as would permit it to produce from a flock of 12,000 broiler breeders. As already noted, 240 broiler breeders would suffice for Polderside's own purposes as a self-marketer if adequate provision were made for the placement of broiler flocks once every week. If broiler flocks are to be placed once every eight week period (as is customary in the chicken industry) a flock of 2,000 broiler breeders would be more than sufficient for Polderside's purposes. With a breeder flock of this size, approximately 35,000 broiler hatching eggs would be produced in every eight week period that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board. On an annual basis, a broiler breeder flock of this size would generate approximately 227,500 broiler hatching eggs that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board.

To reiterate, a *broiler breeder flock of 12,000 birds* (two-6000 bird flocks growing within 6-7 months of each other) would produce approximately 1,560,000 broiler hatching eggs. On an annual basis, a broiler breeder flock of this size would generate approximately 1,365,000 broiler hatching eggs that would be surplus to Polderside's requirements under the quota allocation issued to it by the British Columbia Chicken Marketing Board.

Polderside's plan is to market production from broiler breeders that is surplus to its own requirements (as a chicken grower) to: (a) "Western Hatchery"; (b) "Pollon Group"; (c) "a commercial grower in Washington state"; (d) "one or two small quota holders that will grow the RedBro for the Asian markets"; and, possibly (e) "small permit holders and organic growers wanting chicken to pasture". However, the Commission does not think there is anything sufficiently unique about these aspects of Polderside's plan to warrant any special regulatory accommodation:

1. If any hatchery wanted to purchase broiler hatching eggs produced from an atypical strain of broiler breeder, it could simply place atypical broiler breeder flocks with registered producers. As already noted, this feature of the hatching egg industry is unique. Essentially, the hatching egg producer's customer (i.e., the hatchery) *directly* controls the nature of the product that it receives. There is no need for a mechanism to encourage producers to produce a "specialty product" to satisfy the demands of the hatchery/customer – as the hatchery already directly controls the nature of the product. Consequently, it is not necessary to provide an allocation of quota to Polderside (or to any other

⁸ Ibid.

producer) in order to satisfy the demands of hatcheries for atypical production. To put the matter another way, if Western Hatchery could purchase 1,365,000 broiler hatching eggs produced annually by Polderside under a special regulatory accommodation granted by the Commission, Western Hatchery would naturally reduce its placements with existing producers. In the Commission's view, there could be no justifiable basis for such a reduction, as Western Hatchery is already able to place any strain of broiler breeder with the producers currently shipping to it.

2. The sale of day-old chicks by Polderside to third parties is fundamentally a "hatchery" business – not a "hatching egg producer" business. The Commission does not think there can be any justification for a regulatory accommodation to a hatching egg producer in order to facilitate its efforts to engage in what is fundamentally a hatchery business (the sale of day-old chicks). This aspect of Polderside's plan could be satisfied within the existing marketing system by simply entering the industry as a licensed hatchery. In that event, Polderside could place flocks (of any strain) with producers and sell day-old chicks to third parties. Seen in this light, it becomes clear that the Commission could not grant a regulatory accommodation to Polderside (in the form of an allocation of quota) to facilitate its desire to engage in the sale of day-old chicks to third parties, without also granting similar regulatory accommodations to existing hatcheries (who already engage in the sale of day-old chicks to third parties). Furthermore, the Commission is of the view that it simply could not grant a regulatory accommodation to facilitate the marketing of custom-hatched day-old chicks to third parties without destabilizing the supply management system. If such an accommodation were granted, there could be no principled basis to deny similar regulatory accommodations to other prospective producers who would simply place broiler breeders (or "atypical" broiler breeders) to be custom-hatched as day-old chicks for marketing to third parties. In the Commission's view, the ever-present incentive to produce without the cost burden of quota would result in a natural shift away from the sale of hatching eggs to hatcheries under quota, towards the custom-hatching of eggs under regulatory accommodations granted by the Commission. In such an environment, it is not difficult to see that the supply of hatching eggs and day-old chicks could no longer be effectively regulated. This would inevitably lead to the kind of market instability that the supply management system is designed to avoid.⁹

In the Commission's view, emphasis must be placed on the "self-marketing of chicken grown under quota" aspect of Polderside's plan. It is this facet, above all others, that indicates that some special regulatory accommodation is both warranted and capable of

⁹ Polderside did not provide any details with respect to its plan to sell day-old chicks to "a commercial grower in Washington State". If sufficient details were provided, and if the sale of day-old chicks into the United States could be adequately monitored to ensure that such chicks are not actually sold into the domestic market, the Commission would entertain further discussions to determine whether this could provide a viable alternative (in whole or in part) to the sale of surplus hatching eggs to the breaker.

being granted without destabilizing the supply management system. In the circumstances present here, there is both a demand and an apparent lack of availability. Because day-old RedBro chicks are apparently unavailable through domestic hatcheries¹⁰, *Polderside's own demand* as a *self-marketer of chicken* should not be thwarted. For the reasons expressed above, this is to be contrasted with production of broiler hatching eggs simply for the purpose of *selling broiler hatching eggs to hatcheries*, or the *sale of day-old chicks to third parties*.

To be sure, a special regulatory accommodation for Polderside (so that it can satisfy its requirements as a self-marketer of chicken grown under its own quota) will also ultimately displace existing “conventional” production. However, the Commission believes that such displacement is justifiable in the interests of encouraging innovation. Conversely, the Commission does not think that displacement of conventional production is justifiable if it is unconnected with Polderside’s own requirements as a *self-marketer of chicken*. For that reason, the Small-Lot Innovative Self-Marketer Program contemplates that all broiler hatching eggs surplus to the participant’s requirements as a self-marketer of chicken grown under its own quota must go to the breaker to minimize *unnecessary* disruption of existing production.

Finally, it is necessary to comment on the nature and scope of regulatory accommodations, where they are warranted. The Commission is of the view that special regulatory accommodations should be limited in scope. Such accommodations are intended as a “leg-up” to encourage innovation and diversification – not as a permanent exemption of unlimited scope and duration. Large, commercial operations are most frequently associated with “conventional” production. Small, innovative “start-ups” are typically those that require a “leg-up”. As is evident in the attached “Small-Lot Innovative Self-Marketer Program”, the Commission does not contemplate an accommodation of unlimited scope. The Commission is of the view that it is appropriate to provide an accommodation sufficient to satisfy the applicant’s *self-marketing* requirements *according to the amount of grower quota issued to the applicant by the British Columbia Chicken Marketing Board, up to a maximum of 5,000 broiler breeder pullets*. It may be noted that the maximum allotment permissible under the Commission’s New Entrant Program is also 5,000 broiler breeders. If requirements go beyond that level, one can operate on the reasonable assumption that a sufficient “leg-up” had been given.

The “Small-Lot Innovative Self-Marketer Program”

For the reasons expressed above, the Commission has decided to implement the “Small-Lot Innovative Self-Marketer Program” in the form attached (*subject to review by the Pricing and Production Advisory Committee*).

¹⁰ Polderside has not provided the Commission with evidence of any efforts to obtain day-old “RedBro” chicks from a licensed hatchery. If a hatchery was willing and able to supply such day-old chicks to Polderside, the case for special regulatory accommodation would probably not be met.

The “Small-Lot Innovative Self-Marketer Program” is intended to be implemented by Amending Order, and would form a schedule to the Commission’s Consolidated Order. Subject to the comments below, all provisions of the Consolidated Order (including the provisions with respect to surrender of Placement Quota on transfer) would apply to entrants under the Program.

Finally, there are two features of the Program that warrant additional explanation.

First, because the Program is designed to provide regulatory accommodation to “self-marketers”, Placement Quota allotted under the Program will be issued at a utilization rate of 100%.

Second, the Program recognizes that entrants under the Program may have structural overproduction relative to their needs as self-marketers. For this reason, the Program expressly provides that entrants:

1. must ship all broiler hatching eggs produced in excess of the applicant’s self-marketing requirements (within the limits of the quota issued to the applicant by the British Columbia Chicken Marketing Board) to the breaker at the applicant’s own cost and in accordance with a delivery schedule approved and administered by the Commission;
2. must make arrangements with the breaker to dispose of all broiler hatching eggs produced in excess of the applicant’s self-marketing requirements (within the limits of the quota issued to the applicant by the British Columbia Chicken Marketing Board);
3. will receive only the price payable by the breaker for any broiler hatching eggs marketed to the breaker; and
4. are not be eligible to participate in any surplus removal program administered by the Commission and is not entitled to receive any subsidy with respect to any broiler hatching eggs marketed to the breaker.

Because entrants under the program will not have access to any surplus removal program administered by the Commission, they will not be expected to pay the surplus removal component of the levy imposed by the Commission. Instead, entrants under the Program will be obliged to pay only the administrative levy (and any other levy component unrelated to surplus removal). This will be reflected in a consequential amendment to the Consolidated Order (*subject to review by the Pricing and Production Advisory Committee*).

A person aggrieved by this decision may appeal the decision to the BCFIRB. It is to be noted that this decision is tentative only, as it has been made subject to a pending review by the Pricing and Production Advisory Committee.

DATED AT ABBOTSFORD, BRITISH COLUMBIA, THIS ____ DAY OF AUGUST, 2010.

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

Peter Whitlock - Chair

May 2, 2011

General information regarding "Specialty Broiler Breeders"

It is well known throughout the industry that there are certain persons producing from Silkie and "Asian" broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact, regulated in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, "Asian", or any other strain, of broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. The Commission is tentatively of the view that all persons should be made to comply with all of the Commission's orders, irrespective of whether they produce from Silkie, Asian or any other strain of broiler breeders. Certainly, any failure on the part of the Commission to enforce cannot be regarded as creating a de facto exemption.

Subject to consultation, the Commission envisions a process whereby these producers will be "regularized". To preclude any possibility of a "race for quota", the Commission expects that regularization will be available only to those "non-compliant" producers who have been in production for the period January 1, 2010 to December 31, 2010, and who are currently engaged in production. Upon receipt of corroborated production data for the one-year period preceding January 1, 2011, the Commission envisions that it may issue "Regularized Producer Certificates" and issue quota to holders of such certificates that is subject to the 10/10/10 and LIFO rules, provided that there is sufficient corroborative production data to justify an allocation based on that past production. Future flock placements would be as directed by the Commission in consultation with hatcheries. Any persons operating unlicensed hatcheries must obtain a licence from the Commission. The Commission would not take steps to enforce against holders of "Regularized Producer Certificates" for instances of past non-compliance. Conversely, the Commission expects that it will initiate enforcement proceedings where there is non-compliance by persons who do not hold a "Regularized Producer Certificate".

These concepts are tentative, and are set out here only to provide interested persons with some insight into the Commission's preliminary views. All these matters are subject to consultation with industry.

In due course, the Commission will be holding a meeting to discuss this issue. All hatching egg producers who are currently non-compliant, and all hatcheries receiving production from such persons, are invited and encouraged to attend to express their views on the proposed regularization process.

Sincerely;

A handwritten signature in black ink, appearing to read 'Peter Whitlock', written in a cursive style.

Peter Whitlock, Chair

**COMMISSION MEETING
September 1, 2011**

CALL TO ORDER

Interim Chair Chris den Hertog called the meeting to order at 10:00 a.m. In attendance: Calvin Breukelman, Brian Bilkes, Joe Neels, Dave Cherniwchan, Lori Gress.

Peter Whitlock attended to present the draft Specialty Breeders' Program. Stephanie Nelson attended to present the Program Co-ordinator's Report.

Chris conveyed welcome greetings to Joe as the new member to the Commission.

APPROVALS

Approval of Agenda – The agenda was approved as amended.

Approval of Minutes from June 29, 2011

Duly Moved, Seconded and Carried to approve the minutes as amended.

NEXT MEETING

A meeting in December will be called if required.

ADJOURNMENT

Meeting adjourned at 2:30 p.m.

2011/12/14: Specialty Meeting 10am-12pm

①

- Ken Hultoma: Sikee.
- Trevor Allen: TC'S.
- Kelly Beensha: TC'S.
- Casey: TC'S.
- Rob Donaldson: both.
- Bill Emerson:

* concerns over quota flipping.

* deadline re: submissions (on or prior to date.)

* grandparent stock?? → verification.
chick #1's.

▶ volume of feed re: proof.

chick board? - Aggregate form.

- domestic/export records???

* Domestic quota.

Permit for production of export. (chick currently doing this.)

↳ Risk is the Producers.

↳ Doesn't cut others production.

Industry south → 80%?

- Egg based quota?? where do you get egg supply from?

- schedule fluctuations → 16/17 rolls.

- Place breeders to meet scheduling demand (ie chinese new year)

* operation changes? aligning # vs. market place?

* No imposition of a flock schedule.

+ 2010 chicken board records for figuring out quota ???

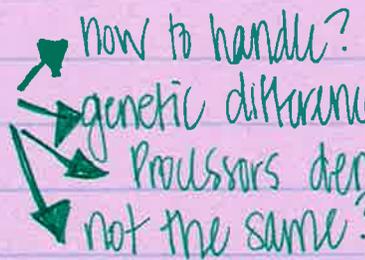

+ omis on the board for demand ???

* next step - review #1s. 2 years quota system.

+ ~~Join~~ Joining breaker program ???

* markets: growing/shrinking

* concerns over breed switching. Production protection? - BB guy could snatch speciality industry

* applicant date: January 15, 2011 -> deadline -> Lori reviewing?

* 2 category quota system? - protects industry from each other.

- speciality allocated first.
- increased ~~production~~ production.
- restricted to speciality.
- Regulate them separately.

Cons:

Another round of discussion w/ the Commission

- sub committee to Advice?
- ~~committee~~ consisting of speciality Producers
- who is speciality??

1) Define a speciality bird??

2) question of non-compliance. FRES

did not want to see ppl rewarded for non-compliance.

3rd party.

* Asian or organic is speciality? - appearance? - production? } different.

growth rate of offspring... 19 wks?
other criteria.

* export production??
- no new speciality

Specialty Committee!!

Regulated speciality quota. (Brian)

- transferability for market protection
- one time event.
- self marketing.

nope.

* develop a safety net for "free quota": transferable in yrs 2-10 @ 10%/yr.

- emails
- files
- labels
-

Specialty Breeders

Peter Whitlock [REDACTED] attended to update the Commission members on the specialty program. This is a huge complicated process, and for maintenance in the future for staff. [REDACTED]

Records from them from 2010 and 2011 – maybe we need to get stats from 2009 also. Chicks hatched from January 1, 2009 to December 31st, 2010. How many hatching eggs will be needed by each breeder producer/how many chicks? Suggested that Bob Guy be contacted to see if he has some information that may be helpful for determining production. Can we go to egg base for specialty instead of hen placements. The number of chicks they sell is recorded by the Chicken Board.

Peter will call each applicant to get some more data from them.

Brian has proposed that Peter be taken off this project. **Duly Moved, Seconded and Carried** to thank Peter for the work that he has done of the specialty program and ask him to turn over the file to Commission staff.

Peter is also the Chair of the PPAC and is to be paid per meeting only and not monthly stipend anymore.

Freedom of information requested regarding imports.

NEXT MEETING

Thursday, June 21st.

ADJOURNMENT

Casey excused from the meeting at 1:20 P.M.

Meeting adjourned at 2:08

meeting w/ Trevor + Casey : May 25

Taiwanese : 52 weeks out of the year
4 weeks provide to Trevor
3 weeks " " Casey.

47 weeks. dumping.

* surplus removal program? → will appeal.
will breaker ~~not~~ take the product?

2a: ~~minimum~~ 1 week window? with right to sales. } largest set?
work back from peak.
largest placement + work back.
BE1015 number.

Meeting w/ Bob Donaldson: May 30, 2012

* Business warfare going on.

- People undercutting pricing w/ cheap chicks

* Will not appeal if we include 2011 as long as it happens quickly.

* Kelly could be swayed by him.

* Chick quota necessary

* develop clearer mandate *

- what are you regulating?
- intentions?

meeting w/ Bill Friesen: June 4, 2012

1984: started @ CMB.

10, 10, 10 won't work. Senior citizens.

chick quota doesn't take into account market development.

new small flock market development.

time restrictions on selling?

new entrants supply chicks?

look @ chicken program. - annualized programs

- where were the mistakes?

-

Surplus removal program? why isn't specialty included?

Export regulations. vet checks every 4 weeks.

GP flocks for TCS + silkies

NEXT MEETING

July 19th tentative

August 16th

ADJOURNMENT

Meeting adjourned at 2:40 p.m.

Specialty Broiler/Breeder transition
Trevor Allen
Notes refer to the BCHEC Consolidated Orders,
September 6, 2006.

Notes: “*” marks the topics that would be addressed fairly if we were recognized as
“virtual hatcheries”

Definitions:

*P.2 “Official Flock Schedule” – Part C; we as independent specialty hatching egg producers, custom hatchers, and chick brokers are the party responsible for creating and placing each flock of day-old breeder pullets.

P.3 “Placement Quota” – Is this amount inclusive or exclusive of breeder Males?
-- From our grandparent flock we will hatch a parent flock that is in excess of our desired breeder flock size. We select from this flock during the pullet rearing stage as part of the overall selection strategy ensuring proper characteristics that are desirable for the production of hatching eggs and broiler chicks.

P.4 “Underweight Broiler Hatching Eggs” – as an industry we routinely utilize less than 52g. eggs for the purpose of producing specialty broiler chicks.

Orders:

***P.6 Special Conditions for Hatcheries**

Part 6(1)(a)(c) This is not the role of the hatchery, we as producers/chick brokers determine the supply and requirements of specialty hatching eggs. (d)This schedule is determined with the co-operation of the processors needs and allocation. This may or may not be determined within the required six production periods of eight weeks each. We as chick producers encourage this but because we are not vertically integrated as hatchery and processor, this timeline is not always obtainable.

P.14 Surrender of Placement Quota on Transfer

Is the “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program” or “Regularised Producer Placement Quota” considered a Special Allotment, General Allotment or an entity upon itself? Is there a claw back on the sale of this type of quota? How will this pool be re-allocated?

P.17 Official Flock Schedule

Part 16(2) We place 3 flocks in a two year period. Our breeder barns are in continuous production. We would not meet the 50% threshold.

***Page 17, Placements of Flocks by Hatcheries and Payment by Producers**

Part 17(1)(2)(3)(4) We as independent specialty hatching egg producers, custom hatchers, and chick brokers are the parties responsible for the above noted.

Page 19, Acceptance of First Broiler Hatching Eggs Produced by a Flock

Part 22(b) As an industry, eggs under 52g. may be considered acceptable to produce a specialty broiler chick.

Page 19, Marketing of Broiler Hatching Eggs

Part 23(1) We would be interested in participating in the surplus egg program.

***Page 20, Fowl**

Part 24(1) The market for our fowl is sustainable and do not feel the need to use the resources of the commission or its staff in this regard. (2)As costs and repercussions are born directly on use as producers, custom hatchers and chick brokers; the kill age of a flock should be determined by ourselves. (3)(4) should not be applicable.

***Page 23,**

Part 25,26,27 All of these parts should not be applicable to regularized producers because we custom hatch or are vertically integrated.

Page 23, Payment of Base Price for Chicks Under 2 Days Old

Part 28 The base price has been determined by the British Columbia Chicken Marketing Board through its Special Marketing Advisory Committee. The current base price is set at \$1.17 with stipulations as noted on the current BCCMB TC pricing order.

Page 23, Payment of Base Price for Fowl

Part 29 Not applicable

Page 25, Hatchery Responsibility Regarding Producer Levies

Part 31 Custom hatcheries could deduct levies as they are already set up to assess and process these payments. They would then add them to the custom hatch invoice as a line item. We will get confirmation of this when required.

Page 55, Production Unit Standards

Part 1 All parts that contain a grandfather date will allow our operations the same grandfathering based on the date of the issuance of regularized producer quota.

Page 56, Production Unit Management Standards

Part 3(2) My production unit produces turkeys that are regulated by the BC Turkey Marketing Board. The two farms are completely separate of each other than being located on the same address.

Page 57, Egg Gathering, Storage and Packing

Part 7(4)(a) eggs may be lighter than 52g.

Summary:

We would like to be designated as “virtual hatcheries”, this would allow us to meet the majority of the commissions orders and allow us to maintain our current businesses plans using a custom hatch model.

The self marketing of our fowl is vital to our current business and we will maintain this as an industry.

We would like to participate in the surplus egg program, but if not, we would like to reserve the right to explore our own markets. These markets would conform to all board rules, C.F.I.A. inspections and any other rules that may apply.

**COMMISSION MEETING
September 17, 2012**

MEMO

TO: Industry Stakeholders

FROM: BC Broiler Hatching Egg Commission

DATE: November 8, 2012

SUBJECT: December 30, 2012 Drafted consolidated order changes reflecting the addition of specialty regulations.

Please find attached the proposed changes to the consolidated orders reflecting the addition of specialty regulations.

Please review the documents and address all questions and concerns in writing to Stephanie Nelson, Acting General Manager within 14 days.

Thank you for your attention to this matter.

A handwritten signature in black ink, appearing to read "Casey", with a stylized flourish at the end.

Casey Langbroek.

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

CONSOLIDATED ORDER OF ~~SEPTEMBER~~ 30DECEMBER 1, 2012

NOTE TO READER: The *Consolidated Order of ~~September 30~~December 1, 2012*, is a consolidation of Orders made by the British Columbia Broiler Hatching Egg Commission as of ~~September 30~~December 1, 2012. Parts of the *Consolidated Order* may have been amended or repealed after that date, and may not be reflected in this version.

This version of the *Consolidated Order of ~~September 30~~December 1, 2012* is for private study or research purposes only, and is not the official version of the *Consolidated Order*. The British Columbia Broiler Hatching Egg Commission does not warrant the accuracy or the completeness of this electronic version of the *Consolidated Order* and in no event will the British Columbia Broiler Hatching Egg Commission be liable or responsible for damages of any kind arising out of the use of the *Consolidated Order*.

Persons who need to rely on the text of the *Consolidated Order* for legal and other purposes may obtain the official version of the *Consolidated Order of ~~September 30~~December 1, 2012*, as amended, from the British Columbia Broiler Hatching Egg Commission, Suite 180 - 32160 South Fraser Way, Abbotsford, B.C., V2T 1W5. Telephone: (604) 850-1854.

PART I - INTRODUCTORY

Purpose of Order

1. The British Columbia Broiler Hatching Egg Commission (the "Commission") has approved this Consolidated Order for the purpose of promoting, regulating and controlling the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks and broiler breeders.

Interpretation

2. In this and all Orders of the Commission, unless the context requires otherwise, the definitions contained in the *Natural Products Marketing (BC) Act*, R.S.B.C. 1996, c. 330 and the *British Columbia Broiler Hatching Egg Scheme* (B.C. Reg. 432/88) shall have effect together with the following additional definitions:

"Breaker Quality Eggs" means unbroken Cull Eggs and Underweight Broiler Hatching Eggs, other than Cull Underweight Broiler Hatching Eggs.

"Broiler Hatching Egg" includes a Breaker Quality Egg, a Cull Egg, a Cull Underweight Broiler Hatching Egg, an Underweight Broiler Hatching Egg, and an Unmarketable Egg.

"Chick" means a live chick at the time of hatch and includes a Cull Chick.

"Committee" means the Pricing and Production Advisory Committee.

"Cull Chick" means a chick having any one or more of the following characteristics: poor legs, skin tears, club down, missing eye(s), crossed beak, unthrifty appearance, dirty or matted with hatch material, scabby navel, body lesion(s), or curled toes.

"Cull Chick Rate" means the ratio expressed as a percentage by dividing the number of Cull Chicks from a given Set by the number of Chicks from that Set.

"Cull Egg" means a Broiler Hatching Egg not yet placed in a Hatchery's incubator and having any one or more of the following characteristics: soft shelled, cracked, rough shelled, misshapen, too large, stained or dirty.

"Cull Underweight Broiler Hatching Eggs" mean Underweight Broiler Hatching Eggs having any one or more of the following characteristics: punctured, broken, very dirty or mouldy.

"Egg Service Room" means a facility operated by a Producer for the purpose of washing or sanitizing, final grading and packaging of Broiler Hatching Eggs.

“Egg Storage Room” means a facility operated by a Producer for the purpose of storing Broiler Hatching Eggs and packaging for Broiler Hatching Eggs.

“F.A.S.” means freight alongside applies to the terms of sale whereby Producers will deliver their Broiler Hatching Eggs crated and ready for pick up by Hatcheries at the Producer’s Farm.

“Farm” means land on which crops, poultry or livestock are raised.

“Fowl” means spent broiler breeders no longer raised or used for the production of Broiler Hatching Eggs.

“Grower” means a Person operating a Farm for the production of broilers regulated by the British Columbia Chicken Marketing Board, and includes any Person designated by that marketing board as a Grower.

“Hatchability” means:

- (a) where the Cull Chick Rate is 4% or less, the ratio expressed as a percentage by dividing the number of Chicks from a given Set by the number of Broiler Hatching Eggs in that Set; or
- (b) where the Cull Chick Rate is greater than 4%, the ratio expressed as a percentage by dividing:
 - (i) the number of Chicks from a given Set
 - less
 - (ii) the amount by which the number of Cull Chicks from that Set exceeds 4% of the number of Chicks from that Set

by the number of Broiler Hatching Eggs in that Set.

“Hatchery” means a Person operating a facility for the hatching and incubation of Broiler Hatching Eggs into broiler chicks for delivery to a Grower.

“Independent Production Unit” means a Production Unit that is geographically and operationally separate from a Production Unit on which any other Person is actively engaged in Broiler Hatching Egg production;

“Lay Barn” means a barn operated by a Producer for the purpose of producing Broiler Hatching Eggs.

“Member” means a member of the Commission and includes the Chair of the Commission.

“Official Flock Schedule” means the schedule established, maintained and revised from time to time by the Commission, for the purpose of recording for each Registered Producer:

- (a) The date of placement of each flock of day-old broiler breeder pullets;
- (b) The size of each flock of day-old broiler breeder pullets; and
- (c) The Hatchery responsible for the ordering and placement of each flock of day-old broiler breeder pullets.

“Permissible Lease” means a Transfer of ~~Placement~~ Quota by way of lease or licence for a term of not more than two years, where:

- (a) the Transferor is a Registered Producer who has been actively engaged in Broiler Hatching Egg production for at least the immediately preceding Quota Period; and
- (b) the ~~Placement~~ Quota so leased or licensed does not exceed 10% of the Transferor’s total allotment of ~~Placement~~ Quota.

“Person” means a person as defined in the *Interpretation Act*, R.S.B.C. 1996, c. 238.

“Pick-Up” means Broiler Hatching Eggs received by a Hatchery from a Producer for transport to that Hatchery.

“Placement Quota” means the maximum quantity, as determined by the Commission, of broiler breeder pullets that may be received by a Producer in a Quota Period for the purpose of producing Broiler Hatching Eggs, excluding any allowances for mortality in shipment.

“Private Interest” does not include an interest arising from the exercise of an official power or the performance of an official duty or function that:

- (a) applies to the general public;
- (b) affects a Member as one of a broad class; or
- (c) concerns the remuneration and benefits of a Member of the Commission.

“Processor” means a Person who receives Fowl and changes its nature by mechanical means or otherwise and delivers or markets Fowl in a processed or manufactured form.

“Producer” means a Person who uses a Farm for the purpose of producing Broiler Hatching Eggs.

“Producer-Hatchery” means a Hatchery that is affiliated with one or more Producers by reason of:

- (a) the Producer or Producers having a direct or indirect interest in the Hatchery, whether by means of shares (and irrespective of the class of shares) or by way of a share interest in a parent corporation;
- (b) the Producer or Producers carrying on business with the Hatchery in partnership; or
- (c) the Producer or Producers being controlled by the same Person or group of Persons who control the Hatchery.

“Production Unit” means a Farm where broiler breeders are raised, or where Broiler Hatching Eggs are produced, or both.

“Quota” means Placement Quota or Regularized Producer Chick Quota, as the case may be.

“Quota Period” means a twenty four (24) month period commencing April 1st.

“Registered Producer” means a Producer registered by the Commission and recorded in the Register of Producers kept at the Commission’s head office.

“Regularized Producer” means a Registered Producer who has been allotted Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

“Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer.

“Reporting Period” means a one week period commencing on Sunday and ending on Saturday.

“Saleable Chick” means a Chick other than a Cull Chick.

“Set” means Broiler Hatching Eggs from a Producer that are placed, contemporaneously, in a Hatchery’s incubator.

“Special Allotment” means:

- (a) a general allotment of Placement Quota by the Commission;
- (b) a special allotment of Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1;~~or~~

Formatted: Indent: Left: 1", Hanging: 0.5"

(c) a special allotment of Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8~~i~~;

(d) a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9; or

(e) a general allotment of Regularized Producer Chick Quota.

“**Transfer**” means a direct or indirect, legal or equitable, permissible or impermissible transfer of an interest in ~~Placement~~ Quota, or the grant of an option to transfer an interest in ~~Placement~~ Quota, and in the case ~~Placement~~ Quota allotted to a corporation includes a transfer of shares or an interest in shares of the corporation or the issuance of additional shares or redemption of existing shares which results in a change in the proportion of shares held by each shareholder; but does not include the grant of a security interest in ~~Placement~~ Quota in favour of a bona fide lender.

“**Transferee**” means the Person to whom ~~Placement~~ Quota is being Transferred.

“**Transferor**” means the Person from whom ~~Placement~~ Quota is being Transferred.

“**Transporter**” means a Person who owns or operates a vehicle or vehicles for the transportation of regulated product.

“**Underweight Broiler Hatching Eggs**” mean Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weighing less than 52 grams.

“**Unmarketable Eggs**” means broken Cull Eggs and Cull Underweight Broiler Hatching Eggs.

[This page is intentionally left blank.]

PART II - LICENSING

Requirement to Hold Licence

3. (1) No Person shall act as a Producer, Hatchery, Processor or Transporter unless in possession of a valid and subsisting licence issued by the Commission, and no Person shall be relieved of compliance with this requirement in respect of any class of licence on the grounds that such Person is the holder of a valid and subsisting licence of another class.
- (2) Notwithstanding subsection (1), every Producer who is the holder of a valid and subsisting Producer licence may act as a Transporter without a Transporter licence.

Licence Classes

4. Every application for a licence must be made to the Commission in the required form.

General Conditions

5. (1) It is a condition of issuance and maintenance of every licence that the applicant or holder complies with the Orders of the Commission from time to time in force and all applicable legislation and regulations.
- (2) Subject to subsection (3), no more than one Producer licence shall be issued with respect to a single Production Unit.
- (3) Two or more Producers may apply to the Commission to dispense with the limitation imposed under subsection (2). No dispensation of the limitation imposed under subsection (2) shall be effective unless approval is given by the Commission in writing. Where the Commission has granted such written approval, every Producer whose licence is permitted to issue with respect to a single Production Unit shall be jointly and severally responsible and accountable for every incident of non-compliance, howsoever caused, in any way relating to or arising from that Production Unit.
- (4) One Producer licence may be issued with respect to more than one Production Unit.
- (5) No licence shall be issued to any individual who is under the age of nineteen years, or to any corporation controlled by any individuals under the age of nineteen years, or to any partnership with respect to which any individual member is under the age of nineteen years.

- (6) When a Producer holding a licence is a partnership or a corporation and undergoes a change in controlling partners or control of the corporation, the licence of such Producer is subject to revocation by the Commission. For the purpose of this subsection, a change in control of a corporation shall be a change in ownership, direct or indirect, of the majority voting shares of the corporation and a change in controlling partners is a change of partner or partners entitled to a 50% or greater interest in the partnership.
- (7) Licences are not transferable.

Special Conditions for Hatcheries

- 6. (1) It is a condition of issuance and maintenance of every Hatchery Licence that the applicant or holder:
 - (a) make and maintain mutually acceptable arrangements with one or more Producers duly licensed by the Commission for a consistent supply of Broiler Hatching Eggs sufficient to meet the requirements of the applicant or holder;
 - (b) place all Broiler Hatching Eggs produced by the Producer or Producers referred to in paragraph (a) into its incubators in a timely fashion and as soon after such Broiler Hatching Eggs are laid as is reasonably possible;
 - (c) make and maintain mutually acceptable arrangements with one or more chicken growers duly licensed by the British Columbia Chicken Marketing Board for the purchase and sale of all Chicks hatched from Broiler Hatching Eggs produced by the Producer or Producers referred to in paragraph (a); and
 - (d) satisfy the Commission that the chicken grower or growers referred to in paragraph (c) have each made mutually acceptable arrangements with one or more chicken processors duly licensed by the British Columbia Chicken Marketing Board for the purchase and sale of all chicken grown from Chicks hatched by the applicant or holder, for a term not less than six production periods of eight weeks each.
- (2) Without limiting the application of subsection (1), every Producer-Hatchery must comply with one of the following additional conditions for the issuance and maintenance a Hatchery Licence:
 - (a) the applicant or holder must place all Broiler Hatching Eggs produced by the affiliated Producer or Producers into its incubators in a timely fashion and as soon after such Broiler Hatching Eggs are laid as is reasonably possible; or

- (b) the applicant or holder must make mutually acceptable arrangements with another Hatchery to receive and purchase any and all Broiler Hatching Eggs produced by the affiliated Producer or Producers that cannot be placed by the applicant or holder into its incubators in a timely fashion and as soon after such Broiler Hatching Eggs are laid as is reasonably possible; or
- (c) the applicant or holder must:
 - (i) make mutually acceptable arrangements with another Hatchery to receive and purchase all Broiler Hatching Eggs produced by the affiliated Producer or Producers; and
 - (ii) the applicant or holder must accept and purchase Broiler Hatching Eggs other than from the Producer or Producers affiliated with the applicant or holder.

Renewal

7. At the commencement of a Quota Period, the Commission will renew:
- (a) Producer licences upon receipt of the prescribed application, provided that the Producer has maintained compliance with all Orders of the Commission from time to time in force and all applicable legislation and regulations;
 - (b) Hatchery licences upon receipt of the prescribed application, provided that the Hatchery has maintained compliance with all Orders of the Commission time to time in force and all applicable legislation and regulations;
 - (c) Processor licences, without application, provided that the Processor has maintained compliance with all Orders of the Commission from time to time in force and all applicable legislation and regulations; and
 - (d) Transporter licences, without application, provided that the Transporter has maintained compliance with all Orders of the Commission from time to time in force and all applicable legislation and regulations.

[This page is intentionally left blank.]

PART III - ALLOTMENT AND REGISTRATION OF ~~PLACEMENT~~ QUOTA

Allotment of ~~Placement~~ Quota

8. (1) The Commission may allot ~~Placement~~ Quota to Producers or adjust, reduce, alter or cancel ~~Placement~~ Quota allotted to such Producers, at such time or times, in such amounts and in such a manner as may be determined by it.
- (2) Unless otherwise determined by the Commission:
- (a) ~~Placement~~ Quota shall not be allotted to any individual who is under the age of nineteen years, or to any corporation controlled by any individuals under the age of nineteen years, or to any partnership with respect to which any individual member is under the age of nineteen years.
- (b) ~~Placement~~ Quota allotted to a Producer that is not produced by that Producer in a Quota Period is subject to cancellation by the Commission, except in the event of exceptional circumstances as determined by the Commission in its sole discretion.
- (c) No Producer may Transfer ~~Placement~~ Quota by way of lease or licence for a term exceeding two years, and any such ~~Placement~~ Quota so leased or licensed is subject to cancellation by the Commission.
- (d) No Producer shall be permitted to hold an allotment of Placement Quota of less than 12,000 broiler breeder pullets per Quota Period, except where the Producer is:
- (i) an entrant under the New Producer Program Rules set out in Schedule 1; or
- (ii) an entrant under the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8.
- (3) All ~~Placement~~ Quota is a revocable licence to produce only and remains the exclusive property of the Commission.

Special Allotment of Placement Quota Under New Producer Program

9. The Commission may allot Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1.

Special Allotment of Placement Quota Under Small-Lot Innovative Self-Marketer Program

10. The Commission may allot Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8.

Special Allotment of Regularized Producer Chick Quota Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

- 10.1 The Commission may allot Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

Registration of ~~Placement~~ Quota to Independent Production Unit

11. (1) ~~Placement~~ Quota allotted by the Commission to a Producer shall be registered to the Independent Production Unit or Units described in the Producer licence.
- (2) Where a Producer operates more than one Independent Production Unit under a single Producer licence, ~~Placement~~ Quota allotted to that Producer will be apportioned by the Commission and registered to each such Independent Production Unit as directed by the Producer or, in the absence of such direction, in such amounts and in such a manner as may be determined by Commission.
- (3) All broiler breeders shall be kept on and marketed from the Independent Production Unit or Units described in the Producer licence in a manner consistent with the ~~Placement~~ Quota registered to the Independent Production Unit or Units, as the case may be, unless the Commission otherwise consents in writing.
- (4) The location of an Independent Production Unit to which ~~Placement~~ Quota is registered shall not be changed in whole or in part, unless the Commission otherwise consents in writing.

Registration of ~~Placement~~ Quota to Producer

12. (1) ~~Placement~~ Quota allotted to a Producer who is a sole proprietor will be registered by the Commission in the name of the Producer. If the Producer requests that the ~~Placement~~ Quota be registered to a business name that is different from the Producer's name, the ~~Placement~~ Quota will be registered to both the business name and the Producer's name.
- (2) ~~Placement~~ Quota allotted to a Producer which is a partnership will be registered by the Commission in the partnership name and individual names of all of the partners. At the time of first registration, and subsequently as required by the Commission, the partnership shall file with the Commission a true copy of the partnership agreement showing the name of each partner

- 13 -

and the interest that each partner has in the partnership. The partnership shall inform the Commission in writing one calendar month before any subsequent change is made in the partners or in the interest each has in the partnership.

- (3) ~~Placement~~ Quota allotted to a Producer which is a corporation will be registered by the Commission in the corporate name and the name of the president or majority shareholder. At the time of first registration, and subsequently as required by the Commission, the corporation shall file with the Commission a true copy of the Certificate of Incorporation and the Register of Members. The corporation shall inform the Commission in writing one calendar month before any subsequent change is made to the share allotment within, or structure of, the corporation.
- (4) ~~Placement~~ Quota allotted in the name of a corporation is deemed to have been allotted to each shareholder, whether holding voting shares or not, in proportion to their share holdings of issued shares in the corporation.
- (5) The Commission may require a Producer, which is a partnership or a corporation, to file with the Commission at any time subsequent to first registration, a true copy of the partnership agreement or register of members of the corporation.
- (6) Failure by a Producer to provide the Commission with any of the documents required by the Commission within the time period stated by the Commission shall result in the suspension of the offending licensee's licence and ~~Placement~~ Quota until the required document is filed and approved by the Commission.

[This page is intentionally left blank.]

PART IV - TRANSFER AND LEASE OF ~~PLACEMENT~~ QUOTA

Application for Transfer of ~~Placement~~ Quota

13. (1) ~~Placement~~ Quota may only be Transferred upon application by the Transferor to, and with the written approval of, the Commission.
- (2) Applications for Transfer of ~~Placement~~ Quota must be accompanied by:
- (a) an administration fee of \$250.00 payable by the applicant to the Commission;
 - (b) a letter from the applicant's Hatchery releasing the applicant from any outstanding accounts with the Hatchery.
- (3) Where the Commission incurs legal or other professional expenses in connection with the processing of an application for Transfer, such expenses may be charged to the applicant as a condition of approval of the application by the Commission.
- (4) Applications for Transfer of ~~Placement~~ Quota made within six months of an approved Transfer of ~~Placement~~ Quota are not subject to payment of additional administration fees or additional legal or other professional expenses incurred by the Commission in connection with the processing of such applications.

Limitations on Transfer of ~~Placement~~ Quota

14. (1) The Commission may refuse to approve a Transfer of ~~Placement~~ Quota where:
- (a) The Transferor or Transferee is not in compliance with the Orders of the Commission from time to time in force and all applicable legislation and regulations; or
 - (b) The Transferee is an individual who is under the age of nineteen years, or a corporation controlled by any individuals under the age of nineteen years, or a partnership with respect to which any individual member is under the age of nineteen years.
- (2) Unless the Commission otherwise consents in writing, no Producer may Transfer ~~Placement~~ Quota by way of a Permissible Lease within one year from the date that such Producer last Transferred ~~Placement~~ Quota by way of a Permissible Lease.
- (3) The Commission may require a Transferee of ~~Placement~~ Quota to be interviewed by the Commission.

- (4) The Commission may impose conditions with respect to any approval of a Transfer of ~~Placement~~ Quota.
- (5) The Commission may suspend the approval of Transfers for a definite or indefinite period of time.

Deemed Transfer of ~~Placement~~ Quota

- 15. (1) A Transfer of ~~Placement~~ Quota allotted to a partnership is deemed to occur when a partnership interest is transferred.
- (2) A Transfer of ~~Placement~~ Quota allotted to a corporation is deemed to occur when:
 - (a) The shares of that corporation are transferred;
 - (b) An interest in the shares of that corporation is transferred;
 - (c) Additional shares of that corporation are issued resulting in a change in the proportion of shares held by each shareholder; or
 - (d) Existing shares of that corporation are redeemed resulting in a change in the proportion of shares held by each shareholder.

Surrender of ~~Placement~~ Quota on Transfer

- 16. (1) Subject to subsection (5), where ~~Placement~~ Quota is Transferred other than by way of a Permissible Lease, the Transferor shall surrender to the Commission an amount of ~~Placement~~ Quota calculated as follows:
 - (a) 5% of the amount of ~~Placement~~ Quota being Transferred, where such Total Production Quota was:
 - (i) allotted pursuant to a Special Allotment to the Transferor prior to April 1, 2006; or
 - (ii) allotted to the Transferor other than pursuant to a Special Allotment;
 - (b) 100% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within one year from the date of the proposed Transfer;
 - (c) 90% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the second year preceding the date of the proposed Transfer;

- (d) 80% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the third year preceding the date of the proposed Transfer;
 - (e) 70% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the fourth year preceding the date of the proposed Transfer;
 - (f) 60% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the fifth year preceding the date of the proposed Transfer;
 - (g) 50% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the sixth year preceding the date of the proposed Transfer;
 - (h) 40% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the seventh year preceding the date of the proposed Transfer;
 - (i) 30% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the eighth year preceding the date of the proposed Transfer;
 - (j) 20% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the ninth year preceding the date of the proposed Transfer;
 - (k) 10% of the amount of ~~Placement~~ Quota being Transferred, where such ~~Placement~~ Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within, or prior to, the tenth year preceding the date of the proposed Transfer.
- (2) For the purposes of subsection (1), the ~~Placement~~ Quota being Transferred is deemed to be the ~~Placement~~ Quota most recently allotted to the Transferor.
 - (3) Where the interest of a Producer in a partnership is increased, decreased or transferred, a proportionate Transfer of the ~~Placement~~ Quota deemed to have been allotted to such Producer is deemed to occur.

- (4) Where the direct or indirect interest of an individual in a corporate Producer is increased, decreased or transferred, a proportionate Transfer of the ~~Placement~~ Quota deemed to have been allotted to such individual is deemed to occur.
- (5) A surrender of ~~Placement~~ Quota pursuant to paragraph 15(1)(a) is not required where:
 - (a) ~~Placement~~ Quota is Transferred, or deemed to have been Transferred, to the Transferor's spouse, child, or child and the child's spouse;
 - (b) all ~~Placement~~ Quota is Transferred to the Transferor's sibling together with the associated Production Unit;
 - (c) two or more Producers enter into an agreement of partnership and the partnership interest of each such Producer is proportionate to the ~~Placement~~ Quota registered in that Producer's name;
 - (d) the amount of ~~Placement~~ Quota deemed to have been allotted to a Producer having an interest in a partnership remains registered in that Producer's name upon dissolution of the partnership.

PART V - FLOCK PLACEMENT

Official Flock Schedule

17. The Official Flock Schedule is available for inspection at the Office of the Commission during regular business hours, provided that the Commission may withhold information from the Official Flock Schedule that does not pertain to the Person requesting inspection.

Placement of Flocks by Hatcheries and Payment by Producers

18. (1) Each Hatchery shall order and arrange for the placement of flocks of day-old broiler breeder pullets in accordance with the Official Flock Schedule, except with respect to a Regularized Producer.
- (2) Each Hatchery shall inform the Commission in writing of its chosen strain or strains of broiler breeders to be ordered and placed in accordance with the Official Flock Schedule.
- (3) Unless otherwise agreed in writing, every Producer shall pay for day-old broiler breeders ordered and arranged by a Hatchery within 30 days from the date of placement of such day-old broiler breeders.
- (4) Where a Producer has failed or refused to pay the full amount due (without deduction, set-off or abatement) for a flock of day-old broiler breeders ordered and arranged by a Hatchery on behalf of that Producer:
- (i) within 30 days from the date of placement of that flock; or
 - (ii) within such other time as may have been agreed in writing between that Hatchery and that Producer with respect to that flock;
- the Hatchery may:
- (iii) forthwith deduct and withhold from the total payable to such Producer amounts sufficient to pay for that flock; and
 - (iv) commencing 30 days prior to the date of placement of the next flock of day-old broiler breeders, deduct and withhold from the total payable to such Producer amounts sufficient to pay for that next flock.

Growing of Pullets

19. (1) All Producers must grow their own broiler breeder pullets on their own Independent Production Unit unless the Commission otherwise approves in writing.

- (2) Every Producer who grows their own broiler breeder pullets at a location other than their own Independent Production Unit must ensure that the growing of those broiler breeder pullets is consistent with all applicable standards.

PART VI - PRODUCTION REQUIREMENTS AND LIMITATIONS

Over Quota Placements

20. Where a Producer has placed a quantity of broiler breeders pullets in a Quota Period in excess of the Placement Quota allotted to that Producer, the Producer is liable to pay to the Commission an over placement levy as may be fixed and imposed by the Commission from time to time.

Under Quota Placements

21. Where the Placement Quota allotted to a Producer exceeds the quantity of broiler breeders pullets placed by that Producer in a Quota Period, the Producer is liable to pay to the Commission an under placement levy as may be fixed and imposed by the Commission from time to time.

Operational Standards

22. Every Hatchery, Producer and Transporter shall carry on operations in accordance with the Supplemental Standards set out in Schedule 6.

Acceptance of First Broiler Hatching Eggs Produced by a Flock

23. No Hatchery shall refuse to accept the first Broiler Hatching Eggs produced by a breeder flock provided that:
- (a) such first Broiler Hatching Eggs are not more than 7 days old and are available in quantities of not less than 720 Broiler Hatching Eggs;
 - (b) all such Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weigh at least 52 grams each; and
 - (c) each flock's eggs are packaged and labeled separately.

Marketing of Broiler Hatching Eggs

24. (1) Subject to subsections (2) and (3), no Producer shall market Broiler Hatching Eggs other than:
- (a) through the Commission;
 - (b) to a Hatchery;
 - (c) to a breaker; or
 - (d) as may otherwise be directed by the Commission.
- (2) Every Producer must market through the Commission all Breaker Quality Eggs.

- (3) Every Producer must destroy all Unmarketable Eggs. No such Unmarketable Eggs shall be marketed, through the Commission or otherwise.
- (4) After giving a Person an opportunity to be heard, the Commission may impose terms and conditions with respect to the marketing of a regulated product and may suspend or cancel the licence held by, or ~~Placement~~ Quota allotted to, a Person if that Person has failed to comply with subsections (1), (2) or (3).
- (5) Where a licence and/or ~~Placement~~ Quota has been suspended for a definite period by reason of a failure to comply with subsections (1), (2) or (3), and that failure to comply has not been rectified within the period of suspension and continues, the Commission may forthwith cancel the licence and/or all or any part of the ~~Placement~~ Quota allotted to that Person.
- (6) Before the Commission imposes terms and conditions with respect to the marketing of a regulated product or suspends or cancels the licence held by, or ~~Placement~~ Quota allotted to, a Person, the Commission shall consider the following:
 - (a) previous enforcement actions for contraventions of a similar nature by the Person;
 - (b) the gravity and magnitude of the contravention;
 - (c) the extent of the harm to others resulting from the contravention;
 - (d) whether the contravention was repeated or continuous;
 - (e) whether the contravention was deliberate;
 - (f) any economic benefit derived by the Person from the contravention; and
 - (g) the Person's efforts to correct the contravention.

Fowl

25. (1) Every Producer shall market their broiler breeder flocks as directed by the Commission, and subject to:
 - (a) any extraordinary kill age as may be directed by the Commission, (other than with respect to a Regularized Producer) after consultation with the Hatchery, where:
 - (i) a broiler breeder flock has failed to produce Broiler Hatching Eggs with a consistent Hatchability of 70%; or

- (ii) there are other extraordinary circumstances warranting an extraordinary kill age.
 - (b) any extraordinary kill age as may be directed by the Producer, after consultation with the Hatchery, where a broiler breeder flock has failed to produce at levels acceptable to that Producer.
- (2) In exercising its discretion under paragraph (1)(a), the Commission will have regard to:
- (a) the extent to which Hatchability has fallen below 70%;
 - (b) the Hatchability trend;
 - (c) whether or not there is a reasonable prospect that the broiler breeder flock will produce Broiler Hatching Eggs with a consistent Hatchability of 70% in the future; and
 - (d) the presence of any other extraordinary circumstances warranting an extraordinary kill age.
- (3) All Fowl shipped from a Producer's Farm to a Processor shall be weighed by the Processor before 10:00 a.m. on the date of delivery.
- (4) Every Hatchery or Processor, as the case may be, shall provide to the affected Producer a minimum of two weeks' advance notice of any kill of Fowl.

[This page is intentionally left blank.]

PART VII - PRICES AND METHOD OF PAYMENT

Payment of Base Price for Broiler Hatching Eggs

26. Every Hatchery shall pay for Broiler Hatching Eggs at the base price set out in Schedule 2, provided that a reasonable surcharge may be imposed by a Hatchery to recover additional costs actually incurred by the Hatchery as a direct consequence of having to pick up Broiler Hatching Eggs from a Producer (other than a Regularized Producer) who keeps less than 12,000 broiler breeders per Quota Period.

Time of Payment for Broiler Hatching Eggs

27. (1) Every Hatchery shall pick up Broiler Hatching Eggs from each Producer designated to it at least twice weekly.
- (2) Payment shall be made to each Producer by each Hatchery within 30 days from the date that such Broiler Hatching Eggs are picked up by the Hatchery.

Authorized Withholdings

28. Where a Producer has failed or refused to pay for a flock of day-old broiler breeders ordered and arranged by a Hatchery on behalf of that Producer within 30 days from the date of placement of that previous flock, or within such other time as may have been agreed in writing between that Hatchery and that Producer with respect to that flock, the Hatchery may withhold the amount so due from any payments due to that Producer by that Hatchery.

Payment of Base Price for Chicks Under 2 Days Old

29. Every Grower shall pay for chicks under 2 days old hatched from Broiler Hatching Eggs at the base price set out in Schedule 2.

Payment of Base Price for Fowl

30. Every Processor shall pay for Fowl at the base price set out in Schedule 2 within 10 days from the date of kill.

[This page is intentionally left blank.]

PART VIII - LEVIES

Producer Levies

31. Levies are fixed and imposed on each Producer as set out in Schedule 3, irrespective of whether any such Producer has been allotted ~~Placement~~ Quota or is the holder of a valid licence issued by the Commission.

Hatchery Responsibility Regarding Producer Levies

32. (1) Each Hatchery, before making payments to a Producer, shall deduct from the total payable to such Producer the amount of levies assessed against the Producer under Schedule 3, and shall within 30 days of receipt of Broiler Hatching Eggs from that Producer, remit the amount so deducted to the Commission.
- (2) In the event levies so assessed against a Producer are greater than the total amount payable to the Producer by the Hatchery, the deficient levy amount shall be added to subsequent levy assessments, and the Hatchery shall deduct from subsequent payments to that Producer the aggregate amount of such levies assessed against that Producer, and shall forthwith thereafter remit the amount so deducted to the Commission.
- (3) Should any Hatchery:
- (a) fail to deduct from amounts payable to a Producer the levies assessed against that Producer under Schedule 3; or
 - (b) fail to remit such levies to the Commission;

then at the Commission's direction, any other Hatchery who has received regulated product from the defaulting Hatchery shall deduct from the payment due to the defaulting Hatchery the levies due to the Commission and shall immediately remit such levies to the Commission.

[This page is intentionally left blank.]

PART IX - REPORTING AND INSPECTION

Hatchery Reporting to Commission

33. (1) Every Hatchery shall, on or before the 5th day of the next Reporting Period, furnish the Commission with a true and detailed report disclosing:
- (a) the name and address of each Producer from whom the Hatchery received Broiler Hatching Eggs;
 - (b) the number of Broiler Hatching Eggs received from each Producer;
 - (c) the number of Saleable Chicks derived from Broiler Hatching Eggs received from each Producer;
 - (d) the number of Broiler Hatching Eggs received from other than Registered Producers;
 - (e) the number of Saleable Chicks derived from Broiler Hatching Eggs received from other than Registered Producers;
 - (f) the amount of levies deducted from amounts payable by the Hatchery to each Producer;
 - (g) the amount of levies remitted by the Hatchery with respect to Broiler Hatching Eggs received from other than Registered Producers;
- (2) Every Hatchery shall complete and forward weekly to the Commission the "B.C. Broiler Hatching Egg Market Summary".
- (3) Every Hatchery shall notify the Commission of its intention to sell chicks to a Grower not then purchasing chicks from that Hatchery at least 16 weeks before commencing selling chicks to that Grower.
- (4) Every Hatchery shall complete and forward to each Producer, at the conclusion of each hatch, a hatch report in a form approved by the Commission.

Processor Reporting to Commission

34. Every Processor shall, on or before the 5th day of the next Reporting Period, furnish the Commission with a true and detailed report disclosing:
- (a) the name and address of each Producer from whom the Processor received Fowl; and
 - (b) the number of Fowl received from each Producer and the date of slaughter.

Books, Records and Accounts

35. (1) Every Hatchery, Processor and Producer shall keep complete and accurate books, records and accounts of all matters relating to the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks or broiler breeders.
- (2) All books, records and accounts required to be kept under subsection (1) must be retained for a period of three years and shall be available for inspection by:
- (a) the Commission;
 - (b) any officer or auditor of the Commission; and
 - (c) any other Person as may be authorized by the Commission from time to time to make an inquiry, report or corrective action request.

Licensees to Furnish Information and Permit Inspection

36. (1) Every Person licensed by the Commission shall, upon request, furnish to the Commission, or to any officer or auditor of the Commission, or to any other Person as may be authorized by the Commission from time to time to make an inquiry, report or corrective action request, any information or documentation relating to the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks or broiler breeders.
- (2) Every Person licensed by the Commission shall make specific answers to any questions submitted to that Person by the Commission, or by any officer or auditor of the Commission, or by any other Person as may be authorized by the Commission from time to time to make an inquiry, report or corrective action request.
- (3) Every Person licensed by the Commission shall permit the Commission, or any officer or auditor of the Commission, or any other Person as may be authorized by the Commission from time to time to make an inquiry, report or corrective action request, to search vehicles in which the regulated product is transported, and to inspect all Farm or business premises owned, occupied or controlled by such licensed Person.

PART X - PROHIBITIONS

Producer

37. No Producer shall engage in the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks or broiler breeders unless the Producer:
- (a) is the holder of a valid and subsisting licence issued by the Commission; and
 - (b) has an allotment of ~~Placement~~ Quota in accordance with the Orders of the Commission.

Hatchery

38. (1) No Hatchery shall receive regulated product from a Producer:
- (a) who is not the holder of a valid and subsisting licence issued by the Commission; and
 - (b) who does not have an allotment of ~~Placement~~ Quota in accordance with the Orders of the Commission.
- (2) No Hatchery shall receive regulated product from a Transporter or a Processor who is not the holder of a valid and subsisting licence of the appropriate class issued by the Commission.

Processor

39. (1) No Processor shall receive regulated product from a Producer:
- (a) who is not the holder of a valid and subsisting licence issued by the Commission; and
 - (b) who does not have an allotment of ~~Placement~~ Quota in accordance with the Orders of the Commission.
- (2) No Processor shall receive regulated product from a Transporter or a Hatchery who is not the holder of a valid and subsisting licence of the appropriate class issued by the Commission.

Transporter

40. (1) No Transporter shall receive regulated product from a Producer:
- (a) who is not the holder of a valid and subsisting licence issued by the Commission; and
 - (b) who does not have an allotment of ~~Placement~~ Quota in accordance with the Orders of the Commission.
- (2) No Transporter shall receive regulated product from a Hatchery or a Processor who is not the holder of a valid and subsisting licence of the appropriate class issued by the Commission.

PART XI - COMPLIANCE

Suspension or Cancellation

41. (1) In addition to any other remedies available to the Commission in respect of a contravention of an Order of the Commission, the *Natural Products Marketing (BC) Act*, R.S.B.C. 1996, c. 330, the *British Columbia Broiler Hatching Egg Scheme* (B.C. Reg. 432/88), or other applicable legislation and regulations, the Commission may suspend or cancel the licence held by, or **Placement** Quota allotted to, a Person determined by the Commission to be in contravention.
- (2) Where a licence has been suspended for a definite period for a contravention and that contravention has not been rectified within the period of suspension and the contravention continues, the Commission may forthwith cancel the licence.

[This page is intentionally left blank.]

PART XII - PRICING AND PRODUCTION ADVISORY COMMITTEE

Committee

42. The Pricing and Production Advisory Committee is hereby continued and is composed of:
- (a) 3 voting Registered Producer representatives (who are not Members of the Commission) appointed by the Commission after consultation with the British Columbia Broiler Hatching Egg Producers Association;
 - (b) 3 voting Hatchery representatives appointed by the Commission after consultation with the British Columbia Egg Hatchery Association;
 - (c) 1 voting member (who is not a Registered Producer, a Hatchery representative, a Grower representative or a Member of the Commission) appointed by the Commission to serve as the Chairperson of the Committee;
 - (d) 1 non-voting observer (who is a Member of the Commission) appointed by the Commission; and
 - (e) 1 *ad hoc*, voting Grower representative appointed by the Commission after consultation with the British Columbia Chicken Marketing Board, who:
 - (i) shall attend at, be privy to, and participate in, only those portions of Committee meetings that concern pricing decisions that the Commission has made or may make and which relate specifically to:
 - A. the base price for Broiler Hatching Eggs set out in Schedule 2; or
 - B. the mechanism by which the base price for Broiler Hatching Eggs is established;
 - (ii) shall not attend at, be privy to, or participate in, any portion of Committee meetings that concern a dispute between a Hatchery and a Producer that has been referred to the Committee in accordance with Schedule 6 to the Consolidated Order.

Appointment of Members

43. All appointments to the Committee:
- (a) shall be communicated by the Commission in writing to the Person or representative so appointed; and
 - (b) shall be held at the pleasure of the Commission.

Duties of the Committee

44. (1) The Committee shall advise the Commission, upon the request of the Commission, or upon the initiative of the Committee, concerning any matter relating to the pricing or production decisions the Commission has made or may make.
- (2) Without limiting the generality of subsection (1), the Committee shall provide a recommendation to the Commission where it has considered a dispute between a Hatchery and a Producer that has been referred to it in accordance with Schedule 6 to the Consolidated Order.

Manner of Providing Advice

45. (1) The Committee shall endeavour to provide advice to the Commission in the form of a written unanimous recommendation.
- (2) Where the Committee is unable to formulate a unanimous recommendation, the Chairperson of the Committee shall provide to the Commission a written position report detailing the majority and minority positions of the Committee members, and the number of votes cast in favour of each such position.

Time

46. Where the Commission has requested the advice of the Committee, the Committee shall provide its advice, whether by way of a written unanimous recommendation or by way of a written position report, within such period of time as the Commission may request.

PART XIII - MISCELLANEOUS

Conflict of Interest

47. Members of the Commission shall conduct themselves in a manner consistent with the Conflict of Interest Rules set out in Schedule 4.

Revocation and Transition

48. This Consolidated Order supersedes and replaces all Orders made by the Commission prior to the effective date hereof and all such prior Orders are hereby revoked, but such revocation shall not affect any contraventions committed or any penalties incurred under the Orders so revoked.

Commencement

49. This Consolidated Order comes into effect on ~~September 30~~December 1, 2012.

DATED AT ABBOTSFORD, BRITISH COLUMBIA, THIS ~~17~~___ DAY OF ~~SEPTEMBER~~DECEMBER, 2012.

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

"Casey Langbroek"
Casey Langbroek - Chair

[This page is intentionally left blank.]

**SCHEDULE 1
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

New Producer Program Rules

Definitions

1. In these Rules:

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under New Producer Program

2. (1) A Person may apply to participate in the New Producer Program only when the Commission has announced on its website that a lottery will be conducted for the purpose of selecting applicants to fill unoccupied places on the prospective producer list hereunder.
- (2) Applications to participate in the New Producer Program are made by filing with the Commission:
 - (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant’s birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status;
 - (d) proof of permanent residence status in the Province of British Columbia; and
 - (e) a non-refundable application fee of \$250.00, payable to the Commission by way of cheque.
- (3) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (4) An applicant for the New Producer Program may be a partnership in which case each partner must qualify under subsection (5).
- (5) A Person seeking to participate in the New Producer Program must have the following qualifications:
 - (a) a genuine intention to be actively engaged in Broiler Hatching Egg production;

- (b) be a Canadian citizen or permanent resident of Canada;
- (c) be a permanent resident in the Province of British Columbia;
- (d) be at least 19 years of age at the time of application; and
- (e) neither the applicant, nor the Spouse of the applicant, nor any co-applicant, may have, or have had at any time, any financial interest in quota or any similar transferable production right issued or allotted by a supply management commodity board or commission in British Columbia, including ~~Placement~~-Quota, whether directly or indirectly, through any organization or entity.

Prospective Producer List

3. (1) The Commission will arrange for an independent third party to conduct a lottery for the purpose of establishing a prospective producer list. The prospective producer list, when first established, shall consist of five prospective producers, provided that a sufficient number of persons apply to participate in the New Producer Program.
- (2) When there are three or less eligible applicants on the prospective producer list, the Commission will arrange for an independent third party to conduct a lottery for the purpose of selecting eligible applicants to fill the unoccupied places on the prospective producer list.
- (3) Where an applicant is in breach of Commission Orders, or applicable legislation, that applicant will not be eligible to participate in the lottery and will not be placed on the prospective producer list.
- (4) Positions on the prospective producer list are:
 - (a) non-transferable, under any circumstances; and
 - (b) not available to be pledged as security.
- (5) Persons on the prospective producer list may have their applications rejected and their prospective producer list position cancelled for any of the following:
 - (a) breach of Commission Orders or applicable legislation;
 - (b) making false statements on the application form;
 - (c) changes in circumstances such that an applicant no longer qualifies under the New Producer Program;
 - (d) changes in legislation adversely affecting the New Producer Program;or

- (e) an NSF cheque for the application fee.

Entry in Program

- 4. (1) The Commission will maintain a new producer allocation pool. All Placement Quota surrendered pursuant to the transfer assessment provisions of the Commission's Consolidated Order will be allocated to that pool by the Commission for the purpose of issuing Placement Quota under the New Producer Program.
- (2) When the new producer allocation pool contains 5,000 broiler breeder pullets of Placement Quota not already assigned by the Commission for the allotment of Placement Quota under the New Producer Program, the Commission will invite one applicant to enter the New Producer Program.
- (3) Where an applicant from the prospective producer list is invited by the Commission to become an entrant to the New Producer Program, the applicant shall submit to the Commission, within 60 days from the date of such invitation:
 - (a) proof, in a form satisfactory to the Commission, of the applicant's financial ability to establish an acceptable Independent Production Unit for the production of Broiler Hatching Eggs; and
 - (b) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Broiler Hatching Eggs;
 - (c) proof, in a form satisfactory to the Commission, that the applicant will be able to establish an acceptable Independent Production Unit for the production of Broiler Hatching Eggs within one year from the date of the invitation to become an entrant to the New Producer Program;
 - (d) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit will be within economic access of a licensed Hatchery; and
 - (e) any other information deemed necessary by the Commission.
- (4) An applicant who has complied with subsection (3) to the satisfaction of the Commission will be allotted 5,000 broiler breeder pullets of Placement Quota when the acceptable Independent Production Unit has been established.

Special Restrictions on Placement Quota Allotted Under the Program

5. (1) Placement Quota allotted under the New Producer Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the New Producer Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the New Producer Program; and
 - (c) is actively engaged in Broiler Hatching Egg production;

failing which the Placement Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

Purchase or Acquisition of Additional Placement Quota

6. (1) An entrant may purchase or acquire Placement Quota.
- (2) Entrants under the New Producer Program are eligible to receive general allotments of new Placement Quota and are subject to general adjustments or reductions of Placement Quota, and for that purpose, such receipts, adjustments or reductions shall be calculated against the Placement Quota then allotted to the entrant.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

7. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Broiler Hatching Egg production for the purposes of the New Producer Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Placement Quota allotted under the New Producer Program is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;

- (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit; and
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Placement Quota allotted under the New Producer Program, and that some other Person is primarily engaged in the business of Broiler Hatching Egg production associated with that Placement Quota, the entrant shall be deemed not to be actively engaged in Broiler Hatching Egg production.

Changes to the New Producer Program

8. (1) Applicants on the prospective producer list and entrants under the New Producer Program are subject to all changes that the Commission may make from time to time to the terms and conditions of the New Producer Program.
- (2) Notwithstanding subsection (1), the Commission may, in its sole discretion, provide to an entrant a written exemption from any term or condition of the New Producer Program that has come into effect after the entrant's entry into the New Producer Program, in which event the entrant shall continue to be governed by the terms and conditions of the New Producer Program as they existed at the time of the entrant's entry into the New Producer Program except insofar as those terms and conditions may conflict with any subsequent term or condition for which a written exemption had not been granted.

**SCHEDULE 2
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

Prices

Broiler Hatching Eggs

1. (1) For Period A113 the base price to be paid by Hatcheries to Producers for Broiler Hatching Eggs is \$0.5686 per Saleable Chick.
- (2) The listed price for Broiler Hatching Eggs is \$5.459 per dozen.
- (3) The base price for Broiler Hatching Eggs is F.A.S. the Producer's Farm.

Chicks Under 2 Days Old

2. (1) For Period A113 the base price to be paid by Growers to Hatcheries for day-old Saleable Chicks hatched from Broiler Hatching Eggs (exclusive of any charges that may be imposed by the Hatchery for vaccination or sexing services requested by the Grower) is \$0.7578 per day-old Saleable Chick.
- (2) Notwithstanding subsection (1), Hatcheries may, at their discretion, provide to Growers chicks under 2 days old at no cost in addition to the number of chicks under 2 days old invoiced per flock placement.
- (3) The base price for chicks under 2 days old hatched from Broiler Hatching Eggs is F.A.S. the Grower's Farm.

Fowl

3. (1) The base price to be paid by Processors to Producers for Fowl is:
 - (a) \$0.40 per kilogram live weight for broiler breeder hens; and
 - (b) \$0.00 per kilogram live weight for broiler breeder stags.
- (2) For Fowl not weighed by the Processor before 10:00 a.m. on the date of delivery, the amount of \$0.02 per kilogram live weight shall be added to the base price for each of broiler breeder hens and broiler breeder stags.
- (3) The base price for Fowl is F.A.S. the Producer's Farm.

[This page is intentionally left blank.]

**SCHEDULE 3
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

Levies

Producer Levies

1. (1) Subject to ~~subsections~~ subsections (2) and (3), levies are fixed and imposed upon each Producer at a rate of \$0.020 per Saleable Chick.
- (2) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Small-Lot Innovative Self-Marketer Program at a rate of \$0.015 per Saleable Chick.
- (3) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program at a rate of \$0.015 per Saleable Chick.

[This page is intentionally left blank.]

**SCHEDULE 4
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

Conflict of Interest Rules

Conflict of Interest

1. For the purposes of these Rules, a Member has a conflict of interest when the Member exercises an official power or performs an official duty or function in the execution of his or her office and at the same time knows that in the performance of the duty or function or in the exercise of the power there is the opportunity to further his or her Private Interest.

Apparent Conflict of Interest

2. For the purposes of these Rules, a Member has an apparent conflict of interest when there is a reasonable perception, which a reasonably well informed person could properly have, that the Member's ability to exercise an official power or perform an official duty or function must have been affected by his or her Private Interest.

Conflict of Interest Prohibition

3. A Member shall not exercise an official power or perform an official duty or function if the Member has a conflict of interest or an apparent conflict of interest.

Insider Information

4. A Member shall not use information that is gained in the execution of his or her office and is not available to the general public to further or seek to further the Member's Private Interest.

Influence

5. A Member shall not use his or her office to seek to influence a decision, to be made by another person, to further the Member's Private Interest.

Procedure on Conflict of Interest

6. (1) A Member who has reasonable grounds to believe that he or she has a conflict of interest or an apparent conflict of interest in a matter that is before the Commission shall:

- (a) if present at a meeting considering the matter:
 - (i) disclose the general nature of the conflict of interest or apparent conflict of interest; and
 - (ii) withdraw from the meeting without voting or participating in the consideration of the matter;
- (b) if not present at a meeting considering the matter, forthwith disclose in writing to the Commission the general nature of the conflict of interest or apparent conflict of interest.
- (3) Where a Member has complied with subsection (1), the secretary of the meeting shall record:
 - (a) the disclosure;
 - (b) the general nature of the conflict of interest or apparent conflict of interest; and
 - (c) the withdrawal of the Member from the meeting.

Disclosure Statement

- 7. (1) Every Member must, prior to the first meeting of the Commission following the date that such Member was elected, and thereafter within 30 days of January 1 of each calendar year, file with the Commission a disclosure statement in the form prescribed by the Commission.
- (2) The disclosure statement must contain:
 - (a) the name of every company in which ten percent (10%) or more of the issued shares are held, directly or indirectly, by the Member, the Member's spouse or minor children, or any trustee or nominee on their behalf, together with a brief description of the business carried on by each such company;
 - (b) the name of every non-corporate business enterprise from which, directly or indirectly, the Member, the Member's spouse or minor children receive income, together with a brief description of the business carried on by each such non-corporate business enterprise; and

- (c) the name of every company or organization with respect to which the Member is an officer, director, elected official or appointed official.
- (3) After filing a disclosure statement, a Member must continue to disclose any material changes to the information recorded thereon by promptly filing with the Commission a revised disclosure statement.

Accepting Extra Benefits

- 8. (1) A Member shall not accept a gift or personal benefit, except compensation authorized by law, that is connected directly or indirectly with the performance of his or her duties of office.
- (2) Subsection (1) does not apply to a gift or personal benefit that is received as an incident of the protocol or social obligations that normally accompany the responsibilities of office.
- (3) Where a gift or personal benefit referred to in subsection (2) exceeds \$250.00 in value, or where the total value received directly or indirectly from one source in any 12 month period exceeds \$250.00, the Member shall immediately disclose:
 - (a) the nature of the gift or personal benefit;
 - (b) its source; and
 - (c) the circumstances under which it was given and accepted.

[This page is intentionally left blank.]

**SCHEDULE 5
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

Biosecurity, Food Safety and Code of Practice

Incorporation by Reference

1. The following are adopted and incorporated by reference into this Schedule:
 - (a) The B.C. Poultry Biosecurity Program published by the B.C Poultry Association on April 17, 2007;
 - (b) The Canadian Broiler Hatching Egg Producers Association's *Canadian Hatching Egg Quality™ Producer Manual* (the HACCP-based on-farm food safety program for hatching egg producers); and
 - (c) The Canadian Agri-Food Research Council's *Recommended code of practice for the care and handling of farm animals – Chickens, Turkeys and Breeders from Hatchery to Processing Plant*;(collectively, the "Programs").

Compliance with Programs

2. Every Producer shall comply with the codes, standards, rules and requirements contained in the Programs.

On Farm Program Coordinator

3.
 - (1) The Commission may designate a Person to act as the On Farm Program Coordinator for the purpose of assisting in the administration of the Programs.
 - (2) A Person designated by the Commission to act as the On Farm Program Coordinator is authorized to exercise the following delegated powers of the Commission:
 - (a) the power to inspect a Producer's books, records and accounts relating to the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks or broiler breeders, for the purpose of assessing the degree of compliance with the Programs;
 - (b) the power to request that any Person licensed by the Commission furnish information or documentation relating to the production, transportation, packing, storage and marketing of Broiler Hatching Eggs, Saleable Chicks or broiler breeders, for the purpose of assessing the degree of compliance with the Programs;

- (c) the power to request that any Person licensed by the Commission make specific answers to any questions submitted to that Person, for the purpose of assessing the degree of compliance with the Programs;
- (d) the power to search vehicles in which the regulated product is transported, and to inspect all Farm or business premises owned, occupied or controlled by any Person licensed by the Commission, for the purpose of assessing the degree of compliance with the Programs; and
- (e) the power to issue a corrective action request in relation to any matter noted by the On Farm Program Coordinator as being non-compliant with the Programs.

Referral to B.C. Poultry Biosecurity Committee

- 4. (1) Where a Person has failed to comply with a corrective action request issued by the On Farm Program Coordinator, the Commission may seek a non-binding recommendation from the B.C. Poultry Biosecurity Committee.
- (2) Without limiting the generality of subsection (1), the Commission may seek a non-binding recommendation from the B.C. Poultry Biosecurity Committee concerning any or all of the following matters:
 - (a) the propriety of the On Farm Program Coordinator's interpretation of the Programs; and
 - (b) the reasonableness of a corrective action request issued by the On Farm Program Coordinator.

Suspension and Cancellation

- 5. (1) After giving a Person an opportunity to be heard, the Commission may impose terms and conditions with respect to the marketing of a regulated product and may suspend or cancel the licence held by, or ~~Placement~~-Quota allotted to, a Person if that Person has failed to comply with a corrective action request issued by the On Farm Program Coordinator.
- (2) Where a licence and/or ~~Placement~~ Quota has been suspended for a definite period by reason of a failure to comply with a corrective action request issued by the On Farm Program Coordinator, and that failure to comply has not been rectified within the period of suspension and continues, the Commission may forthwith cancel the licence and/or all or any part of the ~~Placement~~-Quota allotted to that Person.

- (3) The Commission may set and collect a charge or series of charges against a Person who has failed to comply with a corrective action request issued by the On Farm Program Coordinator to recover the expenses incurred by the Commission in connection with the imposition of terms and conditions with respect to the marketing of a regulated product, and/or the suspension or cancellation of the licence held by, or ~~Placement~~ Quota allotted to, a Person.
- (4) Before the Commission imposes terms and conditions with respect to the marketing of a regulated product, or suspends or cancels the licence held by, or ~~Placement~~ Quota allotted to, a Person, or sets a charge or series of charges against a Person, the Commission shall consider the following:
- (a) previous enforcement actions for contraventions of a similar nature by the Person;
 - (b) the gravity and magnitude of the contravention;
 - (c) the extent of the harm to others resulting from the contravention;
 - (d) whether the contravention was repeated or continuous;
 - (e) whether the contravention was deliberate;
 - (f) any economic benefit derived by the Person from the contravention;
and
 - (g) the Person's efforts to correct the contravention.

[This page is intentionally left blank.]

**SCHEDULE 6
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

Supplemental Standards

PART I - PRODUCTION UNIT STANDARDS

Egg Service Rooms

1. Every Independent Production Unit shall have an Egg Service Room which shall be equipped with hot and cold running water.

Egg Storage Rooms

2. (1) Egg Storage Rooms shall:
 - (a) be large enough to accommodate one week's production of Broiler Hatching Eggs and:
 - (i) packaging (buggies and trays) for four day's production of Broiler Hatching Eggs; or
 - (ii) be of a minimum area equivalent to 2 square feet for every 100 birds in production.
 - (b) be equipped with an operational calibrated thermometer and humidistat;
 - (c) have a well maintained concrete or paved loading area; and
 - (d) be equipped with cooler doors and load-out doors having a minimum width of 4 feet.
- (2) Independent Production Units shall have no more than one Hatching Egg Storage Room.
- (3) Egg Storage Rooms shall be accessible by way of a loading dock or other loading apparatus suitable for the loading of Broiler Hatching Eggs.
- (4) Independent Production Units constructed after February 2006 shall have a lockable exterior entrance to the Egg Storage Room.

PART II - PRODUCTION UNIT MANAGEMENT STANDARDS

General

3. (1) Producers shall use a Hatchery's packaging and egg buggies only for the purpose of packaging and storing Broiler Hatching Eggs.
- (2) No Producer shall raise or manage on a Production Unit any species of poultry other than chickens (*Gallus domesticus*).
- (3) Except with prior notice to the Hatchery, no Producer shall place or maintain on an Independent Production Unit broiler breeders originating from another Producer's Independent Production Unit.

Pullets

4. To ensure that:
 - (a) all pullet production facilities are inspected and meeting standards; and
 - (b) all placements are registered with the Commission;

Producers must apply for a permit from the Commission to place broiler breeder pullets on a production facility other than their own at least 60 days before the projected placement date and prior to the setting of eggs at the hatchery for that parent flock. Changes in pullet flock placement, when necessary, will be accepted with prior notification to the Commission.

Breeder Flock Management

5. (1) Producers:
 - (a) shall administer health and vaccination programs and re-vaccinations as may be prescribed by the flock veterinarian;
 - (b) shall remove all cull chicks when identified and all brother roosters by 25 weeks of age;
 - (c) shall spike broiler breeder flocks with replacement roosters, of the same breed, when necessary to maintain or improve fertility rates;
 - (d) are encouraged to obtain the most recent test results from the Animal Health Monitoring laboratory on any or all replacement roosters;
 - (e) shall immediately report to the Hatchery any indication of disease or any condition that may result in a significant drop in production or fertility;

(f) shall provide the Hatchery and the Commission with copies of any laboratory reports regarding any indication of disease or any significant drop in production or fertility; and

(g) shall properly maintain and keep clean all nest material.

(2) The Commission may:

(a) on its own initiative;

(b) upon the written request of a Producer; or

(c) upon the written request of a Hatchery;

take samples of Broiler Hatching Eggs from a Producer, a Hatchery, or both, for the purpose of testing Broiler Hatching Egg fertility.

Egg Washing and Sanitation

6. (1) Where Broiler Hatching Eggs are washed, they shall be washed with clean water of approximately 40.5 degrees Celsius (105 degrees Fahrenheit), with a detergent approved for washing hatching eggs.

(2) All floor, slat, and washed Broiler Hatching Eggs shall be marked for identification so as to be distinguishable from unwashed Broiler Hatching Eggs and placed in trays at the bottom of the buggies.

Egg Gathering, Storage and Packing

7. (1) Cull Eggs shall be removed by Producers before packaging, such that no more than 1.0% of the total number of Broiler Hatching Eggs in any Pick-Up shall be Cull Eggs.

(2) All Cull Eggs identified by a Hatchery shall be made available to the originating Producer.

(3) Where the Commission or its authorized delegate has verified that the number of Cull Eggs exceeds 1.0% of the total number of Broiler Hatching Eggs in a Pick-Up, the receiving Hatchery may return that Pick-Up to the Producer for re-culling, and may forthwith deduct and withhold from the total payable to such Producer a charge fixed at \$500.00.

(4) All Broiler Hatching Eggs packaged by a Producer shall be:

(a) of a minimum weight of 52 grams, unless they are Silkie or Taiwanese Broiler Hatching Eggs;

(b) packaged with the point down; and

- (c) packaged together only with other Broiler Hatching Eggs originating from the same flock (i.e., “blending” flocks is not permitted).
- (5) No Producer shall make eggs available for pick-up while such eggs have been directed to be destroyed by the Producer’s veterinarian or the Canadian Food Inspection Agency.
- (6) All double-yolked and small eggs (less than 52 grams) shall be packaged on Commission supplies and sold to the Commission, unless they are Silkie or Taiwanese Broiler Hatching Eggs.

PART III - HATCHERY AND TRANSPORTER STANDARDS

Transport

- 8. (1) Transporters shall:
 - (a) maintain all vehicles used for the purpose of transporting Broiler Hatching Eggs at the recommended storage temperatures for hatching eggs;
 - (b) clean and disinfect weekly all vehicles used for the purpose of transporting Broiler Hatching Eggs; and
 - (c) firmly secure all buggies used for transporting Broiler Hatching Eggs so as to minimize any damage to the eggs.

Pullets

- 9. Hatcheries shall correctly identify the pullet placement location (if different from the flock owner information) on the Hatchery Supply Flock Registration form.

Setting and Management

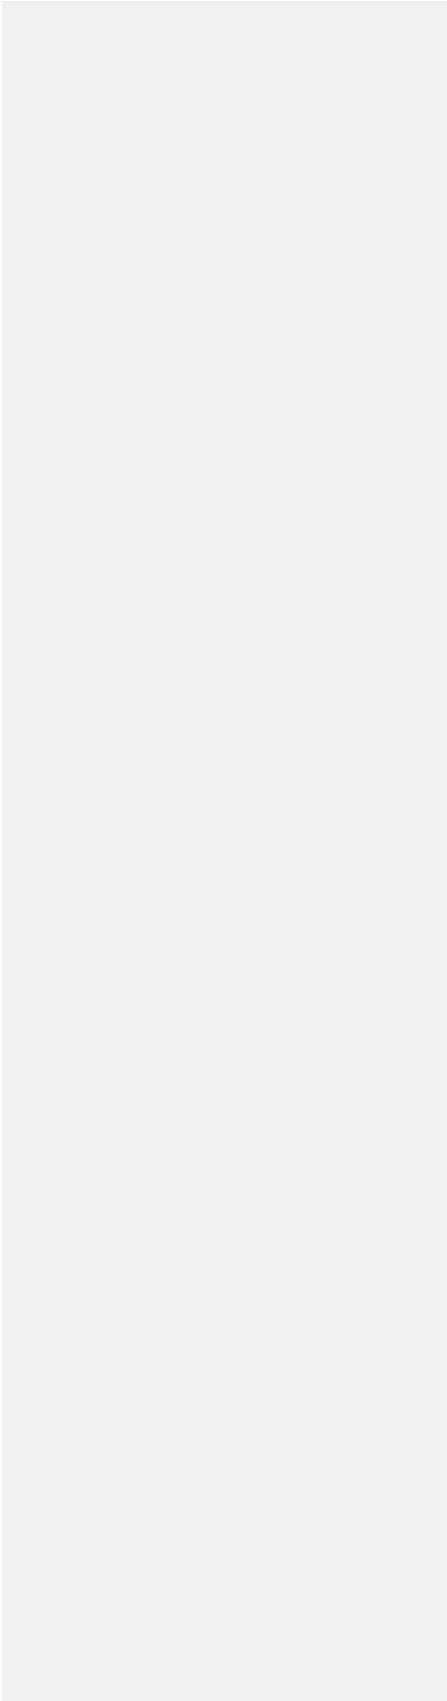

- 10. (1) Hatcheries shall place Broiler Hatching Eggs in their incubators in a timely fashion and as soon after such Broiler Hatching Eggs are laid as is reasonably possible.
- (2) Hatcheries shall provide the Producer and the Commission with copies of any laboratory reports regarding any indication of disease or any significant drop in production or fertility.

PART IV – BREEDER STANDARDS

Broiler Breeder Hatching Eggs

- 11. (1) Broiler breeder hatching eggs shall either:

- (a) be produced from a grandparent flock that is not less than 32 weeks of age; or
 - (b) satisfy the weight requirements set out in subsection (2).
- (2) Where broiler breeder hatching eggs are produced from a grandparent flock that is less than 32 weeks of age:
- (a) the Hatchery supplying such broiler breeder hatching eggs must individually weigh each broiler breeder hatching egg contained in one random sample flat for every six cases;
 - (b) 100% of the broiler breeder hatching eggs so weighed must weigh at least 52 grams; and
 - (c) the Hatchery must certify in writing the results of the weighing and provide such certification to the applicable Producer not later than 3 days following the date that the broiler breeder hatching eggs are set in the Hatchery's incubator.
- (3) Where broiler breeder hatching eggs produced from a grandparent flock that is less than 32 weeks of age do not satisfy the weight requirements set out in subsection (2), the Hatchery and the applicable Producer:
- (a) must consult with each other with a view to arriving at mutually acceptable terms with respect to those broiler breeder hatching eggs; and
 - (b) may, if they are unable to arrive at mutually acceptable terms with respect to those broiler breeder hatching eggs, refer the resulting dispute to the Pricing and Production Advisory Committee in accordance with Part V of this Schedule.
- (4) Producers remain obligated to pay the full amount due (without deduction, set-off or abatement) for flocks of day-old broiler breeders ordered and arranged by a Hatchery, unless another arrangement results from:
- (a) mutually acceptable terms arrived at between a Hatchery and the applicable Producer with respect to broiler breeder hatching eggs that do not satisfy the weight requirements set out in subsection (2);
 - (b) a recommendation made by the Pricing and Production Advisory Committee in accordance with Part V of this Schedule with respect to a resulting dispute, which recommendation has been duly accepted by the Commission; or
 - (c) any other order, decision or determination that may be made by the Commission with respect to a resulting dispute.

Broiler Breeder Chicks

12. Day-old broiler breeder pullets should not have any one or more of the following characteristics: poor legs, skin tears, missing eye(s), crossed beak, unhealthy appearance, dirty or matted with hatch material, scabby navel, body lesion(s), or curled toes.

Genetics

13. Every Producer must be provided with all available manuals and guidelines applicable to any new strain of day-old broiler breeder pullets provided to that Producer.
14. New strains of day-old broiler breeder pullets should not be placed unless there has first been consultation between the applicable Hatchery, the applicable Producer and the Commission.

PART V - DISPUTE RESOLUTION

Discussion and Inspection

15. Where a dispute arises between a Hatchery and a Producer concerning alleged non-compliance with the Standards:
 - (a) The Hatchery and the Producer shall make bona fide efforts to resolve all disputes by amicable discussions, and to meet, discuss in good faith and try to resolve disputes without litigation, controversy or claim, and to provide frank, candid and timely disclosure of all relevant facts to facilitate those discussions.
 - (b) The Commission may:
 - (i) on its own initiative;
 - (ii) upon the written request of a Producer; or
 - (iii) upon the written request of a Hatchery;arrange for an inspection to be conducted, with or without notice, for the purpose of assessing the degree of compliance or non-compliance with the Standards.

Referral to PPAC

16. (1) Where a dispute between a Hatchery and a Producer concerning alleged non-compliance with the Standards cannot be resolved by amicable discussions, the Hatchery or the Producer, as the case may be, may refer the dispute to the Pricing and Production Advisory Committee by:

- (a) delivering to the Commission a written Request for Recommendation addressed to the Pricing and Production Advisory Committee; and
 - (b) delivering a copy of the written Request for Recommendation to all other parties whose interest is or may be affected by the dispute.
- (2) A written Request for Recommendation shall contain:
- (a) a detailed description of the alleged non-compliance with the Standards;
 - (b) a detailed description of the efforts made to resolve the dispute by amicable discussions, without revealing any communications of a privileged nature; and
 - (c) the nature of the recommendation sought by the applicant.
- (3) Within such time as the Pricing and Production Advisory Committee may direct, all other parties whose interest is or may be affected by the dispute may respond to the written Request for Recommendation by:
- (a) delivering to the Commission a written Response addressed to the Pricing and Production Advisory Committee; and
 - (b) delivering a copy of the written Response to the applicant.
- (4) A written Response shall contain:
- (a) a detailed description of the efforts made to resolve the dispute by amicable discussions, without revealing any communications of a privileged nature; and
 - (b) the nature of the recommendation sought by the respondent.
- (5) Within such time as the Pricing and Production Advisory Committee may direct, the applicant may reply to a written response by:
- (a) delivering to the Commission a written Reply addressed to the Pricing and Production Advisory Committee; and
 - (b) delivering a copy of the written Reply to each Respondent.
- (6) A written Reply shall be as brief as the circumstances may permit and shall address only those matters raised in the Response not already addressed in the written Request for Recommendation.

Consideration by PPAC

17. (1) When considering a dispute concerning alleged non-compliance with the Standards, the Pricing and Production Advisory Committee:
 - (a) shall conduct itself in a manner consistent with the Conflict of Interest Rules contained in Schedule 4 to the Consolidated Order as if those Rules applied, mutatis mutandis, to the Pricing and Production Advisory Committee; and
 - (b) may have regard to any inspection report that had been prepared for the purpose of assessing the degree of compliance or non-compliance with the Standards.
- (2) In providing advice to the Commission concerning alleged non-compliance with the Standards, the Pricing and Production Advisory Committee may:
 - (a) recommend that no action be taken by the Commission on the basis that there has been no material deviation from the Standards;
 - (b) recommend that no action be taken by Commission on the basis that there has been no material impact from a deviation from the Standards;
 - (c) recommend that the Commission direct the Producer or Hatchery, as the case may be, to rectify any deviation from the Standards within such time as it considers appropriate;
 - (d) recommend that the Commission suspend the next placement until all Standards are met;
 - (e) recommend that Commission make an order, decision or determination concerning the pricing of regulated product, including an adjustment to price, as the Pricing and Production Advisory Committee may consider appropriate in the circumstances;
 - (f) recommend that Commission make an order, decision or determination concerning the production of regulated product, including a direction with respect to the kill age of any broiler breeder flock, as the Pricing and Production Advisory Committee may consider appropriate in the circumstances;
 - (g) make such other recommendations as the Pricing and Production Advisory Committee may consider appropriate in the circumstances.

**SCHEDULE 7
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

**Rules and Procedures
for the Election of Elected Commission Members¹**

1. The Commission consists of a chair appointed by the Lieutenant Governor in Council and 4 members who are registered producers elected by registered producers.
2. The term of office of an elected member is 3 years from the election or until a successor is elected. The Commission will endeavour to sequence terms so that at least one member is elected each year.
3. The Commission will conduct an election in the month of May or June.
4. The Commission will appoint an independent returning officer to carry out the election and to certify the results. The independent returning officer will be a person who is independent of the hatching egg industry and of the Commission.
5. The Commission will at all times maintain a current and accurate Register of Producers (the "Register") identifying all persons entitled to vote. The Register will be open to inspection at all reasonable times at the Commission's head office.
6. Producers will be notified in writing if their name is to be removed from the Register and will be given the opportunity to appeal that determination to the Commission. All election Register appeals will be reviewed by the independent returning officer and if the independent returning officer determines that the person should continue to have the right to vote, the independent returning officer will recommend to the Commission that the producer's name be restored in the Register.
7. A registered producer will be conclusively deemed to have received a notice, ballot or other thing required to be mailed in respect of an election where it is mailed to the registered producer's last address registered with the

¹ At the request of the British Columbia Farm Industry Review Board, parts of these Rules and Procedures paraphrase certain provisions of the British Columbia Broiler Hatching Egg Scheme (B.C. Reg. 432/88) and the *Natural Products Marketing (BC) Act Regulations* (B.C. Reg. 328/75) (collectively, the "Regulations"). These provisions should be read in the context of the Regulations in which they appear. Further, the Regulations are subject to change from time to time. In the event of any conflict between the Regulations and these Rules and Procedures, the Regulations will govern. Persons who need to rely on the text of these Rules and Procedures for legal or other purposes should also review the Regulations.

Commission, and a failure to receive such notice, ballot or other thing does not invalidate the election.

8. Inadvertent omission to mail a notice, ballot or other thing required to be mailed in respect of an election does not invalidate the election.
9. Every registered producer² may vote in the election of a member to the Commission.
10. A person is not eligible for nomination, election or office as an elected member unless:
 - (a) the person is an individual registered producer or a partner of a firm that is a registered producer or a representative of a corporate registered producer;
 - (b) the person consents in writing to be nominated as a candidate for election;
 - (c) the person is in good standing with all applicable orders made by the Commission; and
 - (d) the nomination is endorsed in writing by not less than 5 registered producers.
11. An elected member may stand for re-election.
12. At least 45 days before the date fixed for holding the election, the Commission will set the date for elections and name the independent returning officer.
13. At least 40 days before the date fixed for holding the election, the independent returning officer will mail to every registered producer a notice:
 - (a) stating the date fixed for the election;
 - (b) enclosing the nomination forms and calling for nominations;
 - (c) stating the deadline for nominations, which shall be at least 25 days before the date fixed for holding the election; and
 - (d) providing the election rules and procedures.

² Subsection 3(p) of the *Natural Products Marketing (BC) Act Regulations* (B.C. Reg. 328/75) provides that every partnership or corporation qualified to vote under any scheme will in writing appoint a person to vote in its behalf and will file with the marketing board, commission or returning officer a copy of such appointment.

14. If only one person is nominated as a candidate for election as an elected member, that person will be elected by acclamation as of the date fixed for the holding of the election.
15. Unless an election of an elected member is by acclamation it will be by secret written mail ballot, as follows:
 - (a) ballots shall be mailed to registered producers at least 15 days before the date fixed for holding the election;
 - (b) registered producers, or the individual appointed to vote on behalf of a registered producer that is a partnership or corporation, are to complete the ballot in accordance with any instructions provided therewith;
 - (c) registered producers are to return the completed ballot to the independent returning officer by the date fixed for holding the election;
 - (d) the independent returning officer counts ballots that have been duly completed in the manner specified in the instructions provided therewith and returned by the date fixed for holding the election;
 - (e) the independent returning officer advises the Commission of the results of the ballot count; and
 - (f) the independent returning officer destroys the ballots.
16. In the event of a tied vote, the Chair of the Commission will cast the deciding vote.
17. In the event of any vacancy in the membership of the Commission, where such membership consists of 3 or more members, the remaining members will constitute the Commission until the vacancy is filled.
18. If a member of the Commission is absent from the Province for 3 consecutive months or fails to attend to his duties for a like period the other members may declare his office vacant.
19. Any member of the Commission will cease to hold office if he is convicted of any offence under the Act or of the scheme established by order in council pursuant to the Act under which he is elected or appointed, or if by notice in writing to the board he resigns his office, or if his office is declared vacant.
20. If a Commission member ceases to hold office or any vacancy occurs in the membership of the Commission, the remaining members, if constituting a quorum, may appoint a member to fill the vacancy, the said appointment to be subject to approval by the British Columbia Farm Industry Review Board.

21. The British Columbia Farm Industry Review Board may fill any vacancy in the membership of the Commission when the members do not constitute a quorum.

22. The Rules and Procedures will be reviewed at the request of a registered producer and in any case no later than 2012. No change may be made to the rules and procedures except with the prior approval by the British Columbia Farm Industry Review Board.
23. These Rules and Procedures come into effect upon the approval of the British Columbia Farm Industry Review Board and replace all previous Rules and Procedures for the election of elected Commission members.

**SCHEDULE 8
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

Small-Lot Innovative Self-Marketer Program Rules

Definitions

1. In these Rules:

“**Atypical Strain of Broiler Breeder**” means a strain of Broiler Breeder that produces a day-old chick that cannot be made available through a licensed Hatchery on an economically viable basis.

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Small-Lot Innovative Self-Marketer Program

2. (1) Applications to participate in the Small-Lot Innovative Self-Marketer Program are made by filing with the Commission:
 - (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant's birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status;
 - (d) proof of permanent residence status in the Province of British Columbia; and
 - (e) a non-refundable application fee of \$250.00, payable to the Commission by way of cheque.
- (2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (3) An applicant for the Small-Lot Innovative Self-Marketer Program may be a partnership in which case each partner must qualify under subsection (4).
- (4) A Person seeking to participate in the Small-Lot Innovative Self-Marketer Program must have the following qualifications:
 - (a) a genuine intention to be actively engaged in Broiler Hatching Egg production from an Atypical Strain of broiler breeder approved by the Commission, for the specific purpose of:

- (i) hatching day-old broiler chicks from that production under a custom hatching agreement with a licensed Hatchery in good standing with the Commission;
 - (ii) growing all day-old broiler chicks hatched pursuant to paragraph (i) under quota allotted to the applicant by the British Columbia Chicken Marketing Board;
 - (iii) processing all broilers grown pursuant to paragraph (ii) under a custom processing agreement with a licensed chicken processor in good standing with the British Columbia Chicken Marketing Board; and
 - (iv) self-marketing all broilers processed pursuant to paragraph (iii) under a brand or label unique to the applicant directly to wholesalers, retailers, restaurants or consumers;
- (b) be a Canadian citizen or permanent resident of Canada;
 - (c) be a permanent resident in the Province of British Columbia;
 - (d) be at least 19 years of age at the time of application;
 - (e) be in good standing with the British Columbia Chicken Marketing Board; and
 - (f) neither the applicant, nor the Spouse of the applicant, nor any co-applicant, may have, or have had at any time, any financial interest in ~~Placement~~ Quota allotted by the Commission, whether directly or indirectly, through any organization or entity.

Entry in Program

3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, of the applicant's financial ability to establish an acceptable Independent Production Unit for the production of Broiler Hatching Eggs;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Broiler Hatching Eggs;
 - (c) proof, in a form satisfactory to the Commission, that the applicant will be able to establish an acceptable Independent Production Unit for the production of Broiler Hatching Eggs within one year from the date of the application;

- (d) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit will be within economic access of a licensed Hatchery;
- (e) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old broiler breeder pullets of the Atypical Strain of Broiler Breeder approved by the Commission;
- (f) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old broiler chicks from the applicant's production under a custom hatching agreement;
- (g) proof, in a form satisfactory to the Commission, that the applicant has made arrangements to grow all day-old broiler chicks hatched pursuant to paragraph (f) under quota allotted to the applicant by the British Columbia Chicken Marketing Board;
- (h) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed chicken processor in good standing with the British Columbia Chicken Marketing Board to process all broilers grown pursuant to paragraph (g) under a custom processing agreement;
- (i) proof, in a form satisfactory to the Commission, that the applicant will self-market all broilers processed pursuant to paragraph (h) under a brand or label unique to the applicant directly to wholesalers, retailers, restaurants, or consumers;
- (j) an undertaking, in a form satisfactory to the Commission, that the applicant will engage in Broiler Hatching Egg production from an Atypical Strain of Broiler Breeder approved by the Commission, for the specific purpose of:
 - (i) hatching day-old broiler chicks from that production under a custom hatching agreement with a licensed Hatchery in good standing with the Commission;
 - (ii) growing all day-old broiler chicks hatched pursuant to paragraph (i) under quota allotted to the applicant by the British Columbia Chicken Marketing Board;
 - (iii) processing all broilers grown pursuant to paragraph (ii) under a custom processing agreement with a licensed chicken processor in good standing with the British Columbia Chicken Marketing Board; and

- (iv) self-marketing all broilers processed pursuant to paragraph (iii) under a brand or label unique to the applicant directly to wholesalers, retailers, restaurants or consumers;
 - (k) an undertaking, in a form satisfactory to the Commission, that the applicant will ship all Broiler Hatching Eggs produced in excess of the applicant's self-marketing requirements (within the limits of the quota allotted to the applicant by the British Columbia Chicken Marketing Board) to the breaker at the applicant's own cost and in accordance with a delivery schedule approved and administered by the Commission;
 - (l) an acknowledgment, in a form satisfactory to the Commission, that:
 - (i) the applicant will receive only the price payable by the breaker for any Broiler Hatching Eggs marketed to the breaker;
 - (ii) the applicant will not be eligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and is not entitled to receive any subsidy with respect to any Broiler Hatching Eggs marketed to the breaker;
 - (m) any other information deemed necessary by the Commission.
- (2) An applicant who has complied with subsection (1) to the satisfaction of the Commission will be allotted Placement Quota when the acceptable Independent Production Unit has been established. The amount of Placement Quota so allotted will be sufficient to satisfy the applicant's current requirements according to the amount of grower quota allotted to the applicant by the British Columbia Chicken Marketing Board, up to a maximum of 5,000 broiler breeder pullets.
- (3) An applicant who has been allotted Placement Quota under subsection (2) may apply for additional allotments of Placement Quota (provided that the aggregate amount of Placement Quota allotted under the Small-Lot Innovative Self-Marketer Program shall not exceed 5,000 broiler breeder pullets) where the applicant has acquired additional grower quota allotted to the applicant by the British Columbia Chicken Marketing Board subsequent to the initial allotment of Placement Quota under subsection (2).

Special Restrictions on Placement Quota Allotted Under the Program

4. (1) Placement Quota allotted under the Small-Lot Innovative Self-Marketer Program may be held for production by the entrant only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all

terms and conditions of the Small-Lot Innovative Self-Marketer Program;

- (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Small-Lot Innovative Self-Marketer Program;
- (c) is actively engaged in Broiler Hatching Egg production from an Atypical Strain of Broiler Breeder approved by the Commission, for the specific purpose of:
 - (i) hatching day-old broiler chicks from that production under a custom hatching agreement with a licensed Hatchery in good standing with the Commission;
 - (ii) growing all day-old broiler chicks hatched pursuant to paragraph (i) under quota allotted to the applicant by the British Columbia Chicken Marketing Board;
 - (iii) processing all broilers grown pursuant to paragraph (ii) under a custom processing agreement with a licensed chicken processor in good standing with the British Columbia Chicken Marketing Board; and
 - (iv) self-marketing all broilers processed pursuant to paragraph (iii) under a brand or label unique to the applicant directly to wholesalers, retailers, restaurants or consumers;
- (d) ships all Broiler Hatching Eggs produced in excess of the applicant's self-marketing requirements (within the limits of the quota allotted to the applicant by the British Columbia Chicken Marketing Board) to the breaker at the applicant's own cost and in accordance with a delivery schedule approved and administered by the Commission;
- (e) receives only the price payable by the breaker for any Broiler Hatching Eggs marketed to the breaker; and
- (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Broiler Hatching Eggs marketed to the breaker;

failing which the Placement Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Placement Quota allotted under the Small-Lot Innovative Self-Marketer Program may only be Transferred for the purpose of engaging in the production of Broiler Hatching Eggs from the same Atypical Strain of Broiler Breeder for which the Commission's approval had been granted hereunder.

Purchase or Acquisition of Additional Placement Quota

5. (1) An entrant may purchase or acquire Placement Quota.
- (2) Entrants under the Small-Lot Innovative Self-Marketer Program are eligible to receive general allotments of new Placement Quota and are subject to general adjustments or reductions of Placement Quota, and for that purpose, such receipts, adjustments or reductions shall be calculated against the Placement Quota then allotted to the entrant.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Broiler Hatching Egg production for the purposes of the Small-Lot Innovative Self-Marketer Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Placement Quota allotted under the Small-Lot Innovative Self-Marketer Program is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit;
 - (g) whether the entrant hatches day-old broiler chicks from its own production under a custom hatching agreement with a licensed Hatchery in good standing with the Commission;
 - (h) whether the entrant grows all day-old broiler chicks hatched pursuant to paragraph (g) under quota allotted to the applicant by the British Columbia Chicken Marketing Board;
 - (i) whether the entrant processes all broilers grown pursuant to paragraph (h) under a custom processing agreement with a licensed chicken processor in good standing with the British Columbia Chicken Marketing Board;

- (j) whether the entrant self-markets all broilers processed pursuant to paragraph (i) under a brand or label unique to the applicant directly to wholesalers, retailers, restaurants or consumers;
 - (k) whether the entrant ships all Broiler Hatching Eggs produced in excess of the applicant's self-marketing requirements (within the limits of the quota allotted to the applicant by the British Columbia Chicken Marketing Board) to the breaker at the applicant's own cost and in accordance with a delivery schedule approved and administered by the Commission;
 - (l) whether the entrant receives only the price payable by the breaker for any Broiler Hatching Eggs marketed to the breaker;
 - (m) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Broiler Hatching Eggs marketed to the breaker;
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Placement Quota allotted under the Small-Lot Innovative Self-Marketer Program, and that some other Person is primarily engaged in the business of Broiler Hatching Egg production associated with that Placement Quota, the entrant shall be deemed not to be actively engaged in Broiler Hatching Egg production.

SCHEDULE 9
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER

Formatted: Font: Bold

Regularization of Historically Non-Compliant Silkie and Taiwanese Producers
Program Rules

Definitions

1. In these Rules:

“Spouse” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

2. (1) Applications to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program are made by filing with the Commission, on or before 3:00 p.m., [date], 2012:

(a) an application form, obtainable from the Commission, duly completed by the applicant;

(b) a copy of the applicant’s birth certificate or other proof of age acceptable to the Commission;

(c) proof of Canadian citizenship or permanent resident status; and

(d) proof of permanent residence status in the Province of British Columbia.

(2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.

(3) An applicant under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be a partnership in which case each partner must qualify under subsection (4).

(4) A Person seeking to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program must have the following qualifications:

(a) the Person must be a Canadian citizen or permanent resident of Canada;

(b) the Person must be a permanent resident in the Province of British Columbia;

- (c) the Person must be at least 19 years of age at the time of application;
- (d) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission; and
- (e) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

Entry in Program

- 3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2010;
 - (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2010;
 - (e) proof, in a form satisfactory to the Commission, of the applicant's financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (f) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs;

- (g) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit is within economic access of a licensed Hatchery;
- (h) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets;
- (i) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from the applicant's production;
- (j) particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2); and
- (k) any other information deemed necessary by the Commission.

(2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:

- (a) will be allotted one unit of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2010; and
- (b) will be issued a temporary, revocable, non-transferrable export permit to hatch one Silkie or Taiwanese Chick per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2010;

(3) Where an applicant has submitted particulars of exceptional circumstances in accordance with paragraph 3(1)(j), the Commission may in its sole discretion allot Regularized Producer Chick Quota or issue temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2).

Special Restrictions on Regularized Producer Chick Quota Allotted Under the Program

4. (1) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:

- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
- (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
- (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
- (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
- (e) continues to be ineligible to participate in any surplus removal program administered by the Commission and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker; _____

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described in subsection (1).

- (3) Regularized Producer Chick Quota cannot be converted to Placement Quota.

Special Restrictions on Temporary, Revocable, Non-transferrable Export Permit Issued Under the Program

- 5. (1) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;

- (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
- (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
- (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
- (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
- (f) continues to be ineligible to participate in any surplus removal program administered by the Commission and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:

- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
- (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
- (c) is not transferrable under any circumstance.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

- 6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production for the purposes of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:

- (a) whether the Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit; and
 - (g) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, and that some other Person is primarily engaged in the business of Silkie or Taiwanese Broiler Hatching Egg production associated with that Regularized Producer Chick Quota or temporary, revocable, non-transferrable export permit, the entrant shall be deemed not to be actively engaged in Silkie or Taiwanese Broiler Hatching Egg production.

RE: NOV 8 2012, MEMO, DRAFTED ORDERS CHANGES REFLECTING THE ADDITION OF SPECIALTY REGULATIONS

Thank you for the opportunity to present our concerns regarding the above noted changes. We appreciate the time and effort to create the proposed drafted orders. However, as specialty hatching egg producers and independent marketers of chicks, we fear that the proposed orders as written will ultimately cause the termination of our businesses. We also feel the entire value chain of specialty chicken will suffer due to the limited amount of choice producers and processors will have if the orders are implemented as written.

We are two Specialty Broiler Producers who have participated in the BC Chicken sector for several years. Since the start of our individual broiler production units we both recognized the potential and aspired to become specialty broiler breeder producers. By producing our own chicks we would be better able to manage our quota obligations (as chick availability was constantly fluctuating), increase our return on investment by producing a better chick and build financially viable businesses. At the time, there were only two other Taiwanese chick suppliers; another grower and a processor owned flock. We felt the industry as a whole would be better served if the producers had more available sources for chicks. Through the ability to co-operate with each other (each raising a "half flock" and combining eggs for placements), purchasing of

used equipment, contracting of our own buildings and installation of our own equipment, when we started we were able to cover the everyday operating costs with the potential for profit in future chick sales. All our efforts of co-operation, research, and hard work were based on the potential of future sales in an open market. Now it seems that this open market is about to be closed and our supply of chicks reduced to an unviable amount. These orders need to allow for the regulation of product at the farm gate, but still allow flexibility for us as chick marketers (virtual hatcheries) to supply an ever evolving open chick market. We sincerely hope that using FIRB's principle based approach "SAFETI" will result in the creation of a program which will allow our farm operations to continue to be viable.

Below are concerns which we identified and some possible solutions to them. If not addressed they will have significant negative effects on not only us as producers and marketers of chicks, but on the entire specialty chicken industry;

- 1) **Production data from 2009 to 2010 does not represent current market conditions.** Specialty breeder production is dictated by customer and processor demand. Today's production level and bird types are not comparable to that of three years ago, therefore allocation needs to be based on current conditions. We had just started production in mid 2010. Since that time we have signed BCCMB contracts with two large producers and one processor for the supply of chicks. Our current requirements are approximately 25 times more than what we produced in 2010.
 - 2) We compete in an open market of supplying chicks to other BCCMB licensed producers. In the capacity of a hatchery, we sign BCCMB contracts (BC101-S) with processors and growers for the supply of our chicks. If our production is regulated (by the chick) As the BCBHEC is proposing, no BCCMB grower would ever be able to switch chick suppliers, as no supplier would ever have more chicks than the quantity of the chick quota that they were first issued. **Chick based quota based on a two year total chick production will dictate the type of chicken produced and will disallow market responsive production.** (In our industry every chick producer operates essentially as a hatchery and should be recognized as such-"virtual hatchery")
 - 3) Our production is based on settable eggs in a one week period. We require enough breeder pullets to produce the quantity of fertile eggs needed to meet the growers placement size (chick placement quantity is determined by BCCMB quota allocation and processor requirements). **Allocation, whether its breeder hen or chick based, must reflect our production needs of a one week period.** The weeks with no scheduled chick placements would provide the supply to service new customers in a changing market. Our hatchery businesses would then have the available product to compete with in an open market of chick sales. Excess eggs produced in "non set" weeks could be our responsibility to dispose of in an approved manner if participating in
-

the Surplus Egg Removal Program was cost prohibitive. This type of management of our sector would parallel the mainstream broiler hatching egg producer model.

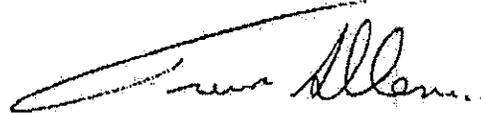

- 4) As specialty broiler producers, we were involved in the development of the current specialty broiler pricing and production protocols as set out by the BCCMB. This process of grower input resulted in a stable and market responsive industry. From our experience, we would encourage the BCBHEC to involve specialty hatching egg producers in the development of the specialty hatching egg industry. **The BCBHEC needs to allow for the creation of a Specialty Market Advisory Committee** in its proposed orders. As there are only 6 specialty hatching egg entities, a committee could be struck allowing each entity the ability to participate.

Again we would thank you for the opportunity to present our concerns for your consideration. We sincerely hope that you can create a program which will allow for a sustainable and financially viable industry for all.

Respectfully submitted,

Casey J. Van Ginkel

Trevor Allen

**COMMISSION MINUTES
February 21, 2013**

Chair Casey Langbroek called the meeting to order at 9:30 a.m.

In attendance: Casey Langbroek Calvin Breukelman, Brian Bilkes, Joe Neels, Stephanie Nelson, Veronica Kushnerenko

[REDACTED]

1. APPROVALS

Approval of Agenda – agenda approved as presented

Approval of Minutes from February 1, 2013

Request to amend and include numbered topics in future minutes and agenda. SN will revise and distribute for a second review.

Duly Moved, Seconded and Carried to approve the minutes as amended

2. TRANSFERS

[REDACTED]

[REDACTED]

3. COMMITTEE REPORTS

5. NEXT MEETINGS

- a. The mini meeting scheduled for March 8th at 9:30 AM will now be a Board Meeting
- b. The Board requests every board meeting will include a financial report. Casey will develop a template for Jennifer to use.

6. ADJOURNMENT

Meeting adjourned at 12:45 PM

BC Hatching eggs

March 11, 2013

To Producers of Silkie and Taiwanese Broiler Hatching Eggs

As you know, the Commission has been engaged in consultations and deliberations concerning the regularization of historically non-compliant Silkie and Taiwanese producers. We are writing to update you on the status of this matter and to invite final comment on the Commission's proposal to address this issue.

Avian Influenza (2004)

In February 2004, an H7N3 strain of avian influenza swept through B.C.'s poultry industry. The disease did not discriminate between producers who held a license and quota and those who did not. The province ordered more than 17 million birds killed. It took about six months for the province to be declared free of avian flu. The outbreak was devastating to the poultry industry, and it clearly illustrated that all producers should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

BCFIRB Report (2005)

On September 1, 2005, the BCFIRB released its comprehensive report concerning specialty products and markets in British Columbia's supply managed sectors. At page 2 of the report, the BCFIRB expressed the following policy principles:

Registration

- a. Boards should have plans to register all producers regardless of size or type of license.
- b. All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.

At page 7, the BCFIRB referred to the recommendations contained in the report entitled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System*, which was commissioned by the Ministry in the fall of 2004:

1. All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.

At pages 11 to 12, the BCFIRB noted:

The incentive to produce without quota is large because regulated prices provide attractive production margins. ...In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good

work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that “a chicken is a chicken” regardless of type.

Commencing at page 19, the BCFIRB issued the following policy directions:

5.1. Registration

With respect to Registration, the following policy directions are given:

1. **All producers, regardless of size or class of production, should be registered with the Boards.**
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

.....

5.10. Exemptions

With respect to Exemptions, the following policy directions and principles are given:

1. There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.

.....

5.17. Food Safety & Biosecurity

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.**
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

With respect to the hatching egg industry in particular, the BCFIRB said:

The Commission's belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

Avian Influenza (2009)

In February, 2009, there was another outbreak of Avian Influenza (H5N1). This outbreak occurred on a Silkie farm and resulted in a cull of approximately 12,000 birds. This second outbreak of AI, occurring as it did on a Silkie farm, further illustrated that producers of Silkie and Taiwanese broiler hatching eggs should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

The Polderside Decision

The Commission had occasion to consider Silkie and Taiwanese production, as well as the notion of "specialty" broiler hatching egg production, when it issued its August 12, 2010 decision in the matter of Polderside Farms Inc. Commencing at page 5 of that decision, the Commission stated:

A. The Nature of the Broiler Hatching Egg Industry

The hatching egg sector is unique among supply managed commodities. Unlike every other supply managed commodity, hatching egg producers do not produce an "end product". Hatching egg producers only produce an "input" to the chicken industry, namely: broiler hatching eggs. In effect, this means that hatching egg producers have only one customer – the hatchery. There is no demand for hatching eggs from wholesalers, retailers or consumers. There is only demand for hatching eggs from hatcheries.

In this environment, the potential for "niche markets" or "specialty production" is substantially more limited than it is in other commodities.

Furthermore, the hatching egg producer's "customer" (the hatchery) is largely able to control the nature of the product that it receives. Broiler breeder flocks are ordered and arranged by hatcheries. If a hatchery desires a particular strain of broiler breeder, it may simply order and arrange for a flock of that strain to be placed with a registered producer.

Consequently, it is important to understand that Polderside's inability to source atypical day-old chicks for its grower operations arises from an apparent inability or unwillingness of hatcheries to satisfy that demand (if there is one); not because registered producers are unable or unwilling to produce from that (or any other) strain of broiler breeder. Clearly, if any hatchery believed that there was an unsatisfied demand for day-old "RedBro" chicks, it could arrange for the placement of RedBro broiler breeders with registered producers. Hatcheries might do so in the future. But the fact remains that no British Columbia hatchery is responding to that demand (if there is one) at this time – which is the principle reason for Polderside's request to place its own flock of RedBro broiler breeders.

B. Historical Anomalies (Silkie, Taiwanese and Loong Kong)

It is well known throughout the industry that there are certain persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact regulated, in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, Taiwanese or Loong Kong broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. It may be that persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks should be made to comply with all of the Commission's orders. On the other hand, it may be that the Commission will need to develop modified requirements for such persons. Quite possibly, some of these persons may be eligible under the very program that has been developed in response to Polderside's request. In any event, the Commission's failure to enforce against these persons cannot be regarded as creating a de facto exemption. We regard non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks as an important but ultimately unrelated matter for determination at another time. While it would have been preferable to develop a comprehensive policy addressing these issues too (if the policy established hereunder is not sufficient to do so), Ms. Jacobsen has repeatedly emphasized that she requires a decision on her application without delay. For that reason, the Commission has decided that the best course of action is to establish the "Small-Lot Innovative Self-Marketer Program", and then examine in greater detail whether that program is sufficient to address the currently non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks.

Consultations with Producers of Silkie and Taiwanese Producers

Throughout 2011, the Commission initiated consultations with historically non-compliant producers of Silkie and Taiwanese hatching eggs. These discussions culminated in the circulation of a draft Amending Order, which itself became the subject of further discussion.

The Commission's Proposal

As a result of these extensive discussions, the Commission has refined its proposed Amending Order into the form attached to this letter. The Amending Order reflects the Commission's tentative view that producers of Silkie and Taiwanese hatching eggs must be required to hold a license and quota – not only as a means of making such producers subject to *enforceable* government-approved food safety and biosecurity protocols – but also as a means to regulate supply in a context where markets are not so easily distinguished (given the hatcheries' ability to order and arrange for the placement of any strain of broiler breeder).

We write to ask for your comments with respect to the proposed Amending Order. To ensure that we are able to move forward on these issues without unnecessary delay, we ask that you give us your written comments within 30 days from the date of this letter.

We look forward to hearing from you.

Yours truly,

Casey Langbroek, Chair
BC Broiler Hatching Egg Commission

**AMENDING ORDER ??
TO THE
CONSOLIDATED ORDER OF SEPTEMBER 30, 2012**

**MADE BY
THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
ON _____, 2013**

The British Columbia Broiler Hatching Egg Commission orders as follows:

1. (1) *Subject to subsection (2), the Consolidated Order of September 30, 2012 is amended by replacing the words "Placement Quota", wherever they appear, with the word "Quota".*
- (2) *Subsection (1) does not apply to:*
 - (a) *The definitions of "Placement Quota" and "Special Allotment" in section 2 of the Consolidated Order of September 30, 2012;*
 - (b) *Paragraph 8(2)(d) of the Consolidated Order of September 30, 2012;*
 - (c) *Sections 9, 10, 20 and 21 of the Consolidated Order of September 30, 2012;*
 - (d) *Sections 4, 5, 6 and 7 of Schedule 1 to the Consolidated Order of September 30, 2012; and*
 - (e) *Sections 3, 4, 5 and 6 of Schedule 8 to the Consolidated Order of September 30, 2012.*
2. *Section 2 of the Consolidated Order of September 30, 2012 is amended by adding the following definitions:*

"Regularized Producer" means a Registered Producer who has been allotted Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

“Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer.

“Quota” means Placement Quota or Regularized Producer Chick Quota, as the case may be.

3. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Special Allotment” with the following:*

“Special Allotment” means:

- (a) a general allotment of Placement Quota by the Commission;
- (b) a special allotment of Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1;
- (c) a special allotment of Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8;
- (d) a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9; or
- (e) a general allotment of Regularized Producer Chick Quota.

4. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Underweight Broiler Hatching Eggs” with the following:*

“Underweight Broiler Hatching Eggs” mean Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weighing less than 52 grams.

5. *The Consolidated Order of September 30, 2012 is amended by adding the following section immediately after section 10:*

Special Allotment of Regularized Producer Chick Quota Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

10.1 The Commission may allot Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

6. *Subsection 18(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

Placement of Flocks by Hatcheries and Payment by Producers

18. (1) Each Hatchery shall order and arrange for the placement of flocks of day-old broiler breeder pullets in accordance with the Official Flock Schedule, except with respect to a Regularized Producer.

7. *Paragraph 23(b) of the Consolidated Order of September 30, 2012 is replaced with the following:*

(b) all such Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weigh at least 52 grams each; and

8. *Subsection 25(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

25. (1) Every Producer other than a Regularized Producer shall market their broiler breeder flocks as directed by the Commission, and subject to:

(a) any extraordinary kill age as may be directed by the Commission, after consultation with the Hatchery, where:

(i) a broiler breeder flock has failed to produce Broiler Hatching Eggs with a consistent Hatchability of 70%; or

(ii) there are other extraordinary circumstances warranting an extraordinary kill age.

(b) any extraordinary kill age as may be directed by the Producer, after consultation with the Hatchery, where a broiler breeder flock has failed to produce at levels acceptable to that Producer.

9. *Section 26 of the Consolidated Order of September 30, 2012 is replaced with the following:*

Payment of Base Price for Broiler Hatching Eggs

21. Every Hatchery shall pay for Broiler Hatching Eggs at the base price set out in Schedule 2, provided that a reasonable surcharge may be imposed by a Hatchery to recover additional costs actually incurred by the Hatchery as a direct consequence of having to pick up Broiler Hatching Eggs from a Producer (other than a Regularized Producer) who keeps less than 12,000 broiler breeders per Quota Period.

10. *Section 1 of Schedule 3 to the Consolidated Order of September 30, 2012 is replaced with the following:*

Producer Levies

1. (1) Subject to subsections (2) and (3), levies are fixed and imposed upon each Producer at a rate of \$0.025 per Saleable Chick.
- (2) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Small-Lot Innovative Self-Marketer Program at a rate of \$0.015 per Saleable Chick.
- (3) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program at a rate of \$0.015 per Saleable Chick.

11. *Paragraph 7(4)(a) of Schedule 6 to the Consolidated Order of September 30, 2012 is replaced with the following:*
- (a) of a minimum weight of 52 grams, unless they are Silkie or Taiwanese Broiler Hatching Eggs;
12. *Subsection 7(6) of Schedule 6 to the Consolidated Order of September 30, 2012 is replaced with the following:*
- (6) All double-yolked and small eggs (less than 52 grams) shall be packaged on Commission supplies and sold to the Commission, unless they are Silkie or Taiwanese Broiler Hatching Eggs.
13. *The Consolidated Order of September 30, 2012 is amended by adding Schedule 9 as attached.*
14. *This Order comes into effect _____, 2013.*

DATED at Abbotsford, British Columbia, on _____, 2013

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

Casey Langbroek, Chair

**SCHEDULE 9
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

**Regularization of Historically Non-Compliant Silkie and Taiwanese Producers
Program Rules**

Definitions

1. In these Rules:

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

2. (1) Applications to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program are made by filing with the Commission, on or before 3:00 p.m., [date], 2013:
- (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant’s birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status; and
 - (d) proof of permanent residence status in the Province of British Columbia.
- (2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (3) An applicant under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be a partnership in which case each partner must qualify under subsection (4).
- (4) A Person seeking to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program must have the following qualifications:
- (a) the Person must be a Canadian citizen or permanent resident of Canada;

- (b) the Person must be a permanent resident in the Province of British Columbia;
- (c) the Person must be at least 19 years of age at the time of application;
- (d) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission; and
- (e) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

Entry in Program

- 3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;
 - (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (e) proof, in a form satisfactory to the Commission, of the applicant's financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (f) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (g) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit is within economic access of a licensed Hatchery;
 - (h) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets;
 - (i) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from the applicant's production;
 - (j) particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2); and
 - (k) any other information deemed necessary by the Commission.
- (2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:
- (a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012; and
 - (b) will be issued a temporary, revocable, non-transferrable export permit to hatch 0.5 Silkie or Taiwanese Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (3) Where an applicant has submitted particulars of exceptional circumstances in accordance with paragraph 3(1)(j), the Commission may allot Regularized Producer Chick Quota and/or issue temporary, revocable, non-transferrable export permit, in amounts other than as provided for in subsection (2). In that event, Regularized Producer Chick Quota and temporary, revocable, non-transferrable export permit allotted and issued to other persons in accordance with subsection (2) will be proportionately reduced in order to accommodate all allotments and issuances to such applicants.

Special Restrictions on Regularized Producer Chick Quota Allotted Under the Program

4. (1) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
 - (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described in subsection (1).
- (3) Regularized Producer Chick Quota cannot be converted to Placement Quota.

Special Restrictions on Temporary, Revocable, Non-transferrable Export Permit Issued Under the Program

5. (1) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:
 - (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

- 6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production for the purposes of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit; and

- (g) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, and that some other Person is primarily engaged in the business of Silkie or Taiwanese Broiler Hatching Egg production associated with that Regularized Producer Chick Quota or temporary, revocable, non-transferrable export permit, the entrant shall be deemed not to be actively engaged in Silkie or Taiwanese Broiler Hatching Egg production.

Questions regarding the Draft Amending Order ??? to the Consolidated Order of September 30, 2012

Question 1

I am finding it difficult to understand which items from the 2012-09-30 Consolidated Orders are excluded.

The Table of Contents for the 2012-09-30 Consolidated Order includes the heading of "Section" and then "Part". Do the "Section" numbers identified in the Amending Order correlate directly the "Part" numbers in the 2012-09-30 Consolidated Orders?

Question 2

- a) **If all of the other items in the 2012-09-30 Consolidated Orders will apply; there are many sections which we would need clarification on. For example: what are vaccines included for the "\$0.7578 per day-old Saleable Chick"?**
- b) **We get our eggs custom hatched based upon an agreed schedule with the hatchery, this business model does not appear to be supported by the 2012-09-30 Consolidated Orders. This may be because I am not clear on all of the items which will not pertain.**

Question 3

Entry in Program

3. (1) The applicant must submit to the Commission, within 60 days from the date application:

(a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;

(b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;

(c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;

(d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

The data required in items a) through b) is from for 2010 to application while the data required for items c) and d) is between January 1, 2009 and December 31, 2012. I am wondering why the two terms are different.

Question 4

2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:

(a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;

Just to be sure I understand this, the following example is presented:

<u>January 1 to Dec 31 2009</u>	<u>3000 breeders</u>	<u>total of 30,000 chicks</u>
<u>January 1 to Dec 31 2010</u>	<u>2000 breeders</u>	<u>total of 15,000 chicks</u>
<u>January 1 to Dec 31, 2011</u>	<u>3000 breeders</u>	<u>total of 30,000 chicks</u>
<u>January 1 to Dec 31, 2012</u>	<u>4000 breeders</u>	<u>total of 35,000 chicks</u>

Since the total number of chicks placed was 110,000, I would be allotted a Quota of 55,000 chicks which can be produced as a saleable chick annually going forward.

Question 5

If the chick production allocated is insufficient to meet the current production as agreed upon with the BC Chicken Marketing Board, how will that be remedied?

Question 6

The September 30, 2012 document includes the following:

Surrender of Placement Quota on Transfer

16. (1) Subject to subsection (5), where Placement Quota is Transferred other than by way of a Permissible Lease, the Transferor shall surrender to the Commission an amount of Placement Quota calculated as follows:

(a) 5% of the amount of Placement Quota being Transferred, where such Total Production Quota was:

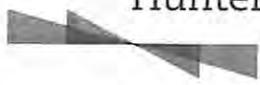

(i) allotted pursuant to a Special Allotment to the Transferor prior to April 1, 2006; or

(ii) allotted to the Transferor other than pursuant to a Special Allotment;

(b) 100% of the amount of Placement Quota being Transferred, where such Placement Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within one year from the date of the proposed Transfer;

(c) 90% of the amount of Placement Quota being Transferred, where such Placement Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the second year preceding the date of the proposed Transfer; etc.

What is the impact of this statement on the Regularized Quota to be issued with the Amending Orders?

British Columbia Broiler Hatching Egg Commission
180-32160 South Fraser Way
Abbotsford, BC V2T 1W5

Attention: Stephanie Nelson, Acting General Manager

Dear Ms. Nelson:

Re: Proposed draft order to “regularize” specialty broiler breeders

We have been retained by Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales, in respect of the proposed draft order to “regularize” the specialty broiler breeder industry through the issuance of quota.

As you know, the specialty broiler breeder industry has long been operating without formal regulation by the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”). We are instructed that in 2010, Skye Hi Farms and V3 Farms, both quota-holding producers of specialty chicken, notified the then-General Manager of the BCBHEC of their intention to build additional barns on their farms in order to commence production as specialty breeders for their own farms. No objection was raised to the proposed production by the then-General Manager, nor was there any suggestion that production could commence without a licence or quota. As the Commission acknowledged in its May 2, 2011 notice to the industry, it is “well known throughout the industry” that specialty broiler breeders have been operating without licence or quota.

Skye Hi and V3 have been operating as specialty breeders since 2010. They have been supplying their own farms and have developed expertise in breeding specialty hatching eggs. As a result of the success of their breeding operations, they have recently acquired three customers in addition to their own farms—also licensed specialty chicken producers—and have entered into commitments to supply chicks to these farms. It is estimated that fulfilling their commitments to the three customers and supplying their own farms will require annual chick sales of 300,000-350,000 chicks.

Schedule 9 to the draft order entitled “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules” would allot “0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province

between January 1, 2009 and December 31, 2012". T&C Chick Sales estimates that this method of calculating quota, if implemented, would result in their being allotted production of approximately 50,000 chicks between the two farms, which would not provide sufficient quota to supply even their own farms, let alone the three new customers that they have committed to supply.

It is submitted that the proposed draft order should be revised to provide for one unit of chick quota for each chick committed and contracted for placement with a licensed chicken grower in the nearest quota period immediately before implementation of the new order. As set out further below, such a modification would be consistent with the Farm Industry Review Board's guidance for the implementation of specialty market regulation and with the 'SAFETI' principles-based approach to governance expected of marketing boards in their decision making.

I. The proposed modification is consistent with FIRB Policy

On September 1, 2005, the British Columbia Farm Industry Review Board ("FIRB") issued general directions to the supply managed commodity boards in British Columbia, including the BCBHEC, concerning how specialty production, new entrant and quota programs were to be administered. The report provided that boards "should have plans to register all producers regardless of size or type of license" (1.2(11)(a)) and that "Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced. . . Production volumes recognized for quota should be equal to the permittee's production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004" (1.2(11)(i), emphasis added).

With respect to the development of quota, the following policy directions were given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity. (5.5)

With respect to the conversion of permits to quota, the following policy directions were given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period. (5.6, emphasis added).

FIRB's letter to Bruce Cook dated February 9, 2006 summarizes that BCBHEC submitted draft orders to FIRB in response to a requirement that the boards draft orders in compliance with the general directions and submit them to FIRB. Following some modifications, FIRB approved the draft orders based on a number of understandings, including:

First and foremost, Commission allocation policies and decision-making are expected to be in accordance with the Ministry's 'Regulated Marketing Economic Policy' and FIRB's September 1, 2005 directions. This includes being responsive to specialty, niche and other innovative marketing opportunities when the need for those become evident in the B.C. hatching egg industry.

The thrust of FIRB's guidance with respect to a program of "regularizing" a specialty industry is that at a minimum, those who have been producing the product for which quota is to be issued are to be issued sufficient quota so as to permit continued production at the level of production in place immediately before the issuance of quota and so as to allow producers to meet their production commitments. While the initial proposal in May 2011 would have recognized production levels between January 1, 2010 and December 31, 2010, the delay in approving and implementing the draft order has meant that production levels of some producers, including Skye Hi and V3 Farms have changed significantly in the intervening years.

The FIRB directions suggest that any new order should provide for quota that allows current producers to continue production at their current levels and meet current commitments.

II. The proposed modification is more consistent with the SAFETI principles

FIRB has identified six principles to assist marketing boards in interpreting and implementing principles-based regulations within their respective mandates represented by the acronym SAFETI: strategic, accountable, fair, effective, transparent, inclusive: *BCFIRB's 6 Higher-Level Principles – Definitions and Guidance*, Sept 2011 ("*6 Higher-Level Principles*"). It is submitted that the modification proposed above is more consistent with a SAFETI analysis than the current draft.

Strategic – This principle requires that BCBHEC "Identify key opportunities and systemic challenges and plan for actions to effectively manage risks and take advantage of future opportunities" (*6 Higher-Level Principles*, at p. 3). Here, in its May 2, 2011 communication "General Information regarding 'Specialty Broiler Breeders'", the Commission has identified the goals of (1) complying with FIRB's direction to ensure that all producers be regulated to ensure biosecurity, premise identification and food safety and (2) the desire to prevent a "race for quota". In support of the latter goal, the communication suggests that the period January 1, 2010 to December 31, 2010 be used to identify those eligible for the "regularized production certificates" and issuance of quota.

Using a date prior to the implementation of any draft order to identify those eligible for issuance of quota may achieve the goal of preventing a race for quota, however, given the time that has passed since the initial consultation on the new order without finalization or implementation of the new order, there is no connection between the objective of preventing a “race for quota” and using the 2010 time period to identify eligibility. Nor is there any connection between this goal and the proposal to use production levels from 2009 – 2012 as a basis for the issuance of quota.

Moreover, it is submitted that allowing specialty hatching egg producers to honour production commitments made with special chicken producers is sound marketing policy. FIRB has recently considered the role of open contracting in developing sound marketing policy in the context of a supervisory review that considering assurance of supply in the chicken industry. In that context, FIRB stated that “a sound marketing policy is one that creates a working climate that recognizes the importance of meeting customer needs at all levels to promote a sustainable industry – from growers through to consumers”: Decision dated June 9, 2010, In the Matter of the *Natural Products Marketing (BC) Act* and a Supervisory Review of BC Chicken Marketing Board Pricing-Related Recommendations at para. 63 and that “the movement of growers between processors could work to the benefit of all parties ensuring a better fit between grower and processor needs, resulting in longer term contracts” at para 66. Here, the proposed draft order that would lock in market share for specialty hatching egg producers at a historical level and would ignore the commitments made between producers of specialty hatching eggs and specialty chicken does not promote positive relationships between producers and is not sound marketing policy.

Accountable – This principle requires that BCBHEC “Maintain legitimacy and integrity through understanding and discharging responsibilities and reporting performance” (6 *Higher-Level Principles*, at p. 3). Here, implementation of an order that would reduce Skye Hi and V3 Farms’ quota to a level below that required to produce their own farms and meet current commitments is not consistent with the principle of accountability. Skye Hi and V3 Farms have kept the BCBHEC informed of their intention to commence and expanding production in their specialty hatching egg operations. At no time did the BCBHEC raise objection to the plans for expansion of Skye Hi and V3 Farms to accommodate production or indicate that BCBHEC would take the position that this specialty operation was contrary to the Commission’s orders. To the contrary, as the Commission has acknowledged, it was “well known throughout the industry” that specialty breeders have been operating outside the quota system. It would undermine the legitimacy of the BCBHEC to arbitrarily change the rules of the game such that it would prevent those specialty breeders who have been operating with the knowledge and approval of the Commission from continuing their operations.

Fair – This principle requires that BCBHEC “Ensure procedural fairness and processes and decision-making” (6 *Higher-Level Principles*, at p. 2). The current draft order is unfair to those specialty breeders, like Skye Hi and V3 Farms, who have increased their market share since 2009. Skye Hi and V3 Farms have built additional barns and increased the size of their

operations in order to meet demand for their specialty chicks on the understanding that they would be permitted to continue in production. Far from discouraging growth of unlicensed specialty breeders, it was agreed at a March 12, 2011 meeting with industry participants and BCBHEC staff that the industry did not desire a quota system for the specialty breeding sector. Given BCBHEC's historical position, it would be contrary to procedural fairness if BCBHEC were to institute a quota system now that would prevent Skye Hi and V3 from continuing to produce specialty chicks to meet their current commitments.

Effective – This principle requires “A clearly defined outcome with appropriate processes and measures” (*6 Higher-Level Principles*, at p. 2). Here, the outcome identified is to “regularize” the specialty breeder industry by issuing quota. There is no connection between the proposed order that would reallocate market share as between current producers to that goal, which would be just as effectively achieved by a system that would issue quota based on current commitments to supply registered chicken growers.

Transparent – This principle requires that “processes, practices, procedures & reporting on exercise of mandate are open, accessible and fully informed” (*6 Higher-Level Principles*, at p. 2). The process of implementing the draft order thus far have been far from transparent. While some consultation with the industry took place after the May 2011 communication was issued by BCBHEC it is not clear how the consultation related to the revised draft order or how the current formula of quota issuance contained in the draft order was arrived at.

Inclusive – This principle requires that “appropriate interests, including the public interest, are considered” (*6 Higher-Level Principles*, at p. 2). Here, in addition to failing to consider the interests of those specialty breeders who have expanded their market share since 2009, the current quota provision in the draft order does not consider the public interest, which is served by promotion of diversity amongst specialty breeders. Nor does it consider the impact of the new order on specialty chicken producers who have chosen to obtain their chicks from Skye Hi and V3 Farms. FIRB has previously held that a marketing board must consider the potential impact of its orders on other regulated commodities: *Fraser Valley Duck and Goose Ltd. v. BC Chicken Marketing Board*, Feb. 29, 2008, File 44200-50, at p. 2.

We are hopeful that the Commission will agree to the modification to the draft order proposed. In the event that the Commission determines to implement the new order in its draft form (or that otherwise reduces the quota entitlement of Skye Hi and V3 Farms to a level below their current commitments) we would respectfully request that the

implementation of that order be delayed to allow sufficient time for our clients to bring an appeal to FIRB under the *Natural Products Market Act* and obtain a decision.

Yours truly,

Hunter Litigation Chambers

Meeting adjourned at 2:43 p.m.

April 25, 2013

BC Hatching Egg Commission

Dear Members:

Re: W. Friesen request for Onetime Transfer

Thank you for allowing us to meet with you today. We are presenting our request and invite your questions. The reasons for our request are:

- 1) We have been in the Specialty Poultry Hatching business for many years. We have developed specific breeds of chicken which are well accepted in the market place.
- 2) On May 2, 2011 our Specialty Poultry Hatching business became unsalable.
- 3) We are planning our retirement for age and health reasons. We request a onetime transfer of our production so a new owner can provide the number chicks established with the BC Chicken Marketing Board.

1) Specialty Poultry Hatching History

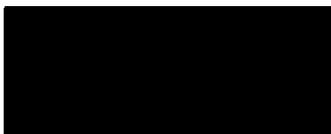

I started raising poultry in 1984 and produced hatching eggs for Fred Evans of ECHO Hatchery. When ECHO was sold to Ernie Unger, I did some of my own hatching and had custom hatching done by Campbell's Pheasantry.

In 1993, we started purchasing eggs and breeding poultry to develop the specific characteristics requested by the Asian and East Asian local communities. In the early 1990s, most processing was done by Wingtat Game Bird Packers. Some specific breeder chicks were sold to Rob Donaldson of Bradner Farms. Fraser Valley Duck and Goose was also a major customer for our chicks and chickens.

As our market grew, we had packaging and labels approved – bag samples are provided.

When the BC Chicken Marketing Board included Specialty Poultry, our hatching records were used to establish the Quota level in 2000. We were also granted Self Marketing quota.

In order to comply with CFIA regulations for hatching, we built a hatching facility which we chose not to complete, but we still have hatching capacity for 14,000 eggs a week.

When Fairline Development opened their processing facility, we grew birds for them for several years as well as supplied the chicks for all their growers. The hatching requirements were too large for Campbell's Pheasantry and so we switched to ECHO Hatchery. Later, Echo Hatchery negotiated a cheaper rate for chicks with Fairline and took a large component of our operation.

We continued to develop our breeds with some of our own hatching and then had all of the hatching done at Rosstown.

In 2009, we changed our processing to Fraser Valley Duck and Goose (FVDG) and then transferred our Self Marketing Quota to them also. In 2010 we sold our grower quota to FVDG with the agreement that we continue to supply them with the chicks and gave them first Right of Refusal for our breeder business when we were ready to retire.

2) On May 2, 2011 our Specialty Poultry Hatching business became unsalable.

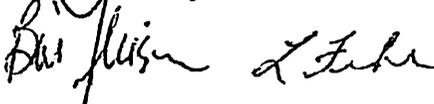

When on May 2, 2011 the letter "General Information Regarding Specialty Broiler Breeders" was distributed by Peter Whitlock, our business sale was put on hold. It was no longer a saleable business due to the uncertainty of new regulations.

We have continued to develop our poultry business; obtaining interest from other Growers for chicks; we have more Grower Quota we are hatching for; and we also sell other breeds.

3) We request a Onetime Transfer of Production so that the new Producer can meet the commitments made via the BC Chicken Marketing Board.

We are ready to retire and since our family members have their careers, we are selling the farm and associated businesses. While we are not asking that the new regulations be changed, we ask that you do not impose a 10 year sentence on us but allow us to transfer the production of approximately 295,000 chicks per year so that the new owner can continue the business.

Thank you for your consideration.

Bill Friesen and Lillian Fehr

May 1, 2013

To: Mr. Bill Friesen and Ms. Lillian Fehr
Re: Written Submission

Thank you for your list of questions dated March 21, 2012 and your letter dated April 25, 2013. The Commission would like to respond to both. However, the Commission has come to the view that it would not be fair or transparent to engage in one-on-one discussions with interested parties to the exclusion of others, given that the Commission is engaged in a consultative process.

We should add too, that the Commission has received feedback from other interested stakeholders, and it has taken the same position in those cases.

In short, the Commission has reached the view that it should not consider or respond to any stakeholder comments or questions if those stakeholders are unwilling to share their views (or the Commission's response thereto) with other stakeholders.

You did not indicate whether you had an expectation that your list of questions dated March 21, 2012 and your letter dated April 25, 2013 should be held by the Commission in confidence. If you do not want that material to be shared with other stakeholders, then the Commission will not consider your comments and questions. On the other hand, if you confirm that your materials can be shared with other stakeholders in the context of this consultative process, then the Commission will circulate those materials (together with any response) among all stakeholders.

Alternatively, you may wish to resubmit your questions and comments in a form that can be shared with other stakeholders.

In any event, we must have your position on whether your materials (or a revised version thereof) can be circulated among other stakeholders not later than May 15, 2013

We look forward to hearing from you.

Your truly,

Casey Langbroek
Chairman BCBHEC

May 1, 2013

To: Ms. Hunter (counsel for Skye Hi Farms and Casey Van Ginkel dba V3 Farms)

Thank you for your letter dated April 3, 2013.

The Commission has come to the view that it would not be fair or transparent to engage in one-on-one discussions with interested parties to the exclusion of others, given that the Commission is engaged in a consultative process. Please note that the Commission has received feedback from at least one other interested stakeholder, and it has taken the same position in those cases.

In short, the Commission has reached the view that it should not consider or respond to any stakeholder comments or questions if those stakeholders are unwilling to share their views (or the Commission's response thereto) with other stakeholders.

You did not indicate whether you had an expectation that your letter dated April 3, 2013 should be held by the Commission in confidence. If you do not want that letter to be shared with other stakeholders, then the Commission will not consider it. On the other hand, if you confirm that your letter can be shared with other stakeholders in the context of this consultative process, then the Commission will circulate it (together with any response) among all stakeholders.

Alternatively, you may wish to resubmit a letter in a form that can be shared with other stakeholders.

In any event, we must have your position on whether your letter (or a revised version thereof) can be circulated among other stakeholders not later than May 15, 2013.

We look forward to hearing from you.

Hello Stephanie

Thank you for your message of May 2nd.

Bill and I felt it was necessary to meet with the Board to convey our request and ensure that we had a clear communication. There was no desire to have a secret communication.

We would be pleased to have our questions and communications shared with the other stakeholders and will be pleased to review the questions, responses and communications of the other stakeholders as well.

Please do not hesitate to contact me by cel phone if any further clarification is required.

We look forward to hearing from you.

Regards
Lillian Fehr and Bill Friesen

Attention: Casey Langbroek, Chairman

Dear Sirs:

Re: Proposed draft order to “regularize” specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms in response to your letter dated May 1, 2013 (received by email on May 2, 2013).

Our clients consider certain of the information contained in our letter of April 3, 2013 to be confidential and do not wish that letter to be shared with other stakeholders.

In light of your advice that the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”) does not intend to consider any feedback by stakeholders unless it can be shared with all other stakeholders, we require some additional information from the Commission about its consultative process in order to more fully consider our position in relation to making further submissions in respect of the proposed draft order:

1. In what form is the Commission prepared to accept feedback on the proposed draft order as part of its consultative process?

2. In addition to the submissions provided in my letter of April 3, 2013, our clients have previously met privately with representatives of the Commission to provide feedback on the proposed draft order as part of the Commission’s consultative process. We are instructed that there were at least four such meetings at which one or both of our clients attended and which were attended by Peter Whitlock, Dave Cherniwchan, members of the Commission and its legal counsel and Stephanie Nelson respectively on behalf of the Commission. It is my clients’ understanding that other stakeholders have similarly met with representatives of the Commission privately to provide feedback on the proposed draft order. Does the Commission intend to consider the views already expressed in private meetings between individual stakeholders and representatives of the Commission as part of its consultative process?

3. Does the Commission rely on any legal authority for its position that it will not consider submissions by stakeholders unless those submissions are available for publication to the industry?

4. We note that the consultative process in relation to the draft order has been ongoing since May 2011. What is the anticipated timeframe for the conclusion of the consultative process and a determination on the form of the intended order?

5. Once a determination is made as to the form of order to be implemented, will there be sufficient notice of the decision to allow appeals to be brought to FIRB by stakeholders if necessary prior to implementation of the order?

We would appreciate your providing the information above and any other available information about the process intended to be followed by the Commission in order to assist with my clients' determination as to whether to make additional written submissions in respect of this issue.

Yours truly,

Hunter Litigation Chambers

Board of Directors.

Thank you for your most recent draft dated March 11, 2013, regarding silkies and taiwanese broiler chicks. First of all, I would like to congratulate the commission for their hard work during these past 2 years in communicating with all industry stake holders to best understand this rather complex segment of the specialty poultry business in BC. A hand full of poultry breeders have over the past 20 years developed an industry through trial and error from 100's of birds per week to 10's of 1000's per week in recent years.

As I go through the amending order, I don't see any provisions for supplying the market in case of expansion or retraction. In BC Fird's report 2005, it indicated specialty markets will grow at differentiated rates than mainstream. If we're to take the risk of a downturn in demand, then we should benefit also from an upswing in demand as well. Of the drafts that have circulated, the last one in March 11, 2013, is the least kind to Bradner Farms. The other drafts used 2009 and 2010 production figures as other producers entered the supply chain in 2011 after hearing of quota being issued by the BCHEC for specialty breeders our sales dipped. I understand the difficulty in appeasing everyone but under this draft I would not have enough chick quota to finish the 2013 calendar year.

In conclusion, I have thought long and hard about March 11, 2013 draft and in principle if no exceptions are allowed then I believe we the producers can work with BCHEC in the short term to become biosecurity compliant and long term to supply the chicks required for the market place. Enough time has been spent. Let's adopt the draft and get on with business.

Again, congratulations on a job well done.

Sincerely,

R. Donaldson

Dear Ms. Hunter:

Re: Producers of Silkie and Taiwanese Broiler Hatching Eggs

I am legal counsel for the British Columbia Broiler Hatching Egg Commission. Your letter dated May 13, 2013 has been forwarded to me for reply.

By letter to you dated May 1, 2013, the Commission advised that it had reached the view it would not be fair or transparent to engage in one-on-one discussions with interested parties to the exclusion of others, given that the Commission is engaged in a consultative process. The Commission further advised that it had determined that it should not consider or respond to any stakeholder comments or questions if those stakeholders are unwilling to share their views (or the Commission's response thereto) with other stakeholders. Against that background, the Commission asked for your position with respect to your letter dated April 3, 2013. In particular, the Commission advised that if you did not want that letter to be shared with other stakeholders, the Commission would not consider it. If, on the other hand, you confirmed that your letter could be shared with other stakeholders in the context of this consultative process, then the Commission advised that it would circulate it (together with any response) among all stakeholders. The Commission also invited you to resubmit a letter in a form that could be shared with other stakeholders.

By your letter dated May 13, 2013, you advised that "[your] clients consider certain of the information contained in [your] letter of April 3, 2013 to be confidential and do not wish that letter to be shared with other stakeholders." You did not identify the parts of the letter which your clients considered to be confidential, and we note that you did not (yet) avail yourself of the opportunity to resubmit a letter in a form that could be shared with other stakeholders.

You have asked a number of questions about the consultative process so that you could more fully consider your position. I will attempt to respond to those question in the order in which they were asked:

1. Feedback with respect to the proposed draft order should be tendered in written form so that it may be shared with other stakeholders, and to ensure that there is a meaningful record of the policy positions advanced by stakeholders in the event of an appeal to the BCFIRB.
2. The Commission has indeed met with stakeholders concerning the regularization of producers of Silkie and Taiwanese broiler hatching eggs since 2011. As you correctly note, some of these early consultations were in the nature of “one-on-one” oral discussions. These early consultations were essential to the Commission as part of its fact-finding process, and it is unlikely that this phase of the consultative process could have been undertaken in a substantially different manner. However, these initial consultations were of a different character than the consultations now underway. In particular, this phase of consultations concerns a final policy review with respect to a draft order that has been tentatively formulated by the Commission following, and at least partly as a result of, the “fact-finding” phase. The Commission is of the view that the policy positions of stakeholders with respect to the tentative draft order should now be made in writing, and should be made available to other stakeholders, so that the final formulation of the policy into the form of an order is as fair and transparent as possible. In short, if stakeholders have any position to express with respect to the draft order, they should do so now, in writing, with the expectation that other stakeholders will have an opportunity to consider and comment upon that position. Obviously, the Commission cannot “force” any stakeholder to avail itself of this opportunity, but the opportunity to make written comment with respect to the draft order is being extended to all.
3. The Commission is soliciting written feedback from stakeholders in a form that can be shared with other stakeholders simply because it believes that this is the best, most fair, and most transparent way to achieve a final resolution concerning the draft order that has now been circulated by the Commission.
4. The Commission’s objective is to finalize the order before the end of the summer.
5. It is unlikely that the effective date of the order will be the date of promulgation. Nevertheless, the onus of deferring implementation of the order pending the outcome of an appeal would rest on an appellant, who might attempt to obtain an order from the BCFIRB staying the effect of the order pending appeal. The Commission cannot possibly express a position on a hypothetical application, in the context of an appeal that has not yet been brought, from an order that has not yet been made, and before all stakeholders have had an opportunity to formally present their views with respect to a proposed, draft order.

If I have not sufficiently addressed your questions, please let me know.

Yours truly,

AFFLECK HIRA BURGOYNE LLP

Attention: Robert P. Hrabinsky

Dear Sir:

Re: Proposed draft order to “regularize” specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales, in respect of the proposed draft order to “regularize” the specialty broiler breeder industry through the issuance of quota and in response to the request for a letter that can be shared with other stakeholders in the specialty broiler breeder industry.

As you know, the specialty broiler breeder industry has long been operating with the knowledge of but without formal regulation by the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”). We are instructed that in 2010, Skye Hi Farms and V3 Farms, both quota-holding producers of specialty chicken, notified the then-General Manager of the BCBHEC of their intention to build additional barns on their farms in order to commence production as specialty breeders for their own farms. No objection was raised to the proposed production by the then-General Manager, nor was there any suggestion that production could commence without a licence or quota. As the Commission acknowledged in its May 2, 2011 notice to the industry, it is “well known throughout the industry” that specialty broiler breeders have been operating without licence or quota.

Skye Hi and V3 have been operating as specialty breeders since 2010 and accordingly have an interest in the proposed draft order. They have been supplying their own farms and have developed expertise in breeding specialty hatching eggs. They have also entered into commitments to supply chicks to other farms.

Schedule 9 to the draft order entitled “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules” would allot “0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012”. T&C Chick Sales estimates that this method of calculating quota, if implemented, would result in their being allotted production

Hunter Litigation Chambers Law Corporation
2100 – 1040 West Georgia Street, Vancouver, BC V6E 4H1
tel: 604 891-2400 fax: 604 647-4554
www.litigationchambers.com

Claire E. Hunter
direct: 604 891-2403
e: chunter@litigationchambers.com

quota insufficient to supply even their own farms, let alone the customers that they have committed to supply.

It is submitted that the proposed draft order should be revised to provide for one unit of chick quota for each chick committed and contracted for placement with a licensed chicken grower immediately before implementation of the new order. As set out further below, such a modification would be consistent with the Farm Industry Review Board's guidance for the implementation of specialty market regulation and with the 'SAFETI' principles-based approach to governance expected of marketing boards in their decision making.

I. The proposed modification is consistent with FIRB Policy

On September 1, 2005, the British Columbia Farm Industry Review Board ("FIRB") issued general directions to the supply managed commodity boards in British Columbia, including the BCBHEC, concerning how specialty production, new entrant and quota programs were to be administered. The report provided that boards "should have plans to register all producers regardless of size or type of license" (1.2(11)(a)) and that "Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced. . . Production volumes recognized for quota should be equal to the permittee's production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004" (1.2(11)(i), emphasis added).

With respect to the development of quota, the following policy directions were given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity. (5.5)

With respect to the conversion of permits to quota, the following policy directions were given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period. (5.6, emphasis added).

FIRB's letter to Bruce Cook dated February 9, 2006 summarizes that BCBHEC submitted draft orders to FIRB in response to a requirement that the boards draft orders in compliance with the general directions and submit them to FIRB. Following some modifications, FIRB approved the draft orders based on a number of understandings, including:

First and foremost, Commission allocation policies and decision-making are expected to be in accordance with the Ministry's 'Regulated Marketing Economic Policy' and FIRB's September 1, 2005 directions. This includes being responsive to specialty, niche and other innovative marketing opportunities when the need for those become evident in the B.C. hatching egg industry.

The thrust of FIRB's guidance with respect to a program of "regularizing" a specialty industry is that at a minimum, those who have been producing the product for which quota is to be issued are to be issued sufficient quota so as to permit continued production at the level of production in place immediately before the issuance of quota and so as to allow producers to meet their production commitments. While the initial proposal in May 2011 would have recognized production levels between January 1, 2010 and December 31, 2010, the delay in approving and implementing the draft order has meant that production levels of some producers have changed significantly in the intervening years, making the use of that period no longer appropriate. For those breeders like T&C Chick Sales who have increased the level of current contracts since 2010, tying quota allocation to a historic production level would not permit them to meet current commitments.

The FIRB directions suggest that any new order should provide for quota that allows current producers to continue production at their current levels and meet current commitments.

II. The proposed modification is more consistent with the SAFETI principles

FIRB has identified six principles to assist marketing boards in interpreting and implementing principles-based regulations within their respective mandates represented by the acronym SAFETI: strategic, accountable, fair, effective, transparent, inclusive: *BCFIRB's 6 Higher-Level Principles – Definitions and Guidance*, Sept 2011 ("*6 Higher-Level Principles*"). It is submitted that the modification proposed above is more consistent with a SAFETI analysis than the current draft.

Strategic – This principle requires that BCBHEC "Identify key opportunities and systemic challenges and plan for actions to effectively manage risks and take advantage of future opportunities" (*6 Higher-Level Principles*, at p. 3). Here, in its May 2, 2011 communication "General Information regarding 'Specialty Broiler Breeders'", the Commission has identified the goals of (1) complying with FIRB's direction to ensure that all producers be regulated to ensure biosecurity, premise identification and food safety and (2) the desire to prevent a "race for quota". In support of the latter goal, the communication suggests that the period January 1, 2010 to December 31, 2010 be used to identify those eligible for the "regularized production certificates" and issuance of quota.

Using a date prior to the implementation of any draft order to identify those eligible for issuance of quota may achieve the goal of preventing a race for quota, however, given the time that has passed since the initial consultation on the new order without finalization or implementation of the new order, there is no connection between the objective of preventing

a “race for quota” and using the 2010 time period to identify eligibility. Nor is there any connection between this goal and the proposal to use production levels from 2009 – 2012 as a basis for the issuance of quota.

Moreover, it is submitted that allowing specialty hatching egg producers to honour production commitments made with special chicken producers is sound marketing policy. FIRB has recently considered the role of open contracting in developing sound marketing policy in the context of a supervisory review that considering assurance of supply in the chicken industry. In that context, FIRB stated that “a sound marketing policy is one that creates a working climate that recognizes the importance of meeting customer needs at all levels to promote a sustainable industry – from growers through to consumers”: Decision dated June 9, 2010, In the Matter of the *Natural Products Marketing (BC) Act* and a Supervisory Review of BC Chicken Marketing Board Pricing-Related Recommendations at para. 63 and that “the movement of growers between processors could work to the benefit of all parties ensuring a better fit between grower and processor needs, resulting in longer term contracts” at para 66. Here, the proposed draft order that would lock in market share for specialty hatching egg producers at a historical level and would ignore the commitments made between producers of specialty hatching eggs and specialty chicken does not promote positive relationships between producers and is not sound marketing policy.

Accountable – This principle requires that BCBHEC “Maintain legitimacy and integrity through understanding and discharging responsibilities and reporting performance” (6 *Higher-Level Principles*, at p. 3). Here, implementation of an order that would reduce Skye Hi and V3 Farms’ quota to a level below that required to produce their own farms and meet current commitments is not consistent with the principle of accountability. Skye Hi and V3 Farms have kept the BCBHEC informed of their intention to commence and expand production in their specialty hatching egg operations. At no time did the BCBHEC raise objection to the plans for expansion of Skye Hi and V3 Farms to accommodate production or indicate that BCBHEC would take the position that this specialty operation was contrary to the Commission’s orders. To the contrary, as the Commission has acknowledged, it was “well known throughout the industry” that specialty breeders have been operating outside the quota system. It would undermine the legitimacy of the BCBHEC to arbitrarily change the rules of the game such that it would prevent those specialty breeders who have been operating with the knowledge and approval of the Commission from continuing their operations.

Fair – This principle requires that BCBHEC “Ensure procedural fairness and processes and decision-making” (6 *Higher-Level Principles*, at p. 2). The current draft order is unfair to those specialty breeders, like Skye Hi and V3 Farms, who have increased their market share since 2009. Skye Hi and V3 Farms have built additional barns and increased the size of their operations in order to meet demand for their specialty chicks on the understanding that they would be permitted to continue in production. Far from discouraging growth of unlicensed specialty breeders, it was agreed at a March 12, 2011 meeting with industry participants and BCBHEC staff that the industry did not desire a quota system for the specialty breeding

sector. Given BCBHEC's historical position, it would be contrary to procedural fairness if BCBHEC were to institute a quota system now that would prevent Skye Hi and V3 from continuing to produce specialty chicks to meet their current commitments.

Effective – This principle requires “A clearly defined outcome with appropriate processes and measures” (*6 Higher-Level Principles*, at p. 2). Here, the outcome identified is to “regularize” the specialty breeder industry by issuing quota. There is no connection between the proposed order that would reallocate market share as between current producers to that goal, which would be just as effectively achieved by a system that would issue quota based on current commitments to supply registered chicken growers.

Transparent – This principle requires that “processes, practices, procedures & reporting on exercise of mandate are open, accessible and fully informed” (*6 Higher-Level Principles*, at p. 2). The process of implementing the draft order thus far have been far from transparent. While some consultation with the industry took place after the May 2011 communication was issued by BCBHEC it is not clear how the consultation related to the revised draft order or how the current formula of quota issuance contained in the draft order was arrived at.

Inclusive – This principle requires that “appropriate interests, including the public interest, are considered” (*6 Higher-Level Principles*, at p. 2). Here, in addition to failing to consider the interests of those specialty breeders who have expanded their market share since 2009, the current quota provision in the draft order does not consider the public interest, which is served by promotion of diversity amongst specialty breeders. Nor does it consider the impact of the new order on specialty chicken producers who have chosen to obtain their chicks from Skye Hi and V3 Farms. FIRB has previously held that a marketing board must consider the potential impact of its orders on other regulated commodities: *Fraser Valley Duck and Goose Ltd. v. BC Chicken Marketing Board*, Feb. 29, 2008, File 44200-50, at p. 2.

We are hopeful that the Commission will agree to the modification to the draft order proposed. We understand the advice of the Commission with respect to its process to be that the early consultations in the nature of “one-on-one” discussions in which our clients participated were part of a fact-finding phase of consultation leading to the formulation of the draft order but that in order for any positions of stakeholders with respect to the tentative draft order to be considered they must be made “in writing, with the expectation that other stakeholders will have an opportunity to consider and comment upon that position”. This letter has been drafted for distribution to other stakeholders on the basis that this is the only manner in which submissions from stakeholders will be accepted by the Commission. Since as stakeholders my clients have not yet received any written submissions from other stakeholders in this industry, we are proceeding on the basis that no other submissions in respect of the draft order have yet been received by the Commission for consideration. We reserve the right to provide further comments on the draft order in response to submissions by other stakeholders.

In the event that the Commission determines to implement the new order in its draft form (or that otherwise reduces the quota entitlement of Skye Hi and V3 Farms to a level below their current commitments) we would respectfully request that the implementation of that order be delayed to allow sufficient time for our clients to bring an appeal to FIRB under the *Natural Products Market Act* and obtain a decision.

Yours truly,

Hunter Litigation Chambers

ADJOURNMENT

The meeting adjourned at 1:03 pm

September 13, 2013

To All Producers of Silkie and Taiwanese Broiler Hatching Eggs:

We are writing to provide you with a further update regarding the Commission's consultative process with producers of Silkie and Taiwanese broiler hatching eggs. For the sake of convenience, we are repeating some of the background information set out in earlier communications.

Information Circular

On May 2, 2011, the Commission issued an information circular as follows:

It is well known throughout the industry that there are certain persons producing from Silkie and "Asian" broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact, regulated in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, "Asian", or any other strain, of broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. The Commission is tentatively of the view that all persons should be made to comply with all of the Commission's orders, irrespective of whether they produce from Silkie, Asian or any other strain of broiler breeders. Certainly, any failure on the part of the Commission to enforce cannot be regarded as creating a de facto exemption.

Subject to consultation, the Commission envisions a process whereby these producers will be "regularized". To preclude any possibility of a "race for quota", the Commission expects that regularization will be available only to those "non-compliant" producers who have been in production for the period January 1, 2010 to December 31, 2010, and who are currently engaged in production. Upon receipt of corroborated production data for the one-year period preceding January 1, 2011, the Commission envisions that it may issue "Regularized Producer Certificates" and issue quota to holders of such certificates that is subject to the 10/10/10 and LIFO rules, provided that there is sufficient corroborative production data to justify an allocation based on that past production. Future flock placements would be as directed by the Commission in consultation with hatcheries. Any persons operating unlicensed hatcheries must obtain a licence from the Commission. The Commission would not take steps to enforce against holders of "Regularized Producer Certificates" for instances of past non-compliance. Conversely, the Commission expects that it will initiate enforcement proceedings where there is non-compliance by persons who do not hold a "Regularized Producer Certificate".

These concepts are tentative, and are set out here only to provide interested persons with some insight into the Commission's preliminary views. All these matters are subject to consultation with Industry.

In due course, the Commission will be holding a meeting to discuss this issue. All hatching egg producers who are currently non-compliant, and all hatcheries receiving production from such persons, are invited and encouraged to attend to express their views on the proposed regularization process.

Consultative Process and Commission Proposal

Throughout 2011, the Commission engaged in an extensive consultative process with historically non-compliant producers of Silkie and Taiwanese hatching eggs. These discussions culminated in the circulation of a draft Amending Order, which itself became the subject of further discussion. On March 11, 2013, the Commission issued its preliminary report, as follows:

As you know, the Commission has been engaged in consultations and deliberations concerning the regularization of historically non-compliant Silkie and Taiwanese producers. We are writing to update you on the status of this matter and to invite final comment on the Commission's proposal to address this issue.

Avian Influenza (2004)

In February 2004, an H7N3 strain of avian influenza swept through B.C.'s poultry industry. The disease did not discriminate between producers who held a license and quota and those who did not. The province ordered more than 17 million birds killed. It took about six months for the province to be declared free of avian flu. The outbreak was devastating to the poultry industry, and it clearly illustrated that all producers should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

BCFIRB Report (2005)

On September 1, 2005, the BCFIRB released its comprehensive report concerning specialty products and markets in British Columbia's supply managed sectors. At page 2 of the report, the BCFIRB expressed the following policy principles:

Registration

- a. **Boards should have plans to register all producers regardless of size or type of license.**
- b. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.**

At page 7, the BCFIRB referred to the recommendations contained in the report entitled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System*, which was commissioned by the Ministry in the fall of 2004:

1. **All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.**

At pages 11 to 12, the BCFIRB noted:

The incentive to produce without quota is large because regulated prices provide attractive production margins. ...In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that "a chicken is a chicken" regardless of type.

Commencing at page 19, the BCFIRB issued the following policy directions:

5.1. Registration

With respect to Registration, the following policy directions are given:

1. **All producers, regardless of size or class of production, should be registered with the Boards.**
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

.....

5.10. Exemptions

With respect to Exemptions, the following policy directions and principles are given:

1. There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.

.....

5.17. Food Safety & Biosecurity

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.**
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

With respect to the hatching egg industry in particular, the BCFIRB said:

The Commission's belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

Avian Influenza (2009)

In February, 2009, there was another outbreak of Avian Influenza (H5N1). This outbreak occurred on a Silkie farm and resulted in a cull of approximately 12,000 birds. This second outbreak of AI, occurring as it did on a Silkie farm, further illustrated that producers of Silkie and Taiwanese broiler hatching eggs should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

The Polderside Decision

The Commission had occasion to consider Silkie and Taiwanese production, as well as the notion of "specialty" broiler hatching egg production, when it issued its August 12, 2010 decision in the matter of Polderside Farms Inc. Commencing at page 5 of that decision, the Commission stated:

A. The Nature of the Broiler Hatching Egg Industry

The hatching egg sector is unique among supply managed commodities. Unlike every other supply managed commodity, hatching egg producers do not produce an "end product". Hatching egg producers only produce an "input" to the chicken industry, namely: broiler hatching eggs. In effect, this means that hatching egg producers have only one customer – the hatchery. There is no demand for hatching eggs from wholesalers, retailers or consumers. There is only demand for hatching eggs from hatcheries.

In this environment, the potential for "niche markets" or "specialty production" is substantially more limited than it is in other commodities.

Furthermore, the hatching egg producer's "customer" (the hatchery) is largely able to control the nature of the product that it receives.

Broiler breeder flocks are ordered and arranged by hatcheries. If a hatchery desires a particular strain of broiler breeder, it may simply order and arrange for a flock of that strain to be placed with a registered producer.

Consequently, it is important to understand that Polderside's inability to source atypical day-old chicks for its grower operations arises from an apparent inability or unwillingness of hatcheries to satisfy that demand (if there is one); not because registered producers are unable or unwilling to produce from that (or any other) strain of broiler breeder. Clearly, if any hatchery believed that there was an unsatisfied demand for day-old "RedBro" chicks, it could arrange for the placement of RedBro broiler breeders with registered producers. Hatcheries might do so in the future. But the fact remains that no British Columbia hatchery is responding to that demand (if there is one) at this time – which is the principle reason for Polderside's request to place its own flock of RedBro broiler breeders.

B. Historical Anomalies (Silkie, Taiwanese and Loong Kong)

It is well known throughout the industry that there are certain persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact regulated, in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, Taiwanese or Loong Kong broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. It may be that persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks should be made to comply with all of the Commission's orders. On the other hand, it may be that the Commission will need to develop modified requirements for such persons. Quite possibly, some of these persons may be eligible under the very program that has been developed in response to Polderside's request. In any event, the Commission's failure to enforce against these persons cannot be regarded as creating a de facto exemption. We regard non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks as an important but ultimately unrelated matter for determination at another time. While it would have been preferable to develop a comprehensive policy addressing these issues too (if the policy established hereunder is not sufficient to do so), Ms. Jacobsen has repeatedly emphasized that she requires a decision on her application without delay. For that reason, the Commission has decided that the best course of action is to establish the "Small-Lot Innovative Self-Marketer Program", and then examine in greater detail whether that program is sufficient to address

the currently non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks.

Consultations with Producers of Silkie and Taiwanese Producers

Throughout 2011, the Commission initiated consultations with historically non-compliant producers of Silkie and Taiwanese hatching eggs. These discussions culminated in the circulation of a draft Amending Order, which itself became the subject of further discussion.

The Commission's Proposal

As a result of these extensive discussions, the Commission has refined its proposed Amending Order into the form attached to this letter. The Amending Order reflects the Commission's tentative view that producers of Silkie and Taiwanese hatching eggs must be required to hold a license and quota – not only as a means of making such producers subject to enforceable government-approved food safety and biosecurity protocols – but also as a means to regulate supply in a context where markets are not so easily distinguished (given the hatcheries' ability to order and arrange for the placement of any strain of broiler breeder).

We write to ask for your comments with respect to the proposed Amending Order. To ensure that we are able to move forward on these issues without unnecessary delay, we ask that you give us your written comments within 30 days from the date of this letter.

We look forward to hearing from you.

Stakeholder Feedback

On March 21, 2013, the Commission received a list of questions from Ms. Fehr, a copy of which is attached. The Commission's response to those questions is as follows:

1. The proposed Amending Order should not be read as a stand-alone order or a complete codification of all the provisions applicable to producers of Silkie and Taiwanese broiler hatching eggs. The Amending Order specifies which sections of the Consolidated Order should be repealed, replaced or added. Subject to what is specified in the Amending Order, there are no items from the Consolidated Order that are "excluded".
- 2.(a) Subsection 2(1) of Schedule 2 to the Consolidated Order states: "the base price to be paid by Growers to Hatcheries for day-old saleable chicks hatched from broiler hatching eggs (exclusive of any charges that may be imposed by the Hatchery for vaccination or sexing services requested by the Grower) is [\$.....] per day-old saleable chick." Where a Grower requests the provision of vaccination services from a Hatchery, any charges that might be imposed by the Hatchery are not included in the price specified in that subsection.
- 2.(b) The Commission requests that Ms. Fehr particularize the provisions of the Consolidated Order that are said to be inconsistent with a "custom hatching" business model.
3. To minimize the prospect of a "race for quota" eligibility is limited to those who were in production in 2010 (subject to exceptional circumstances). Applicants must provide details of the number of chicks hatched and placed with growers or exported over the two year period between January 1, 2009 and December 31, 2012 so that allotments made under the program are based on the most recent data.

4. The example is consistent with the methodology set out in the proposed Amending Order. Please note, however, that "Regularized Producer Chick Quota" means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer. A "Quota Period" is a two-year period.
5. The proposed Amending Order reflects the tentative view that initial allocations under the program must be grounded in fact. For that reason, the proposed Amending Order contemplates that allotments will be based on the number of chicks actually hatched and placed with growers or exported over the two year period between January 1, 2009 and December 31, 2012.
6. The proposed Amending Order specifies that Regularized Producer Chick Quota may be transferred. Allotments of Regularized Producer Chick Quota are defined as a "Special Allotment" for the purposes of the surrender assessment rules.

The Commission received a further letter from Ms. Fehr dated April 25, 2013, a copy of which is attached. In addition, on July 19, 2013, the Commission received the attached letter from Ms. Claire Hunter, counsel for Skye Hi Farms and Casey Van Ginkel dba V3 Farms.

Proposed Amending Order

Having considered the feedback from stakeholders, the Commission has made modifications to its proposed Amending Order. A copy of the Commission's revised, proposed Amending Order is attached for your reference.

Further and Final Feedback

We are writing at this time to solicit any further feedback from stakeholders concerning only the March 21, 2013 list of questions from Ms. Fehr and the Commission's response thereto; the April 25, 2013 letter from Ms. Fehr; the July 19, 2013 letter from Ms. Hunter; and the revised, proposed Amending Order.

Any further feedback must be received by the Commission not later than September 27, 2013. After September 27, 2013, the Commission will deliberate on the matter with a view to coming to a decision.

Yours truly,

Casey Langbroek
BCBHEC Chair

Questions regarding the Draft Amending Order ??? to the Consolidated Order of September 30, 2012

Question 1

I am finding it difficult to understand which items from the 2012-09-30 Consolidated Orders are excluded.

The Table of Contents for the 2012-09-30 Consolidated Order includes the heading of "Section" and then "Part". Do the "Section" numbers identified in the Amending Order correlate directly the "Part" numbers in the 2012-09-30 Consolidated Orders?

Question 2

- a) **If all of the other items in the 2012-09-30 Consolidated Orders will apply; there are many sections which we would need clarification on. For example: what are vaccines included for the "\$0.7578 per day-old Saleable Chick"?**
- b) **We get our eggs custom hatched based upon an agreed schedule with the hatchery, this business model does not appear to be supported by the 2012-09-30 Consolidated Orders. This may be because I am not clear on all of the items which will not pertain.**

Question 3

Entry in Program

3. (1) The applicant must submit to the Commission, within 60 days from the date application:

(a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;

(b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;

(c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;

(d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

The data required in items a) through b) is from for 2010 to application while the data required for items c) and d) is between January 1, 2009 and December 31, 2012. I am wondering why the two terms are different.

Question 4

2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:

(a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;

Just to be sure I understand this, the following example is presented:

<u>January 1 to Dec 31 2009</u>	<u>3000 breeders</u>	<u>total of 30,000 chicks</u>
<u>January 1 to Dec 31 2010</u>	<u>2000 breeders</u>	<u>total of 15,000 chicks</u>
<u>January 1 to Dec 31, 2011</u>	<u>3000 breeders</u>	<u>total of 30,000 chicks</u>
<u>January 1 to Dec 31, 2012</u>	<u>4000 breeders</u>	<u>total of 35,000 chicks</u>

Since the total number of chicks placed was 110,000, I would be allotted a Quota of 55,000 chicks which can be produced as a saleable chick annually going forward.

Question 5

If the chick production allocated is insufficient to meet the current production as agreed upon with the BC Chicken Marketing Board, how will that be remedied?

Question 6

The September 30, 2012 document includes the following:

Surrender of Placement Quota on Transfer

16. (1) Subject to subsection (5), where Placement Quota is Transferred other than by way of a Permissible Lease, the Transferor shall surrender to the Commission an amount of Placement Quota calculated as follows:

(a) 5% of the amount of Placement Quota being Transferred, where such Total Production Quota was:

(i) allotted pursuant to a Special Allotment to the Transferor prior to April 1, 2006; or

(ii) allotted to the Transferor other than pursuant to a Special Allotment;

(b) 100% of the amount of Placement Quota being Transferred, where such Placement Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within one year from the date of the proposed Transfer;

(c) 90% of the amount of Placement Quota being Transferred, where such Placement Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the second year preceding the date of the proposed Transfer; etc.

What is the impact of this statement on the Regularized Quota to be issued with the Amending Orders?

April 25, 2013

BC Hatching Egg Commission

Dear Members:

Re: W. Friesen request for Onetime Transfer

Thank you for allowing us to meet with you today. We are presenting our request and invite your questions. The reasons for our request are:

- 1) We have been in the Specialty Poultry Hatching business for many years. We have developed specific breeds of chicken which are well accepted in the market place.
- 2) On May 2, 2011 our Specialty Poultry Hatching business became unsalable.
- 3) We are planning our retirement for age and health reasons. We request a onetime transfer of our production so a new owner can provide the number chicks established with the BC Chicken Marketing Board.

1) Specialty Poultry Hatching History

I started raising poultry in 1984 and produced hatching eggs for Fred Evans of ECHO Hatchery. When ECHO was sold to Ernie Unger, I did some of my own hatching and had custom hatching done by Campbell's Pheasantry.

In 1993, we started purchasing eggs and breeding poultry to develop the specific characteristics requested by the Asian and East Asian local communities. In the early 1990s, most processing was done by Wingtat Game Bird Packers. Some specific breeder chicks were sold to Rob Donaldson of Bradner Farms. Fraser Valley Duck and Goose was also a major customer for our chicks and chickens.

As our market grew, we had packaging and labels approved – bag samples are provided.

When the BC Chicken Marketing Board included Specialty Poultry, our hatching records were used to establish the Quota level in 2000. We were also granted Self Marketing quota.

In order to comply with CFIA regulations for hatching, we built a hatching facility which we chose not to complete, but we still have hatching capacity for 14,000 eggs a week.

When Fairline Development opened their processing facility, we grew birds for them for several years as well as supplied the chicks for all their growers. The hatching requirements were too large for Campbell's Pheasantry and so we switched to ECHO Hatchery. Later, Echo Hatchery negotiated a cheaper rate for chicks with Fairline and took a large component of our operation.

We continued to develop our breeds with some of our own hatching and then had all of the hatching done at Rosstown.

In 2009, we changed our processing to Fraser Valley Duck and Goose (FVDG) and then transferred our Self Marketing Quota to them also. In 2010 we sold our grower quota to FVDG with the agreement that we continue to supply them with the chicks and gave them first Right of Refusal for our breeder business when we were ready to retire.

2) On May 2, 2011 our Specialty Poultry Hatching business became unsalable.

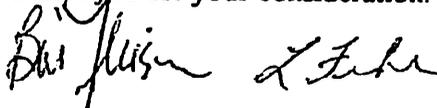

When on May 2, 2011 the letter "General Information Regarding Specialty Broiler Breeders" was distributed by Peter Whitlock, our business sale was put on hold. It was no longer a saleable business due to the uncertainty of new regulations.

We have continued to develop our poultry business; obtaining interest from other Growers for chicks; we have more Grower Quota we are hatching for; and we also sell other breeds.

3) We request a Onetime Transfer of Production so that the new Producer can meet the commitments made via the BC Chicken Marketing Board.

We are ready to retire and since our family members have their careers, we are selling the farm and associated businesses. While we are not asking that the new regulations be changed, we ask that you do not impose a 10 year sentence on us but allow us to transfer the production of approximately 295,000 chicks per year so that the new owner can continue the business.

Thank you for your consideration.

Bill Friesen and Lillian Fehr

Attention: Robert P. Hrabinsky

Dear Sir:

Re: Proposed draft order to “regularize” specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales, in respect of the proposed draft order to “regularize” the specialty broiler breeder industry through the issuance of quota and in response to the request for a letter that can be shared with other stakeholders in the specialty broiler breeder industry.

As you know, the specialty broiler breeder industry has long been operating with the knowledge of but without formal regulation by the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”). We are instructed that in 2010, Skye Hi Farms and V3 Farms, both quota-holding producers of specialty chicken, notified the then-General Manager of the BCBHEC of their intention to build additional barns on their farms in order to commence production as specialty breeders for their own farms. No objection was raised to the proposed production by the then-General Manager, nor was there any suggestion that production could commence without a licence or quota. As the Commission acknowledged in its May 2, 2011 notice to the industry, it is “well known throughout the industry” that specialty broiler breeders have been operating without licence or quota.

Skye Hi and V3 have been operating as specialty breeders since 2010 and accordingly have an interest in the proposed draft order. They have been supplying their own farms and have developed expertise in breeding specialty hatching eggs. They have also entered into commitments to supply chicks to other farms.

Schedule 9 to the draft order entitled “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules” would allot “0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012”. T&C Chick Sales estimates that this method of calculating quota, if implemented, would result in their being allotted production

Hunter Litigation Chambers Law Corporation

quota insufficient to supply even their own farms, let alone the customers that they have committed to supply.

It is submitted that the proposed draft order should be revised to provide for one unit of chick quota for each chick committed and contracted for placement with a licensed chicken grower immediately before implementation of the new order. As set out further below, such a modification would be consistent with the Farm Industry Review Board's guidance for the implementation of specialty market regulation and with the 'SAFETI' principles-based approach to governance expected of marketing boards in their decision making.

I. The proposed modification is consistent with FIRB Policy

On September 1, 2005, the British Columbia Farm Industry Review Board ("FIRB") issued general directions to the supply managed commodity boards in British Columbia, including the BCBHEC, concerning how specialty production, new entrant and quota programs were to be administered. The report provided that boards "should have plans to register all producers regardless of size or type of license" (1.2(11)(a)) and that "Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced. . . Production volumes recognized for quota should be equal to the permittee's production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004" (1.2(11)(i), emphasis added).

With respect to the development of quota, the following policy directions were given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity. (5.5)

With respect to the conversion of permits to quota, the following policy directions were given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period. (5.6, emphasis added).

FIRB's letter to Bruce Cook dated February 9, 2006 summarizes that BCBHEC submitted draft orders to FIRB in response to a requirement that the boards draft orders in compliance with the general directions and submit them to FIRB. Following some modifications, FIRB approved the draft orders based on a number of understandings, including:

First and foremost, Commission allocation policies and decision-making are expected to be in accordance with the Ministry's 'Regulated Marketing Economic Policy' and FIRB's September 1, 2005 directions. This includes being responsive to specialty, niche and other innovative marketing opportunities when the need for those become evident in the B.C. hatching egg industry.

The thrust of FIRB's guidance with respect to a program of "regularizing" a specialty industry is that at a minimum, those who have been producing the product for which quota is to be issued are to be issued sufficient quota so as to permit continued production at the level of production in place immediately before the issuance of quota and so as to allow producers to meet their production commitments. While the initial proposal in May 2011 would have recognized production levels between January 1, 2010 and December 31, 2010, the delay in approving and implementing the draft order has meant that production levels of some producers have changed significantly in the intervening years, making the use of that period no longer appropriate. For those breeders like T&C Chick Sales who have increased the level of current contracts since 2010, tying quota allocation to a historic production level would not permit them to meet current commitments.

The FIRB directions suggest that any new order should provide for quota that allows current producers to continue production at their current levels and meet current commitments.

II. The proposed modification is more consistent with the SAFETI principles

FIRB has identified six principles to assist marketing boards in interpreting and implementing principles-based regulations within their respective mandates represented by the acronym SAFETI: strategic, accountable, fair, effective, transparent, inclusive: *BCFIRB's 6 Higher-Level Principles – Definitions and Guidance*, Sept 2011 ("*6 Higher-Level Principles*"). It is submitted that the modification proposed above is more consistent with a SAFETI analysis than the current draft.

Strategic – This principle requires that BCBHEC "Identify key opportunities and systemic challenges and plan for actions to effectively manage risks and take advantage of future opportunities" (*6 Higher-Level Principles*, at p. 3). Here, in its May 2, 2011 communication "General Information regarding 'Specialty Broiler Breeders'", the Commission has identified the goals of (1) complying with FIRB's direction to ensure that all producers be regulated to ensure biosecurity, premise identification and food safety and (2) the desire to prevent a "race for quota". In support of the latter goal, the communication suggests that the period January 1, 2010 to December 31, 2010 be used to identify those eligible for the "regularized production certificates" and issuance of quota.

Using a date prior to the implementation of any draft order to identify those eligible for issuance of quota may achieve the goal of preventing a race for quota, however, given the time that has passed since the initial consultation on the new order without finalization or implementation of the new order, there is no connection between the objective of preventing

a “race for quota” and using the 2010 time period to identify eligibility. Nor is there any connection between this goal and the proposal to use production levels from 2009 – 2012 as a basis for the issuance of quota.

Moreover, it is submitted that allowing specialty hatching egg producers to honour production commitments made with special chicken producers is sound marketing policy. FIRB has recently considered the role of open contracting in developing sound marketing policy in the context of a supervisory review that considering assurance of supply in the chicken industry. In that context, FIRB stated that “a sound marketing policy is one that creates a working climate that recognizes the importance of meeting customer needs at all levels to promote a sustainable industry – from growers through to consumers”: Decision dated June 9, 2010, In the Matter of the *Natural Products Marketing (BC) Act* and a Supervisory Review of BC Chicken Marketing Board Pricing-Related Recommendations at para. 63 and that “the movement of growers between processors could work to the benefit of all parties ensuring a better fit between grower and processor needs, resulting in longer term contracts” at para 66. Here, the proposed draft order that would lock in market share for specialty hatching egg producers at a historical level and would ignore the commitments made between producers of specialty hatching eggs and specialty chicken does not promote positive relationships between producers and is not sound marketing policy.

Accountable – This principle requires that BCBHEC “Maintain legitimacy and integrity through understanding and discharging responsibilities and reporting performance” (6 *Higher-Level Principles*, at p. 3). Here, implementation of an order that would reduce Skye Hi and V3 Farms’ quota to a level below that required to produce their own farms and meet current commitments is not consistent with the principle of accountability. Skye Hi and V3 Farms have kept the BCBHEC informed of their intention to commence and expand production in their specialty hatching egg operations. At no time did the BCBHEC raise objection to the plans for expansion of Skye Hi and V3 Farms to accommodate production or indicate that BCBHEC would take the position that this specialty operation was contrary to the Commission’s orders. To the contrary, as the Commission has acknowledged, it was “well known throughout the industry” that specialty breeders have been operating outside the quota system. It would undermine the legitimacy of the BCBHEC to arbitrarily change the rules of the game such that it would prevent those specialty breeders who have been operating with the knowledge and approval of the Commission from continuing their operations.

Fair – This principle requires that BCBHEC “Ensure procedural fairness and processes and decision-making” (6 *Higher-Level Principles*, at p. 2). The current draft order is unfair to those specialty breeders, like Skye Hi and V3 Farms, who have increased their market share since 2009. Skye Hi and V3 Farms have built additional barns and increased the size of their operations in order to meet demand for their specialty chicks on the understanding that they would be permitted to continue in production. Far from discouraging growth of unlicensed specialty breeders, it was agreed at a March 12, 2011 meeting with industry participants and BCBHEC staff that the industry did not desire a quota system for the specialty breeding

sector. Given BCBHEC's historical position, it would be contrary to procedural fairness if BCBHEC were to institute a quota system now that would prevent Skye Hi and V3 from continuing to produce specialty chicks to meet their current commitments.

Effective – This principle requires “A clearly defined outcome with appropriate processes and measures” (*6 Higher-Level Principles*, at p. 2). Here, the outcome identified is to “regularize” the specialty breeder industry by issuing quota. There is no connection between the proposed order that would reallocate market share as between current producers to that goal, which would be just as effectively achieved by a system that would issue quota based on current commitments to supply registered chicken growers.

Transparent – This principle requires that “processes, practices, procedures & reporting on exercise of mandate are open, accessible and fully informed” (*6 Higher-Level Principles*, at p. 2). The process of implementing the draft order thus far have been far from transparent. While some consultation with the industry took place after the May 2011 communication was issued by BCBHEC it is not clear how the consultation related to the revised draft order or how the current formula of quota issuance contained in the draft order was arrived at.

Inclusive – This principle requires that “appropriate interests, including the public interest, are considered” (*6 Higher-Level Principles*, at p. 2). Here, in addition to failing to consider the interests of those specialty breeders who have expanded their market share since 2009, the current quota provision in the draft order does not consider the public interest, which is served by promotion of diversity amongst specialty breeders. Nor does it consider the impact of the new order on specialty chicken producers who have chosen to obtain their chicks from Skye Hi and V3 Farms. FIRB has previously held that a marketing board must consider the potential impact of its orders on other regulated commodities: *Fraser Valley Duck and Goose Ltd. v. BC Chicken Marketing Board*, Feb. 29, 2008, File 44200-50, at p. 2.

We are hopeful that the Commission will agree to the modification to the draft order proposed. We understand the advice of the Commission with respect to its process to be that the early consultations in the nature of “one-on-one” discussions in which our clients participated were part of a fact-finding phase of consultation leading to the formulation of the draft order but that in order for any positions of stakeholders with respect to the tentative draft order to be considered they must be made “in writing, with the expectation that other stakeholders will have an opportunity to consider and comment upon that position”. This letter has been drafted for distribution to other stakeholders on the basis that this is the only manner in which submissions from stakeholders will be accepted by the Commission. Since as stakeholders my clients have not yet received any written submissions from other stakeholders in this industry, we are proceeding on the basis that no other submissions in respect of the draft order have yet been received by the Commission for consideration. We reserve the right to provide further comments on the draft order in response to submissions by other stakeholders.

In the event that the Commission determines to implement the new order in its draft form (or that otherwise reduces the quota entitlement of Skye Hi and V3 Farms to a level below their current commitments) we would respectfully request that the implementation of that order be delayed to allow sufficient time for our clients to bring an appeal to FIRB under the *Natural Products Market Act* and obtain a decision.

Yours truly,

Hunter Litigation Chambers

Claire E. Hunter

**AMENDING ORDER ??
TO THE
CONSOLIDATED ORDER OF SEPTEMBER 30, 2012**

**MADE BY
THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
ON _____, 2013**

The British Columbia Broiler Hatching Egg Commission orders as follows:

1. (1) *Subject to subsection (2), the Consolidated Order of September 30, 2012 is amended by replacing the words "Placement Quota", wherever they appear, with the word "Quota".*
- (2) *Subsection (1) does not apply to:*
 - (a) *The definitions of "Placement Quota" and "Special Allotment" in section 2 of the Consolidated Order of September 30, 2012;*
 - (b) *Paragraph 8(2)(d) of the Consolidated Order of September 30, 2012;*
 - (c) *Sections 9, 10, 20 and 21 of the Consolidated Order of September 30, 2012;*
 - (d) *Sections 4, 5, 6 and 7 of Schedule 1 to the Consolidated Order of September 30, 2012; and*
 - (e) *Sections 3, 4, 5 and 6 of Schedule 8 to the Consolidated Order of September 30, 2012.*
2. *Section 2 of the Consolidated Order of September 30, 2012 is amended by adding the following definitions:*

"Regularized Producer" means a Registered Producer who has been allotted Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

“Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer.

“Quota” means Placement Quota or Regularized Producer Chick Quota, as the case may be.

3. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Special Allotment” with the following:*

“Special Allotment” means:

- (a) a general allotment of Placement Quota by the Commission;
- (b) a special allotment of Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1;
- (c) a special allotment of Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8;
- (d) a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9; or
- (e) a general allotment of Regularized Producer Chick Quota.

4. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Underweight Broiler Hatching Eggs” with the following:*

“Underweight Broiler Hatching Eggs” mean Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weighing less than 52 grams.

5. *The Consolidated Order of September 30, 2012 is amended by adding the following section immediately after section 10:*

Special Allotment of Regularized Producer Chick Quota Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

10.1 The Commission may allot Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

6. *Subsection 16(2) of the Consolidated Order of September 30, 2012 is replaced with the following:*

(2) For the purposes of subsection (1), the Placement Quota being Transferred is deemed to be the Placement Quota most recently allotted to the Transferor. The Commission may, in its sole discretion, deem Placement Quota to have been allotted on a date that precedes the date of allotment recorded by the Commission where a Producer has satisfied the Commission, on satisfactory evidence, that there are good and sufficient reasons to do so.

7. *Subsection 18(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

Placement of Flocks by Hatcheries and Payment by Producers

18. (1) Each Hatchery shall order and arrange for the placement of flocks of day-old broiler breeder pullets in accordance with the Official Flock Schedule, except with respect to a Regularized Producer.

8. *Paragraph 23(b) of the Consolidated Order of September 30, 2012 is replaced with the following:*

(b) all such Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weigh at least 52 grams each; and

9. *Subsection 25(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

25. (1) Every Producer other than a Regularized Producer shall market their broiler breeder flocks as directed by the Commission, and subject to:
- (a) any extraordinary kill age as may be directed by the Commission, after consultation with the Hatchery, where:
 - (i) a broiler breeder flock has failed to produce Broiler Hatching Eggs with a consistent Hatchability of 70%; or
 - (ii) there are other extraordinary circumstances warranting an extraordinary kill age.
 - (b) any extraordinary kill age as may be directed by the Producer, after consultation with the Hatchery, where a broiler breeder flock has failed to produce at levels acceptable to that Producer.

10. *Section 26 of the Consolidated Order of September 30, 2012 is replaced with the following:*

Payment of Base Price for Broiler Hatching Eggs

21. Every Hatchery shall pay for Broiler Hatching Eggs at the base price set out in Schedule 2, provided that a reasonable surcharge may be imposed by a Hatchery to recover additional costs actually incurred by the Hatchery as a direct consequence of having to pick up Broiler Hatching Eggs from a Producer (other than a Regularized Producer) who keeps less than 12,000 broiler breeders per Quota Period.

11. *Section 1 of Schedule 3 to the Consolidated Order of September 30, 2012 is replaced with the following:*

Producer Levies

1. (1) Subject to subsections (2) and (3), levies are fixed and imposed upon each Producer at a rate of \$0.025 per Saleable Chick.
 - (2) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Small-Lot Innovative Self-Marketer Program at a rate of \$0.015 per Saleable Chick.
 - (3) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program at a rate of \$0.015 per Saleable Chick.
12. *Paragraph 7(4)(a) of Schedule 6 to the Consolidated Order of September 30, 2012 is replaced with the following:*
- (a) of a minimum weight of 52 grams, unless they are Silkie or Taiwanese Broiler Hatching Eggs;
13. *Subsection 7(6) of Schedule 6 to the Consolidated Order of September 30, 2012 is replaced with the following:*
- (6) All double-yolked and small eggs (less than 52 grams) shall be packaged on Commission supplies and sold to the Commission, unless they are Silkie or Taiwanese Broiler Hatching Eggs.
14. *The Consolidated Order of September 30, 2012 is amended by adding Schedule 9 as attached.*

15. *This Order comes into effect* _____, 2013.

DATED at Abbotsford, British Columbia, on _____, 2013

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

Casey Langbroek, Chair

**SCHEDULE 9
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

**Regularization of Historically Non-Compliant Silkie and Taiwanese Producers
Program Rules**

Definitions

1. In these Rules:

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

2. (1) Applications to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program are made by filing with the Commission, on or before 3:00 p.m., [date], 2013:
- (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant's birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status; and
 - (d) proof of permanent residence status in the Province of British Columbia.
- (2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (3) An applicant under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be a partnership in which case each partner must qualify under subsection (4).
- (4) A Person seeking to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program must have the following qualifications:
- (a) the Person must be a Canadian citizen or permanent resident of Canada;

- (b) the Person must be a permanent resident in the Province of British Columbia;
- (c) the Person must be at least 19 years of age at the time of application;
- (d) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission; and
- (e) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

Entry in Program

- 3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;
 - (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (e) proof, in a form satisfactory to the Commission, of the applicant's financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (f) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (g) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit is within economic access of a licensed Hatchery;
 - (h) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets;
 - (i) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from the applicant's production;
 - (j) particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2); and
 - (k) any other information deemed necessary by the Commission.
- (2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:
- (a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012; and
 - (b) will be issued a temporary, revocable, non-transferrable export permit to hatch 0.5 Silkie or Taiwanese Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (3) Where an applicant has submitted particulars of exceptional circumstances in accordance with paragraph 3(1)(j), the Commission may allot Regularized Producer Chick Quota and/or issue temporary, revocable, non-transferrable export permit, in amounts other than as provided for in subsection (2). In that event, Regularized Producer Chick Quota and temporary, revocable, non-transferrable export permit allotted and issued to other persons in accordance with subsection (2) will be proportionately reduced in order to accommodate all allotments and issuances to such applicants.

Special Restrictions on Regularized Producer Chick Quota Allotted Under the Program

4. (1) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
 - (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described in subsection (1).
- (3) Regularized Producer Chick Quota cannot be converted to Placement Quota.

Special Restrictions on Temporary, Revocable, Non-transferrable Export Permit Issued Under the Program

5. (1) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:
 - (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production for the purposes of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit; and

- (g) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, and that some other Person is primarily engaged in the business of Silkie or Taiwanese Broiler Hatching Egg production associated with that Regularized Producer Chick Quota or temporary, revocable, non-transferrable export permit, the entrant shall be deemed not to be actively engaged in Silkie or Taiwanese Broiler Hatching Egg production.

Dear Sirs:

Re: Proposed draft order to “regularize” specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales (“T&C”), in response to the September 13, 2013 letter from the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”) requesting “further feedback from stakeholders concerning only the March 21, 2013 list of questions from Ms. Fehr and the Commission’s response thereto; the April 25, 2013 letter from Ms. Fehr; the July 19, 2013 letter from Ms. Hunter and the revised, proposed Amending Order” by September 27, 2013. Given the limited nature of the request for further feedback, I will not repeat the comments set out in my previous letters to the Commission but my clients’ position in respect of this matter remains as set out in those letters.

Your letter advised that “Having considered the feedback from stakeholders, the Commission has made modifications to its proposed Amending Order. A copy of the Commission’s revised, proposed Amending Order is attached for your reference.” As an initial matter, the version of the Amending Order attached does not show the changes made from the last version. Will you please provide us with a red-line version of the proposed Amending Order showing the changes made in response to the feedback from stakeholders since the last version circulated?

While the two stakeholder submissions had different perspectives, they raised a common concern about the proposed draft order, namely that the proposed allocation of quota would not allow those producers whose market share has grown since 2009 to continue to meet commitments made to supply chicken growers regulated by the British Columbia Chicken Marketing Board. Unfortunately, this concern does not appear to be addressed by the revised draft general order which still provides that producers will be allotted “0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler

Hatching Eggs produced by the applicant and placed with licensed chicken growers between January 1, 2009 and December 31, 2012”.

In response to Ms. Fehr’s questions, under the heading “Stakeholder Feedback”, the Commission advised (italicized added, underlining in original):

3. . . . Applicants must provide details of the number of chicks hatched and placed with growers or exported *over the two year period between January 1, 2009 and December 31, 2012 so that allotments made under the program are based on the most recent data.*
4. . . . Please note, however, that “Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, *of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer. A “Quota Period” is a two-year period.*
5. The proposed Amending Order reflects the tentative view that *initial allocations under the program must be grounded in fact. For that reason, the proposed Amending Order contemplates that allotments will be based on the number of chicks actually hatched and placed with growers or exported over the two year period between January 1, 2009 and December 31, 2012.*

While we have set out our position in respect of that aspect of the draft in our letter of July 19, 2013, we have two comments with respect to the Commission’s response to Ms. Fehr. First, the period between January 1, 2009 and December 31, 2012 is four years, not two. Second, T&C agrees that initial allocations under the program “must be grounded in fact” but it is T&C’s position that the “facts” with respect to chick placement should be current—not historical—data. The most recent available data will provide the best information for the Commission to determine the current needs and preferences of registered chicken growers and to develop sound marketing policy. To the extent the Commission does not have its own current data with respect to chick placements with registered chicken growers, that should not be an impediment to using current data. Such data is likely available from the British Columbia Chicken Marketing Board. Alternatively, T&C, and presumably other industry participants, are in a position to provide up to date placement records. We trust you will advise us if you require data from T&C in this regard.

Yours truly,

Hunter Litigation Chambers

A Commissioner for taking
Affidavits for British Columbia

**AMENDING ORDER ??
TO THE
CONSOLIDATED ORDER OF SEPTEMBER 30, 2012**

**MADE BY
THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
ON _____, 2013**

The British Columbia Broiler Hatching Egg Commission orders as follows:

1. (1) *Subject to subsection (2), the Consolidated Order of September 30, 2012 is amended by replacing the words "Placement Quota", wherever they appear, with the word "Quota".*
- (2) *Subsection (1) does not apply to:*
 - (a) *The definitions of "Placement Quota" and "Special Allotment" in section 2 of the Consolidated Order of September 30, 2012;*
 - (b) *Paragraph 8(2)(d) of the Consolidated Order of September 30, 2012;*
 - (c) *Sections 9, 10, 20 and 21 of the Consolidated Order of September 30, 2012;*
 - (d) *Sections 4, 5, 6 and 7 of Schedule 1 to the Consolidated Order of September 30, 2012; and*
 - (e) *Sections 3, 4, 5 and 6 of Schedule 8 to the Consolidated Order of September 30, 2012.*
2. *Section 2 of the Consolidated Order of September 30, 2012 is amended by adding the following definitions:*

"Regularized Producer" means a Registered Producer who has been allotted Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

"Regularized Producer Chick Quota" means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer.

"Quota" means Placement Quota or Regularized Producer Chick Quota, as the case may be.

3. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of "Special Allotment" with the following:*

"Special Allotment" means:

- (a) a general allotment of Placement Quota by the Commission;
- (b) a special allotment of Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1;
- (c) a special allotment of Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8;
- (d) a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9; or
- (e) a general allotment of Regularized Producer Chick Quota.

4. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of "Underweight Broiler Hatching Eggs" with the following:*

"Underweight Broiler Hatching Eggs" mean Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weighing less than 52 grams.

5. *The Consolidated Order of September 30, 2012 is amended by adding the following section immediately after section 10:*

Special Allotment of Regularized Producer Chick Quota Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

- 10.1 The Commission may allot Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

66. *Subsection 16(2) of the Consolidated Order of September 30, 2012 is replaced with the following:*

- (2) For the purposes of subsection (1), the Placement Quota being Transferred is deemed to be the Placement Quota most recently allotted to the Transferor. The Commission may, in its sole discretion, deem Placement Quota to have been allotted on a date that precedes the date of allotment recorded by the Commission where a Producer has satisfied the Commission, on satisfactory evidence, that there are good and sufficient reasons to do so.

7. *Subsection 18(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

Placement of Flocks by Hatcheries and Payment by Producers

18. (1) Each Hatchery shall order and arrange for the placement of flocks of day-old broiler breeder pullets in accordance with the Official Flock Schedule, except with respect to a Regularized Producer.

78. *Paragraph 23(b) of the Consolidated Order of September 30, 2012 is replaced with the following:*

- (b) all such Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weigh at least 52 grams each; and

9. *Subsection 25(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

25. (1) Every Producer other than a Regularized Producer shall market their broiler breeder flocks as directed by the Commission, and subject to:
- (a) any extraordinary kill age as may be directed by the Commission, after consultation with the Hatchery, where:
 - (i) a broiler breeder flock has failed to produce Broiler Hatching Eggs with a consistent Hatchability of 70%; or
 - (ii) there are other extraordinary circumstances warranting an extraordinary kill age.
 - (b) any extraordinary kill age as may be directed by the Producer, after consultation with the Hatchery, where a broiler breeder flock has failed to produce at levels acceptable to that Producer.

910. *Section 26 of the Consolidated Order of September 30, 2012 is replaced with the following:*

Payment of Base Price for Broiler Hatching Eggs

21. Every Hatchery shall pay for Broiler Hatching Eggs at the base price set out in Schedule 2, provided that a reasonable surcharge may be imposed by a Hatchery to recover additional costs actually incurred by the Hatchery as a direct consequence of having to pick up Broiler Hatching Eggs from a Producer (other than a Regularized Producer) who keeps less than 12,000 broiler breeders per Quota Period.

11. Section 1 of *Schedule 3 to the Consolidated Order of September 30, 2012* is replaced with the following:

Producer Levies

1. (1) Subject to subsections (2) and (3), levies are fixed and imposed upon each Producer at a rate of ~~\$0.02~~0.025 per Saleable Chick.
- (2) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Small-Lot Innovative Self-Marketer Program at a rate of \$0.015 per Saleable Chick.
- (3) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program at a rate of \$0.015 per Saleable Chick.

112. Paragraph 7(4)(a) of *Schedule 6 to the Consolidated Order of September 30, 2012* is replaced with the following:

- (a) of a minimum weight of 52 grams, unless they are Silkie or Taiwanese Broiler Hatching Eggs;

113. Subsection 7(6) of *Schedule 6 to the Consolidated Order of September 30, 2012* is replaced with the following:

- (6) All double-yolked and small eggs (less than 52 grams) shall be packaged on Commission supplies and sold to the Commission, unless they are Silkie or Taiwanese Broiler Hatching Eggs.

114. *The Consolidated Order of September 30, 2012* is amended by adding *Schedule 9* as attached.

44

15. *This Order comes into effect* _____, 2013.

DATED at Abbotsford, British Columbia, on _____, 2013

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

Casey Langbroek, Chair

**SCHEDULE 9
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

**Regularization of Historically Non-Compliant Silkie and Taiwanese Producers
Program Rules**

Definitions

1. In these Rules:

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

2. (1) Applications to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program are made by filing with the Commission, on or before 3:00 p.m., [date], 20122013:
- (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant’s birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status; and
 - (d) proof of permanent residence status in the Province of British Columbia.
- (2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (3) An applicant under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be a partnership in which case each partner must qualify under subsection (4).
- (4) A Person seeking to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program must have the following qualifications:
- (a) the Person must be a Canadian citizen or permanent resident of Canada;

- (b) the Person must be a permanent resident in the Province of British Columbia;
- (c) the Person must be at least 19 years of age at the time of application;
- (d) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission; and
- (e) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

Entry in Program

3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, ~~2010~~2012;
 - (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, ~~2010~~2012;

- (e) proof, in a form satisfactory to the Commission, of the applicant's financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (f) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (g) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit is within economic access of a licensed Hatchery;
 - (h) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets;
 - (i) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from the applicant's production;
 - (j) particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2); and
 - (k) any other information deemed necessary by the Commission.
- (2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:
- (a) will be allotted ~~one unit~~ 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, ~~2010~~ 2012; and
 - (b) will be issued a temporary, revocable, non-transferrable export permit to hatch ~~one~~ 0.5 Silkie or Taiwanese ~~Chick~~ Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, ~~2010~~ 2012;

- (3) Where an applicant has submitted particulars of exceptional circumstances in accordance with paragraph 3(1)(j), the Commission may ~~in its sole discretion~~ allot Regularized Producer Chick Quota and/or issue temporary, revocable, non-transferrable export permit, in amounts other than as provided for in subsection (2). In that event, Regularized Producer Chick Quota and temporary, revocable, non-transferrable export permit allotted and issued to other persons in accordance with subsection (2) will be proportionately reduced in order to accommodate all allotments and issuances to such applicants.

Special Restrictions on Regularized Producer Chick Quota Allotted Under the Program

4. (1) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
 - (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described in subsection (1).
- (3) Regularized Producer Chick Quota cannot be converted to Placement Quota.

Special Restrictions on Temporary, Revocable, Non-transferrable Export Permit Issued Under the Program

5. (1) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:
 - (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production for the purposes of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit; and

- (g) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, and that some other Person is primarily engaged in the business of Silkie or Taiwanese Broiler Hatching Egg production associated with that Regularized Producer Chick Quota or temporary, revocable, non-transferrable export permit, the entrant shall be deemed not to be actively engaged in Silkie or Taiwanese Broiler Hatching Egg production.

November 15, 2013

To the PPAC:

The Commission has been engaged in an extensive consultative process with industry stakeholders with respect to the Commission's proposed "Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program". At this juncture, the Commission is writing to solicit the non-binding recommendations (if any) of the PPAC with respect to that proposed amending order, a copy of which is attached.

The Commission's consultative efforts with respect to the proposed "Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program" are fully detailed in the enclosed binder.

We ask that the PPAC provide us with its non-binding recommendations (if any) with respect to that proposed amending order not later than November 29, 2013.

Thank you for your attention to this matter.

Yours truly,

A handwritten signature in black ink, appearing to read "Casey Langbroek".

Casey Langbroek
BCBHEC Chair

March 11, 2013

To Producers of Silkie and Taiwanese Broiler Hatching Eggs

As you know, the Commission has been engaged in consultations and deliberations concerning the regularization of historically non-compliant Silkie and Taiwanese producers. We are writing to update you on the status of this matter and to invite final comment on the Commission's proposal to address this issue.

Avian Influenza (2004)

In February 2004, an H7N3 strain of avian influenza swept through B.C.'s poultry industry. The disease did not discriminate between producers who held a license and quota and those who did not. The province ordered more than 17 million birds killed. It took about six months for the province to be declared free of avian flu. The outbreak was devastating to the poultry industry, and it clearly illustrated that all producers should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

BCFIRB Report (2005)

On September 1, 2005, the BCFIRB released its comprehensive report concerning specialty products and markets in British Columbia's supply managed sectors. At page 2 of the report, the BCFIRB expressed the following policy principles:

Registration

- a. **Boards should have plans to register all producers regardless of size or type of license.**
- b. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.**

At page 7, the BCFIRB referred to the recommendations contained in the report entitled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System*, which was commissioned by the Ministry in the fall of 2004:

1. **All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.**

At pages 11 to 12, the BCFIRB noted:

The incentive to produce without quota is large because regulated prices provide attractive production margins. ...In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good

work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that "a chicken is a chicken" regardless of type.

Commencing at page 19, the BCFIRB issued the following policy directions:

5.1. Registration

With respect to Registration, the following policy directions are given:

1. **All producers, regardless of size or class of production, should be registered with the Boards.**
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

.....

5.10. Exemptions

With respect to Exemptions, the following policy directions and principles are given:

1. There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.

.....

5.17. Food Safety & Biosecurity

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.**
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

With respect to the hatching egg industry in particular, the BCFIRB said:

The Commission's belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

Avian Influenza (2009)

In February, 2009, there was another outbreak of Avian Influenza (H5N1). This outbreak occurred on a Silkie farm and resulted in a cull of approximately 12,000 birds. This second outbreak of AI, occurring as it did on a Silkie farm, further illustrated that producers of Silkie and Taiwanese broiler hatching eggs should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

The Polderside Decision

The Commission had occasion to consider Silkie and Taiwanese production, as well as the notion of “specialty” broiler hatching egg production, when it issued its August 12, 2010 decision in the matter of Polderside Farms Inc. Commencing at page 5 of that decision, the Commission stated:

A. The Nature of the Broiler Hatching Egg Industry

The hatching egg sector is unique among supply managed commodities. Unlike every other supply managed commodity, hatching egg producers do not produce an “end product”. Hatching egg producers only produce an “input” to the chicken industry, namely: broiler hatching eggs. In effect, this means that hatching egg producers have only one customer – the hatchery. There is no demand for hatching eggs from wholesalers, retailers or consumers. There is only demand for hatching eggs from hatcheries.

In this environment, the potential for “niche markets” or “specialty production” is substantially more limited than it is in other commodities.

Furthermore, the hatching egg producer’s “customer” (the hatchery) is largely able to control the nature of the product that it receives. Broiler breeder flocks are ordered and arranged by hatcheries. If a hatchery desires a particular strain of broiler breeder, it may simply order and arrange for a flock of that strain to be placed with a registered producer.

Consequently, it is important to understand that Polderside’s inability to source atypical day-old chicks for its grower operations arises from an apparent inability or unwillingness of hatcheries to satisfy that demand (if there is one); not because registered producers are unable or unwilling to produce from that (or any other) strain of broiler breeder. Clearly, if any hatchery believed that there was an unsatisfied demand for day-old “RedBro” chicks, it could arrange for the placement of RedBro broiler breeders with registered producers. Hatcheries might do so in the future. But the fact remains that no British Columbia hatchery is responding to that demand (if there is one) at this time – which is the principle reason for Polderside’s request to place its own flock of RedBro broiler breeders.

B. Historical Anomalies (Silkie, Taiwanese and Loong Kong)

It is well known throughout the industry that there are certain persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact regulated, in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission’s Consolidated Order applicable to production from Silkie, Taiwanese or Loong Kong broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. It may be that persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks should be made to comply with all of the Commission's orders. On the other hand, it may be that the Commission will need to develop modified requirements for such persons. Quite possibly, some of these persons may be eligible under the very program that has been developed in response to Polderside's request. In any event, the Commission's failure to enforce against these persons cannot be regarded as creating a de facto exemption. We regard non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks as an important but ultimately unrelated matter for determination at another time. While it would have been preferable to develop a comprehensive policy addressing these issues too (if the policy established hereunder is not sufficient to do so), Ms. Jacobsen has repeatedly emphasized that she requires a decision on her application without delay. For that reason, the Commission has decided that the best course of action is to establish the "Small-Lot Innovative Self-Marketer Program", and then examine in greater detail whether that program is sufficient to address the currently non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks.

Consultations with Producers of Silkie and Taiwanese Producers

Throughout 2011, the Commission initiated consultations with historically non-compliant producers of Silkie and Taiwanese hatching eggs. These discussions culminated in the circulation of a draft Amending Order, which itself became the subject of further discussion.

The Commission's Proposal

As a result of these extensive discussions, the Commission has refined its proposed Amending Order into the form attached to this letter. The Amending Order reflects the Commission's tentative view that producers of Silkie and Taiwanese hatching eggs must be required to hold a license and quota – not only as a means of making such producers subject to *enforceable* government-approved food safety and biosecurity protocols – but also as a means to regulate supply in a context where markets are not so easily distinguished (given the hatcheries' ability to order and arrange for the placement of any strain of broiler breeder).

We write to ask for your comments with respect to the proposed Amending Order. To ensure that we are able to move forward on these issues without unnecessary delay, we ask that you give us your written comments within 30 days from the date of this letter.

We look forward to hearing from you.

Yours truly,

Casey Langbroek, Chair
BC Broiler Hatching Egg Commission

September 13, 2013

To All Producers of Silkie and Taiwanese Broiler Hatching Eggs:

We are writing to provide you with a further update regarding the Commission's consultative process with producers of Silkie and Taiwanese broiler hatching eggs. For the sake of convenience, we are repeating some of the background information set out in earlier communications.

Information Circular

On May 2, 2011, the Commission issued an information circular as follows:

It is well known throughout the industry that there are certain persons producing from Silkie and "Asian" broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact, regulated in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, "Asian", or any other strain, of broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. The Commission is tentatively of the view that all persons should be made to comply with all of the Commission's orders, irrespective of whether they produce from Silkie, Asian or any other strain of broiler breeders. Certainly, any failure on the part of the Commission to enforce cannot be regarded as creating a de facto exemption.

Subject to consultation, the Commission envisions a process whereby these producers will be "regularized". To preclude any possibility of a "race for quota", the Commission expects that regularization will be available only to those "non-compliant" producers who have been in production for the period January 1, 2010 to December 31, 2010, and who are currently engaged in production. Upon receipt of corroborated production data for the one-year period preceding January 1, 2011, the Commission envisions that it may issue "Regularized Producer Certificates" and issue quota to holders of such certificates that is subject to the 10/10/10 and LIFO rules, provided that there is sufficient corroborative production data to justify an allocation based on that past production. Future flock placements would be as directed by the Commission in consultation with hatcheries. Any persons operating unlicensed hatcheries must obtain a licence from the Commission. The Commission would not take steps to enforce against holders of "Regularized Producer Certificates" for instances of past non-compliance. Conversely, the Commission expects that it will initiate enforcement proceedings where there is non-compliance by persons who do not hold a "Regularized Producer Certificate".

These concepts are tentative, and are set out here only to provide interested persons with some insight into the Commission's preliminary views. All these matters are subject to consultation with Industry.

In due course, the Commission will be holding a meeting to discuss this issue. All hatching egg producers who are currently non-compliant, and all hatcheries receiving production from such persons, are invited and encouraged to attend to express their views on the proposed regularization process.

Consultative Process and Commission Proposal

Throughout 2011, the Commission engaged in an extensive consultative process with historically non-compliant producers of Silkie and Taiwanese hatching eggs. These discussions culminated in the circulation of a draft Amending Order, which itself became the subject of further discussion. On March 11, 2013, the Commission issued its preliminary report, as follows:

As you know, the Commission has been engaged in consultations and deliberations concerning the regularization of historically non-compliant Silkie and Taiwanese producers. We are writing to update you on the status of this matter and to invite final comment on the Commission's proposal to address this issue.

Avian Influenza (2004)

In February 2004, an H7N3 strain of avian influenza swept through B.C.'s poultry industry. The disease did not discriminate between producers who held a license and quota and those who did not. The province ordered more than 17 million birds killed. It took about six months for the province to be declared free of avian flu. The outbreak was devastating to the poultry industry, and it clearly illustrated that all producers should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

BCFIRB Report (2005)

On September 1, 2005, the BCFIRB released its comprehensive report concerning specialty products and markets in British Columbia's supply managed sectors. At page 2 of the report, the BCFIRB expressed the following policy principles:

Registration

- a. **Boards should have plans to register all producers regardless of size or type of license.**
- b. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols.**

At page 7, the BCFIRB referred to the recommendations contained in the report entitled *Recommendations for Managing Specialty Agri-food Products in B.C.'s Supply Managed System*, which was commissioned by the Ministry in the fall of 2004:

1. **All producers of milk, eggs, chicken, turkey and broiler hatching eggs, regardless of size or class of product, should be registered with the Boards.**

At pages 11 to 12, the BCFIRB noted:

The incentive to produce without quota is large because regulated prices provide attractive production margins. ...In the case of smaller producers who have sought to circumvent the system, various reasons have been asserted including ignorance of the system and objection in principle to restrictions on who can produce these regulated products.

It can be difficult for people producing outside the system to understand why supply must be regulated, and particularly why there should be controls on who should produce food. In some cases, such as small mixed farmers, their production is part of a diverse farming operation and their products are sold directly by them through local channels. They feel they are doing good work, earning a living, and providing a service to their community. They understand government policy as promoting diverse, community based agriculture; they see a requirement to purchase expensive quota just so they can produce a food product as not just economically impossible but contradictory as well.

However, supply management has a long and well-justified foundation in Canadian economic policy. Further, supply management is the law, as reflected in judicial decisions that “a chicken is a chicken” regardless of type.

Commencing at page 19, the BCFIRB issued the following policy directions:

5.1. Registration

With respect to Registration, the following policy directions are given:

1. **All producers, regardless of size or class of production, should be registered with the Boards.**
2. Boards and Government should jointly determine a cost effective, administratively efficient way to obtain adequate levels of registration.

.....

5.10. Exemptions

With respect to Exemptions, the following policy directions and principles are given:

1. There should be no exemptions from the agri-food regulations (including food safety and biosecurity). This supports the principle of registration.

.....

5.17. Food Safety & Biosecurity

With respect to Food Safety and Biosecurity, the following policy directions are given:

1. **All classes of product and all producers are to be subject to government-approved food safety and biosecurity protocols appropriate to their farming operation as a condition of licensing, irrespective of type of license issued.**
2. Government should provide clear policy direction concerning where food safety and biosecurity responsibilities reside. To the extent that Boards are delegated with the responsibility in these areas, appropriate authority should be delegated to the Boards.

With respect to the hatching egg industry in particular, the BCFIRB said:

The Commission's belief that a specialty production and marketing management program is not required seems reasonable since certified specialty chicks are not required to produce certified specialty broiler chickens (i.e. certified organic chicks are not required to produce certified organic chicken.)

Avian Influenza (2009)

In February, 2009, there was another outbreak of Avian Influenza (H5N1). This outbreak occurred on a Silkie farm and resulted in a cull of approximately 12,000 birds. This second outbreak of AI, occurring as it did on a Silkie farm, further illustrated that producers of Silkie and Taiwanese broiler hatching eggs should be registered and made subject to *enforceable* government-approved food safety and biosecurity protocols.

The Polderside Decision

The Commission had occasion to consider Silkie and Taiwanese production, as well as the notion of "specialty" broiler hatching egg production, when it issued its August 12, 2010 decision in the matter of Polderside Farms Inc. Commencing at page 5 of that decision, the Commission stated:

A. The Nature of the Broiler Hatching Egg Industry

The hatching egg sector is unique among supply managed commodities. Unlike every other supply managed commodity, hatching egg producers do not produce an "end product". Hatching egg producers only produce an "input" to the chicken industry, namely: broiler hatching eggs. In effect, this means that hatching egg producers have only one customer – the hatchery. There is no demand for hatching eggs from wholesalers, retailers or consumers. There is only demand for hatching eggs from hatcheries.

In this environment, the potential for "niche markets" or "specialty production" is substantially more limited than it is in other commodities.

Furthermore, the hatching egg producer's "customer" (the hatchery) is largely able to control the nature of the product that it receives.

Broiler breeder flocks are ordered and arranged by hatcheries. If a hatchery desires a particular strain of broiler breeder, it may simply order and arrange for a flock of that strain to be placed with a registered producer.

Consequently, it is important to understand that Polderside's inability to source atypical day-old chicks for its grower operations arises from an apparent inability or unwillingness of hatcheries to satisfy that demand (if there is one); not because registered producers are unable or unwilling to produce from that (or any other) strain of broiler breeder. Clearly, if any hatchery believed that there was an unsatisfied demand for day-old "RedBro" chicks, it could arrange for the placement of RedBro broiler breeders with registered producers. Hatcheries might do so in the future. But the fact remains that no British Columbia hatchery is responding to that demand (if there is one) at this time – which is the principle reason for Polderside's request to place its own flock of RedBro broiler breeders.

B. Historical Anomalies (Silkie, Taiwanese and Loong Kong)

It is well known throughout the industry that there are certain persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks that are operating without licence or quota issued by the Commission.

It is important to note that all such persons are, in fact regulated, in all respects by the Commission. There are no exceptions, exemptions, special rules or programs in the Commission's Consolidated Order applicable to production from Silkie, Taiwanese or Loong Kong broiler breeders. Whether through inadvertence, or for some forgotten rationale, the Commission has not yet taken steps to enforce its orders against these persons.

The BCFIRB has made it clear that all producers must be regulated for the purposes of biosecurity, premise identification and food safety at a bare minimum. It may be that persons producing from Silkie, Taiwanese and Loong Kong broiler breeder flocks should be made to comply with all of the Commission's orders. On the other hand, it may be that the Commission will need to develop modified requirements for such persons. Quite possibly, some of these persons may be eligible under the very program that has been developed in response to Polderside's request. In any event, the Commission's failure to enforce against these persons cannot be regarded as creating a de facto exemption. We regard non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks as an important but ultimately unrelated matter for determination at another time. While it would have been preferable to develop a comprehensive policy addressing these issues too (if the policy established hereunder is not sufficient to do so), Ms. Jacobsen has repeatedly emphasized that she requires a decision on her application without delay. For that reason, the Commission has decided that the best course of action is to establish the "Small-Lot Innovative Self-Marketer Program", and then examine in greater detail whether that program is sufficient to address

the currently non-compliant production from Silkie, Taiwanese and Loong Kong broiler breeder flocks.

Consultations with Producers of Silkie and Taiwanese Producers

Throughout 2011, the Commission initiated consultations with historically non-compliant producers of Silkie and Taiwanese hatching eggs. These discussions culminated in the circulation of a draft Amending Order, which itself became the subject of further discussion.

The Commission's Proposal

As a result of these extensive discussions, the Commission has refined its proposed Amending Order into the form attached to this letter. The Amending Order reflects the Commission's tentative view that producers of Silkie and Taiwanese hatching eggs must be required to hold a license and quota – not only as a means of making such producers subject to enforceable government-approved food safety and biosecurity protocols – but also as a means to regulate supply in a context where markets are not so easily distinguished (given the hatcheries' ability to order and arrange for the placement of any strain of broiler breeder).

We write to ask for your comments with respect to the proposed Amending Order. To ensure that we are able to move forward on these issues without unnecessary delay, we ask that you give us your written comments within 30 days from the date of this letter.

We look forward to hearing from you.

Stakeholder Feedback

On March 21, 2013, the Commission received a list of questions from Ms. Fehr, a copy of which is attached. The Commission's response to those questions is as follows:

1. The proposed Amending Order should not be read as a stand-alone order or a complete codification of all the provisions applicable to producers of Silkie and Taiwanese broiler hatching eggs. The Amending Order specifies which sections of the Consolidated Order should be repealed, replaced or added. Subject to what is specified in the Amending Order, there are no items from the Consolidated Order that are "excluded".
- 2.(a) Subsection 2(1) of Schedule 2 to the Consolidated Order states: "the base price to be paid by Growers to Hatcheries for day-old saleable chicks hatched from broiler hatching eggs (exclusive of any charges that may be imposed by the Hatchery for vaccination or sexing services requested by the Grower) is [\$.....] per day-old saleable chick." Where a Grower requests the provision of vaccination services from a Hatchery, any charges that might be imposed by the Hatchery are not included in the price specified in that subsection.
- 2.(b) The Commission requests that Ms. Fehr particularize the provisions of the Consolidated Order that are said to be inconsistent with a "custom hatching" business model.
3. To minimize the prospect of a "race for quota" eligibility is limited to those who were in production in 2010 (subject to exceptional circumstances). Applicants must provide details of the number of chicks hatched and placed with growers or exported over the two year period between January 1, 2009 and December 31, 2012 so that allotments made under the program are based on the most recent data.

4. The example is consistent with the methodology set out in the proposed Amending Order. Please note, however, that “Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer. A “Quota Period” is a two-year period.
5. The proposed Amending Order reflects the tentative view that initial allocations under the program must be grounded in fact. For that reason, the proposed Amending Order contemplates that allotments will be based on the number of chicks actually hatched and placed with growers or exported over the two year period between January 1, 2009 and December 31, 2012.
6. The proposed Amending Order specifies that Regularized Producer Chick Quota may be transferred. Allotments of Regularized Producer Chick Quota are defined as a “Special Allotment” for the purposes of the surrender assessment rules.

The Commission received a further letter from Ms. Fehr dated April 25, 2013, a copy of which is attached. In addition, on July 19, 2013, the Commission received the attached letter from Ms. Claire Hunter, counsel for Skye Hi Farms and Casey Van Ginkel dba V3 Farms.

Proposed Amending Order

Having considered the feedback from stakeholders, the Commission has made modifications to its proposed Amending Order. A copy of the Commission’s revised, proposed Amending Order is attached for your reference.

Further and Final Feedback

We are writing at this time to solicit any further feedback from stakeholders concerning only the March 21, 2013 list of questions from Ms. Fehr and the Commission’s response thereto; the April 25, 2013 letter from Ms. Fehr; the July 19, 2013 letter from Ms. Hunter; and the revised, proposed Amending Order.

Any further feedback must be received by the Commission not later than September 27, 2013. After September 27, 2013, the Commission will deliberate on the matter with a view to coming to a decision.

Yours truly,

BCBHEC Chair

Questions regarding the Draft Amending Order ??? to the Consolidated Order of September 30, 2012

Question 1

I am finding it difficult to understand which items from the 2012-09-30 Consolidated Orders are excluded.

The Table of Contents for the 2012-09-30 Consolidated Order includes the heading of "Section" and then "Part". Do the "Section" numbers identified in the Amending Order correlate directly the "Part" numbers in the 2012-09-30 Consolidated Orders?

Question 2

- a) **If all of the other items in the 2012-09-30 Consolidated Orders will apply; there are many sections which we would need clarification on. For example: what are vaccines included for the "\$0.7578 per day-old Saleable Chick"?**
- b) **We get our eggs custom hatched based upon an agreed schedule with the hatchery, this business model does not appear to be supported by the 2012-09-30 Consolidated Orders. This may be because I am not clear on all of the items which will not pertain.**

Question 3

Entry in Program

3. (1) The applicant must submit to the Commission, within 60 days from the date application:

- (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
- (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
- (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;
- (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

The data required in items a) through b) is from for 2010 to application while the data required for items c) and d) is between January 1, 2009 and December 31, 2012. I am wondering why the two terms are different.

Question 4

2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:

(a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;

Just to be sure I understand this, the following example is presented:

<u>January 1 to Dec 31 2009</u>	<u>3000 breeders</u>	<u>total of 30,000 chicks</u>
<u>January 1 to Dec 31 2010</u>	<u>2000 breeders</u>	<u>total of 15,000 chicks</u>
<u>January 1 to Dec 31, 2011</u>	<u>3000 breeders</u>	<u>total of 30,000 chicks</u>
<u>January 1 to Dec 31, 2012</u>	<u>4000 breeders</u>	<u>total of 35,000 chicks</u>

Since the total number of chicks placed was 110,000, I would be allotted a Quota of 55,000 chicks which can be produced as a saleable chick annually going forward.

Question 5

If the chick production allocated is insufficient to meet the current production as agreed upon with the BC Chicken Marketing Board, how will that be remedied?

Question 6

The September 30, 2012 document includes the following:

Surrender of Placement Quota on Transfer

16. (1) Subject to subsection (5), where Placement Quota is Transferred other than by way of a Permissible Lease, the Transferor shall surrender to the Commission an amount of Placement Quota calculated as follows:

(a) 5% of the amount of Placement Quota being Transferred, where such Total Production Quota was:

(i) allotted pursuant to a Special Allotment to the Transferor prior to April 1, 2006; or

(ii) allotted to the Transferor other than pursuant to a Special Allotment;

(b) 100% of the amount of Placement Quota being Transferred, where such Placement Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within one year from the date of the proposed Transfer;

(c) 90% of the amount of Placement Quota being Transferred, where such Placement Quota was allotted pursuant to a Special Allotment to the Transferor on or after April 1, 2006, and within the second year preceding the date of the proposed Transfer; etc.

What is the impact of this statement on the Regularized Quota to be issued with the Amending Orders?

April 25, 2013

BC Hatching Egg Commission

Dear Members:

Re: W. Friesen request for Onetime Transfer

Thank you for allowing us to meet with you today. We are presenting our request and invite your questions. The reasons for our request are:

- 1) We have been in the Specialty Poultry Hatching business for many years. We have developed specific breeds of chicken which are well accepted in the market place.
- 2) On May 2, 2011 our Specialty Poultry Hatching business became unsalable.
- 3) We are planning our retirement for age and health reasons. We request a onetime transfer of our production so a new owner can provide the number chicks established with the BC Chicken Marketing Board.

1) Specialty Poultry Hatching History

I started raising poultry in 1984 and produced hatching eggs for Fred Evans of ECHO Hatchery. When ECHO was sold to Ernie Unger, I did some of my own hatching and had custom hatching done by Campbell's Pheasantry.

In 1993, we started purchasing eggs and breeding poultry to develop the specific characteristics requested by the Asian and East Asian local communities. In the early 1990s, most processing was done by Wingtat Game Bird Packers. Some specific breeder chicks were sold to Rob Donaldson of Bradner Farms. Fraser Valley Duck and Goose was also a major customer for our chicks and chickens.

As our market grew, we had packaging and labels approved – bag samples are provided.

When the BC Chicken Marketing Board included Specialty Poultry, our hatching records were used to establish the Quota level in 2000. We were also granted Self Marketing quota.

In order to comply with CFIA regulations for hatching, we built a hatching facility which we chose not to complete, but we still have hatching capacity for 14,000 eggs a week.

When Fairline Development opened their processing facility, we grew birds for them for several years as well as supplied the chicks for all their growers. The hatching requirements were too large for Campbell's Pheasantry and so we switched to ECHO Hatchery. Later, Echo Hatchery negotiated a cheaper rate for chicks with Fairline and took a large component of our operation.

We continued to develop our breeds with some of our own hatching and then had all of the hatching done at Rosstown.

In 2009, we changed our processing to Fraser Valley Duck and Goose (FVDG) and then transferred our Self Marketing Quota to them also. In 2010 we sold our grower quota to FVDG with the agreement that we continue to supply them with the chicks and gave them first Right of Refusal for our breeder business when we were ready to retire.

2) On May 2, 2011 our Specialty Poultry Hatching business became unsalable.

When on May 2, 2011 the letter "General Information Regarding Specialty Broiler Breeders" was distributed by Peter Whitlock, our business sale was put on hold. It was no longer a saleable business due to the uncertainty of new regulations.

We have continued to develop our poultry business; obtaining interest from other Growers for chicks; we have more Grower Quota we are hatching for, and we also sell other breeds.

3) We request a Onetime Transfer of Production so that the new Producer can meet the commitments made via the BC Chicken Marketing Board.

We are ready to retire and since our family members have their careers, we are selling the farm and associated businesses. While we are not asking that the new regulations be changed, we ask that you do not impose a 10 year sentence on us but allow us to transfer the production of approximately 295,000 chicks per year so that the new owner can continue the business.

Thank you for your consideration.

Bill Friesen and Lillian Fehr

Dear Sir:

Re: Proposed draft order to “regularize” specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales, in respect of the proposed draft order to “regularize” the specialty broiler breeder industry through the issuance of quota and in response to the request for a letter that can be shared with other stakeholders in the specialty broiler breeder industry.

As you know, the specialty broiler breeder industry has long been operating with the knowledge of but without formal regulation by the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”). We are instructed that in 2010, Skye Hi Farms and V3 Farms, both quota-holding producers of specialty chicken, notified the then-General Manager of the BCBHEC of their intention to build additional barns on their farms in order to commence production as specialty breeders for their own farms. No objection was raised to the proposed production by the then-General Manager, nor was there any suggestion that production could commence without a licence or quota. As the Commission acknowledged in its May 2, 2011 notice to the industry, it is “well known throughout the industry” that specialty broiler breeders have been operating without licence or quota.

Skye Hi and V3 have been operating as specialty breeders since 2010 and accordingly have an interest in the proposed draft order. They have been supplying their own farms and have developed expertise in breeding specialty hatching eggs. They have also entered into commitments to supply chicks to other farms.

Schedule 9 to the draft order entitled “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules” would allot “0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012”. T&C Chick Sales estimates that this method of calculating quota, if implemented, would result in their being allotted production

quota insufficient to supply even their own farms, let alone the customers that they have committed to supply.

It is submitted that the proposed draft order should be revised to provide for one unit of chick quota for each chick committed and contracted for placement with a licensed chicken grower immediately before implementation of the new order. As set out further below, such a modification would be consistent with the Farm Industry Review Board's guidance for the implementation of specialty market regulation and with the 'SAFETI' principles-based approach to governance expected of marketing boards in their decision making.

I. The proposed modification is consistent with FIRB Policy

On September 1, 2005, the British Columbia Farm Industry Review Board ("FIRB") issued general directions to the supply managed commodity boards in British Columbia, including the BCBHEC, concerning how specialty production, new entrant and quota programs were to be administered. The report provided that boards "should have plans to register all producers regardless of size or type of license" (1.2(11)(a)) and that "Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced. . . Production volumes recognized for quota should be equal to the permittee's production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004" (1.2(11)(i), emphasis added).

With respect to the development of quota, the following policy directions were given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity. (5.5)

With respect to the conversion of permits to quota, the following policy directions were given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period. (5.6, emphasis added).

FIRB's letter to Bruce Cook dated February 9, 2006 summarizes that BCBHEC submitted draft orders to FIRB in response to a requirement that the boards draft orders in compliance with the general directions and submit them to FIRB. Following some modifications, FIRB approved the draft orders based on a number of understandings, including:

First and foremost, Commission allocation policies and decision-making are expected to be in accordance with the Ministry's 'Regulated Marketing Economic Policy' and FIRB's September 1, 2005 directions. This includes being responsive to specialty, niche and other innovative marketing opportunities when the need for those become evident in the B.C. hatching egg industry.

The thrust of FIRB's guidance with respect to a program of "regularizing" a specialty industry is that at a minimum, those who have been producing the product for which quota is to be issued are to be issued sufficient quota so as to permit continued production at the level of production in place immediately before the issuance of quota and so as to allow producers to meet their production commitments. While the initial proposal in May 2011 would have recognized production levels between January 1, 2010 and December 31, 2010, the delay in approving and implementing the draft order has meant that production levels of some producers have changed significantly in the intervening years, making the use of that period no longer appropriate. For those breeders like T&C Chick Sales who have increased the level of current contracts since 2010, tying quota allocation to a historic production level would not permit them to meet current commitments.

The FIRB directions suggest that any new order should provide for quota that allows current producers to continue production at their current levels and meet current commitments.

II. The proposed modification is more consistent with the SAFETI principles

FIRB has identified six principles to assist marketing boards in interpreting and implementing principles-based regulations within their respective mandates represented by the acronym SAFETI: strategic, accountable, fair, effective, transparent, inclusive: *BCFIRB's 6 Higher-Level Principles – Definitions and Guidance*, Sept 2011 ("*6 Higher-Level Principles*"). It is submitted that the modification proposed above is more consistent with a SAFETI analysis than the current draft.

Strategic – This principle requires that BCBHEC "Identify key opportunities and systemic challenges and plan for actions to effectively manage risks and take advantage of future opportunities" (*6 Higher-Level Principles*, at p. 3). Here, in its May 2, 2011 communication "General Information regarding 'Specialty Broiler Breeders'", the Commission has identified the goals of (1) complying with FIRB's direction to ensure that all producers be regulated to ensure biosecurity, premise identification and food safety and (2) the desire to prevent a "race for quota". In support of the latter goal, the communication suggests that the period January 1, 2010 to December 31, 2010 be used to identify those eligible for the "regularized production certificates" and issuance of quota.

Using a date prior to the implementation of any draft order to identify those eligible for issuance of quota may achieve the goal of preventing a race for quota, however, given the time that has passed since the initial consultation on the new order without finalization or implementation of the new order, there is no connection between the objective of preventing

a “race for quota” and using the 2010 time period to identify eligibility. Nor is there any connection between this goal and the proposal to use production levels from 2009 – 2012 as a basis for the issuance of quota.

Moreover, it is submitted that allowing specialty hatching egg producers to honour production commitments made with special chicken producers is sound marketing policy. FIRB has recently considered the role of open contracting in developing sound marketing policy in the context of a supervisory review that considering assurance of supply in the chicken industry. In that context, FIRB stated that “a sound marketing policy is one that creates a working climate that recognizes the importance of meeting customer needs at all levels to promote a sustainable industry – from growers through to consumers”: Decision dated June 9, 2010, In the Matter of the *Natural Products Marketing (BC) Act* and a Supervisory Review of BC Chicken Marketing Board Pricing-Related Recommendations at para. 63 and that “the movement of growers between processors could work to the benefit of all parties ensuring a better fit between grower and processor needs, resulting in longer term contracts” at para 66. Here, the proposed draft order that would lock in market share for specialty hatching egg producers at a historical level and would ignore the commitments made between producers of specialty hatching eggs and specialty chicken does not promote positive relationships between producers and is not sound marketing policy.

Accountable – This principle requires that BCBHEC “Maintain legitimacy and integrity through understanding and discharging responsibilities and reporting performance” (6 *Higher-Level Principles*, at p. 3). Here, implementation of an order that would reduce Skye Hi and V3 Farms’ quota to a level below that required to produce their own farms and meet current commitments is not consistent with the principle of accountability. Skye Hi and V3 Farms have kept the BCBHEC informed of their intention to commence and expand production in their specialty hatching egg operations. At no time did the BCBHEC raise objection to the plans for expansion of Skye Hi and V3 Farms to accommodate production or indicate that BCBHEC would take the position that this specialty operation was contrary to the Commission’s orders. To the contrary, as the Commission has acknowledged, it was “well known throughout the industry” that specialty breeders have been operating outside the quota system. It would undermine the legitimacy of the BCBHEC to arbitrarily change the rules of the game such that it would prevent those specialty breeders who have been operating with the knowledge and approval of the Commission from continuing their operations.

Fair – This principle requires that BCBHEC “Ensure procedural fairness and processes and decision-making” (6 *Higher-Level Principles*, at p. 2). The current draft order is unfair to those specialty breeders, like Skye Hi and V3 Farms, who have increased their market share since 2009. Skye Hi and V3 Farms have built additional barns and increased the size of their operations in order to meet demand for their specialty chicks on the understanding that they would be permitted to continue in production. Far from discouraging growth of unlicensed specialty breeders, it was agreed at a March 12, 2011 meeting with industry participants and BCBHEC staff that the industry did not desire a quota system for the specialty breeding

sector. Given BCBHEC's historical position, it would be contrary to procedural fairness if BCBHEC were to institute a quota system now that would prevent Skye Hi and V3 from continuing to produce specialty chicks to meet their current commitments.

Effective – This principle requires “A clearly defined outcome with appropriate processes and measures” (*6 Higher-Level Principles*, at p. 2). Here, the outcome identified is to “regularize” the specialty breeder industry by issuing quota. There is no connection between the proposed order that would reallocate market share as between current producers to that goal, which would be just as effectively achieved by a system that would issue quota based on current commitments to supply registered chicken growers.

Transparent – This principle requires that “processes, practices, procedures & reporting on exercise of mandate are open, accessible and fully informed” (*6 Higher-Level Principles*, at p. 2). The process of implementing the draft order thus far have been far from transparent. While some consultation with the industry took place after the May 2011 communication was issued by BCBHEC it is not clear how the consultation related to the revised draft order or how the current formula of quota issuance contained in the draft order was arrived at.

Inclusive – This principle requires that “appropriate interests, including the public interest, are considered” (*6 Higher-Level Principles*, at p. 2). Here, in addition to failing to consider the interests of those specialty breeders who have expanded their market share since 2009, the current quota provision in the draft order does not consider the public interest, which is served by promotion of diversity amongst specialty breeders. Nor does it consider the impact of the new order on specialty chicken producers who have chosen to obtain their chicks from Skye Hi and V3 Farms. FIRB has previously held that a marketing board must consider the potential impact of its orders on other regulated commodities: *Fraser Valley Duck and Goose Ltd. v. BC Chicken Marketing Board*, Feb. 29, 2008, File 44200-50, at p. 2.

We are hopeful that the Commission will agree to the modification to the draft order proposed. We understand the advice of the Commission with respect to its process to be that the early consultations in the nature of “one-on-one” discussions in which our clients participated were part of a fact-finding phase of consultation leading to the formulation of the draft order but that in order for any positions of stakeholders with respect to the tentative draft order to be considered they must be made “in writing, with the expectation that other stakeholders will have an opportunity to consider and comment upon that position”. This letter has been drafted for distribution to other stakeholders on the basis that this is the only manner in which submissions from stakeholders will be accepted by the Commission. Since as stakeholders my clients have not yet received any written submissions from other stakeholders in this industry, we are proceeding on the basis that no other submissions in respect of the draft order have yet been received by the Commission for consideration. We reserve the right to provide further comments on the draft order in response to submissions by other stakeholders.

In the event that the Commission determines to implement the new order in its draft form (or that otherwise reduces the quota entitlement of Skye Hi and V3 Farms to a level below their current commitments) we would respectfully request that the implementation of that order be delayed to allow sufficient time for our clients to bring an appeal to FIRB under the *Natural Products Market Act* and obtain a decision.

Yours truly,

Hunter Litigation Chambers

Claire E. Hunter

**AMENDING ORDER ??
TO THE
CONSOLIDATED ORDER OF SEPTEMBER 30, 2012**

**MADE BY
THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
ON _____, 2013**

The British Columbia Broiler Hatching Egg Commission orders as follows:

1. (1) *Subject to subsection (2), the Consolidated Order of September 30, 2012 is amended by replacing the words "Placement Quota", wherever they appear, with the word "Quota".*
- (2) *Subsection (1) does not apply to:*
 - (a) *The definitions of "Placement Quota" and "Special Allotment" in section 2 of the Consolidated Order of September 30, 2012;*
 - (b) *Paragraph 8(2)(d) of the Consolidated Order of September 30, 2012;*
 - (c) *Sections 9, 10, 20 and 21 of the Consolidated Order of September 30, 2012;*
 - (d) *Sections 4, 5, 6 and 7 of Schedule 1 to the Consolidated Order of September 30, 2012; and*
 - (e) *Sections 3, 4, 5 and 6 of Schedule 8 to the Consolidated Order of September 30, 2012.*
2. *Section 2 of the Consolidated Order of September 30, 2012 is amended by adding the following definitions:*

"Regularized Producer" means a Registered Producer who has been allotted Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

“Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer.

“Quota” means Placement Quota or Regularized Producer Chick Quota, as the case may be.

3. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Special Allotment” with the following:*

“Special Allotment” means:

- (a) a general allotment of Placement Quota by the Commission;
- (b) a special allotment of Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1;
- (c) a special allotment of Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8;
- (d) a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9; or
- (e) a general allotment of Regularized Producer Chick Quota.

4. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Underweight Broiler Hatching Eggs” with the following:*

“Underweight Broiler Hatching Eggs” mean Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weighing less than 52 grams.

5. *The Consolidated Order of September 30, 2012 is amended by adding the following section immediately after section 10:*

Special Allotment of Regularized Producer Chick Quota Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

10.1 The Commission may allot Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

6. *Subsection 18(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

Placement of Flocks by Hatcheries and Payment by Producers

18. (1) Each Hatchery shall order and arrange for the placement of flocks of day-old broiler breeder pullets in accordance with the Official Flock Schedule, except with respect to a Regularized Producer.

7. *Paragraph 23(b) of the Consolidated Order of September 30, 2012 is replaced with the following:*

(b) all such Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weigh at least 52 grams each; and

8. *Subsection 25(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

25. (1) Every Producer other than a Regularized Producer shall market their broiler breeder flocks as directed by the Commission, and subject to:

(a) any extraordinary kill age as may be directed by the Commission, after consultation with the Hatchery, where:

(i) a broiler breeder flock has failed to produce Broiler Hatching Eggs with a consistent Hatchability of 70%; or

(ii) there are other extraordinary circumstances warranting an extraordinary kill age.

(b) any extraordinary kill age as may be directed by the Producer, after consultation with the Hatchery, where a broiler breeder flock has failed to produce at levels acceptable to that Producer.

9. *Section 26 of the Consolidated Order of September 30, 2012 is replaced with the following:*

Payment of Base Price for Broiler Hatching Eggs

21. Every Hatchery shall pay for Broiler Hatching Eggs at the base price set out in Schedule 2, provided that a reasonable surcharge may be imposed by a Hatchery to recover additional costs actually incurred by the Hatchery as a direct consequence of having to pick up Broiler Hatching Eggs from a Producer (other than a Regularized Producer) who keeps less than 12,000 broiler breeders per Quota Period.

10. *Section 1 of Schedule 3 to the Consolidated Order of September 30, 2012 is replaced with the following:*

Producer Levies

1. (1) Subject to subsections (2) and (3), levies are fixed and imposed upon each Producer at a rate of \$0.025 per Saleable Chick.
- (2) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Small-Lot Innovative Self-Marketer Program at a rate of \$0.015 per Saleable Chick.
- (3) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program at a rate of \$0.015 per Saleable Chick.

11. *Paragraph 7(4)(a) of Schedule 6 to the Consolidated Order of September 30, 2012 is replaced with the following:*
 - (a) of a minimum weight of 52 grams, unless they are Silkie or Taiwanese Broiler Hatching Eggs;
12. *Subsection 7(6) of Schedule 6 to the Consolidated Order of September 30, 2012 is replaced with the following:*
 - (6) All double-yolked and small eggs (less than 52 grams) shall be packaged on Commission supplies and sold to the Commission, unless they are Silkie or Taiwanese Broiler Hatching Eggs.
13. *The Consolidated Order of September 30, 2012 is amended by adding Schedule 9 as attached.*
14. *This Order comes into effect _____, 2013.*

DATED at Abbotsford, British Columbia, on _____, 2013

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

Casey Langbroek, Chair

**SCHEDULE 9
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

**Regularization of Historically Non-Compliant Silkie and Taiwanese Producers
Program Rules**

Definitions

1. In these Rules:

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

2. (1) Applications to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program are made by filing with the Commission, on or before 3:00 p.m., [date], 2013:
- (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant’s birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status; and
 - (d) proof of permanent residence status in the Province of British Columbia.
- (2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (3) An applicant under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be a partnership in which case each partner must qualify under subsection (4).
- (4) A Person seeking to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program must have the following qualifications:
- (a) the Person must be a Canadian citizen or permanent resident of Canada;

- (b) the Person must be a permanent resident in the Province of British Columbia;
- (c) the Person must be at least 19 years of age at the time of application;
- (d) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission; and
- (e) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

Entry in Program

- 3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;
 - (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (e) proof, in a form satisfactory to the Commission, of the applicant's financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (f) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (g) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit is within economic access of a licensed Hatchery;
 - (h) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets;
 - (i) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from the applicant's production;
 - (j) particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2); and
 - (k) any other information deemed necessary by the Commission.
- (2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:
- (a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012; and
 - (b) will be issued a temporary, revocable, non-transferrable export permit to hatch 0.5 Silkie or Taiwanese Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (3) Where an applicant has submitted particulars of exceptional circumstances in accordance with paragraph 3(1)(j), the Commission may allot Regularized Producer Chick Quota and/or issue temporary, revocable, non-transferrable export permit, in amounts other than as provided for in subsection (2). In that event, Regularized Producer Chick Quota and temporary, revocable, non-transferrable export permit allotted and issued to other persons in accordance with subsection (2) will be proportionately reduced in order to accommodate all allotments and issuances to such applicants.

Special Restrictions on Regularized Producer Chick Quota Allotted Under the Program

4. (1) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
 - (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described in subsection (1).
- (3) Regularized Producer Chick Quota cannot be converted to Placement Quota.

Special Restrictions on Temporary, Revocable, Non-transferrable Export Permit Issued Under the Program

5. (1) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:
 - (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production for the purposes of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit; and

- (g) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, and that some other Person is primarily engaged in the business of Silkie or Taiwanese Broiler Hatching Egg production associated with that Regularized Producer Chick Quota or temporary, revocable, non-transferrable export permit, the entrant shall be deemed not to be actively engaged in Silkie or Taiwanese Broiler Hatching Egg production.

Pricing and Production Advisory Committee Meeting

November 26, 2013

Call to Order

Chair, Peter Whitlock called the meeting to order at 10:05. In attendance Ryan Whitmore, FVCSL; Ernie Silveri, Western Hatchery; Allan Cross, Producers Association; Joe Neels, BCBHEC

This meeting was called to discuss the issues regarding the March 11, 2013 letter to Producers of Silkie and Taiwanese Broiler Hatching Eggs and:

the November 15, 2013 letter to BCEHA, BCBHEPA, BCFIRD, BCCMB, Other Hatcheries and PPAC.

The goal is for the Commission to receive any non-binding recommendations that the PPAC may have with respect to the proposed amending order on or prior to November 29, 2013.”

Concerns were expressed about how the Supply Management quota for Silkie and Taiwanese product would fluctuate as the market fluctuates. The expectation is the use of a utilization percentage concept, similar to the BCBHEC system.

Areas of concern included: Quota is a saleable chick based quota? All producers are associated with hatcheries? Can you be independent? Can you hatch your own? Who sets the price? Participation in the Surplus removal system?

Squandered egg issue. Concerns included: Not significant need for forecasting on actual numbers? Does require hatcheries to place flocks without taking into account the nuances of production by flock month by month? Concern about how easily the system can have a large deviation of production. Great to say you want to control the number of imports that come in but the system needs to produce the eggs when they are needed. The official flock schedule needs to be in place accurately before the proposed system can be effective. Whatever system manages this must be flexible enough to constantly adjust. This cannot be done by just regulating imports. Just step of several required. Hatcheries are happy to see the work being done by the Commission on the official flock schedule.

The Chair raised the issue with the members that all the concerns raised had likely been discussed during the extensive consultation process and this was not the forum for them to

receive answers to their concerns. The expectation is that the recommended changes to the Standing Orders being discussed today are the result of that consultation process and that each of these issues have been taken into account in that process.

Due to a lack of quorum the PPAC will not be making a recommendation but would like the Commission to ensure the concerns raised at this meeting have been addressed in the consultation process prior to the Commission members making their final decision.

Meeting Adjourned 11:05

**AMENDING ORDER 11
TO THE
CONSOLIDATED ORDER OF SEPTEMBER 30, 2012**

**MADE BY
THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
ON NOVEMBER 28, 2013**

The British Columbia Broiler Hatching Egg Commission orders as follows:

1. (1) *Subject to subsection (2), the Consolidated Order of September 30, 2012 is amended by replacing the words “Placement Quota”, wherever they appear, with the word “Quota”.*
- (2) *Subsection (1) does not apply to:*
 - (a) *The definitions of “Placement Quota” and “Special Allotment” in section 2 of the Consolidated Order of September 30, 2012;*
 - (b) *Paragraph 8(2)(d) of the Consolidated Order of September 30, 2012;*
 - (c) *Sections 9, 10, 20 and 21 of the Consolidated Order of September 30, 2012;*
 - (d) *Sections 4, 5, 6 and 7 of Schedule 1 to the Consolidated Order of September 30, 2012; and*
 - (e) *Sections 3, 4, 5 and 6 of Schedule 8 to the Consolidated Order of September 30, 2012.*
2. *Section 2 of the Consolidated Order of September 30, 2012 is amended by adding the following definitions:*

“Regularized Producer” means a Registered Producer who has been allotted Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

“Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer.

“Quota” means Placement Quota or Regularized Producer Chick Quota, as the case may be.

3. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Special Allotment” with the following:*

“Special Allotment” means:

- (a) a general allotment of Placement Quota by the Commission;
- (b) a special allotment of Placement Quota in accordance with the New Producer Program Rules set out in Schedule 1;
- (c) a special allotment of Placement Quota in accordance with the Small-Lot Innovative Self-Marketer Program Rules set out in Schedule 8;
- (d) a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9; or
- (e) a general allotment of Regularized Producer Chick Quota.

4. *Section 2 of the Consolidated Order of September 30, 2012 is amended by replacing the definition of “Underweight Broiler Hatching Eggs” with the following:*

“Underweight Broiler Hatching Eggs” mean Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weighing less than 52 grams.

5. *The Consolidated Order of September 30, 2012 is amended by adding the following section immediately after section 10:*

Special Allotment of Regularized Producer Chick Quota Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

10.1 The Commission may allot Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules set out in Schedule 9.

6. *Subsection 16(2) of the Consolidated Order of September 30, 2012 is replaced with the following:*

(2) For the purposes of subsection (1), the Placement Quota being Transferred is deemed to be the Placement Quota most recently allotted to the Transferor. The Commission may, in its sole discretion, deem Placement Quota to have been allotted on a date that precedes the date of allotment recorded by the Commission where a Producer has satisfied the Commission, on satisfactory evidence, that there are good and sufficient reasons to do so.

7. *Subsection 18(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

Placement of Flocks by Hatcheries and Payment by Producers

18. (1) Each Hatchery shall order and arrange for the placement of flocks of day-old broiler breeder pullets in accordance with the Official Flock Schedule, except with respect to a Regularized Producer.

8. *Paragraph 23(b) of the Consolidated Order of September 30, 2012 is replaced with the following:*

(b) all such Broiler Hatching Eggs (other than Silkie or Taiwanese Broiler Hatching Eggs) weigh at least 52 grams each; and

9. *Subsection 25(1) of the Consolidated Order of September 30, 2012 is replaced with the following:*

25. (1) Every Producer other than a Regularized Producer shall market their broiler breeder flocks as directed by the Commission, and subject to:
- (a) any extraordinary kill age as may be directed by the Commission, after consultation with the Hatchery, where:
 - (i) a broiler breeder flock has failed to produce Broiler Hatching Eggs with a consistent Hatchability of 70%; or
 - (ii) there are other extraordinary circumstances warranting an extraordinary kill age.
 - (b) any extraordinary kill age as may be directed by the Producer, after consultation with the Hatchery, where a broiler breeder flock has failed to produce at levels acceptable to that Producer.

10. *Section 26 of the Consolidated Order of September 30, 2012 is replaced with the following:*

Payment of Base Price for Broiler Hatching Eggs

21. Every Hatchery shall pay for Broiler Hatching Eggs at the base price set out in Schedule 2, provided that a reasonable surcharge may be imposed by a Hatchery to recover additional costs actually incurred by the Hatchery as a direct consequence of having to pick up Broiler Hatching Eggs from a Producer (other than a Regularized Producer) who keeps less than 12,000 broiler breeders per Quota Period.

11. Section 1 of *Schedule 3 to the Consolidated Order of September 30, 2012* is replaced with the following:

Producer Levies

1. (1) Subject to subsections (2) and (3), levies are fixed and imposed upon each Producer at a rate of \$0.025 per Saleable Chick.
- (2) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Small-Lot Innovative Self-Marketer Program at a rate of \$0.015 per Saleable Chick.
- (3) Notwithstanding subsection (1), levies are fixed and imposed upon each Producer engaged in Broiler Hatching Egg production under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program at a rate of \$0.015 per Saleable Chick.

12. Paragraph 7(4)(a) of *Schedule 6 to the Consolidated Order of September 30, 2012* is replaced with the following:

- (a) of a minimum weight of 52 grams, unless they are Silkie or Taiwanese Broiler Hatching Eggs;

13. Subsection 7(6) of *Schedule 6 to the Consolidated Order of September 30, 2012* is replaced with the following:

- (6) All double-yolked and small eggs (less than 52 grams) shall be packaged on Commission supplies and sold to the Commission, unless they are Silkie or Taiwanese Broiler Hatching Eggs.

14. *The Consolidated Order of September 30, 2012* is amended by adding *Schedule 9* as attached.

15. *This Order comes into effect November 28, 2013.*

DATED at Abbotsford, British Columbia, on November 28, 2013

BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION

A handwritten signature in black ink, appearing to be 'CL' or similar initials, written in a cursive style.

Casey Langbroek, Chair

**SCHEDULE 9
TO THE BRITISH COLUMBIA BROILER HATCHING EGG COMMISSION
CONSOLIDATED ORDER**

**Regularization of Historically Non-Compliant Silkie and Taiwanese Producers
Program Rules**

Definitions

1. In these Rules:

“**Spouse**” means a partner in a marriage, or a Person with whom there has been cohabitation in a conjugal relationship, having so cohabitated for a continuous period of at least one year.

Application Under Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program

2. (1) Applications to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program are made by filing with the Commission, on or before 3:00 p.m., February 1, 2014:
- (a) an application form, obtainable from the Commission, duly completed by the applicant;
 - (b) a copy of the applicant’s birth certificate or other proof of age acceptable to the Commission;
 - (c) proof of Canadian citizenship or permanent resident status; and
 - (d) proof of permanent residence status in the Province of British Columbia.
- (2) Spouses may submit a joint application, but no more than one application may be submitted by both Spouses, or either of them.
- (3) An applicant under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be a partnership in which case each partner must qualify under subsection (4).
- (4) A Person seeking to participate in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program must have the following qualifications:
- (a) the Person must be a Canadian citizen or permanent resident of Canada;

- (b) the Person must be a permanent resident in the Province of British Columbia;
- (c) the Person must be at least 19 years of age at the time of application;
- (d) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission; and
- (e) the Person must have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

Entry in Program

- 3. (1) The applicant must submit to the Commission, within 60 days from the date application:
 - (a) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (b) proof, in a form satisfactory to the Commission, that the applicant has been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
 - (c) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012;
 - (d) proof, in a form satisfactory to the Commission, of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (e) proof, in a form satisfactory to the Commission, of the applicant's financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (f) proof, in a form satisfactory to the Commission, that the applicant has economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs;
 - (g) proof, in a form satisfactory to the Commission, that the applicant's Independent Production Unit is within economic access of a licensed Hatchery;
 - (h) proof, in a form satisfactory to the Commission, that the applicant is able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets;
 - (i) proof, in a form satisfactory to the Commission, that the applicant has made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from the applicant's production;
 - (j) particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection (2); and
 - (k) any other information deemed necessary by the Commission.
- (2) Subject to subsection (3), an applicant who has complied with subsection (1) to the satisfaction of the Commission:
- (a) will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012; and
 - (b) will be issued a temporary, revocable, non-transferrable export permit to hatch 0.5 Silkie or Taiwanese Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012;

- (3) Where an applicant has submitted particulars of exceptional circumstances in accordance with paragraph 3(1)(j), the Commission may allot Regularized Producer Chick Quota and/or issue temporary, revocable, non-transferrable export permit, in amounts other than as provided for in subsection (2). In that event, Regularized Producer Chick Quota and temporary, revocable, non-transferrable export permit allotted and issued to other persons in accordance with subsection (2) will be proportionately reduced in order to accommodate all allotments and issuances to such applicants.

Special Restrictions on Regularized Producer Chick Quota Allotted Under the Program

4. (1) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
 - (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described in subsection (1).
- (3) Regularized Producer Chick Quota cannot be converted to Placement Quota.

Special Restrictions on Temporary, Revocable, Non-transferrable Export Permit Issued Under the Program

5. (1) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production by the entrant only for so long as the entrant:
 - (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

- (2) Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:
 - (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.

Determination as to Whether the Entrant is Actively Engaged in Broiler Hatching Egg Production

6. (1) The Commission will determine, in its sole discretion, whether an entrant is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production for the purposes of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. Without limiting the generality of the foregoing, the Commission will have regard to the following factors:
 - (a) whether the Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, is being used for the benefit of the entrant;
 - (b) whether the entrant is active in the day-to-day affairs of the Independent Production Unit, including matters of animal husbandry;
 - (c) whether the entrant operates and controls the Independent Production Unit;
 - (d) whether the entrant owns, leases or rents the Independent Production Unit;
 - (e) whether the entrant pays for feed and other farm supplies utilized on the Independent Production Unit;
 - (f) whether the entrant enjoys the chance of profit and bears the risk of loss in relation to the operations of the Independent Production Unit; and

- (g) whether the entrant continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker.
- (2) For the purpose of determining whether the entrant is actively engaged in the production of Broiler Hatching Eggs, the Commission shall have regard to the substance and effect of any arrangement made between the entrant and any other Person, irrespective of the form of that arrangement.
- (3) Where it appears to the Commission that the entrant is primarily engaged in the business of administering Regularized Producer Chick Quota, and/or temporary, revocable, non-transferrable export permit, and that some other Person is primarily engaged in the business of Silkie or Taiwanese Broiler Hatching Egg production associated with that Regularized Producer Chick Quota or temporary, revocable, non-transferrable export permit, the entrant shall be deemed not to be actively engaged in Silkie or Taiwanese Broiler Hatching Egg production.

STATUTORY DECLARATION

The Applicant, and the Co-Applicant (if applicable), do each **SOLEMNLY DECLARE THAT:**

1. I am a Canadian citizen or permanent resident of Canada. Now produced and shown to me and marked as Exhibit "A" to this my Statutory Declaration is a photocopy of proof of Canadian citizenship or permanent resident status.
2. I am a permanent resident in the Province of British Columbia. Now produced and shown to me and marked as Exhibit "B" to this my Statutory Declaration is a photocopy of proof of permanent residence status in the Province of British Columbia.
3. I am at least 19 years of age as at the date hereof. Now produced and shown to me and marked as Exhibit "C" to this my Statutory Declaration is a photocopy of my birth certificate or other proof of age.
4. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission.
5. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

6. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is _____. Now produced and shown to me and marked collectively as Exhibit "D" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

7. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012 is _____. Now produced and shown to me and marked collectively as Exhibit "E" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012.

8. I am financially able to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

Now produced and shown to me and marked collectively as Exhibit "F" to this my Statutory Declaration are photocopies of documents material to my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs.

9. I have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

Now produced and shown to me and marked collectively as Exhibit "G" to this my Statutory Declaration are photocopies of documents material to my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

10. My Independent Production Unit is within economic access of a licensed Hatchery. Particulars of the proximity of my Independent Production Unit to the licensed Hatchery are as follows:

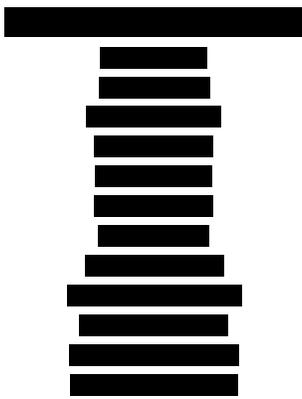

15. I am aware that Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be Transferred provided that it shall continue to be subject to all of the special restrictions described above.
16. I am aware that Regularized Producer Chick Quota cannot be converted to Placement Quota.
17. I am aware that any Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;
- failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.
18. I am aware that Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*:
- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.
19. I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same legal force and effect as if made under oath.

Please see the attached update on Non-Avian Influenza from Veterinarian Dr. Bill Cox.

producers are reminded to keep up a high level of biosecurity and to maintain high shell quality throughout the life of the flock.

Rodenticide Label Changes

All producers should note that legislation regarding the use of rodent baits is changing. Please read all rodent bait labels carefully and talk to your bait provider about federal regulation changes. Please see our upcoming January 2014 newsletter for more information and factsheet.

Historically Non-Compliant Amending Orders:

Please be advised that the attached amendments have been added to the consolidated orders effective January 1, 2014

POULTRY DISEASE UPDATE

H3N2 INFLUENZA VIRUS ANTIBODIES IN BROILER BREEDERS DECEMBER, 2013

What is the Current Situation in the Fraser Valley?

- Based on submission up to November 29, 2013, there have been 341 blood samples tested for the H3N2 flu (also referred to as 'swine flu') virus antibodies of which 162 have been found to be positive
- There is no known relationship between serological positives and production losses – in other words, some flocks that have tested positive have had excellent production
- No virus has yet been found, either by isolation or by PCR
- There is much we do not know, including how the virus is spreading, if the virus actually causes disease in the breeder hens, and the nature of infection in breeder hens

What is Happening Now?

- Our investigation is continuing with intensive sampling of pullet flocks being raised on serologically positive farms
- Efforts to isolate the virus are continuing
- Veterinarians are continuing to respond to concerns from clients
- An epidemiological study is about to start using blood already available from the flock health program
- An expert panel has been assembled and meets regularly to update the situation, discuss new findings, and pursue new leads

What Action Should Individual Farmers Take Right Now?

We continue to investigate this situation and will keep the industry updated. The focus for producers continues to be on maintaining good biosecurity and reviewing your biosecurity SOP's.

Right now there are many rumors circulating about the nature of this situation. If you have questions or concerns, or if you hear information that sounds like a rumor, please contact me or Stephanie Nelson at the BC Broiler Hatching Egg Commission so we can address them appropriately.

B. Grounds for Appeal		
I am aggrieved or dissatisfied by the decision to amend the British Columbia Broiler Hatching Egg Commission Consolidated Order as set out in Amending Order 11 and Schedule 9 "Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules"		Date of Decision: November 28, 2013 (communicated December 20, 2013)
Of the: British Columbia Broiler Hatching Egg Commission		
Specify why the decision should be changed and state the outcome (BCFIRB decision) requested:		

The decision does not comply with the BCFIRB September 1, 2005 “Specialty Market and New Entrant Submissions Policy, Analysis, Principles and Directions” or with sound marketing policy. Amending Order 11 and Schedule 9 “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules” do not provide for sufficient quota to allow the Appellants to meet their current contractual commitments to supply registered specialty chicken growers including their own farms or to operate at an efficient farm level.

The process undertaken by the BC Broiler Hatching Egg Commission in implementing Amending Order 11 does not comply with the BCFIRB 6 Higher-Level Principles – Definitions and Guidance, September 2011 and was unfair to the Appellants. In particular, the Commission failed to consider the interests of those specialty producers whose market position has grown since 2009, failed to consider the submissions of the Appellants during the consultation process and failed to consider the impact of the Amending Order on registered specialty chicken growers who have chosen to contract to purchase the Appellants’ chicks.

The Appellants seek an order directing the Commission to replace the Amending Order with a scheme that is consistent with BCFIRB’s directions and which would allow the Appellants to operate at an efficient level, continue to supply chicks to their own farms and meet their current and ongoing contractual commitments.

Dear Sir/Madame:

**RE: Skye Hi Farms Inc. and Casey Van Ginkel dba V3 Farms v British Columbia
Broiler Hatching Egg Commission**

Background:

1. In September 2005, the British Columbia Farm Industry Review Board (“BCFIRB”) directed all marketing boards (including the British Columbia Broiler Hatching Egg Commission (“the Commission”)) to ‘have plans to register all producers’ for purposes including food safety and animal disease control. Registration in support of industry biosecurity and related issues was subsequently reiterated to the Commission in respect of specialty broiler breeder production. On May 2, 2011, the Commission published a document in which it acknowledged that there were persons producing specialty broiler breeder flocks without a licence or quota issued by the Commission and that the Commission intended to “regularize” those producers after consultation. A consultation process took place over a period of three years.
2. On November 28, 2013, the Commission issued its decision to implement Amending Order 11 and Schedule 9, ‘Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules’ (“the Decision”). The Decision creates a Program to regulate the production of Silkie and Taiwanese broiler hatching eggs and to issue quota based on historical production levels rather than current contractual commitments.
3. On January 6, 2014, the appellants filed with BCFIRB an appeal of the Commission’s Decision. On February 7, 2014 the appellants, who are both producers of Silkie and Taiwanese broiler hatching eggs and registered growers of those birds (with the British

Columbia Chicken Marketing Board (the “Chicken Board”), filed an application for a stay of the Decision which is to be implemented on April 14, 2014. The appellants state that the Commission is unwilling to agree to a stay or to extend the deadline for the appellants’ application into the Program until after the determination of the appeal.

The Appellants’ Position:

4. The appellants are seeking a stay of the entire decision under appeal and rely on the three part test set out in *RJR-MacDonald Inc. v Canada (A.G.)*, [1994] 1 S.C.R. 311:
 - 1) is there is a serious question to be tried;
 - 2) would the applicant would suffer irreparable harm if the application were refused; and
 - 3) on the balance of convenience, which party would suffer greater harm from granting or refusing the remedy pending a decision on the merits?
5. The appellants submit that the Notice of Appeal raises “serious issues as to whether [the Decision] accords with BCFIRB’s directions, whether it constitutes sound marketing policy and whether the Commission observed principles of natural justice in arriving at its decision.”
6. In their written submissions dated February 7, 2014, the appellants claim that prior to its Decision, the Commission was well aware that (Silkie and Taiwanese) specialty producers were operating outside of the system established by the Consolidated Orders but never took steps to issue quota in relation to that market. In particular, the appellants state that in December of 2005, the Chicken Board established a quota program for specialty chicken production (which included Silkies) and authorized chick placement by unregistered specialty hatching egg producers but that the Commission still did not make any provision for the registration of specialty hatching egg production at that time.
7. The appellants state that they got into a specialty broiler hatching egg production in the summer of 2010 (with the Commission’s knowledge) so that they could supply their own respective chicken growing operations with “a steadier supply of chicks for their growing needs” in a market that at that time had little competition. To that end the appellants state that they invested in farm buildings and equipment and expanded their business from supplying their own specialty chicken growing operations to selling their hatching eggs to other grower clients.
8. The appellants also state that in December of 2012 they created T&C Chick Sales, a joint venture, which is a licensed chick broker with the Chicken Board. They refer to this business as a “virtual hatchery” because it purchases specialty eggs from the appellants and makes arrangements with a hatchery to hatch the eggs and vaccinate the chicks. T&C then pays the hatchery for those services and sells the chicks to growers.

9. The appellants submit that the Decision provides for the allocation of quota based on historical production levels rather than current market conditions and that this factor disadvantages them. In particular, the appellants submit that their current production levels are 40 to 50 times the production levels that they had in 2010 so that under the new scheme for calculating quota, they would not be allotted a sufficient amount to supply their own farms or the other growers they have supplied.
10. The appellants submit that during the consultation process, the Commission failed to consider the concerns they raised about the proposed amendments and in particular, “the specific needs of the specialty broiler hatching egg market as it currently operates and the potential impact of the proposed changes upon their businesses.” The appellants also state that the consultation process was procedurally flawed in that no industry-wide specialty sector meeting was ever held by the Commission and no reasons were issued by the Commission for its Decision.
11. The appellants submit that there is “a serious issue as to whether the [Decision] constitutes sound marketing policy and whether the appellants were treated fairly by the Commission in the process leading up to the [Decision]”.
12. The appellants submit that there is no prejudice to the Commission or the public interest in granting a stay. In particular, the appellants submit that there can be no urgency implementing the new Program given that the Commission has already delayed for many years before taking steps to regularize these specialty producers.
13. On the other hand, the appellants submit that they, and potentially the specialty hatching egg and chicken industries as a whole, will be irreparably harmed if a stay is not granted for the following reasons:
 - (a) the Program will irreparably alter the business of the appellants because the proposed quota allocation will not enable them “to meet their (current) production commitments or increase production to achieve industry efficient farm size unless they can establish ‘exceptional circumstances’ which is not defined.” Consequently, if a stay is not granted and the appellants fail to satisfy the criteria of ‘exceptional circumstances’ under the Program, quota would be allocated to other growers and T&C Chick Sales would lose its customers.
 - (b) The Decision would preclude the appellants’ joint venture, T&C Chick Sales, from continuing to operate as a chick broker (absent special direction from the Commission) because it requires that eggs be marketed through a hatchery (for one) but does not recognize chick brokers operating as “virtual hatcheries.” Further, this would deprive

the market of high quality eggs because the appellants' Taiwanese chicks have a lower mortality rate compared to others' and reach a marketable size in less than 82 days.

- (c) The quota allocation under the Program will potentially harm the specialty chicken industry by reducing the supply of high quality hatching eggs and chicks needed for existing specialty chicken growers. T&C Chick Sales produces approximately 20% of the specialty broiler hatching egg market and there are not enough Taiwanese chicks available in the market to supply the appellants' current growing operations without their own hatching egg operations. If no other hatching egg producers are willing or able to produce Taiwanese chicks to meet the appellants' requirements, it could result in an immediate disruption to the Taiwanese chicken supply to the public.
- (d) The Decision fails to provide a mechanism (such as a Specialty Market Advisory Committee established by other marketing boards) for input from specialty producers into the running of the industry or for setting prices or addressing other industry concerns and this will lead to disputes within the industry and result in it not being responsive to changing market conditions.
- (e) The Program imposes levies on specialty broiler hatching egg producers without providing them with the benefits of supply management that are enjoyed by mainstream broiler hatching egg producers. In particular, the Official Flock Schedule would not apply with the result that the risk of market increase or decline would not be spread across the industry. In addition, specialty growers are not included in the Surplus Egg Removal Program available to mainstream broiler hatching egg producers.

The Respondent's Position:

14. The Commission states that the quota allocation Program provided for in the Decision was designed to fully accommodate actual, historical market share and to discourage potential applicants who might attempt to secure "contractual commitments" and ramp up production in the expectation that doing so would result in a quota windfall (or a "race for base.") It includes the following "salient features":

- (a) Paragraphs 2(4)(d) and (e) of Schedule 9 limit eligibility under the program to persons who have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a license or quota issued by the Commission....and who have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence or quota issued by the Commission.

- (b) Persons who are eligible to participate may submit an application to the Commission and applicants must submit within 60 days proof of the number of Silkie and Taiwanese chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province and exported outside the Province between January 1, 2009 to December 31, 2012; and
- (c) Section 3(1)(d) of Schedule 9 provides that applicants may submit particulars of any exceptional circumstances as might justify an exceptional allotment of quota or export permit.
15. In its written submissions dated February 13, 2014, the Commission states that pursuant to section 37 of the Consolidated Order, “specialty producers have always been required to hold both a license and quota issued by the Commission as a pre-condition to the production and marketing of regulated product” but that the Commission has not heretofore enforced its orders against producers of Silkie and Taiwanese broiler hatching eggs. Consequently, the Commission submits that the Decision takes nothing away from the appellants because they have “never had a right to engage in the production or marketing of broiler hatching eggs and have at all times been prohibited from doing so by section 37 of the Consolidated Order.”
16. The Commission also relies on *Materi v BCEMB*, (BCFIRB, August 14, 2007) for the proposition that “a period of non-compliant activity without enforcement does not create a right to an amnesty nor does it create an entitlement to produce.”
17. As a further consequence, the Commission submits that the Decision cannot cause irreparable harm to the appellants by impairing a “right to engage in production or quota” that they did not have so that if the appellants’ activities are in jeopardy, the jeopardy arises not from the regularization program set out in the Decision but instead from section 37 of the Consolidated Order. The Commission submits that Decision simply establishes a transition program that allows the appellants to come into compliance by applying for quota.
18. The Commission submits that *RJR-MacDonald supra* sets out the test for a stay of challenged legislation and is authority for the proposition that when considering the balance of convenience, there is a presumption that the public interest will be irreparably harmed by staying the legislation. As a result, the Commission also submits that the appellants must demonstrate that a stay of the Decision would provide a public benefit.

19. The Commission agrees that there is a serious issue to be tried insofar as the appeal raises questions as to whether the Commission's consultative process and the regularization program accord with sound marketing policy. However the Commission submits that if a stay was granted, the Commission would be unable to process an application by the appellants for quota and therefore the appellants could no longer assert that the program does not provide them sufficient quota to meet their own needs or current contractual commitments because that issue would be incapable of being determined.
20. The Commission denies that the appellants would suffer irreparable harm if the Decision was implemented and submits that the appellants have provided no tangible evidence of alleged harm against them. The Commission submits that if the appellants are able to demonstrate their eligibility including their historical market share and any exceptional circumstances that might justify an exceptional allotment, then there is no reason for the appellants to believe that the program will not accommodate them.
21. The Commission notes that the appellants do not suggest that the Decision will not provide them with sufficient quota to reflect their actual historic market share and accordingly, it suggests that "it is appropriate to draw a distinction between real harm to existing interests ...and the thwarting of grander ambitions or desires..." and that the latter cannot reasonably be considered an "irreparable harm." The Commission submits that the program was designed to accommodate actual market share and that the real nature of the appellants' stay application is not for the purpose of preserving the status quo but rather to permit them to produce at "current levels" of production which exceeds their actual market share.
22. The Commission also submits that T&C Chick Sales is not an appellant in this matter and the question of whether 'chick brokers' should be licensed by the Commission is entirely unconnected with the regularization of non-compliant Silkie and Taiwanese producers, generally, and the Decision in particular.
23. The Commission further submits that if a stay was granted, BCFIRB would have to determine the extent to which the appellants and other non-compliant producers would be able to produce without a licence and quota pending appeal. Alternatively, if BCFIRB was to set no limits, the Commission submits that potential applicants would attempt to secure "contractual commitments" and ramp up production in the expectation that doing so would result in a quota windfall or "race for base" and this would bring chaos and instability to the market.

Appellants' Reply:

24. In a further written submission dated February 18, 2014, the appellants dispute that there is a presumption of irreparable harm to the public interest on a stay application under the *NPMA*. The appellants submit that “a fair reading” of the *RJR-MacDonald* case makes clear that the public interest constitutes a “special factor” only in constitutional cases or Charter challenges. The appellants also submit that to make such a presumption, BCFIRB would have to pre-judge the issue on appeal. Instead, the appellants submit that the Commission must provide evidence that it is in the public interest to implement the Decision but has not done so.
25. The appellants submit that the applicable test is the balance of convenience test which is set out in Rule 7(1)(b) of the *Rules of Practice and Procedure for Appeals under the NPMA* which provides that an appellant who applies for a stay must show “why the harm to the applicant outweighs the harm that would occur to others, or to the public interest, if BCFIRB grants the stay”. The appellants also submit that “BCFIRB has applied this test consistently in stay applications, including where the stay sought would suspend the application of a marketing board’s decision.” The appellants deny that they rely on argument to establish irreparable harm and submit that their opinion evidence is admissible as evidence pursuant to Rule 18(3) of the Rules under the *NPMA* and that BCFIRB should give it “significant weight” because the Commission has adduced no contradictory evidence to challenge it.
26. The appellants further submit that the Commission’s position on this application that specialty producers have always been required to be licensed and hold quota is contrary to its earlier position that it set out in a Notice dated March 17, 2010 which it stated (in part) as follows:

..the Commission is hereby communicating that there is no plan to allocate quota to those who are producing (or who may produce) ‘specialty’ broiler breeders. Consistent with the views of ...participants [at a March 12, 2010 meeting], the Commission intends to introduce rules for ‘specialty’ broiler breeders only in so far as is necessary to achieve the objectives of premise identification, bio-security and food safety.....
27. The appellants submit that they relied on the Commissions’ stated position in 2010 when they expanded their businesses and are now prejudiced by the Commissions’ reversal of that position.

Decision:

28. In its written submissions, the Commission submitted that in its consideration of the ‘public interest’ BCFIRB should give other producers of Silkie and Taiwanese broiler hatching eggs the opportunity to be heard with respect to this stay application. In response, the appellants submit that it was incumbent on the Commission to lead evidence of the perspectives of other industry stakeholders and that given that it just completed a “multi-year consultation” it should be aware of the perspectives of other Silkie and Taiwanese broiler hatching egg producers. The appellants submit that the Commission’s failure to adduce any evidence of public interest cannot now be cured by soliciting further submissions on the stay application.
29. During a pre-hearing conference held on February 14, 2014, counsel for the Commission also proposed that BCFIRB defer its decision on the stay application to in order to permit any interveners (none of whom had yet applied) to make submissions on the stay application. After hearing oral submissions from the parties, that request was denied for the reasons set out in a decision of the presiding member dated February 19, 2014.
30. In *RJR-MacDonald supra* at pp. 347-8, the Supreme Court of Canada held that the following “three part *American Cyanamid* test ***should be applied to applications for interlocutory injunctions and stays in both private law and Charter cases.***” [emphasis added]
 - a. At the first stage, an applicant demonstrate a serious question to be tried;
 - b. At the second stage, the applicant must convince the court that it will suffer irreparable harm if the relief is not granted;
 - c. The third branch of the test requires an assessment of the balance of inconvenience. In addition to the damage each party alleges it will suffer, the interest of the public must be taken into account. The effect a decision of the application will have upon the public interest may be relied upon by either party. When the nature and declared purpose of the legislation is to promote the public interest, a motions court should not be concerned whether the legislation actually has such an effect. It must be assumed to do so. The applicant who relies on the public interest must demonstrate that the suspension of the legislation would itself provide a public benefit.
31. The test in *RJR-MacDonald* is also set out under Rule 7(1)(b) of the *Rules of Practice and Procedure for Appeals under the Natural Products Marketing Act* (the *NPMA*) provides that an appellant who applies to BCFIRB for a stay of a decision under appeal and must specify
 - (i) Whether the appeal raises a serious issue(s) to be considered;

- (ii) What harm to the applicant, that cannot be remedied, would occur if a stay is not granted;
- (iii) Why the harm to the applicant outweighs the harm that would occur to others, or to the public interest, if BCFIRB grants the stay.

Serious Issue to be Tried:

32. In *RJR-MacDonald supra* at p. 348, the Supreme Court of Canada in referring to the first branch of the test held that “whether the test has been satisfied should be determined by a motions judge on the basis of common sense and an extremely limited review of the case on the merits.” It also noted that this stage will be satisfied “unless the case on the merits is frivolous or vexatious...”
33. The parties agree that there is a serious issue to be tried; i.e. whether the Decision accords with sound marketing policy. The parties also agree that there is a serious issue to be tried with respect to the Commission’s consultative process in making the Decision, however the appellants characterize that issue as one of procedural fairness while the respondent characterizes it as one of sound marketing policy. I am satisfied that the appeal raises serious issues to be tried.

Irreparable Harm:

34. Under the second branch of the test, the appellants must satisfy the burden of proving that they would suffer irreparable harm if the Commission’s Decision is not stayed pending appeal. In *RJR-MacDonald supra* at p. 341, the Court defined ‘irreparable harm’ as “harm which either cannot be quantified in monetary terms or which cannot be cured” and an example of that includes circumstances where “a party will be put out of business by the court’s decision or where one party will suffer permanent market loss or irrevocable damage to its business reputation.”
35. The appellants submit that the program will be instituted on April 14, 2014 at which time the Commission will be considering applications from producers for quota. The appellants state that the Commission is unwilling to extend the deadline for the appellants’ application into the Program until after the determination of the appeal. The appellants submit that they would be irreparably harmed if the implementation of the program proceeded pending a decision on the merits of the appeal in the following ways:
- (a) if they were to apply for quota under the “default quota provisions” which are based on historical market share, they would not receive sufficient quota to meet the current needs of their own specialty chicken operations (which have grown since December

- 31, 2012) nor would they be able to meet their current commitments for specialty eggs to other specialty chicken producers unless they could satisfy the criteria of “exceptional circumstances” which is not defined. It would also not allow them to increase production to achieve “industry efficient farm size” and as a result they would lose customers and this would render their operations non-viable.
- (b) Although the appellants could appeal a decision of the Commission regarding their respective quota allotments, in the interim (pending determination of the appeal), the Commission would allocate quota to other growers and the appellants would lose its customers (who rely on a steady supply of chicks for their operations). As a further consequence the relationship the appellants have built with other specialty producers would be irreparably harmed.
- (c) under the new regularization program T&C Chick Sales (the appellants’ ‘virtual hatchery’) could no longer operate as a chick broker unless it received a special direction from the Commission. This means that the appellants would no longer be able to market eggs through a chick broker and there are not enough Taiwanese chicks available in the market to supply the appellants’ current growing operations without their own hatching egg operations.
36. The Commission submits that the appellants have always been prohibited from engaging in production of specialty eggs without a license or quota under s. 37 of the Consolidated Order and as a result, the Decision cannot cause irreparable harm to them by impairing a “right to engage in production or quota” that they did not have.
37. The Commission also submits that there is no reason for the appellants to believe that the quota allotment system under the Decision will not accommodate them and that it is unreasonable for the appellants to suggest otherwise until such time as they apply for quota. The Commission submits that the Program under the Decision is designed to allot quota based on historic (or actual) market share and to discourage a “race for base” driven by a desire for a quota windfall. The Commission submits that the appellants want to preserve their “current levels of production” because it exceeds their actual market share. The Commission also submits that there is no tangible evidence of irreparable harm to the appellants’ *existing interests* and that “the thwarting of grander ambitions” cannot reasonably be considered an irreparable harm.
38. The respondent further submits that T&C Chick Sales is not a party to this appeal and that the question of whether ‘chick brokers’ should be licensed by the Commission is unconnected with the Decision which deals with the regularization of producers.

39. I find that under the “default provisions” of the Program for allotting quota, the appellants would be allotted quota based on their demonstrated historical market share during the period, January 1, 2009 to December 31, 2012. However, in order to obtain additional quota sufficient to match their current level of production (or any growth since December 31, 2012), the appellants would have to satisfy “exceptional circumstances” which is not defined. I accept the appellants’ position that if they do not satisfy the Commission’s criteria for “exceptional circumstances,” then they would not be able to meet the current production needs of their own specialty chicken operations and those of their customers who may have to obtain their chicks from other producers.
40. I disagree with the Commission’s submission that the appellants’ joint venture, T&C Chick Sales, is an irrelevant factor. While T&C may not be an appellant, it is an integral part of the appellants’ current business model and therefore it should not be viewed in isolation from the appellants’ respective businesses. Since December 2012, the appellants have relied on their “virtual hatchery” to supply their respective specialty chicken operations with chicks and they claim that without T&C, they would not have a sufficient number of specialty chicks to maintain their current production levels unless they could obtain those chicks elsewhere (see Affidavit of Trevor Allen, paragraph 50). However, while I accept the appellants’ evidence that the Decision insofar as it does not recognize chick brokers like T&C Chick Sales does not accommodate the business model they have developed, I am not satisfied on the evidence that the appellants could not obtain a sufficient number of chicks from hatcheries.
41. I have also considered the Commission’s submission that the appellants have never had a right to produce without a license or quota based strictly on s. 37 of the Consolidated Order. However, in my view it would not be fair to characterize the period leading up to the Decision as one in which the Commission did not enforce the requirement under its Order that producers have quota. By way of a notice to producers dated March 2010, the Commission advised specialty producers of its intention to regularize their operations and assured them that it would not include the requirement to hold quota.
42. Furthermore, the appellants have appealed the entirety of the Decision and therefore what is in issue is not solely the basis for allotting quota (based on historical market share compared to contractual commitments) but also whether a regularization Program that requires producers to hold quota and that does not recognize chick brokers (among other things) meets with sound marketing policy.
43. The appellants argue that if a stay is not granted and the Commission determines that as part of the application process, the appellants have not provided “exceptional

circumstances” a stay would not have any effect as the quota would be allocated to other producers and T&C would lose its customers without any effective means to challenge the decision. I do not agree. First, it is speculative at this point to know how the Commission will treat the appellants’ application. The program as designed has a base component and a discretionary component which may or may not give the appellants the market share that they have gained since December 2012. Further, the Commission has the authority to make “special directions” to recognize in some fashion the appellants’ business model of a “virtual hatchery”. In short, the program may or may not cause the appellants irreparable harm. On this point, I agree with the Commission, that in the absence of a decision on the application, there is a factual vacuum.

44. Once the Commission makes a decision on these significant issues with respect to the appellants or any other application, a person aggrieved by or dissatisfied with that decision could bring an appeal and a stay application on short notice. While any such stay application may be more complicated in that the implications of any other allocation applications would need to be addressed, the Provincial board would have the benefit of the Commission’s considered views on the merits of the application concerned, which BCFIRB expects would take into consideration the impact on other affected stakeholders. An application and arguments related to irreparable harm would then have a factual underpinning.
45. I am mindful of the appellants’ submission that their opinion evidence should be given significant weight in this matter because it has not been contradicted by the Commission, however I respectfully disagree. While I accept that the appellants are in a good position to offer opinions about certain aspects of the businesses they operate and make projections about how the Decision *might* affect their businesses, until a decision on the appellants’ application has been made by the Commission, these are speculations at best.

Conclusion

46. As I have found that the appellants have not satisfied the second branch of the test, it is unnecessary for me to consider the last branch of the test, the balance of inconvenience. However, in their submissions, the parties spent a great deal of attention on the issue regarding the proper treatment of the public interest on these types of stay applications and as a result I will briefly address that issue.
47. The Commission submitted that *RJR-MacDonald supra* is authority for the proposition that under the balance of inconvenience test there is a presumption that the public interest will be irreparably harmed if legislation is stayed and that an applicant for a stay must show that there would be a benefit to the public interest by granting a stay. The appellants

dispute this and submit that this presumption applies only in cases where the constitutional validity of legislation is challenged and note that former BCFIRB panels have applied the balance of inconvenience test without resorting to a presumption of irreparable harm to the public interest: [see for eg., *Primary Poultry Processors Association of BC v Chicken Board* (BCFIRB, April 30, 2003).

48. I do not agree with the appellants that the presumption of irreparable harm to the public interest arises only in constitutional cases. The Court in *RJR-MacDonald* stated that all three branches of the test (as reproduced in paragraph 30 above), apply both to private matters as well as to Charter cases. Further, in my view, applications to stay the decisions of commodity boards can be likened to constitutional challenges as both seek to impugn the legislative acts of a public authority. As stated in *RJR-MacDonald supra* at page 346:

In the case of a public authority, the onus of demonstrating irreparable harm to the public interest is less than that of a private applicant. This is partly a function of the nature of the public authority and partly a function of the action sought to be enjoined. The test will nearly always be satisfied simply upon proof that the authority is charged with the duty of promoting or protecting the public interest and upon some indication that the impugned legislation, regulation, or activity was undertaken pursuant to that responsibility. Once these minimal requirements have been met, the court should in most cases assume that irreparable harm to the public interest would result from the restraint of that action.

49. *RJR-MacDonald* recognizes that there is a presumption that the legislation promotes the public interest and that a stay of that legislation would harm the public interest. Accordingly, the onus would be on the applicant for a stay to demonstrate that there would be a benefit to the public interest in staying the legislation. This view has been accepted and applied by BCFIRB [see for eg. *Island Farm Dairies Co-op Association v BC Milk Marketing Board* (BCFIRB, December 31, 2003)].
50. Having found that the appellants have not satisfied the requirements for a stay of the Commission's Decision made November 28, 2013, their application is dismissed.

Dear Sir/Madame:

RE: Skye Hi Farms Inc. and Casey Van Ginkel dba V3 Farms v British Columbia Broiler Hatching Egg Commission

1. This is a corrigendum to the presiding member's Decision issued March 6, 2014.
2. The second sentence of paragraph 3 of the decision is amended to read as follows:
.....On February 7, 2014, the appellants, who are both producers of Silkie and Taiwanese broiler hatching eggs and registered growers of those birds (with the British Columbia Chicken Marketing Board (the "Chicken Board")), filed an application for a stay of the decision. Pursuant to the Decision, the producers must submit to the Commission their applications for quota by February 13, 2014 and provide any supplemental information in support of their applications within 60 days or no later than April 14, 2014.
3. The first sentence of paragraph 35 of the decision is amended to read as follows:
The appellants submit that the Commission will be considering applications from producers for quota after April 14, 2014 (the final day under the program for submitting supplemental information in support of producer applications).

STATUTORY DECLARATION

The Applicant, and the Co-Applicant (if applicable), do each **SOLEMNLY DECLARE THAT:**

1. I am a Canadian citizen or permanent resident of Canada. Now produced and shown to me and marked as Exhibit "A" to this my Statutory Declaration is a photocopy of proof of Canadian citizenship or permanent resident status.
2. I am a permanent resident in the Province of British Columbia. Now produced and shown to me and marked as Exhibit "B" to this my Statutory Declaration is a photocopy of proof of permanent residence status in the Province of British Columbia.
3. I am at least 19 years of age as at the date hereof. Now produced and shown to me and marked as Exhibit "C" to this my Statutory Declaration is a photocopy of my birth certificate or other proof of age.
4. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission.
5. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

6. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is [REDACTED]. Now produced and shown to me and marked collectively as Exhibit "D" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

7. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012 is [REDACTED]. Now produced and shown to me and marked collectively as Exhibit "E" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012.

8. I am financially able to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

[REDACTED]

Now produced and shown to me and marked collectively as Exhibit "F" to this my Statutory Declaration are photocopies of documents material to my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs.

9. I have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

[REDACTED]

Now produced and shown to me and marked collectively as Exhibit "G" to this my Statutory Declaration are photocopies of documents material to my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

10. My Independent Production Unit is within economic access of a licensed Hatchery. Particulars of the proximity of my Independent Production Unit to the licensed Hatchery are as follows:

[REDACTED]

15. I am aware that Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be Transferred provided that it shall continue to be subject to all of the special restrictions described above.
16. I am aware that Regularized Producer Chick Quota cannot be converted to Placement Quota.
17. I am aware that any Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;
- failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.
18. I am aware that Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*:
- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.
19. I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same legal force and effect as if made under oath.

MEMO

TO: All Historically Non-Compliant Hatching Egg Producers

FROM: Stephanie Nelson, General Manager of the BC Hatching Egg Commission

DATE: January 30, 2014

SUBJECT: Application Deadline

It has come to my attention that due to some administrative challenges, it has been difficult to collect the information required to complete the application package by the deadline of February 1, 2014.

Therefore, the deadline has been extended to February the 7th, 2014.

Additionally, a training session has been arranged for Tuesday February 18th, 2014. This training session will be conducted by our national Food Safety Coordinator Victoria Sikur to train you in our food safety program and Sarah Zonneveld our provincial On Farm Program Coordinator to train you in both our Biosecurity and Premise Identification programs.

Please Register with Veronica Kushnerenko: veronica@bcbhec.com or 604-854-4488

Regards,

A handwritten signature in black ink, appearing to read "Stephanie Nelson", with a long horizontal line extending to the right.

Stephanie Nelson
General Manager

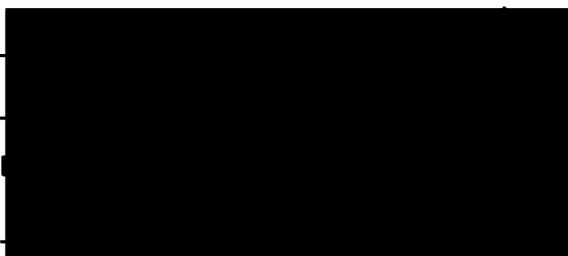

Note: This application is made without prejudice to the BC Farm Industry Review Appeal Skye Hi Farms in ET AL v. BCBHEC 44200-507/14-01, and the application for a stay of implementation of the amending order therein. This application does not intend to waive, affect or compromise any rights we might have in respect of or any decisions the Commission made in reliance on the amending order. We expressly reserve all of our rights.

Abbotsford, B.C. V2S 2C1
Ph: 604-859-4825 Fax: 604-859-0469

6. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 107,571. Now produced and shown to me and marked collectively as Exhibit "D" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012. *-Forth coming*

7. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012 is 0. Now produced and shown to me and marked collectively as Exhibit "E" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012.

8. I am financially able to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

I have owned and operated my hatching egg
business as a farm since 2010.

Now produced and shown to me and marked collectively as Exhibit "F" to this my Statutory Declaration are photocopies of documents material to my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs.

9. I have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

Contracted supply of TC chicks to licensed
BCCMB specialty growers

Now produced and shown to me and marked collectively as Exhibit "G" to this my Statutory Declaration are photocopies of documents material to my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

10. My Independent Production Unit is within economic access of a licensed Hatchery. Particulars of the proximity of my Independent Production Unit to the licensed Hatchery are as follows:

Yarrow BC, hatchery already picks up regularly
(30 min drive)

11. I am able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets.

12. I have made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from my production, namely: Rosstown Hatchery (name of licensed Hatchery).

13. Particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection 3(2) of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules* are as follows:

Current & Future contracts exceeds historical
production quantity applied for on this
application.

Now produced and shown to me and marked collectively as Exhibit "H" to this my Statutory Declaration are photocopies of documents material to exceptional circumstances described above.

14. I am aware that any Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:

- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
- (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
- (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
- (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
- (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

falling which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

15. I am aware that Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be Transferred provided that it shall continue to be subject to all of the special restrictions described above.
16. I am aware that Regularized Producer Chick Quota cannot be converted to Placement Quota.
17. I am aware that any Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;
- failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.
18. I am aware that Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*:
- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.
19. I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same legal force and effect as if made under oath.

3. I am at least 19 years of age as at the date hereof. Now produced and shown to me and marked as Exhibit "C" to this my Statutory Declaration is a photocopy of my birth certificate or other proof of age.
4. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission.
5. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

6. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 132,976. Now produced and shown to me and marked collectively as Exhibit "D" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012. - FORTHCOMING.

7. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012 is 0. Now produced and shown to me and marked collectively as Exhibit "E" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012.

8. I am financially able to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

OWN & OPERATE COMMERCIAL BROILER & BREEDER
(SPECIALTY) PRODUCTION FACILITY AT
5468 160 ST Surrey BC.

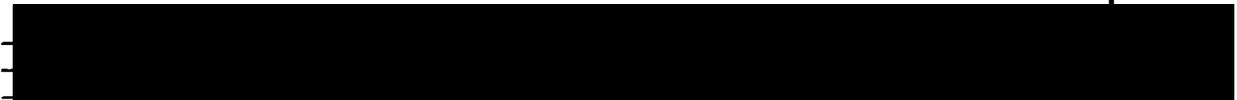

Now produced and shown to me and marked collectively as Exhibit "F" to this my Statutory Declaration are photocopies of documents material to my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. - FORTHCOMING.

9. I have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

CONTRACTED SUPPLY OF TC CHICKS TO LICENCED
BREEDERS SPECIALTY GROWERS.

Now produced and shown to me and marked collectively as Exhibit "G" to this my Statutory Declaration are photocopies of documents material to my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. - FORTHCOMING.

10. My Independent Production Unit is within economic access of a licensed Hatchery. Particulars of the proximity of my Independent Production Unit to the licensed Hatchery are as follows:

11. I am able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets.

12. I have made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from my production, namely: ROSSDOWN HATCHERY (name of licensed Hatchery).

13. Particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection 3(2) of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules* are as follows:

CURRENT & FUTURE CONTRACTS EXCEEDS HISTORICAL PRODUCTION QUANTITY.

Now produced and shown to me and marked collectively as Exhibit "H" to this my Statutory Declaration are photocopies of documents material to exceptional circumstances described above. — FORTHCOMING.

14. I am aware that any Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:

- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
- (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
- (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
- (d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and
- (e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

15. I am aware that Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be Transferred provided that it shall continue to be subject to all of the special restrictions described above.
16. I am aware that Regularized Producer Chick Quota cannot be converted to Placement Quota.
17. I am aware that any Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;
- failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.
18. I am aware that Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*:
- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.
19. I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same legal force and effect as if made under oath.

MEMO

TO: All Historically Non-Compliant Hatching Egg Producers

FROM: Stephanie Nelson, General Manager of the BC Hatching Egg Commission

DATE: February 7, 2014

SUBJECT: Application Deadline & Training Update

It has come to my attention that there have been ongoing administrative challenges in completing the applications; therefore the deadline has been extended further to February the 13th, 2014.

The training session has been arranged for Tuesday February 18th, 2014 at 10:00 am. at the Commission Office. This training session will be conducted by our national Food Safety Coordinator Victoria Sikur to train you in our food safety program and Sarah Zonneveld our provincial On Farm Program Coordinator to train you in both our Biosecurity and Premise Identification programs.

Please register with Veronica Kushnerenko: veronica@bcbhec.com or 604-854-4488 if you have not done so already.

Regards,

A handwritten signature in black ink, appearing to read "Stephanie Nelson". The signature is fluid and cursive, with a large loop at the end.

Stephanie Nelson

STATUTORY DECLARATION

The Applicant, and the Co-Applicant (if applicable), do each **SOLEMNLY DECLARE THAT:**

1. I am a Canadian citizen or permanent resident of Canada. Now produced and shown to me and marked as Exhibit "A" to this my Statutory Declaration is a photocopy of proof of Canadian citizenship or permanent resident status.
2. I am a permanent resident in the Province of British Columbia. Now produced and shown to me and marked as Exhibit "B" to this my Statutory Declaration is a photocopy of proof of permanent residence status in the Province of British Columbia.
3. I am at least 19 years of age as at the date hereof. Now produced and shown to me and marked as Exhibit "C" to this my Statutory Declaration is a photocopy of my birth certificate or other proof of age.
4. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission.
5. I have been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of application without a licence issued by the Commission and without Placement Quota allotted by the Commission.

6. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is [REDACTED] Now produced and shown to me and marked collectively as Exhibit "D" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

7. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012 is [REDACTED] Now produced and shown to me and marked collectively as Exhibit "E" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012. [REDACTED]

8. I am financially able to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

[REDACTED]

Now produced and shown to me and marked collectively as Exhibit "F" to this my Statutory Declaration are photocopies of documents material to my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs.

9. I have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

[REDACTED]

Now produced and shown to me and marked collectively as Exhibit "G" to this my Statutory Declaration are photocopies of documents material to my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. 

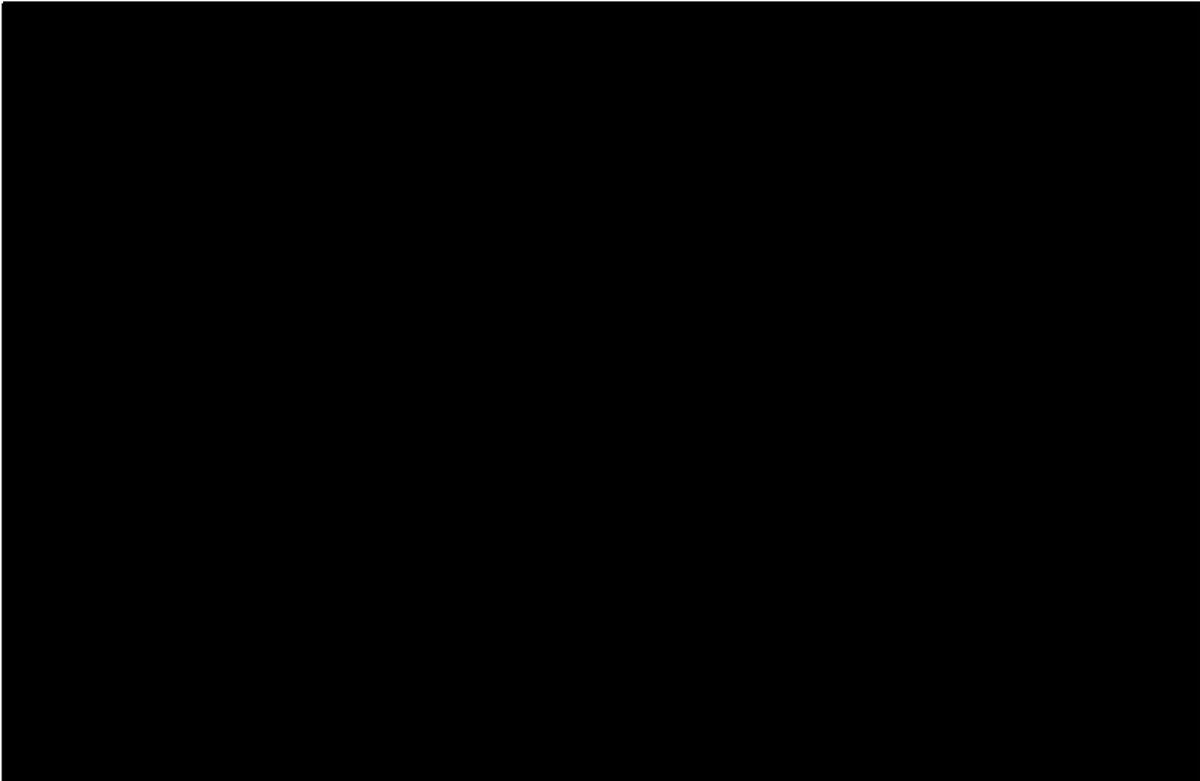

10. My independent Production Unit is within economic access of a licensed Hatchery. Particulars of the proximity of my Independent Production Unit to the licensed Hatchery are as follows:

11. I am able to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets.

12. I have made arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from my production, namely:  (name of licensed Hatchery).

13. Particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection 3(2) of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules are as follows:

Now produced and shown to me and marked collectively as Exhibit "H" to this my Statutory Declaration are photocopies of documents material to exceptional circumstances described above.

14. I am aware that any Regularized Producer Chick Quota allotted under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production only for so long as the entrant:

(a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;

(b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;

(c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;

(d) uses the Regularized Producer Chick Quota exclusively for the production of Silkie or Taiwanese Chicks; and

(e) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the Regularized Producer Chick Quota so allotted shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

15. I am aware that Regularized Producer Chick Quota allotted under the Regularization of Historically Non- Compliant Silkie and Taiwanese Producers Program may be Transferred provided that it shall continue to be subject to all of the special restrictions described above.
16. I am aware that Regularized Producer Chick Quota cannot be converted to Placement Quota.
17. I am aware that any Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program may be held for production only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;

failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.

18. I am aware that Temporary, revocable, non-transferrable export permit issued under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program:
- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.

19. I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same legal force and effect as if made under oath.

British Columbia Broiler Hatching Egg Commission
180-32160 South Fraser Way
Abbotsford, BC V2T 1W5

Attention: Stephanie Nelson, General Manager

Dear Sirs/Mesdames:

**Re: Particulars of Exceptional Circumstances for Skye Hi Farms Inc. and V3 Farms
in respect of their Regularization of Historically Non-Compliant Silkie and
Taiwanese Producers Program Applications**

We write on behalf of Skye Hi Farms Inc. (“Skye Hi”) and Casey van Ginkel dba V3 Farms (“V3”, collectively with Skye Hi, the “Applicants”), further to their applications filed February 5, 2014, to set out the particulars of the exceptional circumstances that justify an allotment of Regularized Producer Chick Quota to Skye Hi and V3 other than as provided for in subsection 3(2) of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules* (“Rules”) and to request that the Commission (1) grant Skye Hi and V3 collectively 415,000 units of regularized chick quota to be allocated 50% to each farm, that is 207,500 units each of Skye Hi and V3 at this time and (2) implement procedures that would permit the Applicants to grow their operations to achieve minimum efficient farm size of 5000 breeders as market growth and/or conditions make additional allocation available.

Enclosed with this letter is a request for a decision from the Commission permitting T&C Chick Sales, the Applicants’ joint venture chick broker (“T&C”), to continue to operate as a virtual hatchery following the implementation of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program. If both applications are granted by the Commission, the Skye Hi and V3 would sell all broiler hatching eggs produced to T&C, which would contract for hatching and placement of chicks with registered chicken growers.

By way of overview, Skye Hi and V3 are both registered specialty chicken growers who have been involved in the specialty chicken sector, growing Taiwanese chicken, since quota for that sector was made available by the British Columbia Chicken Marketing Board (the “Chicken Board”).

When specialty chicken quota was initially issued, the British Columbia Broiler Hatching Egg Commission (the “Commission”) did not issue specialty hatching egg quota. As a result, Taiwanese and Silkie chicken producers were required to purchase chicks that had been

produced outside of the quota system. The Chicken Board has worked with Taiwanese and Silkie chicken growers for the placements of chicks and, in some cases, has issued chick broker licences to Taiwanese and Silkie hatching egg producers.

In May 2010, the Commission advised specialty hatching egg producers that they did not intend to allocate quota to those who were producing or who may produce specialty chicks. That year, Skye Hi and V3 decided to pursue the production of specialty broiler hatching eggs to supply their Taiwanese chicken growing operations in order to guarantee a quality supply of chicks for their production of a breed of Taiwanese Chicken called “Shondon”, which is recognized by the Chicken Board. After advising the Commission of their plans, Skye Hi and V3 began to expand their farms to accommodate this new endeavour.

In 2012, Skye Hi and V3 expanded their operations beyond merely supplying their own chicken growing production to supply other licensed chicken growers. Their success can be attributed to the fact that their Shondon chicks have a low mortality rate and reach their marketable size more quickly than other specialty chicks, reducing overhead for chicken growers. Accordingly, their production of specialty hatching eggs has grown quickly, expanding to meet the demand of several registered specialty chicken growers in addition to their own operations. Their current production level under T&C Chick Sales (“T&C”) is exponentially greater than their production levels in 2010 but is lower than the minimum efficient farm size.

There are three factors that constitute exceptional circumstances in this case justifying a departure from the allotment of quota pursuant to subsection 3(2) of the *Rules* and the implementation of procedures that would permit the Applicants’ operations to grow to achieve the minimum farm size of 5000 breeder units as market conditions allow. First, a grant of discretionary quota above the default quota amount under the Amending Order is necessary to meet Skye Hi and V3’s current contractual commitments as well as the present market requirements of specialty chicken growers. Second, in order to permit for long term economically viable operations, the allotment of quota should reflect the principle of minimum efficient farm size that the Commission has already adopted in its regulation of mainstream producers. Finally, it would be unfair for the Commission having effectively acquiesced through its conduct in Skye Hi and V3’s establishment and growth of their hatching egg production operations to reduce the size of those operations through new regulation or to prevent Skye Hi and V3 from achieving minimum efficient farm size. Accordingly, Skye Hi and V3 should be allotted sufficient quota to meet their current contractual commitments and the procedures should be implemented to allow them to grow to a minimum efficient farm size.

Skye Hi and V3 rely on the affidavits of Casey Van Ginkel, Trevor Allen and Melissa Horton filed with BCFIRB in *Skye Hi Farms Inc. & Casey Van Ginkel dba V3 Farms v. British Columbia Broiler Hatching Egg Commission*, Appeal #14-01 (“Amending Order Appeal”), which have previously been provided to the Commission. Skye Hi and V3 as well as the Book of Documents Material to V3 Farms and Skye Hi Farms’ Exceptional Circumstances

(the “Book of Documents”), enclosed with the copy of this letter delivered by courier. The Book of Documents is organized by way of schedules that correspond to the Exhibits identified in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Application form. The Applicants consider certain of these documents to be confidential business records.

1. Skye Hi and V3’s continued production at current levels is necessary to meet current contractual commitments and market requirements

Subsection 3(2) of the *Rules* provides that an applicant who has complied with subsection (1) to the satisfaction of the Commission will be allotted 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from broiler hatching eggs produced by the applicant and placed with licensed chicken growers between January 1, 2009 and December 31, 2012. This calculation of allotment will not apply if the Commission is satisfied that exceptional circumstances warrant allotments in amounts other than as provided for in subsection 3(2) pursuant to subsection 3(3).

Skye Hi and V3 produced 96,144¹ and 132,976 Shondon chicks respectively from their eggs that were placed with registered specialty chicken growers in British Columbia between January 1, 2009 and December 31, 2012. Photocopies of documents evidencing the number of Shondon chicks hatched by Skye Hi and V3, referenced in the February 5, 2014 applications as Exhibit D, are attached hereto as **Schedules “A”** and **“B”** in the Book of Documents. At **Tabs A(1)** and **B(1)** of the Book of Documents, charts have been prepared tracking the number of chicks hatched by Skye Hi and V3, organized chronologically by hatching date. Those charts rely on the information provided to Skye Hi and V3 in the hatchery reports prepared by Rosstown Hatchery (the chart identifies the tab number at which the supporting hatchery report can be found). We are instructed that the hatching reports are the best evidence available on the number of chicks placed by Skye Hi and V3 as those reports are used by Rosstown to report the monthly number of chicks it hatched to the Chicken Board.

Because Skye Hi and V3 did not commence operations until 2010 and since commencing operations have substantially increased their production to meet market demand, the allotments that they will be entitled to under the default quota allotment set out in the Amending Order will fall far short of the allotment required to meet current contractual commitments. **Schedule C** of the Book of Documents includes documentation of Skye Hi and V3’s business growth over the course of late 2012 to the present. These documents show that beginning in 2013, Skye Hi and V3 have placed chicks with specialty chicken growers through T&C, their joint venture that has been licensed as a chick broker by the Chicken

¹ There is a discrepancy between the amount of chicks set out in Skye Hi’s February 5, 2014 application and the final number reported in this letter. The error in the application form arose from including certain breeder stock in the original calculation.

Board. In 2013, T&C hatched and placed 280,550 Shondon chicks (**Tab C(1)**). T&C now supplies eight licensed chicken growers (**Tab C(1)**).

T&C projects that in order to satisfy its current contractual commitments it will place 415,000 Shondon chicks (which includes the 4% increase in the number of chicks provided to growers to account for any early mortality) with registered chicken growers in 2014 (**Tab C(44)**). T&C's chick supply will be met through the combined production of Skye Hi and V3. To date, T&C has entered into 11 agreements for the purchase of chicks with licensed chicken growers to be placed in 2014 (**Tab C(25), (26), (32), (34), (38), (39), (40), (48), (49), (50), (51)**). Those contracts are entered into on a cyclical basis corresponding to the production cycles of growers.

T&C's contracts with chicken growers also reflect a desire of certain specialty chicken growers to grow chicks from the high quality specialty broiler hatching eggs produced by Skye Hi and V3. Mr. Allen's affidavit at para. 10 describes certain attributes of Shondon chicks that are desirable for both chicken growers and processors, including a lower mortality rate and faster growth than comparable Taiwanese chicks.

If Skye Hi and V3 are allotted quota in accordance with subsection 3(2) of the *Rules*, these growers will face a shortage in the supply of Shondon chicks to meet their chicken quota allocations, disrupting the specialty chicken market.

Sound marketing policy should favour allowing Skye Hi and V3 to honour their contracts and allowing specialty chicken farmers to grow the Shondon chicks they have contracted for. This is particularly true given the attributes of their chicks and, as described further below, the previous absence of regulation in this area.

In order to meet current contractual commitments, collectively, V3 and Skye Hi would require an allotment sufficient to allow them to produce 415,000 hatching eggs to sell to T&C annually.

2. Skye Hi and V3's longterm economic viability requires the ability to grow to achieve minimum efficient farm size

Skye Hi and V3 have increased their market share since 2010. They have built additional barns and have expanded the size of their operations in order to supply their own chicken growing operations and to meet demand for their specialty chicks. However they remain small, niche operations, operating below the 5000 breeder unit level.

As set out above, if Skye Hi and V3's quota allocation is calculated in accordance with subsection 3(2) of the *Rules*, they will have insufficient quota to supply even their own farms, let alone the customers they have committed to supply, harming the customer relationships they have developed and reducing their operations' economic viability. Moreover, as the Amending Order does not provide a pathway for small producers to grow to

achieve minimum farm size as the market grows, there is no mechanism presently upon implementation of the Amending Order that would permit them to grow their hatching egg operations to achieve minimum efficient farm size.

As will be well known to the Commission, a farm cannot sustain economically viable production below a certain level. The Commission has recognized this principle, as reflected in its regulation of mainstream producers in the Consolidated Order of September 30, 2012. Paragraph 8(2)(d) of the Consolidated Order provides that no producer shall be permitted to hold an allotment of placement quota of less than 12,000 broiler breeder pullets per quota period, except in circumstances of an entrant under the New Producer Program Rules or an entrant under the Small-Lot Innovative Self-Marketer Program. In the case of an entrant under the New Producer Program Rules, an applicant that meets the requirements for admission is allotted 5,000 broiler breeder pullets: Schedule 1, s. 4(4). An entrant under the Small-Lot Innovative Self-Marketer Program can be allotted placement quota “sufficient to satisfy the applicant’s current requirements according to the amount of grower quota allotted to the applicant by the [Chicken Board], up to a maximum of 5,000 broiler breeder pullets”: Schedule 8, s. 3(3). In implementing this small lot program, the Commission gave effect to the principle that special regulatory accommodations are on occasion necessary to give a “leg up” to encourage innovation and diversification: *Decision Re: Polderside Farms Inc.*, August 11, 2010, at p.13. Skye Hi and V3 suggest that a similar approach should guide the allotment of quota in the context of the specialty broiler hatching egg producers.

V3 and Skye Hi are small operations that focus on producing a particular specialty breed of chicken, Shondon Taiwanese chicken, for which there is increasing market demand. Their operations have been growing because they offer a high quality product that is attractive to registered chicken growers and processors. Their growth has resulted from growth in the specialty chicken sector; that is, while it may have impacted market share, their growth has not reduced the overall production of other specialty hatching egg producers. They have grown to meet increased market needs for Taiwanese chicken and responded to a market niche as it emerged.

V3 and Skye Hi’s continued operation is good for the specialty hatching egg and special chicken industries; a policy that would promote their continued economic viability is consistent with sound marketing policy. Skye Hi and V3 seek quota allotment that at minimum allows them to maintain viable production levels to sustain their hatching egg operations, which they estimate requires quota sufficient to allow them to produce chick quota equivalent to 5000 breeder units, collectively. Photocopies of documents material to V3 and Skye Hi’s financial ability to maintain an acceptable independent production unit and economically viable plans to sustain the production of their Shondon broiler hatching eggs at current levels are included in **Schedule “C”** of the Book of Documents.

3. The Commission effectively acquiesced in Skye Hi and V3's establishment and growth of their hatching egg production operations

Fairness dictates that the Commission should exercise their discretion to grant Skye Hi and V3's request for quota above the default provisions and implement procedures that would permit Skye Hi and V3's operations to achieve minimum farm size in the circumstances as Skye Hi and V3 established and grew their specialty broiler hatching egg business with the effective acquiescence of the Commission.

As set out in more detail in the stay application filed by Skye Hi and V3 in the Amending Order Appeal, the conduct of the Commission led Skye Hi and V3 to believe that no quota regularization program for Taiwanese hatching eggs would be pursued by the Commission. The Applicants took cautious steps to ensure the Commission was aware of their plans to establish a business that would produce specialty broiler hatching eggs. No objection was ever raised by the Commission regarding these efforts to produce specialty broiler hatching eggs. Nor was there any suggestion made that Skye Hi and V3 were required to obtain a licence or quota before commencing production.

After the Commission gave notice to producers on May 2, 2011 that it would commence a consultation process to regularize specialty broiler hatching egg production, Skye Hi and V3 made a number of efforts to express their position to the Commission that the calculation of quota based on historical production levels would be insufficient to meet their current production obligations and to maintain the economic viability of their operations. As the consultation process stretched out over close to three years, Skye Hi and V3 continued to expand their production of broiler hatching eggs in response to demand from registered specialty chicken growers.

Photocopies of additional documents material to Skye Hi and V3's exceptional circumstances pertaining to the acquiescence of the Commission are included in **Schedule "D"** of the Book of Documents.

The calculation of quota based on subsection 3(2) will not provide Skye Hi and V3 with sufficient quota to meet their contractual obligations. For the reasons set out in our letters of April 3 and July 19, 2013, an application of the SAFETI principles to the exceptional circumstances set out in this letter warrant departure from the general quota calculation approach provided for in subsection 3(2) in order that Skye Hi and V3 be allotted one unit of chick quota for each chick currently committed and contracted for placement with a licensed chicken grower such that the collective allotment of Skye Hi and V3 would be 415,000 units of chick quota to be allocated between them, allocated 50% to each farm. Moreover, implementation of procedures that would permit the Applicants to grow their operations to achieve minimum efficient farm size as the market for specialty hatching egg growers is consistent with the application of BCFIRB's September 1, 2005 directions concerning how specialty production, new entrant and quota programs were to be administered.

We would be pleased to answer any questions or provide additional information about the Applicants' operations if that would be of assistance to the Commission in reaching a decision on this application.

Yours truly,

Hunter Litigation Chambers

British Columbia Broiler Hatching Egg Commission
180-32160 South Fraser Way
Abbotsford, BC V2T 1W5

Attention: Stephanie Nelson, General Manager

Dear Sirs/Mesdames:

Re: Request for a Decision re: continued operation of T&C Chick Sales

We write on behalf of Skye Hi Farms Inc. (“Skye Hi”) and Casey van Ginkel dba V3 Farms and T&C Chick Sales (collectively, the “Applicants”) further to our letter of today’s date setting out the circumstances that justify an allotment of quota other than as provided for in section 3(2) of the *Regularization of Historically Non-compliant Silkie and Taiwanese Producers Program Rules* to request a decision from the British Columbia Broiler Hatching Egg Commission (the “Commission”) permitting T&C Chick Sales to continue to operate as a virtual hatchery following the implementation of Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program.

The Applicants rely on the affidavits of Casey Van Ginkel, Trevor Allen and Melissa Horton filed with the British Columbia Farm Industry in *Skye Hi Farms Inc. & Casey Van Ginkel dba V3 Farms v. The British Columbia Broiler Hatching Egg Commission*, Appeal #14-01 (“Amending Order Appeal”) which have previously been provided to the Commission.

Skye Hi and V3’s Hatching Egg Production Business

Skye Hi and V3 are both registered specialty chicken growers who have been involved in the specialty chicken sector since quota for that sector was made available by the British Columbia Chicken Marketing Board (“Chicken Board”).

Because when specialty chicken quota was initially issued, the Commission did not issue specialty hatching egg quota, specialty chicken producers were required to purchase chicks that had been produced outside of the quota system. The Chicken Board has worked with specialty chicken growers in order to make placements of chicks and in some cases has issued chick broker licences to specialty hatching egg producers. In May 2010, the Commission advised specialty hatching egg producers that they did not intend to allocate quota to those who were producing or who may produce specialty chicks.

In 2010, after advising the Commission of their plans, Skye Hi and V3 took steps to create a business that would produce specialty broiler hatching eggs to supply their chicken growing

operations in order to guarantee a quality supply of chicks for their operations of a breed of Taiwanese Chicken called “Shondon” which is recognized by the Chicken Board.

Skye Hi and V3 have experienced success as hatching egg producers. Their chicks have a low mortality rate and reach their marketable size more quickly than other specialty chicks, reducing overhead for chicken growers. Accordingly, their production of specialty hatching eggs has grown quickly expanding to include several registered specialty chicken growers in addition to their own operations. Their current production level is currently significantly greater than their production in 2010.

T&C Chick Sales’ “Virtual Hatchery” Operations

In 2012, Skye Hi and V3 created T&C Chick Sales (“T&C”) through which they conduct the sale of hatching eggs to chicken growers. T&C has had a chick broker licence from the Chicken Board since it commenced operations.

T&C does not have a physical hatchery operation but operates as a “virtual hatchery”. T&C purchases specialty hatching eggs from Skye Hi and V3 and makes arrangements with a physical hatchery to hatch the eggs, contracting with a physical hatchery for it to pick up and hatch the eggs, and vaccinate and deliver the surviving chicks to the specialty chicken grower.

T&C retains control over the chicks, determines the price at which they will be offered for sale, negotiates and signs a contract as “hatchery” for each placement of chicks with the chicken grower and the grower’s processor. This service is advantageous for specialty chicken growers as it permits them to retain a degree of control over the selection of chicks and in particular to ensure that they are able to grow Shondon chicks.

Request for Determination

Amending Order 11, which creates a scheme to regulate the production of Taiwanese and Silkie hatching egg production does not explicitly authorize an entity operating as a virtual hatchery in the manner that T&C operates and does not include any provision for continued operation of those entities currently licensed by the Chicken Board to continue operations.

Section 24 of the Consolidated Order provides that no Producer shall market Broiler Hatching Eggs other than (a) through the Commission, (b) to a Hatchery, (c) to a breaker or (d) as may otherwise be directed by the Commission. The definition of “Hatchery” is “a Person operating a facility for the hatching and incubation of Broiler Hatching Eggs into broiler chicks for delivery to a Grower.” While Amending Order 11 provides for the inclusion of specialty producers as “Regularized Producers” it does not make any changes to the definition of “Hatchery” requiring a “facility” or to the requirements of section 24 with the effect that T&C may not be permitted to continue to operate as a chick broker acting as a “virtual hatchery”.

In its March 6, 2014 decision denying the appellants' application for a stay in the Amending Order Appeal on the basis that irreparable harm had not been established in the absence of decisions from the Commission on the issuance of quota and the continued operation of T&C, the British Columbia Farm Industry Review Board observed that the Commission "has the authority to make 'special directions' to recognize in some fashion the appellants' business model of a 'virtual hatchery'" (para. 43).

Accordingly, Skye Hi, V3 and T&C seek a decision or determination from the Commission pursuant to section 24(d) of the Consolidated Order permitting T&C to continue its operations as a virtual hatchery such that Skye Hi and V3 may continue to market specialty hatching eggs to T&C and, so long as T&C maintains its chick broker from the Chicken Board, T&C may continue to negotiate contracts with specialty chicken growers to place chicks with registered specialty chicken growers.

We look forward to hearing from the Commission as to its determination on this issue. Please let us know if you require any additional information to consider this request.

Yours truly,

Hunter Litigation Chambers

¹ On December 22, 2010, Skye Hi Farms sold specialty broiler hatching chicks to W. Friesen (Tab 2(2)). The eggs were picked up by Rosstown Hatchery from Skye Hi Farms and invoiced to W. Friesen (Tab 2(3)). This arrangement allowed W. Friesen to meet its placement obligations. In turn, W. Friesen paid for the chicks purchased by Skye Hi Farms to supply its own growing needs (Tab B(4)).

² On May 25, 2011, Skye Hi Farms sold specialty broiler hatching chicks to W. Friesen (Tab B(2)). The eggs were picked up by Rosstown Hatchery from Skye Hi Farms and invoiced to W. Friesen (Tab B(5),(6)). This arrangement allowed W. Friesen to meet its placement obligations. In turn, W. Friesen paid for the number of chicks purchased by Skye Hi Farms to supply its own growing needs (Tab B(4)).

TOTALS				

Part 17 Chick Placements

17.2 Every chick broker who sells or distributes chicks other than chicks marketed for the purpose of being used in the production of eggs shall file with the Board a report on an approved form, unless another form provided by the broker is approved by the Board, indicating the customer's name, address, phone number, the number of chicks sold or placed and the date of sale or placement. This report, in addition to meeting the requirements of Part 56, shall be forwarded to the Board by the first day of the month following the sale or distribution of chicks.

Part 17 Chick Placements

17.2 Every chick broker who sells or distributes chicks other than chicks marketed for the purpose of being used in the production of eggs shall file with the Board a report on an approved form, unless another form provided by the broker is approved by the Board, indicating the customer's name, address, phone number, the number of chicks sold or placed and the date of sale or placement. This report, in addition to meeting the requirements of Part 56, shall be forwarded to the Board by the first day on the month following the sale or distribution of chicks.

MERRY CHRISTMAS

VOLUME 5

AVIAN INFLUENZA—NOVEMBER 18, 2005

On December 10th, 2005 the CFIA lifted the quarantine on all farms in the 5km zone in Yarrow. In order to improve preparedness for this type of animal disease emergency, the industry is planning a "post mortem" of the event in January 2006.

We would like to extend our heartfelt appreciation to the veterinarians of our industry for their quick response to the discovery of Avian Influenza in a duck on a farm in Yarrow. It was their initial take-charge response that allowed the industry to function fairly normally throughout the quarantine period that lasted from November 18th to December 10th.

Thanks to Dr. Neil Ambrose, Dr. Stew Ritchie and Mike McIwee, Dr. Bill Cox, Dr. Bill Gibb and Dr. Ralph Hopkins.

We would also like to thank the BC MAL Lab staff and Dr. Victoria Bowes for their work and commitment during the quarantine period as well.

Dave, Lori, Barry and Angela would like to thank all of our farms in the quarantine zone for all of your patience and cooperation.

This time around the communication and cooperation between producers, industry, government and CFIA must be noted! We all worked very well together and are taking steps for an even

better response for the future should we have another positive AI test result.

FREE INFLUENZA VACCINE FOR THOSE WHO WORK WITH LIVE DOMESTIC SWINE AND POULTRY.

The BC Centre for Disease Control is providing vaccination free to persons who regularly handle or are in the same confined airspace as live domestic swine or poultry (farm workers, veterinarians, and abattoir workers). To receive the vaccination free of charge you must state that you work with live poultry at the time of vaccination. See your doctor or attend an immunization clinic. See <http://www.healthservices.gov.bc.ca/socsec/index.html> for more information.

WWW.BCBHEC.COM—CHECK OUT OUR WEBSITE!

Visit our NEW website!
www.bcbhec.com

Have a look at the newly released website for the BC Broiler Hatching Egg Commission. We are proud to offer many links to information that both the public and our producers would find useful. In the future we will

have a producer only side which would be accessed by an individual producer's username and password. Here a producer could enter production information for his flock and farm to compare it to a "provincial" average of those who have also used the website. There will be a message board for pro-

ducers to use between themselves as well as a classified section to post roosters for sale, employment opportunities, ads for equipment, etc. We will be showcasing the website at the January 10th Producer Meeting at the Ramada at 7:00PM. See you there!

MANAGERS REPORT — DAVE CHERNIWCHAN

SUPPLY:

Since the last newsletter, we have seen domestic egg supply increase to pre-AI production. Thanks to our hatcheries for working with the Commission in reducing their imports and using domestic eggs through the lowest set period of Sept/Oct. Together, we did not send any eggs to the breakers. Our fowl is now on a regular kill schedule, which also helped the relief of any surplus. Since that period we now see imports being brought in on a regular base. Kill age is still at 60 +/- 1 week.

The hatcheries are reporting very good hatches from flocks currently in production. One issue we face with such good hatchability and good production is that our supply may exceed hatchery requirements. Hopefully we will not have to move any eggs to the breakers or reduce the current kill age. The 2006 chicken allocation was set last week with an increase of only 0.05% in kilograms of chicken over 2005. We are in a holding pattern as far as maintaining our current kill age and domestic egg supply in BC.

NEW ENTRANT PROGRAM:

The Commission has changed the new entrant program to incorporate transferable issuance of quota to all new entrants. With this new policy it's based on a 10 - 10 - 10 program which after 10 years 90% is transferable and the remaining 10% goes back into a pool for the next new entrant. We are now writing a policy for all hatching egg producers. If and when, new growth is issued this same program will apply to all current hatching egg producers. The Commis-

sion will be informing all producers and industry stakeholders of the recommendations and changes.

SPECIALTY BIRDS:

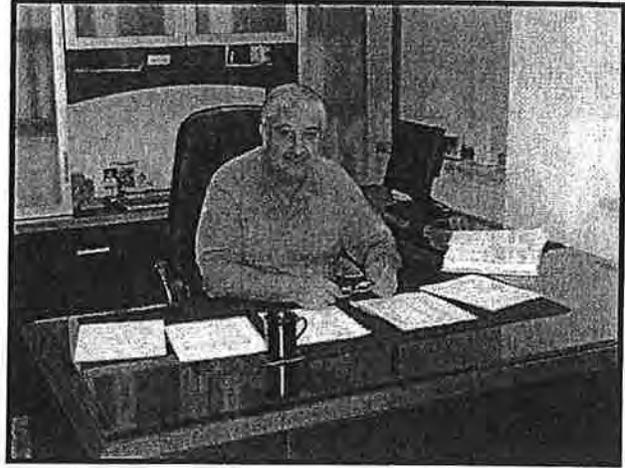

The Commission's position that a specialty program is not required for broiler hatching eggs at this time is accepted by FIRB, but is subject to the condition that, should designated specialty chicken produced in accordance with the BC Chicken Marketing Board regulations require specialty chicks, the Commission should develop and introduce a specialty program. The Commission is currently in the process of writing exemption regulations for all specialty producers. These are silkies, Taiwanese, etc. breeders.

TRANSFER ASSESSMENT:

The Commission will have a 5% direct transfer assessment on all quota transfers upon the approval by FIRB/MAL. This program is part of the new entrant program which will be ordered early in the New Year. All producers and stakeholders will be kept informed.

NON HATCHING EGGS:

The Commission will be reviewing cooler sizes. We have become aware that some producers are not holding their non hatching eggs in their coolers. The new CHEQ program requires that all non hatching eggs be stored in the hatching egg cooler for a maximum of 7 days. If your non hatching eggs remain on the farm for more than 7 days, they must be refrigerated or destroyed. The Commission has also been informed by the Vancouver Health Authority that hatching eggs were being found in bakeries. These eggs are not

to be sold to vendors or peddlers for resale. Since this discovery the Commission will be introducing a penalty to curb incentives of vendor sales. This penalty system should be in place early next year.

NATIONAL:

CBHEMA is currently involved with the federal provincial agreement and countless efforts in preparing for the next round of WTO talks being held in Hong Kong in December. It is of the utmost importance that supply management remains untouched with Over Quota Tariffs. Our grip on this matter at the WTO is getting harder and harder to maintain. Our National Agency Executive Committee is participating in the WTO talks in Hong Kong. As producers receive their updates on the talks in Hong Kong, the Commission is asking to get the white SM5 cards signed and sent in, to either Lori or the address on the card, to show support. We need all we can get as the talks are really heating up and supply management is a crucial concern to all SM5 commodities in Canada.

CONSOLIDATED ORDER REVIEW:

The Commission reviewed the Consolidated Orders of 1999 in late June. The Commission has sent the Orders to the BC Egg Hatchery Association for their review. A consultation meeting was held with the Commission and the BCEHA who agreed on the changes to be made. The Commission has also reviewed these draft orders with PPAC. Another meeting is scheduled to complete the changes agreed upon by all parties. This process should be completed by the early next year.

HAVE A VERY MERRY CHRISTMAS AND A BLESSED NEW YEAR!

March 17, 2010

General information regarding "Specialty Broiler Breeders"

On March 12, 2010, the British Columbia Broiler Hatching Egg Commission hosted a meeting to discuss the regulation of "specialty" broiler breeders.

Excluding the General Manager of the BC Chicken Marketing Board and Commission representatives, 12 individuals attended the meeting.

The views of stakeholders were solicited as to the extent of regulatory intervention that should be applicable to "specialty" broiler breeders. All those who expressed a view on the subject were unanimous in the view that regulation should extend only to premise identification and the application of biosecurity and food safety rules. Concern was expressed that any ambiguity on this point could have a disruptive affect as persons might be inclined to place flocks in the expectation that doing so might result in an entitlement to an allocation of quota. Those who expressed a view on the matter were unanimous in requesting that the Commission provide a clear statement that regulation will extend only to premise identification and the application of biosecurity and food safety rules.

Accordingly, the Commission is hereby communicating that there is no plan to allocate quota to those who are producing (or who may produce) "specialty" broiler breeders. Consistent with the views of meeting participants, the Commission intends to introduce rules for "specialty" broiler breeders only in so far as is necessary to achieve the objectives of premise identification, biosecurity and food safety. A copy of this notice will be published on the Commissions' website.

There was some discussion concerning the definition of a "specialty" broiler breeder. The consensus expressed at the meeting was that a "specialty" broiler breeder is one that is placed for the purpose of satisfying the unique "Asian" chicken market. It was noted that approximately 80% of that market is chicken that is marketed to consumers with head and feet on. Silkies, Taiwanese and Loong Kong were identified as breeds typically placed for that purpose. The Commission will be formulating a definition for "specialty" broiler breeder so as to clearly distinguish such breeders from mainstream breeders (which include those from Hubbard ISA, Cobb Vantress, or Ross and will be preparing draft rules intended to implement premise identification, biosecurity and food safety requirements.

Dave,

Thanks for taking some time and talking with me yesterday. Further to our discussions, here is a basic outline of what we have put together.

I am just completing the installation of the equipment in a newly renovated 30' x 80' (2400 sq.ft.) breeder barn, where I plan to place approx. 600-800 specialty Asian breeders (to start) in the coming weeks. Trevor and I will be working together to supply our own production, while actively pursuing other markets both here and in the US. The plan would be to increase the breeder quantity to 1200 next year (maximum for the space), as we develop these new markets.

The premise ID for my farm is [REDACTED] and my contact information is as follows:

V3 Farms

As mentioned in the e-mail sent by Mr. VanGinkel, we will be working together in order to establish a viable enterprise to supply local and international markets. We operate separate farms and will be known as separate entities while working in a co-op of sorts. I have started construction of and purchased equipment for a 76'x40' barn exclusively for the production of specialty broiler breeders. My farm identity # is BC339DETC. I look forward to further discussion with yourself and the industry.
Trevor Allen.

Dave,

Just thought I'd drop you a line to let you know that I have got my TC breeder production up and running. If there are any biosecurity manuals/ documents that specifically pertain to hatching eggs that are necessary or might be of benefit to me, please send them to me or let me know and I could pick them up.

Regards,

Casey van Ginkel

Trevor Allen and Cheryl Tarbet

Dear Trevor and Cheryl,

As you may be aware, the Board has been dealing with the issue of a shortage of specialty quota that has been caused by a number of reasons including:

- Repatriation of quota to the mainstream sector that had been used to grow specialty chicken prior to the FIRB specialty review and resulting changes to the January 23, 2006 BCCMB General Orders.
- Increases in processor allocation granted to specialty processors as a result of round two of *Part 8, New Entrant Program* for Processors of the General Orders.

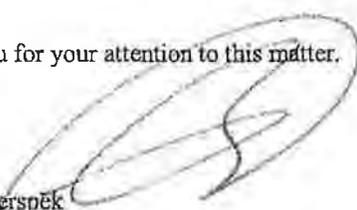

The Board has made several decisions and has a plan in place that will address the shortage of specialty quota in several stages. One of these stages will involve a **31.75% pro-rata allocation** of additional specialty quota to all specialty quota holders.

Effective June 24, 2007 your specialty quota of 7,716 kilograms is increased by 2,450 kilograms to a total of 10,116 kilograms based on an eight week cycle. Based on an eight week cycle, your registered space of 8,000 square feet is sufficient under *Part 34 Barn Space* of the General Orders to produce this amount of product. The Board is aware that most specialty chicken is grown on a cycle length greater than eight weeks and has plans to update the square footage requirements under *Part 34* for specialty chicken in the near future. In the interim please ensure that you have sufficient space to grow your chicken in accordance with the specifications previously agreed to between you and your processor.

The newly issued 2,450 kilograms of specialty quota will have an effective date of June 24, 2007 for the purposes of *Part 36 Quota Transfer Assessment* of the January 23, 2006 General Orders. (Copy attached).

Should you have any questions or require clarification, please do not hesitate to contact me directly.

Thank you for your attention to this matter.

RE: NOV 8 2012, MEMO, DRAFTED ORDERS CHANGES REFLECTING THE ADDITION OF SPECIALTY REGULATIONS

Thank you for the opportunity to present our concerns regarding the above noted changes. We appreciate the time and effort to create the proposed drafted orders. However, as specialty hatching egg producers and independent marketers of chicks, we fear that the proposed orders as written will ultimately cause the termination of our businesses. We also feel the entire value chain of specialty chicken will suffer due to the limited amount of choice producers and processors will have if the orders are implemented as written.

We are two Specialty Broiler Producers who have participated in the BC Chicken sector for several years. Since the start of our individual broiler production units we both recognized the potential and aspired to become specialty broiler breeder producers. By producing our own chicks we would be better able to manage our quota obligations (as chick availability was constantly fluctuating), increase our return on investment by producing a better chick and build financially viable businesses. At the time, there were only two other Taiwanese chick suppliers; another grower and a processor owned flock. We felt the industry as a whole would be better served if the producers had more available sources for chicks. Through the ability to co-operate with each other (each raising a "half flock" and combining eggs for placements), purchasing of

used equipment, contracting of our own buildings and installation of our own equipment, when we started we were able to cover the everyday operating costs with the potential for profit in future chick sales. All our efforts of co-operation, research, and hard work were based on the potential of future sales in an open market. Now it seems that this open market is about to be closed and our supply of chicks reduced to an unviable amount. These orders need to allow for the regulation of product at the farm gate, but still allow flexibility for us as chick marketers (virtual hatcheries) to supply an ever evolving open chick market. We sincerely hope that using FIRB's principle based approach "SAFETI" will result in the creation of a program which will allow our farm operations to continue to be viable.

Below are concerns which we identified and some possible solutions to them. If not addressed they will have significant negative effects on not only us as producers and marketers of chicks, but on the entire specialty chicken industry;

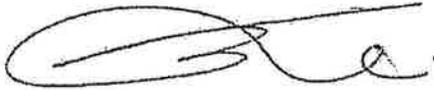

- 1) **Production data from 2009 to 2010 does not represent current market conditions.** Specialty breeder production is dictated by customer and processor demand. Today's production level and bird types are not comparable to that of three years ago, therefore allocation needs to be based on current conditions. We had just started production in mid 2010. Since that time we have signed BCCMB contracts with two large producers and one processor for the supply of chicks. Our current requirements are approximately 25 times more than what we produced in 2010.
- 2) We compete in an open market of supplying chicks to other BCCMB licensed producers. In the capacity of a hatchery, we sign BCCMB contracts (BC101-5) with processors and growers for the supply of our chicks. If our production is regulated (by the chick) As the BCBHEC is proposing, no BCCMB grower would ever be able to switch chick suppliers, as no supplier would ever have more chicks than the quantity of the chick quota that they were first issued. **Chick based quota based on a two year total chick production will dictate the type of chicken produced and will disallow market responsive production.** (In our industry every chick producer operates essentially as a hatchery and should be recognized as such-"virtual hatchery")
- 3) Our production is based on settable eggs in a one week period. We require enough breeder pullets to produce the quantity of fertile eggs needed to meet the growers placement size (chick placement quantity is determined by BCCMB quota allocation and processor requirements). **Allocation, whether its breeder hen or chick based, must reflect our production needs of a one week period.** The weeks with no scheduled chick placements would provide the supply to service new customers in a changing market. Our hatchery businesses would then have the available product to compete with in an open market of chick sales. Excess eggs produced in "non set" weeks could be our responsibility to dispose of in an approved manner if participating in

the Surplus Egg Removal Program was cost prohibitive. This type of management of our sector would parallel the mainstream broiler hatching egg producer model.

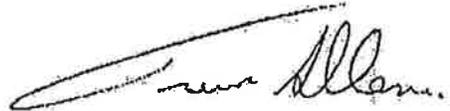

- 4) As specialty broiler producers, we were involved in the development of the current specialty broiler pricing and production protocols as set out by the BCCMB. This process of grower input resulted in a stable and market responsive industry. From our experience, we would encourage the BCBHEC to involve specialty hatching egg producers in the development of the specialty hatching egg industry. **The BCBHEC needs to allow for the creation of a Specialty Market Advisory Committee in its proposed orders.** As there are only 6 specialty hatching egg entities, a committee could be struck allowing each entity the ability to participate.

Again we would thank you for the opportunity to present our concerns for your consideration. We sincerely hope that you can create a program which will allow for a sustainable and financially viable industry for all.

Respectfully submitted,

Casey J. Van Ginkel

British Columbia Broiler Hatching Egg Commission
180-32160 South Fraser Way
Abbotsford, BC V2T 1W5

Attention: Stephanie Nelson, Acting General Manager

Dear Ms. Nelson:

Re: Proposed draft order to “regularize” specialty broiler breeders

We have been retained by Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales, in respect of the proposed draft order to “regularize” the specialty broiler breeder industry through the issuance of quota.

As you know, the specialty broiler breeder industry has long been operating without formal regulation by the British Columbia Broiler Hatching Egg Commission (“BCBHEC” or the “Commission”). We are instructed that in 2010, Skye Hi Farms and V3 Farms, both quota-holding producers of specialty chicken, notified the then-General Manager of the BCBHEC of their intention to build additional barns on their farms in order to commence production as specialty breeders for their own farms. No objection was raised to the proposed production by the then-General Manager, nor was there any suggestion that production could commence without a licence or quota. As the Commission acknowledged in its May 2, 2011 notice to the industry, it is “well known throughout the industry” that specialty broiler breeders have been operating without licence or quota.

Skye Hi and V3 have been operating as specialty breeders since 2010. They have been supplying their own farms and have developed expertise in breeding specialty hatching eggs. As a result of the success of their breeding operations, they have recently acquired three customers in addition to their own farms—also licensed specialty chicken producers—and have entered into commitments to supply chicks to these farms. It is estimated that fulfilling their commitments to the three customers and supplying their own farms will require annual chick sales of 300,000-350,000 chicks.

Schedule 9 to the draft order entitled “Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules” would allot “0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province

between January 1, 2009 and December 31, 2012". T&C Chick Sales estimates that this method of calculating quota, if implemented, would result in their being allotted production of approximately 50,000 chicks between the two farms, which would not provide sufficient quota to supply even their own farms, let alone the three new customers that they have committed to supply.

It is submitted that the proposed draft order should be revised to provide for one unit of chick quota for each chick committed and contracted for placement with a licensed chicken grower in the nearest quota period immediately before implementation of the new order. As set out further below, such a modification would be consistent with the Farm Industry Review Board's guidance for the implementation of specialty market regulation and with the 'SAFETY' principles-based approach to governance expected of marketing boards in their decision making.

I. The proposed modification is consistent with FIRB Policy

On September 1, 2005, the British Columbia Farm Industry Review Board ("FIRB") issued general directions to the supply managed commodity boards in British Columbia, including the BCBHEC, concerning how specialty production, new entrant and quota programs were to be administered. The report provided that boards "should have plans to register all producers regardless of size or type of license" (1.2(11)(a)) and that "Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced. . . Production volumes recognized for quota should be equal to the permittee's production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004" (1.2(11)(i), emphasis added).

With respect to the development of quota, the following policy directions were given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity. (5.5)

With respect to the conversion of permits to quota, the following policy directions were given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period. (5.6, emphasis added).

FIRB's letter to Bruce Cook dated February 9, 2006 summarizes that BCBHEC submitted draft orders to FIRB in response to a requirement that the boards draft orders in compliance with the general directions and submit them to FIRB. Following some modifications, FIRB approved the draft orders based on a number of understandings, including:

First and foremost, Commission allocation policies and decision-making are expected to be in accordance with the Ministry's 'Regulated Marketing Economic Policy' and FIRB's September 1, 2005 directions. This includes being responsive to specialty, niche and other innovative marketing opportunities when the need for those become evident in the B.C. hatching egg industry.

The thrust of FIRB's guidance with respect to a program of "regularizing" a specialty industry is that at a minimum, those who have been producing the product for which quota is to be issued are to be issued sufficient quota so as to permit continued production at the level of production in place immediately before the issuance of quota and so as to allow producers to meet their production commitments. While the initial proposal in May 2011 would have recognized production levels between January 1, 2010 and December 31, 2010, the delay in approving and implementing the draft order has meant that production levels of some producers, including Skye Hi and V3 Farms have changed significantly in the intervening years.

The FIRB directions suggest that any new order should provide for quota that allows current producers to continue production at their current levels and meet current commitments.

II. The proposed modification is more consistent with the SAFETI principles

FIRB has identified six principles to assist marketing boards in interpreting and implementing principles-based regulations within their respective mandates represented by the acronym SAFETI: strategic, accountable, fair, effective, transparent, inclusive: *BCFIRB's 6 Higher-Level Principles – Definitions and Guidance*, Sept 2011 ("*6 Higher-Level Principles*"). It is submitted that the modification proposed above is more consistent with a SAFETI analysis than the current draft.

Strategic – This principle requires that BCBHEC "Identify key opportunities and systemic challenges and plan for actions to effectively manage risks and take advantage of future opportunities" (*6 Higher-Level Principles*, at p. 3). Here, in its May 2, 2011 communication "General Information regarding 'Specialty Broiler Breeders'", the Commission has identified the goals of (1) complying with FIRB's direction to ensure that all producers be regulated to ensure biosecurity, premise identification and food safety and (2) the desire to prevent a "race for quota". In support of the latter goal, the communication suggests that the period January 1, 2010 to December 31, 2010 be used to identify those eligible for the "regularized production certificates" and issuance of quota.

Using a date prior to the implementation of any draft order to identify those eligible for issuance of quota may achieve the goal of preventing a race for quota, however, given the time that has passed since the initial consultation on the new order without finalization or implementation of the new order, there is no connection between the objective of preventing a “race for quota” and using the 2010 time period to identify eligibility. Nor is there any connection between this goal and the proposal to use production levels from 2009 – 2012 as a basis for the issuance of quota.

Moreover, it is submitted that allowing specialty hatching egg producers to honour production commitments made with special chicken producers is sound marketing policy. FIRB has recently considered the role of open contracting in developing sound marketing policy in the context of a supervisory review that considering assurance of supply in the chicken industry. In that context, FIRB stated that “a sound marketing policy is one that creates a working climate that recognizes the importance of meeting customer needs at all levels to promote a sustainable industry – from growers through to consumers”: Decision dated June 9, 2010, In the Matter of the *Natural Products Marketing (BC) Act* and a Supervisory Review of BC Chicken Marketing Board Pricing-Related Recommendations at para. 63 and that “the movement of growers between processors could work to the benefit of all parties ensuring a better fit between grower and processor needs, resulting in longer term contracts” at para 66. Here, the proposed draft order that would lock in market share for specialty hatching egg producers at a historical level and would ignore the commitments made between producers of specialty hatching eggs and specialty chicken does not promote positive relationships between producers and is not sound marketing policy.

Accountable – This principle requires that BCBHEC “Maintain legitimacy and integrity through understanding and discharging responsibilities and reporting performance” (6 *Higher-Level Principles*, at p. 3). Here, implementation of an order that would reduce Skye Hi and V3 Farms’ quota to a level below that required to produce their own farms and meet current commitments is not consistent with the principle of accountability. Skye Hi and V3 Farms have kept the BCBHEC informed of their intention to commence and expanding production in their specialty hatching egg operations. At no time did the BCBHEC raise objection to the plans for expansion of Skye Hi and V3 Farms to accommodate production or indicate that BCBHEC would take the position that this specialty operation was contrary to the Commission’s orders. To the contrary, as the Commission has acknowledged, it was “well known throughout the industry” that specialty breeders have been operating outside the quota system. It would undermine the legitimacy of the BCBHEC to arbitrarily change the rules of the game such that it would prevent those specialty breeders who have been operating with the knowledge and approval of the Commission from continuing their operations.

Fair – This principle requires that BCBHEC “Ensure procedural fairness and processes and decision-making” (6 *Higher-Level Principles*, at p. 2). The current draft order is unfair to those specialty breeders, like Skye Hi and V3 Farms, who have increased their market share since 2009. Skye Hi and V3 Farms have built additional barns and increased the size of their

operations in order to meet demand for their specialty chicks on the understanding that they would be permitted to continue in production. Far from discouraging growth of unlicensed specialty breeders, it was agreed at a March 12, 2011 meeting with industry participants and BCBHEC staff that the industry did not desire a quota system for the specialty breeding sector. Given BCBHEC's historical position, it would be contrary to procedural fairness if BCBHEC were to institute a quota system now that would prevent Skye Hi and V3 from continuing to produce specialty chicks to meet their current commitments.

Effective – This principle requires “A clearly defined outcome with appropriate processes and measures” (*6 Higher-Level Principles*, at p. 2). Here, the outcome identified is to “regularize” the specialty breeder industry by issuing quota. There is no connection between the proposed order that would reallocate market share as between current producers to that goal, which would be just as effectively achieved by a system that would issue quota based on current commitments to supply registered chicken growers.

Transparent – This principle requires that “processes, practices, procedures & reporting on exercise of mandate are open, accessible and fully informed” (*6 Higher-Level Principles*, at p. 2). The process of implementing the draft order thus far have been far from transparent. While some consultation with the industry took place after the May 2011 communication was issued by BCBHEC it is not clear how the consultation related to the revised draft order or how the current formula of quota issuance contained in the draft order was arrived at.

Inclusive – This principle requires that “appropriate interests, including the public interest, are considered” (*6 Higher-Level Principles*, at p. 2). Here, in addition to failing to consider the interests of those specialty breeders who have expanded their market share since 2009, the current quota provision in the draft order does not consider the public interest, which is served by promotion of diversity amongst specialty breeders. Nor does it consider the impact of the new order on specialty chicken producers who have chosen to obtain their chicks from Skye Hi and V3 Farms. FIRB has previously held that a marketing board must consider the potential impact of its orders on other regulated commodities: *Fraser Valley Duck and Goose Ltd. v. BC Chicken Marketing Board*, Feb. 29, 2008, File 44200-50, at p. 2.

We are hopeful that the Commission will agree to the modification to the draft order proposed. In the event that the Commission determines to implement the new order in its draft form (or that otherwise reduces the quota entitlement of Skye Hi and V3 Farms to a level below their current commitments) we would respectfully request that the

implementation of that order be delayed to allow sufficient time for our clients to bring an appeal to FIRB under the *Natural Products Market Act* and obtain a decision.

Yours truly,

Hunter Litigation Chambers

Dear Sir:

Re: Proposed draft order to "regularize" specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales, in respect of the proposed draft order to "regularize" the specialty broiler breeder industry through the issuance of quota and in response to the request for a letter that can be shared with other stakeholders in the specialty broiler breeder industry.

As you know, the specialty broiler breeder industry has long been operating with the knowledge of but without formal regulation by the British Columbia Broiler Hatching Egg Commission ("BCBHEC" or the "Commission"). We are instructed that in 2010, Skye Hi Farms and V3 Farms, both quota-holding producers of specialty chicken, notified the then-General Manager of the BCBHEC of their intention to build additional barns on their farms in order to commence production as specialty breeders for their own farms. No objection was raised to the proposed production by the then-General Manager, nor was there any suggestion that production could commence without a licence or quota. As the Commission acknowledged in its May 2, 2011 notice to the industry, it is "well known throughout the industry" that specialty broiler breeders have been operating without licence or quota.

Skye Hi and V3 have been operating as specialty breeders since 2010 and accordingly have an interest in the proposed draft order. They have been supplying their own farms and have developed expertise in breeding specialty hatching eggs. They have also entered into commitments to supply chicks to other farms.

Schedule 9 to the draft order entitled "Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules" would allot "0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012". T&C Chick Sales estimates that this method of calculating quota, if implemented, would result in their being allotted production

This is Exhibit " G " referred to in the Affidavit of Casey Van Ginkel

Sworn before me at Vancouver, BC

This 6th day of January 2014

[Signature]
A Commissioner for taking Affidavits for British Columbia

quota insufficient to supply even their own farms, let alone the customers that they have committed to supply.

It is submitted that the proposed draft order should be revised to provide for one unit of chick quota for each chick committed and contracted for placement with a licensed chicken grower immediately before implementation of the new order. As set out further below, such a modification would be consistent with the Farm Industry Review Board's guidance for the implementation of specialty market regulation and with the 'SAFETI' principles-based approach to governance expected of marketing boards in their decision making.

I. The proposed modification is consistent with FIRB Policy

On September 1, 2005, the British Columbia Farm Industry Review Board ("FIRB") issued general directions to the supply managed commodity boards in British Columbia, including the BCBHEC, concerning how specialty production, new entrant and quota programs were to be administered. The report provided that boards "should have plans to register all producers regardless of size or type of license" (1.2(11)(a)) and that "Existing specialty permit programs are to be converted to quota of a class applicable to the type of product produced. . . Production volumes recognized for quota should be equal to the permittee's production in the twelve months ending December 2004, or the nearest applicable quota period ending after December 2004" (1.2(11)(i), emphasis added).

With respect to the development of quota, the following policy directions were given:

1. Designated specialty quotas and licenses are required for the regulation of production and marketing of specialty products.
2. Rules for specialty classes of quota should be developed recognizing the principles of consistency, simplicity, fairness and reciprocity. (5.5)

With respect to the conversion of permits to quota, the following policy directions were given:

1. Specialty permits are to be converted to quota licenses of a class applicable to the designated product produced.
2. Permit conversion to quota is to recognize, as a minimum, the authorized volumes produced in the twelve months ended December 31, 2004, or the nearest quota cycle to this twelve-month period. (5.6, emphasis added).

FIRB's letter to Bruce Cook dated February 9, 2006 summarizes that BCBHEC submitted draft orders to FIRB in response to a requirement that the boards draft orders in compliance with the general directions and submit them to FIRB. Following some modifications, FIRB approved the draft orders based on a number of understandings, including:

First and foremost, Commission allocation policies and decision-making are expected to be in accordance with the Ministry's 'Regulated Marketing Economic Policy' and FIRB's September 1, 2005 directions. This includes being responsive to specialty, niche and other innovative marketing opportunities when the need for those become evident in the B.C. hatching egg industry.

The thrust of FIRB's guidance with respect to a program of "regularizing" a specialty industry is that at a minimum, those who have been producing the product for which quota is to be issued are to be issued sufficient quota so as to permit continued production at the level of production in place immediately before the issuance of quota and so as to allow producers to meet their production commitments. While the initial proposal in May 2011 would have recognized production levels between January 1, 2010 and December 31, 2010, the delay in approving and implementing the draft order has meant that production levels of some producers have changed significantly in the intervening years, making the use of that period no longer appropriate. For those breeders like T&C Chick Sales who have increased the level of current contracts since 2010, tying quota allocation to a historic production level would not permit them to meet current commitments.

The FIRB directions suggest that any new order should provide for quota that allows current producers to continue production at their current levels and meet current commitments.

II. The proposed modification is more consistent with the SAFETI principles

FIRB has identified six principles to assist marketing boards in interpreting and implementing principles-based regulations within their respective mandates represented by the acronym SAFETI: strategic, accountable, fair, effective, transparent, inclusive: *BCFIRB's 6 Higher-Level Principles – Definitions and Guidance*, Sept 2011 ("*6 Higher-Level Principles*"). It is submitted that the modification proposed above is more consistent with a SAFETI analysis than the current draft.

Strategic – This principle requires that BCBHEC "Identify key opportunities and systemic challenges and plan for actions to effectively manage risks and take advantage of future opportunities" (*6 Higher-Level Principles*, at p. 3). Here, in its May 2, 2011 communication "General Information regarding 'Specialty Broiler Breeders'", the Commission has identified the goals of (1) complying with FIRB's direction to ensure that all producers be regulated to ensure biosecurity, premise identification and food safety and (2) the desire to prevent a "race for quota". In support of the latter goal, the communication suggests that the period January 1, 2010 to December 31, 2010 be used to identify those eligible for the "regularized production certificates" and issuance of quota.

Using a date prior to the implementation of any draft order to identify those eligible for issuance of quota may achieve the goal of preventing a race for quota, however, given the time that has passed since the initial consultation on the new order without finalization or implementation of the new order, there is no connection between the objective of preventing

a “race for quota” and using the 2010 time period to identify eligibility. Nor is there any connection between this goal and the proposal to use production levels from 2009 – 2012 as a basis for the issuance of quota.

Moreover, it is submitted that allowing specialty hatching egg producers to honour production commitments made with special chicken producers is sound marketing policy. FIRB has recently considered the role of open contracting in developing sound marketing policy in the context of a supervisory review that considering assurance of supply in the chicken industry. In that context, FIRB stated that “a sound marketing policy is one that creates a working climate that recognizes the importance of meeting customer needs at all levels to promote a sustainable industry – from growers through to consumers”: Decision dated June 9, 2010, In the Matter of the *Natural Products Marketing (BC) Act* and a Supervisory Review of BC Chicken Marketing Board Pricing-Related Recommendations at para. 63 and that “the movement of growers between processors could work to the benefit of all parties ensuring a better fit between grower and processor needs, resulting in longer term contracts” at para 66. Here, the proposed draft order that would lock in market share for specialty hatching egg producers at a historical level and would ignore the commitments made between producers of specialty hatching eggs and specialty chicken does not promote positive relationships between producers and is not sound marketing policy.

Accountable – This principle requires that BCBHEC “Maintain legitimacy and integrity through understanding and discharging responsibilities and reporting performance” (6 *Higher-Level Principles*, at p. 3). Here, implementation of an order that would reduce Skye Hi and V3 Farms’ quota to a level below that required to produce their own farms and meet current commitments is not consistent with the principle of accountability. Skye Hi and V3 Farms have kept the BCBHEC informed of their intention to commence and expand production in their specialty hatching egg operations. At no time did the BCBHEC raise objection to the plans for expansion of Skye Hi and V3 Farms to accommodate production or indicate that BCBHEC would take the position that this specialty operation was contrary to the Commission’s orders. To the contrary, as the Commission has acknowledged, it was “well known throughout the industry” that specialty breeders have been operating outside the quota system. It would undermine the legitimacy of the BCBHEC to arbitrarily change the rules of the game such that it would prevent those specialty breeders who have been operating with the knowledge and approval of the Commission from continuing their operations.

Fair – This principle requires that BCBHEC “Ensure procedural fairness and processes and decision-making” (6 *Higher-Level Principles*, at p. 2). The current draft order is unfair to those specialty breeders, like Skye Hi and V3 Farms, who have increased their market share since 2009. Skye Hi and V3 Farms have built additional barns and increased the size of their operations in order to meet demand for their specialty chicks on the understanding that they would be permitted to continue in production. Far from discouraging growth of unlicensed specialty breeders, it was agreed at a March 12, 2011 meeting with industry participants and BCBHEC staff that the industry did not desire a quota system for the specialty breeding

sector. Given BCBHEC's historical position, it would be contrary to procedural fairness if BCBHEC were to institute a quota system now that would prevent Skye Hi and V3 from continuing to produce specialty chicks to meet their current commitments.

Effective – This principle requires “A clearly defined outcome with appropriate processes and measures” (*6 Higher-Level Principles*, at p. 2). Here, the outcome identified is to “regularize” the specialty breeder industry by issuing quota. There is no connection between the proposed order that would reallocate market share as between current producers to that goal, which would be just as effectively achieved by a system that would issue quota based on current commitments to supply registered chicken growers.

Transparent – This principle requires that “processes, practices, procedures & reporting on exercise of mandate are open, accessible and fully informed” (*6 Higher-Level Principles*, at p. 2). The process of implementing the draft order thus far have been far from transparent. While some consultation with the industry took place after the May 2011 communication was issued by BCBHEC it is not clear how the consultation related to the revised draft order or how the current formula of quota issuance contained in the draft order was arrived at.

Inclusive – This principle requires that “appropriate interests, including the public interest, are considered” (*6 Higher-Level Principles*, at p. 2). Here, in addition to failing to consider the interests of those specialty breeders who have expanded their market share since 2009, the current quota provision in the draft order does not consider the public interest, which is served by promotion of diversity amongst specialty breeders. Nor does it consider the impact of the new order on specialty chicken producers who have chosen to obtain their chicks from Skye Hi and V3 Farms. FIRB has previously held that a marketing board must consider the potential impact of its orders on other regulated commodities: *Fraser Valley Duck and Goose Ltd. v. BC Chicken Marketing Board*, Feb. 29, 2008, File 44200-50, at p. 2.

We are hopeful that the Commission will agree to the modification to the draft order proposed. We understand the advice of the Commission with respect to its process to be that the early consultations in the nature of “one-on-one” discussions in which our clients participated were part of a fact-finding phase of consultation leading to the formulation of the draft order but that in order for any positions of stakeholders with respect to the tentative draft order to be considered they must be made “in writing, with the expectation that other stakeholders will have an opportunity to consider and comment upon that position”. This letter has been drafted for distribution to other stakeholders on the basis that this is the only manner in which submissions from stakeholders will be accepted by the Commission. Since as stakeholders my clients have not yet received any written submissions from other stakeholders in this industry, we are proceeding on the basis that no other submissions in respect of the draft order have yet been received by the Commission for consideration. We reserve the right to provide further comments on the draft order in response to submissions by other stakeholders.

In the event that the Commission determines to implement the new order in its draft form (or that otherwise reduces the quota entitlement of Skye Hi and V3 Farms to a level below their current commitments) we would respectfully request that the implementation of that order be delayed to allow sufficient time for our clients to bring an appeal to FIRB under the *Natural Products Market Act* and obtain a decision.

Yours truly,

Hunter Litigation Chambers

Dear Sirs:

Re: Proposed draft order to "regularize" specialty broiler breeders

We write on behalf of Skye Hi Farms and Casey Van Ginkel dba V3 Farms, specialty broiler breeders operating through their joint venture T&C Chick Sales ("T&C"), in response to the September 13, 2013 letter from the British Columbia Broiler Hatching Egg Commission ("BCBHEC" or the "Commission") requesting "further feedback from stakeholders concerning only the March 21, 2013 list of questions from Ms. Fehr and the Commission's response thereto; the April 25, 2013 letter from Ms. Fehr; the July 19, 2013 letter from Ms. Hunter and the revised, proposed Amending Order" by September 27, 2013. Given the limited nature of the request for further feedback, I will not repeat the comments set out in my previous letters to the Commission but my clients' position in respect of this matter remains as set out in those letters.

Your letter advised that "Having considered the feedback from stakeholders, the Commission has made modifications to its proposed Amending Order. A copy of the Commission's revised, proposed Amending Order is attached for your reference." As an initial matter, the version of the Amending Order attached does not show the changes made from the last version. Will you please provide us with a red-line version of the proposed Amending Order showing the changes made in response to the feedback from stakeholders since the last version circulated?

While the two stakeholder submissions had different perspectives, they raised a common concern about the proposed draft order, namely that the proposed allocation of quota would not allow those producers whose market share has grown since 2009 to continue to meet commitments made to supply chicken growers regulated by the British Columbia Chicken Marketing Board. Unfortunately, this concern does not appear to be addressed by the revised draft general order which still provides that producers will be allotted "0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler

This is Exhibit " I " referred to in the
Affidavit of Casey Van Ginkel
Sworn before me at Vancouver, BC
This 6th day of January 2014
[Signature]
A Commissioner for taking
Affidavits for British Columbia

Hatching Eggs produced by the applicant and placed with licensed chicken growers between January 1, 2009 and December 31, 2012”.

In response to Ms. Fehr’s questions, under the heading “Stakeholder Feedback”, the Commission advised (*italicized added, underlining in original*):

3. . . . Applicants must provide details of the number of chicks hatched and placed with growers or exported *over the two year period between January 1, 2009 and December 31, 2012 so that allotments made under the program are based on the most recent data.*

4. . . . Please note, however, that “Regularized Producer Chick Quota” means the maximum quantity, as determined by the Commission, *of Chicks that may be hatched in a Quota Period from Broiler Hatching Eggs produced by a Regularized Producer. A “Quota Period” is a two-year period.*

5. The proposed Amending Order reflects the tentative view that *initial allocations under the program must be grounded in fact. For that reason, the proposed Amending Order contemplates that allotments will be based on the number of chicks actually hatched and placed with growers or exported over the two year period between January 1, 2009 and December 31, 2012.*

While we have set out our position in respect of that aspect of the draft in our letter of July 19, 2013, we have two comments with respect to the Commission’s response to Ms. Fehr. First, the period between January 1, 2009 and December 31, 2012 is four years, not two. Second, T&C agrees that initial allocations under the program “must be grounded in fact” but it is T&C’s position that the “facts” with respect to chick placement should be current—not historical—data. The most recent available data will provide the best information for the Commission to determine the current needs and preferences of registered chicken growers and to develop sound marketing policy. To the extent the Commission does not have its own current data with respect to chick placements with registered chicken growers, that should not be an impediment to using current data. Such data is likely available from the British Columbia Chicken Marketing Board. Alternatively, T&C, and presumably other industry participants, are in a position to provide up to date placement records. We trust you will advise us if you require data from T&C in this regard.

Yours truly,

Hunter Litigation Chambers

Claire E. Hunter

Robert and Patricia Donaldson

May 26, 2014

Dear Robert and Patricia Donaldson,

The Commission has conducted a preliminary review of your application made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* dated January 28, 2014 and received by the Commission on February 13, 2014.

We are writing at this time to provide you with our preliminary comments and observations. In some instances, we require additional particulars and documentation.

Subject to further and final consideration, the Commission is tentatively satisfied that:

1. Your application was submitted on time (on or before 3:00 p.m. on February 13, 2014);
2. You have provided full "Particulars of the Applicant";
3. You have provided full "Particulars of the Co-Applicant";
4. You have provided full particulars of the "Business Organization";
5. You have provided the addresses of the Independent Production Units;
6. You have provided proof of Canadian Citizenship or permanent resident status;
7. You have provided proof of permanent resident status in the Province of British Columbia;
8. You are 19 years of age;
9. You have provided a photocopy of a birth certificate or other proof of age;
10. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
11. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of the Application without a licence issued by the Commission and without Placement Quota allotted by the Commission;

12. You have provided proof (by way of statutory declaration) of your financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
13. You have provided proof (by way of statutory declaration) that your Independent Production Units are within economic access of a licensed Hatchery;
14. You have provided proof (by way of statutory declaration) of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
15. You have provided proof (by way of statutory declaration) of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are incomplete or that otherwise require further particulars and/or documentation:

1. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 8,678,498.

You have provided a "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012. This is very helpful.

However, we ask that you also provide:

- (a) Copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012; and**
 - (b) Copies of the BCCMB's Grower Chick Placement Reports (Form BC111) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.**
2. It is incumbent on you to provide particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection 3(2) of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules.

Your application refers to the following:

Increased orders which would require additional breeders. This instance would or could come up in the future, or if another hatchery failed to produce, or if additional growers needed chicks.

We understand that you are referring to contingencies which may or may not arise in the future. If our understanding is inaccurate, please let us know. Further, if any of these events have actually occurred, you must provide full and detailed particulars.

Thank you for your attention to this matter.

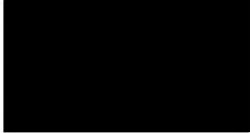

Regards,

A handwritten signature in black ink, appearing to read "Stephanie Nelson". The signature is fluid and cursive, with a large loop at the end.

Stephanie Nelson
BCBHEC General Manager

Trevor Allen

May 26, 2014

Dear Mr. Allen,

The Commission has conducted a preliminary review of the following applications:

1. Application made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* dated February 5, 2014 and received by the Commission on February 5, 2014;
2. Letter dated April 4, 2014 from Claire Hunter to Stephanie Nelson representing your "exceptional circumstances" application together with your "Book of Documents Material to V3 Farms and Skye Hi Farms Inc.'s Exceptional Circumstances"; and
3. Letter dated April 4, 2014 from Claire Hunter to Stephanie Nelson representing your request for a decision regarding "the continued operation of T&C Chick Sales".

We are writing at this time to provide you with our preliminary comments and observations. In some instances, we require additional particulars and documentation. In the case of your request regarding "T&C Chick Sales", the Commission is able to provide you with its decision, which is set out herein.

Program Application / Extraordinary Circumstances Application

Subject to further and final consideration, the Commission is tentatively satisfied that:

1. Your application was submitted on time (on or before 3:00 p.m. on February 13, 2014);
2. You have provided full "Particulars of the Applicant";
3. You have provided full particulars of the "Business Organization";
4. You have provided the address of the Independent Production Unit;
5. You have provided a duly sworn Statutory Declaration;
6. You have provided proof of Canadian Citizenship or permanent resident status;
7. You have provided proof of permanent resident status in the Province of British Columbia;

8. You are 19 years of age;
9. You have provided a photocopy of a birth certificate or other proof of age;
10. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
11. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of the Application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
12. You have provided proof (by way of statutory declaration) of your financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
13. You have provided proof (by way of statutory declaration) of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
14. You have provided proof of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are unacceptable, incomplete or that otherwise require further particulars and/or documentation:

1. Your counsel's letter dated April 4, 2014 states:

Skye Hi and V3 rely on the affidavits of Casey Van Ginkel, Trevor Allen and Melissa Horton filed with the BCFIRB in *Skye Hi Farms Inc. & Casey Van Ginkel dba V3 Farms v. British Columbia Broiler Hatching Egg Commission*, Appeal #14-01 ("Amending Order Appeal"), which have previously been provided to the Commission. Skye Hi and V3 as well as the Book of Documents Material to V3 Farms and Skye Hi Farms' Exceptional Circumstances (the "Book of Documents"), enclosed with the copy of this letter delivered by courier.

The Commission is not prepared to allow the affidavits of Casey Van Ginkel, Trevor Allen and Melissa Horton filed with the BCFIRB in *Skye Hi Farms Inc. & Casey Van Ginkel dba V3 Farms v. British Columbia Broiler Hatching Egg Commission*, Appeal #14-01 ("Amending Order Appeal") to be incorporated *holus-bolus* into your application materials. Those affidavits were prepared for another purpose and in another context. If there are elements of those materials that relate to your application under the program, it is incumbent on you to present those elements in a way that is cogent, well-organized, free from duplication, and directly responsive to the requirements of Schedule 9 of the Consolidated Order. In particular, if your counsel's letter of April 4, 2014 is intended to be supplemented with certain facts asserted in various affidavits filed in the appeal proceedings, we suggest that you re-submit a complete and comprehensive version of that letter. Similarly, if the "Book of Documents Material to V3 Farms and Skye Hi Farms' Exceptional Circumstances" is

incomplete insofar as it is intended to be supplemented by certain documents exhibited to various affidavits filed in the appeal proceedings, we suggest that you resubmit a complete and comprehensive version of the Book of Documents.

2. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 107,571.

In your counsel's letter of April 4, 2014 regarding "Particulars of Exceptional Circumstances", your counsel states:

Skye Hi produced... 96,144 Shondon chicks... from [its] eggs that were placed with registered specialty chicken growers in British Columbia between January 1, 2009 and December 31, 2012. Photocopies of documents evidencing the number of Shondon chicks hatched by Skye Hi..., referenced in the February 5, 2014 applications as Exhibit D, are attached hereto as Schedules "A" and "B" in the Book of Documents. At Tabs A(1) and B(1) of the Book of Documents, charts have been prepared tracking the number of chicks hatched by Skye Hi..., organized chronologically by hatching date. Those charts rely on the information provided to Skye Hi... in the hatchery reports prepared by Rosstown Hatchery (the chart identifies the tab number at which the supporting hatchery report can be found). We are instructed that the hatching reports are the best evidence available on the number of chicks placed by Skye Hi... as those reports are used by Rosstown to report the monthly number of chicks it hatched to the Chicken Board.

It appears to us that you have largely provided information and documentation concerning the number of broiler hatching eggs that have been hatched into chicks. We also understand that did so because of your belief that "hatching reports are the best evidence available on the number of chicks placed". If we have misunderstood this aspect of your application, please let us know.

In any event, you should be aware that the Commission does not regard the number of eggs hatched into chicks as a reliable indicator of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

We specifically ask that you provide, at a minimum:

- (a) **A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012;**

- (b) **Copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012; and**
 - (c) **Copies of the BCCMB's Grower Chick Placement Reports (Form BC111) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.**
2. It is incumbent on you to provide proof that you have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

Your application states that you have "contracted supply of TC Chicks to licensed specialty growers."

In your counsel's letter of April 4, 2014 regarding "Particulars of Exceptional Circumstances", your counsel states that "[p]hotocopies of documents material to V3 and Skye Hi's financial ability to maintain an acceptable independent production unit and economically viable plans to sustain the production of their Shondon broiler hatching eggs at current levels are included in Schedule "C" of the Book of Documents."

Among other things, Schedule "C" of your Book of Documents includes a number of BC101-S forms which record the existence of various agreements for the purchase of chicks. However, we understand that these are generally new agreements that may not have a long commercial history. If our understanding is correct, it will be necessary to know more about these arrangements to properly assess economic viability.

We specifically ask that you provide, at a minimum, full particulars of: (a) your custom hatching arrangements with Rosstown including the cost thereof; (b) the specific terms on which you have contracted to supply chicks to various growers; (c) whether any of your contracted growers were previously serviced by other applicants under the program (and if so, on what terms); (d) an explanation as to how your T&C's terms of sale are sustainable and therefore economically viable, having regard to price and any extraordinary costs associated with your custom hatching arrangements.

Request for Decision Regarding T&C Chick Sales

By letter dated April 4, 2014, your counsel requested that the Commission make a decision "permitting T&C Chick Sales to continue to operate as a virtual hatchery following the implementation of Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program."

The request, as we understand it, is based on the following:

T&C does not have a physical hatchery operation but operates as a "virtual hatchery". T&C purchases specialty hatching eggs from Skye Hi and V3 and makes arrangements with a physical hatchery to hatch the

eggs, contracting with a physical hatchery for it to pick up and hatch the eggs, and vaccinate and deliver the surviving chicks to the specialty chicken grower.

T&C retains control over the chicks, determines the price at which they will be offered for sale, negotiates and signs contracts as "hatchery" for each placement of chicks with the chicken grower and the grower's processor.

It is important to note that the Commission does not agree with a number of assertions made by your counsel in the April 4, 2014 letter. For example, the Commission disagrees with the assertion that "chicken growers were required to purchase chicks that had been purchased outside of the quota system" because "when specialty chicken quota was initially issued, the Commission did not issue specialty hatching egg quota." Further, the Commission does not agree that T&C's activities (purchasing your hatching eggs, arranging for custom hatching, and marketing chicks to growers) should lead to it being described as a "virtual hatchery". However, we do not think it necessary to engage on these matters as the Commission has decided to grant an authorization which, in substance, should satisfy you.

Your counsel correctly notes that section 24 of the Consolidated Order operates to preclude producers from marketing hatching eggs other than through the Commission; to a hatchery; to a breaker; or as may otherwise be directed by the Commission. The primary purpose of this provision is to prevent hatching eggs from being marketed in the table egg marketplace.

At the present time, the Commission is not opposed in principle to the notion of a "third party" purchasing broiler hatching eggs from licensed producers so that those eggs may be custom hatched into chicks, which are thereafter marketed by that third party directly to licensed chicken growers. At least at this time, we do not think that it is necessary to license the third party (T&C) to accommodate this structure. However, it would be necessary for the Commission to authorize you to market your broiler hatching eggs to T&C in accordance with paragraph 24(1)(d) of the Consolidated Order.

Accordingly, pursuant to paragraph 24(1)(d) of the Consolidated Order, the Commission hereby authorizes you to market your broiler hatching eggs to T&C Chick Sales, subject to the following conditions:

1. This authorization will not take effect unless and until you have received a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules;
2. The grant of this authorization does not otherwise relieve you of the obligation to comply with section 24 of the Consolidated Order.
3. T&C must not market any broiler hatching eggs in a manner that would constitute a breach of section 24 if T&C was regarded as the "Producer". You will be fully accountable for any such breach by T&C as if such breach was your own.
4. This authorization is subject to immediate revocation in the event of any breach by you of the provisions of the Consolidated Order, or in the event of any breach of the preceding condition.

Thank you for your attention to this matter.

Regards,

A handwritten signature in black ink, appearing to read "Stephanie Nelson". The signature is fluid and cursive, with a large, prominent loop at the end of the last name.

Stephanie Nelson
BCBHEC General Manager

Kelly and Teresa Boonstra

May 26, 2014

Dear Mr. and Mrs. Boonstra,

The Commission has conducted a preliminary review of your application made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* dated January 27, 2014.

We are writing at this time to provide you with our preliminary comments and observations. In some instances, we require additional particulars and documentation.

Subject to further and final consideration, the Commission is tentatively satisfied that:

1. Your application was submitted on time (on or before 3:00 p.m. on February 13, 2014);
2. You have provided full "Particulars of the Applicant";
3. You have provided full "Particulars of the Co-Applicant";
4. You have provided full particulars of the "Business Organization";
5. You have provided the address of the Independent Production Unit;
6. You have provided proof of Canadian Citizenship or permanent resident status;
7. You have provided proof of permanent resident status in the Province of British Columbia;
8. You are 19 years of age;
9. You have provided a photocopy of a birth certificate or other proof of age;
10. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
11. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of the Application without a licence issued by the Commission and without Placement Quota allotted by the Commission;

12. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of your financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
13. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof that your Independent Production Unit is within economic access of a licensed Hatchery;
14. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
15. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are incomplete or that otherwise require further particulars and/or documentation:

1. You have completed a Statutory Declaration, but it has not yet been duly sworn before a Commissioner for Oaths. You must provide a duly sworn Statutory Declaration.
2. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012. It is also incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been exported outside the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 2,300,759.

Your application also states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been exported outside the Province between January 1, 2009 and December 31, 2012 is 2,895,540.

You have provided copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012. This is very helpful.

However, we ask that you also provide:

- (a) **A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were**

placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012; and

- (b) Copies of the BCCMB's Grower Chick Placement Reports (Form BC111) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.**

Thank you for your attention to this matter.

Regards,

A handwritten signature in black ink, appearing to read 'Stephanie Nelson', with a large, stylized loop at the end.

Stephanie Nelson
BCBHEC General Manager

Casey Van Ginkel dba V3 Farms
[REDACTED]

May 26, 2014

Dear Mr. Van Ginkel,

The Commission has conducted a preliminary review of the following applications:

1. Application made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* dated February 5, 2014 and received by the Commission on February 5, 2014;
2. Letter dated April 4, 2014 from Claire Hunter to Stephanie Nelson representing your "exceptional circumstances" application together with your "Book of Documents Material to V3 Farms and Skye Hi Farms Inc.'s Exceptional Circumstances"; and
3. Letter dated April 4, 2014 from Claire Hunter to Stephanie Nelson representing your request for a decision regarding "the continued operation of T&C Chick Sales".

We are writing at this time to provide you with our preliminary comments and observations. In some instances, we require additional particulars and documentation. In the case of your request regarding "T&C Chick Sales", the Commission is able to provide you with its decision, which is set out herein.

Program Application / Extraordinary Circumstances Application

Subject to further and final consideration, the Commission is tentatively satisfied that:

1. Your application was submitted on time (on or before 3:00 p.m. on February 13, 2014);
2. You have provided full "Particulars of the Applicant";
3. You have provided full particulars of the "Business Organization";
4. You have provided the address of the Independent Production Unit;
5. You have provided a duly sworn Statutory Declaration;
6. You have provided proof of Canadian Citizenship or permanent resident status;
7. You have provided proof of permanent resident status in the Province of British Columbia;
8. You are 19 years of age;

9. You have provided a photocopy of a birth certificate or other proof of age;
10. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
11. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of the Application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
12. You have provided proof (by way of statutory declaration) of your financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
13. You have provided proof (by way of statutory declaration) of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
14. You have provided proof of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are unacceptable, incomplete or that otherwise require further particulars and/or documentation:

1. Your counsel's letter dated April 4, 2014 states:

Skye Hi and V3 rely on the affidavits of Casey Van Ginkel, Trevor Allen and Melissa Horton filed with the BCFIRB in *Skye Hi Farms Inc. & Casey Van Ginkel dba V3 Farms v. British Columbia Broiler Hatching Egg Commission*, Appeal #14-01 ("Amending Order Appeal"), which have previously been provided to the Commission. Skye Hi and V3 as well as the Book of Documents Material to V3 Farms and Skye Hi Farms' Exceptional Circumstances (the "Book of Documents"), enclosed with the copy of this letter delivered by courier.

The Commission is not prepared to allow the affidavits of Casey Van Ginkel, Trevor Allen and Melissa Horton filed with the BCFIRB in *Skye Hi Farms Inc. & Casey Van Ginkel dba V3 Farms v. British Columbia Broiler Hatching Egg Commission*, Appeal #14-01 ("Amending Order Appeal") to be incorporated *holus-bolus* into your application materials. Those affidavits were prepared for another purpose and in another context. If there are elements of those materials that relate to your application under the program, it is incumbent on you to present those elements in a way that is cogent, well-organized, free from duplication, and directly responsive to the requirements of Schedule 9 of the Consolidated Order. In particular, if your counsel's letter of April 4, 2014 is intended to be supplemented with certain facts asserted in various affidavits filed in the appeal proceedings, we suggest that you re-submit a complete and comprehensive version of that letter. Similarly, if the "Book of Documents Material to V3 Farms and Skye Hi Farms' Exceptional Circumstances" is incomplete insofar as it is intended to be supplemented by certain documents exhibited to various affidavits filed in the appeal proceedings, we suggest that you resubmit a complete and comprehensive version of the Book of Documents.

2. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 132,976.

In your counsel's letter of April 4, 2014 regarding "Particulars of Exceptional Circumstances", your counsel states:

V3 produced... 132,976 Shondon chicks... from [its] eggs that were placed with registered specialty chicken growers in British Columbia between January 1, 2009 and December 31, 2012. Photocopies of documents evidencing the number of Shondon chicks hatched by... V3, referenced in the February 5, 2014 applications as Exhibit D, are attached hereto as Schedules "A" and "B" in the Book of Documents. At Tabs A(1) and B(1) of the Book of Documents, charts have been prepared tracking the number of chicks hatched by... V3, organized chronologically by hatching date. Those charts rely on the information provided to... V3 in the hatchery reports prepared by Rosstown Hatchery (the chart identifies the tab number at which the supporting hatchery report can be found). We are instructed that the hatchery reports are the best evidence available on the number of chicks placed by... V3 as those reports are used by Rosstown to report the monthly number of chicks it hatched to the Chicken Board.

It appears to us that you have largely provided information and documentation concerning the number of broiler hatching eggs that have been hatched into chicks. We also understand that did so because of your belief that "hatching reports are the best evidence available on the number of chicks placed". If we have misunderstood this aspect of your application, please let us know.

In any event, you should be aware that the Commission does not regard the number of eggs hatched into chicks as a reliable indicator of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

We specifically ask that you provide, at a minimum:

- (a) **A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012;**
- (b) **Copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012; and**

(c) **Copies of the BCCMB's Grower Chick Placement Reports (Form BC111) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.**

2. It is incumbent on you to provide proof that you have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

Your application states that you have "contracted supply of TC Chicks to licensed specialty growers."

In your counsel's letter of April 4, 2014 regarding "Particulars of Exceptional Circumstances", your counsel states that "[p]hotocopies of documents material to V3 and Skye Hi's financial ability to maintain an acceptable independent production unit and economically viable plans to sustain the production of their Shondon broiler hatching eggs at current levels are included in Schedule "C" of the Book of Documents."

Among other things, Schedule "C" of your Book of Documents includes a number of BC101-S forms which record the existence of various agreements for the purchase of chicks. However, we understand that these are generally new agreements that may not have a long commercial history. If our understanding is correct, it will be necessary to know more about these arrangements to properly assess economic viability.

We specifically ask that you provide, at a minimum, full particulars of: (a) your custom hatching arrangements with Rosstown including the cost thereof; (b) the specific terms on which you have contracted to supply chicks to various growers; (c) whether any of your contracted growers were previously serviced by other applicants under the program (and if so, on what terms); (d) an explanation as to how your T&C's terms of sale are sustainable and therefore economically viable, having regard to price and any extraordinary costs associated with your custom hatching arrangements.

Request for Decision Regarding T&C Chick Sales

By letter dated April 4, 2014, your counsel requested that the Commission make a decision "permitting T&C Chick Sales to continue to operate as a virtual hatchery following the implementation of Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program."

The request, as we understand it, is based on the following:

T&C does not have a physical hatchery operation but operates as a "virtual hatchery". T&C purchases specialty hatching eggs from Skye Hi and V3 and makes arrangements with a physical hatchery to hatch the eggs, contracting with a physical hatchery for it to pick up and hatch the eggs, and vaccinate and deliver the surviving chicks to the specialty chicken grower.

T&C retains control over the chicks, determines the price at which they will be offered for sale, negotiates and signs contracts as "hatchery" for each placement of chicks with the chicken grower and the grower's processor.

It is important to note that the Commission does not agree with a number of assertions made by your counsel in the April 4, 2014 letter. For example, the Commission disagrees with the assertion that "chicken growers were required to purchase chicks that had been purchased outside of the quota system" because "when specialty chicken quota was initially issued, the Commission did not issue specialty hatching egg quota." Further, the Commission does not agree that T&C's activities (purchasing your hatching eggs, arranging for custom hatching, and marketing chicks to growers) should lead to it being described as a "virtual hatchery". However, we do not think it necessary to engage on these matters as the Commission has decided to grant an authorization which, in substance, should satisfy you.

Your counsel correctly notes that section 24 of the Consolidated Order operates to preclude producers from marketing hatching eggs other than through the Commission; to a hatchery; to a breaker; or as may otherwise be directed by the Commission. The primary purpose of this provision is to prevent hatching eggs from being marketed in the table egg marketplace.

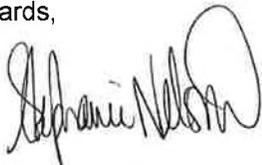

At the present time, the Commission is not opposed in principle to the notion of a "third party" purchasing broiler hatching eggs from licensed producers so that those eggs may be custom hatched into chicks, which are thereafter marketed by that third party directly to licensed chicken growers. At least at this time, we do not think that it is necessary to license the third party (T&C) to accommodate this structure. However, it would be necessary for the Commission to authorize you to market your broiler hatching eggs to T&C in accordance with paragraph 24(1)(d) of the Consolidated Order.

Accordingly, pursuant to paragraph 24(1)(d) of the Consolidated Order, the Commission hereby authorizes you to market your broiler hatching eggs to T&C Chick Sales, subject to the following conditions:

1. This authorization will not take effect unless and until you have received a special allotment of Regularized Producer Chick Quota in accordance with the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules;
2. The grant of this authorization does not otherwise relieve you of the obligation to comply with section 24 of the Consolidated Order.
3. T&C must not market any broiler hatching eggs in a manner that would constitute a breach of section 24 if T&C was regarded as the "Producer". You will be fully accountable for any such breach by T&C as if such breach was your own.
4. This authorization is subject to immediate revocation in the event of any breach by you of the provisions of the Consolidated Order, or in the event of any breach of the preceding condition.

Thank you for your attention to this matter.

Regards,

A handwritten signature in black ink, appearing to read "Stephanie Nelson". The signature is fluid and cursive, with a large loop at the end.

Stephanie Nelson
BCBHEC General Manager

Wilhelm Friesen and Lillian Fehr

May 26, 2014

Dear Wilhelm Friesen and Lillian Fehr,

The Commission has conducted a preliminary review of your application made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* dated February 7, 2014 and received by the Commission on February 7, 2014.

We are writing at this time to provide you with our preliminary comments and observations. In some instances, we require additional particulars and documentation.

Subject to further and final consideration, the Commission is tentatively satisfied that:

1. Your application was submitted on time (on or before 3:00 p.m. on February 13, 2014);
2. You have provided full "Particulars of the Applicant";
3. You have provided full "Particulars of the Co-Applicant";
4. You have provided the address of the Independent Production Unit;
5. You have provided proof of Canadian Citizenship or permanent resident status;
6. You have provided proof of permanent resident status in the Province of British Columbia;
7. You are 19 years of age;
8. You have provided a photocopy of a birth certificate or other proof of age;
9. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from January 1, 2010 to December 31, 2010 without a licence issued by the Commission and without Placement Quota allotted by the Commission;
10. You have provided proof (by way of statutory declaration) of having been continuously engaged in the production of Silkie or Taiwanese Broiler Hatching Eggs from December 31, 2010 to the date of the Application without a licence issued by the Commission and without Placement Quota allotted by the Commission;
11. You have provided proof (by way of statutory declaration) of your financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;

12. You have provided proof (by way of statutory declaration) that your Independent Production Units are within economic access of a licensed Hatchery;
13. You have provided proof (by way of statutory declaration) of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
14. You have provided proof (by way of statutory declaration) of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are incomplete or that otherwise require further particulars and/or documentation:

1. You indicate that Wilhelm Friesen and Lillian Fehr carry on business as a partnership, but state that the name of the business is "W. Friesen Enterprises dba W. Friesen". It is not clear whether your business name is "W. Friesen Enterprises" or "W. Friesen" and we ask that you clarify this point.
2. It is incumbent on you to provide proof that you have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

Your application states that your economically viable plans are "based upon the continuation of the level of production established for 2014."

Please confirm whether your operations were economically viable based on the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that had been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

3. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 934,407.

We ask that you provide:

- (a) **A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012;**
- (b) **Copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012; and**

(c) **Copies of the BCCMB's Grower Chick Placement Reports (Form BC111) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between **January 1, 2009 and December 31, 2012.****

2. It is incumbent on you to provide particulars of any exceptional circumstances as might justify an allotment of Regularized Producer Chick Quota or an issuance of temporary, revocable, non-transferrable export permit in amounts other than as provided for in subsection 3(2) of the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules.

Among other things, your application refers to the following:

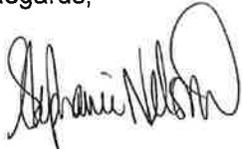

W Friesen leased the Foon Kan Farm and provided their chicks for several years and their data is included with ours.

The numbers for 2009 are lower due to involvement with Fairline. Once W. Friesen was out of that working relationship, the number of chicks and the business has increased steadily.

From the description, it is not clear how these matters might justify an extraordinary allotment. We ask that you provide a further and better explanation of both points.

Thank you for your attention to this matter.

Regards,

Stephanie Nelson
BCBHEC General Manager

Subject: Hatchery Placement Detail Report

Stephanie,

Attached are the Hatchery Placement Detail Reports provided by the BCCMB. Page 8 is a copy of a placement that we did that was mistakenly not claimed or misfiled at our office. I tried to get proof of this placement from Carol at the chicken board but she will not provide it because we did not claim it. Please add this chick placement to our total.

I tried to get the BC111 forms from the BCCMB and they can not provide them to me because the growers don't always send them to the BCCMB or to me. I'm sure the growers did fill them out but I don't think they saved 4 years worth and tracking them all would be almost impossible.

Veronica is sending me a copy of the Statutory Declaration so I can get it sworn before a Commissioner. I will send it to you asap.

Thank you

Kelly Boonstra

15. I am aware that Regularized Producer Chick Quota allotted under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be Transferred provided that it shall continue to be subject to all of the special restrictions described above.
16. I am aware that Regularized Producer Chick Quota cannot be converted to Placement Quota.
17. I am aware that any Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* may be held for production only for so long as the entrant:
- (a) permits Commission audits of the farm operation to ensure compliance with Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (b) is in good standing with all applicable Commission orders and all applicable legislation, including all terms and conditions of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*;
 - (c) is actively engaged in Silkie or Taiwanese Broiler Hatching Egg production;
 - (d) uses the temporary, revocable, non-transferrable export permit exclusively for the production of Silkie or Taiwanese Chicks;
 - (e) exports all Chicks produced under the temporary, revocable, non-transferrable export permit; and
 - (f) continues to be ineligible to participate in any surplus removal program administered by the Commission (other than the pick-up and delivery of hatching eggs) and unentitled to receive any subsidy with respect to any Silkie or Taiwanese Broiler Hatching Eggs marketed to the breaker;
- failing which the temporary, revocable, non-transferrable export permit so issued shall thereupon be subject to immediate cancellation on notice by the Commission to the entrant.
18. I am aware that Temporary, revocable, non-transferrable export permit issued under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*:
- (a) automatically expires at the end of each Quota Period, or at the end of such other period as may have been specified by the Commission, unless further renewed by the Commission for such time as the Commission may determine in its sole discretion;
 - (b) may be revoked by the Commission at any time, in whole or in part, upon providing not less than 5 days' notice of revocation to the entrant; and
 - (c) is not transferrable under any circumstance.
19. I make this solemn declaration conscientiously believing it to be true and knowing that it is of the same legal force and effect as if made under oath.

Subject: Information request response (V3 & Skye Hi)

Stephanie,

We will attempt to answer the questions below as they were asked on behalf of both farms (V3 & Skye Hi) as the required info is the same and the two farms were working together throughout the entire time frame.

Part 1:

2 (a) BCCMB “ Hatchery Placement Detail Report”...

We are unable to provide this as the BCCMB collects the information from hatcheries only to create this report. It is our understanding that Rosstown only provides the BCCMB with a weekly total of custom hatched chicks (with details of who they were custom hatched for, but not who they were sold to)

(b) BCCMB “Weekly Chick Placement and Sales Report” (BC200)”...

We are unable to provide this as this is a report prepared by hatcheries for the BCCMB, as above Rosstown only reports weekly who custom hatched chicks, not chick sales for custom hatchers.

(c) BCCMB Grower Chick Placement Reports (BC111)

We are unable to provide this. This is a form that is supposed to be submitted by growers to the BCCMB 7 days after chick placement. The BCCMB denied our request for this information (see attachment).

What we can provide is the totals submitted from our book of documents (see attachment) with some further explanation;

From when we started producing our own hatching eggs through the end of 2012, we worked together supplying hatching eggs to each other for each farms individual chick placements. For example if Skye Hi was scheduled to place 12,000 chicks on a particular day, but was only able to produce enough hatching eggs for 8,000 chicks, V3 would supply Skye Hi with enough hatching eggs to make up the difference. We operated like this with a 'zero-sum' target. That is, each year we would track the egg flow between us and make sure there was a no eggs owed to each other at year end.

The totals on our individual summaries is derived from the hatchery reports created by Rosstown management. The bottom box on these reports will show how many chicks were delivered (delivery was always done by Rosstown staff). I have spoken with the Rosstown hatchery GM and he can corroborate this information with you. All of the hatch reports submitted in the two attached summaries were for placements at either V3 Farms or Skye Hi Farms except report #c178. Report #c178 was for Windberry farms, here you will see that the bottom box shows not only the customer, but the delivered amount and the quantity destroyed. The second box from the bottom shows which flock the eggs came from (V3 = V3 Farms, TA = Skye Hi Farms) and their respective hatchability. For the time period of 2009-2012 we submitted to the BCBHEC the total number of chicks placed on each of our individual farms as the number of chicks that each farm produced (as our cooperative egg sharing was zero-sum, the quantity of chicks produced would be equal regardless of where each chick placements hatching eggs were sourced from- except for the Windberry placement where we actually used each individual farms hatched chick quantities for our application submissions). All of our submitted hatch reports from Rosstown will coincide with the submitted BC101-s contracts which we signed with our growers and our Chick Broker Report which was reported to the BCCMB monthly (chick broker report only available for 2013 to present).

Part 2:

2 (a) "custom hatching arrangements with Rosstown including costs...."

Rosstown provides egg pick up as required (cost is included in set charge)

Rosstown charges T&C \$22 per case of eggs set. Vaccination cost \$.115 per chick (includes ILT/HVT, Rispens, Gentocin and Bronchitis. Chick delivery is \$150.00

2 (b) "specific terms on which you have contracted to supply chicks to various growers...."

T&C sells chicks at \$.90 each, payable immediately on invoice.

T&C contracts with its growers on a "cycle by cycle" basis.

2 (c) "whether any of your contracted growers were previously supplied by other applicants...(if so terms)"

All of T&C's growers were previously supplied by mainly one other hatching egg producer (the producer which was aligned with Fairline Development). Historically, the terms in the specialty sector were; you purchased chicks from the supplier that the processor dictated at the price that the chick supplier demanded (This still stands true for 2 out of 3 specialty processors). It should be noted that the historical price for chicks was significantly higher than what T&C charges for it's chicks ranging between \$1.10 - \$1.34 (to the best of our knowledge). As previously stated, this was one of the factors that drove our desire to become our own chick suppliers. However, as one of the processors (Fairline Development) was suffering financial distress and ultimately exited the industry through out 2012/2013 many of their displaced growers chose to ship their product to a processor who chose not to dictate the chick supplier (FVDG). With the new found ability to choose their chick supplier, some of these growers chose to purchase T&C's Shondon chicks.

2 (d) "explanation of as to how your T&C's terms are sustainable..."

T&C sells chicks for \$.90 each, pays the associated custom hatch cost to Rosstown and pays its egg suppliers (V3 & Skye Hi) the posted BCBHEC egg price per dozen. At this current formula T&C generated a net profit of 11.9% in 2013 (details of this can be provided upon request). At our current production levels, we are pleased with the return T&C is achieving as well as our individual farms have reached a minimal profitability. I would also like to add that since starting to purchase our chicks, we have retained 100% of our customers. In fact, we continue to field inquiries about our chicks.

We sincerely hope that this information will meet with your satisfaction, however if you require any further details or clarification just let us know.

Casey & Trevor

¹ On December 22, 2010, Skye Hi Farms sold specialty broiler hatching chicks to W. Friesen (Tab 2(2)). The eggs were picked up by Rosstown Hatchery from Skye Hi Farms and invoiced to W. Friesen (Tab 2(3)). This arrangement allowed W. Friesen to meet its placement obligations. In turn, W. Friesen paid for the chicks purchased by Skye Hi Farms to supply its own growing needs (Tab B(4)).

² On May 25, 2011, Skye Hi Farms sold specialty broiler hatching chicks to W. Friesen (Tab B(2)). The eggs were picked up by Rosstown Hatchery from Skye Hi Farms and invoiced to W. Friesen (Tab B(5),(6)). This arrangement allowed W. Friesen to meet its placement obligations. In turn, W. Friesen paid for the number of chicks purchased by Skye Hi Farms to supply its own growing needs (Tab B(4)).

Subject: BC111 - T&C Chick Sales

Hi Arlene,

Would it be possible for us to obtain any/ all BC111 forms submitted by our customers (T&C Chick Sales- nov 2012 to present)

Customers are as follows:

Windberry
Prairie Pride
Woodcreek
Van Kammen
Russlynn
V3 Farms
SkyeHi

Thanks,

Casey

BCBHEC

Dear Stephanie,

Further to our conversation regarding our application made under the "Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program".

As noted in your letter, dated May 26, 2014, we did provide the BCCMB "Summary of the Weekly Chick Placement and Sales Report", indicating Silky and Taiwanese placements produced and placed, however, for a couple reasons this report is not complete. At the time (2009-2011) we were a small hatchery, and had a large number (nearly all) of the Taiwanese placements custom hatched at Rosstown Hatchery, while we hatched the Silky at our facility. We were under the impression that Rosstown was reporting the placements to the BCCMB on our behalf. Also at that time (2009-2011), by the BCCMB's own admission, there were not nearly the checks and balances in place, to corroborate placements and shipments of chicks and chicken, so there were no flags raised indicating we were not reporting all of the placements.

So, in order to fill in the blanks in the "Summary of the Weekly Chick Placement and Sales Report" we provided copies of the chick sales invoices for those placements that had not been reported by this office. I was hoping this would suffice as proof that we had produced those chicks, since the BCCMB had said they were not interested in amending the reports on our behalf.

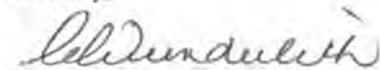

As for providing copies of the "Weekly Chick Placement and Sales Reports" (Form BC200), we have copies of reports as of July 23, 2010. I think this is when the current format was implemented. Prior to that, we just faxed over a cover sheet indicating placements, which of course were lacking most if not all the placements that Rosstown custom hatched for us. For this reason, we provided copies of the chick sales invoices as proof of having produced those chicks.

During the time 2009-2012 we placed no fewer than 540 placements of Silky & Taiwanese chicks to 26 different growers. Acquiring the BCCMB's "Grower Chick Placement Reports" (Form BC111) for each and every one of these placements would be a monumental task, requiring the full, timely co-operation of all these growers, some of whom no longer use Bradner Farms as their hatchery, and thus may have no loyalty to, nor desire to assist. As well, and also by the BCCMB's own admission, many of the reports actually were never submitted to the board, so there is no assurance these growers would even have them. Recently, according to a contact at BCCMB, they are being more aggressive at acquiring these reports in a timely manner.

In summary, we have provided the BCCMB's Summary of the Weekly Chick Placement and Sales Report, along with copies of all chick sales invoices to prove chick sales for those placements we mistakenly overlooked when submitting to the board. We are able to submit all Form BC200 reports from July 23, 2010 to end of 2012. We can create Form BC200 reports for all missing placements if you wish. As well, I am able to submit hatchery reports from Rosstown Hatchery, as well as their invoices for custom hatch, and proof of payment, in the form of cancelled cheques. The question remains, what other documentation would be sufficient to satisfy our claim of chick production?

We are anxious to provide as much information as possible to facilitate this process.
Please don't hesitate to call at any time.

Sincerely,

Carol Wunderlich,
Bradner Farms Hatchery Manager

Abbotsford, BC V2T 1W5

Dear Stephanie:

Re: Letter of May 26, 2014

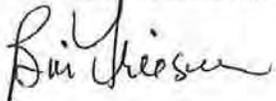

Thank you for the confirmation of many of our application details. In response to the questions for further clarification, please find the following:

- 1) Bill Friesen and Lillian Fehr created their partnership in 1993 as W Friesen have been doing business under this continuously since then. More recently our bank required our partnership to be registered. Since W Friesen was not acceptable, we are registered as W Friesen Enterprises and continue to do business as W. Friesen.
- 2) W. Friesen will be economically viable based upon the continuation level of production between January 1, 2009 and December 31, 2012.
- 3) Please find attached our updated summary of all placements to BCCMB growers between 2009 and 2012, all of the Monthly Chick Placement and Sales Report which were submitted between 2009 and 2012. The BCCMB did not request that we submit these reports until June 2011. I have requested the summary documents, the Hatchery Placement Detail Report and Grower Chick Placement Reports from the BCCMB and will forward those as soon as they arrive.
- 4) With respect to the Foon Kan placements, I have included a copy of the BCCMB agreement for the 3 year lease. Financially we considered it one operation and so my electronic records did not separate placements by farm. Our production records do not go back that far. The chicks number for both W Friesen and Foon Kan production are listed as W Friesen for 2009 and 2010.
- 5) With respect to the numbers for 2009, for much of that year we were custom growing birds for Fairline and exporting our chicks. We are not requesting an export license at this time.

Our special request is to allocate sufficient numbers of chicks to meet currently scheduled placements with the BCCMB producers. Our orders have increased since our initial application early this year.

Our other special request to have our long term hatching business acknowledged, and the allocation back dated.

We look forward to hearing from you.

W Bill Friesen

Lillian Fehr

B.C. Chicken Marketing Board

FORM BC 204 Under Part 43 of the General Orders

LEASE OF QUOTA WITH REGISTERED PREMISES FORM

The B.C. Chicken Marketing Board may permit the leasing of Quota with Registered Premises by a Grower, subject to Part 43 of the January 23, 2006 General Orders, upon terms and conditions as the Board stipulates.

Each person who wishes to lease quota with registered premises, must comply with the following terms;

- (a) Where an approved lease of registered premises is legally binding and enforceable the Board may allot the production quota to the lessee where;
- (b) the owner files with the Board a copy of the signed lease which shall not have a total term of more than 3 years; and
- (c) The Regulated product leased must be contracted to the same Processor the lessor would normally be shipping to unless the Board gives specific approval otherwise;
- (d) All Classes of Transferable Quota is leased on a live weight kilogram basis;
- (e) The leased quota must be grown in a registered licensed production unit leased by the Lessee that must be compliant with bio-security & OFFSAP Program & any other programs specified by the Board.
- (f) The Board is satisfied that the lease and any arrangement between the lessor (owner) and lessee are not intended to circumvent the General Orders.
- (g) Upon expiration or termination of the lease the Board will allot the next production quota to the owner of the registered premise

This application must be completed in its entirety and returned to the Board office

June 20, 2014

Mr. Bill Vanderspek, General Manager
B.C. Chicken Marketing Board
101 – 32450 Simon Avenue
Abbotsford, BC V2T 4J2

Dear Mr. Vanderspek,

The BCBHEC is currently evaluating applications submitted to it under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program*. Under that program, applicants are obliged to provide, among other things, proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as well as proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012.

Applicants have submitted a variety of forms of evidence to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by them that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012. In some cases, applicants have helpfully provided copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200). In other cases, applicants have helpfully provided copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200).

It is important that applicants provide the best "proof" available. It is also important that this information be provided by each and every applicant. The BCBHEC has therefore written to the applicants to ensure that each will provide, at a minimum:

- (a) A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that were placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012;
- (b) Copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012; and

- (c) Copies of the BCCMB's Grower Chick Placement Reports (Form BC111) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicant that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

To our surprise, some applicants have indicated that the BCCMB is either unable or unwilling to provide this information (though other applicants seem to have been able to do so, at least in part). For example, Skye Hi Farms Inc. and Casey Van Ginkel dba V3 Farms (whom we note are represented by the BCCMB's own legal counsel) have responded as follows:

- (a) BCCMB "Hatchery Placement Detail Report"...

We are unable to provide this as the BCCMB collects the information from hatcheries only to create this report. It is our understanding that Rosssdown only provides the BCCMB with a weekly total of custom hatched chicks (with details of who they were custom hatched for, but not who they were sold to)

- (b) BCCMB "Weekly Chick Placement and Sales Report" (BC200)" ...

We are unable to provide this as this is a report prepared by hatcheries for the BCCMB, as above Rosssdown only reports weekly who custom hatched chicks, not chick sales for custom hatchers.

- (c) BCCMB Grower Chick Placement Reports (BC111)

We are unable to provide this. This is a form that is supposed to be submitted by growers to the BCCMB 7 days after chick placement. The BCCMB denied our request for this information...

Please note that "Rosssdown" is simply custom hatching for Skye Hi Farms Inc. and Casey Van Ginkel dba V3 Farms. Counsel for those applicants (also counsel for the BCCMB) has advised as follows:

T&C retains control over the chicks, determines the price at which they will be offered for sale, negotiates and signs contracts as "hatchery" for each placement of chicks with the chicken grower and the grower's processor.

We are at a loss to understand how it is that some applicants are able to provide the requested information, while others cannot. Further, we cannot understand how the BCCMB could be without records to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by each applicant that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as well the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by each applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012.

The administration of the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* is predicated on the assumption that the BCCMB is able to corroborate claims

made with respect to chicks placed and/or exported. We ask that you please comment on the claims made by some of the applicants that such corroborate evidence is either unavailable or being deliberately withheld by the BCCMB.

Best regards,

A handwritten signature in black ink, appearing to be 'Casey Langbroek', written in a cursive style.

Casey Langbroek
BCBHEC Chair

June 24, 2014

Mr. Casey Langbroek, Chair
British Columbia Broiler Hatching Egg Commission

Abbotsford, BC V2T 1W5

Sent by email: stephanie@bcbhec.com

Re: Letter June 20, 2014

Dear Mr. Langbroek,

Staff at the BC Chicken Marketing Board have accommodated your applicants by providing them with as much information as we are able to in order to corroborate their claims with respect to the number of Silkie or Taiwanese chicks placed and/or exported between January 1, 2009 and December 31, 2012. Please note that the BC Chicken Marketing Board regulates the amount of chicken produced by each grower, not the number of chicks hatched or placed in the Province of BC.

It has been brought to our attention by some of your applicants that they did not report all of their chick sales during the timeframe in question. At this point, the Board is not prepared to update our files with this "new" information without substantive proof that these placements actually occurred.

Skye Hi Farms Inc and Casey Van Ginkel dba V3 Farms are registered as chick brokers with the BC Chicken Marketing Board. As such, they are not required to complete Weekly Chick Placement and Sales Reports (BC200) and therefore we do not have a corresponding Hatchery Placement Detail Report.

Neither of these producers meet the BCCMB or BCBHEC definitions of a hatchery.

The BCCMB General Orders define a hatchery as *the premises in which chicks are hatched*.

The BCBHEC Consolidated Order defines a hatchery as *a Person operating a facility for the hatching and incubation of Broiler Hatching Eggs into broiler chicks for delivery to a Grower.*

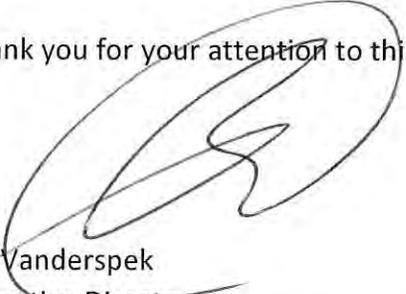

The BCCMB does require chick brokers to report all sales on a monthly basis but as mentioned above, it appears that not all TC and Silkie chick sales were reported. The BCCMB will not be updating files for the timeframe in question without further information.

Hunter Litigation is counsel for the BCCMB, but we are not their sole client. Ms. Hunter consulted with the BCCMB prior to agreeing to represent Skye Hi and V3 in this matter. It was the opinion of the BCCMB Executive Director that there was no apparent or evident conflict in Ms. Hunter acting for Skye Hi and V3 in a hatching egg issue.

Due to confidentiality reasons, we are not able to provide BC111's to your applicants as they contain information collected from individual producers for specific purposes which do not include providing information to your applicants which may or may not corroborate their claims.

The BCCMB has not deliberately withheld any information other than that which we deem to be the proprietary information of individual chicken growers. We have provided as much information as we have received and are able to report while maintaining grower confidentiality.

Thank you for your attention to this matter.

Bill Vanderspek
Executive Director

BRITISH COLUMBIA CHICKEN MARKETING BOARD

\\bccmbsbs\data\Administration\Correspondence\BCBHEC\Response to letter Regarding Specialty Applicants June 20, 2014.docx

July 21, 2014

To the Applicants of the Historically Non-Complaint Program,

As noted in our legal counsel's letter to the BCFIRB dated June 29, 2014, applicants under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* appear to have submitted a variety of forms of evidence to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by them that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012.

It is important that applicants provide the best "proof" available. It is also important that the Commission be able to assess the applications according to criteria that are fair, transparent and applicable to all. Therefore, the Commission will be arranging a meeting with applicants to discuss the form and content of collaborative evidence upon which to assess the applications. Applicants are requested to provide a list of their available dates in both July and August.

Please note that each applicant will be required to provide, in advance of the meeting, a brief written statement of position (which will be shared with the other applicants) on the following matters:

1. What forms of corroborative evidence are available to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by them that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012?
2. What forms of corroborative evidence should be accepted by the Commission for the purpose of assessing applications under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program?
3. Should applicants be given the opportunity to review and comment on the applications submitted by others?
4. If the position taken with respect to question 3 is "no", on what basis could the Commission withhold disclosure of all or any part of the application materials under the *Freedom of Information and Protection of Privacy Act*?

It is expected that the positions of the applicants on the above referenced matters will be the subject of discussion at the forthcoming meeting.

Regards,

A handwritten signature in black ink, appearing to read "Stephanie Nelson", is written over a large, faint yellow circular watermark.

Dear Stephanie:

Re: Letter of July 22, 2014

As requested, please find our views on the following topics:

- 1) Proof of production – since the BCCMB is not able to substantiate our records, and it would appear that there is no consistency in record keeping within the group; it would appear that the retrospective approach be replaced by a request to the BCCMB for the current annual commitments and those records used for allocation.
- 2) Forms of corroborative evidence – the BCCMB should be asked if the applicants provided chicks in the past and what they are scheduled to provide chicks.
- 3) Applicants review other material – we believe this process should be totally transparent to all.
- 4) If the answer to 3 is no – no comment.

Bill Friesen and Lillian Fehr expect to be available EXCEPT for the following dates:

July 31, 2014
August 14 to 17, 2014
August 28 – 30, 2014

In the spirit of an open and transparent process, we hope this meeting will be with all the applicants in one meeting and not individual meetings.

Sincerely,

W. Bill Friesen

Lillian Fehr

BCBHEC

Dear Stephanie,

Regarding your letter dated July 21st, 2014 to all Applicants of the Historically Non-Compliant Program, Rob & I can be available on any working day in August, except the 18th through 22nd. We would ask for a few days or a week's notice prior to the meeting.

As to the items listed in the letter, our position on each is as follows:

1. Forms of Corroborative Evidence Available. While it seems like a good report to base chick placements on, the Weekly Chick Placement and Sales Reports are historically incomplete as far as Bradner Farms is concerned. Therefore, I would suggest hatchery chick sales invoices would be a better indicator of actual chick placements.
2. What form of evidence should be accepted by the Commission? While the reporting of Chick Placements and Sales to the BCCMB is a requirement now, there were little or no checks and balances placed upon the Hatchery to report anything more than the broiler (Cobb or Ross) chick placement. However you can be sure every hatch produced and placed has a Hatchery Chick Sales Invoice attached to it.
3. We believe all applicants should be able to review and comment on applications submitted by others.

We look forward to meeting in the very near future.

Sincerely,

Carol Wunderlich,

Bradner Farms Hatchery Manager

Attention: Stephanie Nelson, General Manager

Dear Ms. Nelson:

Re: Response to July 21, 2014 letter

We write on behalf of both of our farms in response to your letter of July 21, 2014. We are both available for a meeting on the following dates in August 1, 11, 12, 13, 14, 15, 18, or 19.

In response to the matters upon which you have requested our position:

1. Proof of production -- Different growers may have different evidence available to corroborate the number of Silkie or Taiwanese Chicks hatched from broiler eggs produced by them and placed with licensed chicken growers. We have provided charts tracking the number of chicks hatched by Skye Hi and V3 based on hatchery reports prepared by Rosstown Hatchery. We have provided third party verified information from 2010 when we commenced operations through to April 4, 2014. We support the suggestion of Bill Friesen and Lillian Fehr that BCCMB request current annual commitments and that those records be used as chick production is a flow through product. The difficulty in obtaining accurate records of historical production is another reason that in our view the Commission should be basing its allocation on current—rather than historical—chick placement commitments.
2. Forms of corroborative evidence -- We agree with the suggestion of Bill Friesen and Lillian Fehr that the best evidence would be if BCCMB would provide information about chick placement. If the BCCMB is unable to provide historical information back to 2009, perhaps the BCCMB will be able to obtain the information for the last year, or 6.5 BCCMB production periods. If the BCCMB is able to provide information for the past twelve months, our view is that that information should be used in place of the unverified information for 2009 -2012. If that information is not available, the Commission should consider accepting other third party verified records such as those already provided by Skye Hi and V3.
3. Information about our application has already been shared with other applicants through the appeal we have filed with the Farm Industry Review Board. While we do not object to others having the opportunity to review and comment on our application if the

process is transparent to all stakeholders, we are concerned about the additional delays occasioned by building in time for each applicant to review the applications filed by others.

4. We are not in a position to provide advice to the Commission about the application of the *Freedom of Information and Protection of Privacy Act* but we trust that the Commission will obtain appropriate legal advice in considering any disclosure obligations it might have under that act.

Yours truly,

Trevor Allen, Skye Hi Farms

Casey Van Ginkel, V3 Farms

Agenda

Historically Non-Compliant Meeting with BCBHEC

August 19, 2014 1:00 P.M.

Best Western Regency Inn, Abbotsford B.C.

1. **Welcome and Introductions:** Calvin Breukelman, Chair
2. **FIRB comments:** Jim Collins, FIRB General Manager
3. **Historical comments:** Robert Hrabinsky, Commission Council
4. **Review and discussion of questions posed in July 21, 2014 letter to applicants:**
Stephanie Nelson, BCBHEC General Manager
 - What forms of corroborative evidence are available to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by them that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012?
 - What forms of corroborative evidence should be accepted by the Commission for the purpose of assessing applications under the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program?
 - Should applicants be given the opportunity to review and comment on the applications submitted by others?
 - If the position taken with respect to question 3 is "no", on what basis could the Commission withhold disclosure of all or any part of the application materials under the *Freedom of Information and Protection of Privacy Act*?
5. **Final Comments**

September 2, 2014

To the Applicants;

The attached Executive Summary of our meeting on August 19, 2014 was presented to the Commission at its August 21, 2014 meeting, and the Commission has made the following decision:

The Commission will assess each application having regard to the following corroborative evidence: (1) hatchery invoices from the hatchery to the hatching egg producer; and (2) invoices from the hatching egg producer to the purchaser (except in the case of William Friesen and Lillian Fehr, and only then with respect to chicks grown by them). In the case of William Friesen and Lillian Fehr, the volume of chicks produced for their own growing operation should be compared against their BCCMB quota expressed in kilograms.

Applicants will have until September 15, 2014 to supplement their existing applications with additional corroborative evidence (as described above) if not already set out in the application.

Regards,

Stephanie Nelson
BCBHEC General Manager

EXECUTIVE SUMMARY OF HNC MEETING – AUGUST 19, 2014

IN ATTENDANCE:

APPLICANTS: William Friesen, Lillian Fehr, Rob Donaldson, Casey Van Ginkel, Trevor Allan, Kelly and Teresa Boonstra

BCFIRB: Jim Collins

BCBHEC: Calvin Breukelman, Stephanie Nelson, Veronica Kushnerenko and Robert Hrabinsky

SUMMARY:

The purpose of the meeting was to discuss the four questions identified in the Commission's letter to applicants dated July 21, 2014.

Jim Collins confirmed that he would not be reporting back on the meeting to the panel hearing the appeal. Legal counsel for the Commission confirmed that all discussions concerning the administrative method to corroborate the number of chicks marketed were "on the record" and could be referenced in the appeal. On the other hand, any discussions that might take place concerning possible changes to the Program Rules could and would take place on a without prejudice basis.

Discussion among the applicants revealed that it would not be possible to rely upon BCCMB records to substantiate the number of chicks marketed. While Kelly and Teresa Boonstra indicated that they were able to assemble their application on the strength of BCCMB records, all other applicants indicated that the BC200 and BC111 forms were not consistently used and that these forms are therefore an unreliable method of corroboration.

Casey Van Ginkel argued that the Commission could refer to the BCCMB's BC101 form, but a subsequent follow-up call to the BCCMB revealed that this form was also not consistently used and would not be a reliable method of corroboration.

All applicants ultimately agreed that the Commission can and should look to hatchery invoices from the hatchery to the hatching egg producer, together with invoices from the hatching egg producer to the purchaser, as the method of corroboration. The only exception would arise in the case of William Friesen and Lillian Fehr, who produced some chicks for their own growing operation and would not have invoices "from the hatching egg producer to the purchaser" in that instance.

All applicants agreed that their application materials would not be shared with other applicants as a matter of course, but that any applicant could request disclosure of another's application materials following the Commission's allocation decision.

It was agreed that the Commission would communicate its decision with respect to the method of corroboration to each applicant, and that the applicants would thereafter be given a reasonable amount of time (perhaps by September 15) to submit their corroborative material.

RECOMMENDATION:

It is recommended that the Commission assess each application having regard to the following corroborative evidence: (1) hatchery invoices from the hatchery to the hatching egg producer; and (2) invoices from the hatching egg producer to the purchaser (except in the case of William Friesen and Lillian Fehr, and only then with respect to chicks grown by them). In the case of William Friesen and Lillian Fehr, the volume of chicks produced for their own growing operation should be compared against their BCCMB quota expressed in kilograms.

Subject: BCBHEC Meeting notes from August 19, 2014

Hello

I was reviewing the meeting notes again to ensure that I am gathering the appropriate records. While the meeting conclusions record the fact that we do have invoices from ourselves as the chick supplier to ourselves as the grower, we also do not have invoices from ourselves as the chick supplier to ourselves as the lessee of the Foon Kan farm. I did note in the meeting that we had included the lease agreement as part of our initial application and we treated the entire operation as one farm.

I trust this will not become an issue moving forward.

Regards
Lillian

Dear Stephanie:

RE: W Friesen Hatching Statistics 2009 to 2012

In keeping with the conclusions of the stakeholders meeting in August 2014, please find our 'evidence' of hatching for the BC Chicken Marketing Board (BCCMB) sales 2009 to 2012.

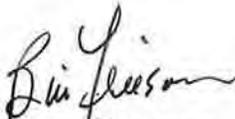

The W. Friesen operation included both BCCMB License 2004 for Friesen, Wilhelm & Fehr, Lillian and License 2040 for Foo Kan & Yuk Ying Yan (Foon Kan). BCCMB quota was sold and bought during that timeframe. The operation included both chickens classified as "TC" and "Silkie". The time from chick placement to sale ranges from 90 to 120 days. The average weight for "TC" is estimated at 1.9 KG's per bird and for Silkie 1.0 KG's per bird. You will note that our average production rate has increased over time as we our production of Silkie has decreased.

Enclosed are the summary statistics from W. Friesen and copies of the relevant:

- Hatching records from Rosstown Hatchery
- Chick sales from W Friesen
- W Friesen and Foon Kan chick placements
- BC Chicken Marketing Board production W Friesen 2009, 2010, 2013
- BC Chicken Marketing Board production Foon Kan 2010, 2011, 2012
- The total number of chicks placed for BCCMB production was 878123.

We trust that everything is in order and self explanatory but please contact us, should there be any question about the data.

Regards

W. Bill Friesen

Lillian Fehr

To: Stephanie Nelson

Subject: Hatchery Invoice

Stephanie,

Coastline Chicks can not supply invoices from the hatchery since we own the hatchery. We did not invoice ourselves for chicks hatched and placed on registered growers farms.

We did submit all our invoices from January 1, 2009 to December 31, 2012. If you require any additional information please let me know.

Kelly

Coastline Chicks

Good morning,

The Commission's review of applications made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules* is nearing completion. Though no decisions have been made by the Commission at this time, a preliminary review suggests that you supplied invoices accounting for 878,123 chick placements, which is 56,584 chicks short of your application total of 934,707.

On September 2, 2014, the Commission decided that the volume of chicks produced for your own growing operation should be compared against your BCCMB quota expressed in kilograms.

We are therefore writing to you to give you an opportunity to provide information concerning your BCCMB quota, and to explain how that information might be used to account for the shortfall of 56,584 chicks. In particular, the Commission would require an explanation as to how those chicks could be placed without being reflected under any invoice either from or to a hatchery.

Regards,
Stephanie Nelson

Dear Stephanie:

RE: Inquiry of January 20, 2015

Thank you for your inquiry regarding the data submitted in September 2015.

The initial application of 934,707 chicks was based upon hatchery invoices to best of our ability. When we submitted the data in September, the figure of 878,123 was the total of chicks placed and/or invoiced. The data also included the KG reported by BCCMB for both the Foon Kan farm and W Friesen operation.

In the September submission, the total number of chicks invoiced was not totaled. Please find the attached page 4 which has been revised to include the total number of chicks invoiced by the hatchery at 967,929.

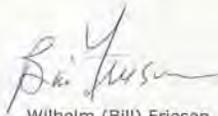

We have been diligent in presenting what we know to be realistic data. During the year of 2009 we also experienced an outbreak of ILT, as did other producers. That is reflected in our numbers.

If there are any other questions regarding the data submitted, please let us know.

Regards

Lillian Fehr

Subject: Re: Application

Hello Stephanie

Please find the attached pages and let me know if further clarification is required.

Regards

Lillian

On 20 January 2015 at 10:33, Stephanie Nelson <stephanie@bcbhec.com> wrote:

Good morning,

The Commission's review of applications made under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program Rules* is nearing completion. Though no decisions have been made by the Commission at this time, a preliminary review suggests that you supplied invoices accounting for 878,123 chick placements, which is 56,584 chicks short of your application total of 934,707.

On September 2, 2014, the Commission decided that the volume of chicks produced for your own growing operation should be compared against your BCCMB quota expressed in kilograms.

We are therefore writing to you to give you an opportunity to provide information concerning your BCCMB quota, and to explain how that information might be used to account for the shortfall of 56,584 chicks. In particular, the Commission would require an explanation as to how those chicks could be placed without being reflected under any invoice either from or to a hatchery.

Regards,
Stephanie Nelson

Dear Stephanie:

RE: Inquiry of January 20, 2015

Thank you for your inquiry regarding the data submitted in September 2015.

The initial application of 934,707 chicks was based upon hatchery invoices to best of our ability. When we submitted the data in September, the figure of 878,123 was the total of chicks placed and/or invoiced. The data also included the KG reported by BCCMB for both the Foon Kan farm and W Friesen operation.

In the September submission, the total number of chicks invoiced was not totaled. Please find the attached page 4 which has been revised to include the total number of chicks invoiced by the hatchery at 967,929.

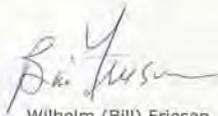

We have been diligent in presenting what we know to be realistic data. During the year of 2009 we also experienced an outbreak of ILT, as did other producers. That is reflected in our numbers.

If there are any other questions regarding the data submitted, please let us know.

Regards

Lillian Fehr

February 19, 2015

Ms. Stephanie Nelson
Executive Director
B.C. Broiler Hatching Egg Commission
Suite 180 - 32160 South Fraser Way
Abbotsford, B.C. V2T 1W5

Dear Ms. Nelson:

**Re: Specified Procedures on Information Other Than Financial Statements
"Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program"**

We have reviewed the applications of five applicants for an allotment of Regularized Producer Chick Quota and/or a temporary, revocable, non-transferrable export permit and tallying the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicants that have been placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012; and the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicants that have been exported outside the Province between January 1, 2009 to December 31, 2012.

For each of the five applications we independently extracted the hatched chick data and created our own chick production totals by year, by type and/or recalculated the totals. Below is a summary of our findings for each of the applications. However, these procedures do not constitute an audit of the applicants' applications for an allotment of Regularized Producer Chick Quota and/or a temporary, revocable, non-transferrable export permit, and therefore we express no opinion on the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by the applicants that have been placed with licensed chicken growers as at December 31, 2012.

Bradner Farms' Application

We extracted all of Bradner Farms' invoices for chick placements in the four year period from January 1, 2009 to December 31, 2012 and calculated the total of chick placements on these invoices to be eight million, eight hundred and forty-one thousand, two hundred and eight-seven (8,841,287) (**Exhibit #1**). The Bradner Farms' Application total was reported as eight million, six hundred and seventy-eight thousand, four hundred and ninety-eight (8,678,498) and the difference between our recalculation and the application is one hundred and sixty-two thousand seven hundred and eighty-nine (162,789) chick placements.

V3 Farms' Application

We recalculated the number of chicks placed in the four year period from January 1, 2009 to December 31, 2012 from the "*Hatching Reports*" contained in the V3 Farms' Application and computed a total of one hundred and thirty-two thousand, nine hundred and seventy-six (132,976) (**Exhibit #2**) chicks placed and found the total to be in agreement with the V3 Farms' Application.

Skype Hi Farms Inc. Farms' Application

We recalculated the number of chicks placed in the four year period from January 1, 2009 to December 31, 2012 from the "*Hatching Reports*" contained in the Skype Hi Farms Inc. Application and computed a total of ninety-six thousand, one hundred and forty-four (96,144) **(Exhibit #3)** chicks placed and found the total to be in agreement with the Skype Hi Farms Inc. Application.

Coastline Chicks Application

We recalculated the number of chicks placed with licensed chicken growers within the Province in the four year period from January 1, 2009 to December 31, 2012 from the "*Coastline Chicks Sales Invoices*" contained in the Coastline Chicks Application and computed a total of two million, three hundred and two thousand, one hundred and eighty (2,302,180) **(Exhibit #4)** chicks placed and found the total not to be in agreement with the Coastline Chicks Application. The Coastline Chicks Application total was reported as two million, three hundred thousand, seven hundred and fifty-nine (2,300,759) and the difference between our recalculation and the application is four thousand, one hundred and ten (4,110) chick placements.

We recalculated the number of chicks exported outside the Province in the four year period from January 1, 2009 to December 31, 2012 from the "*Coastline Chicks Sales Invoices*" contained in the Coastline Chicks Application and computed a total of two million, nine hundred and sixty-four thousand, nine hundred and ninety-three (2,964,993) **(Exhibit #4)** chicks placed and found the total not to be in agreement with the Coastline Chicks Application. The Coastline Chicks Application total was reported as two million, eight hundred and ninety-five thousand, five hundred and forty (2,895,540) and the difference between our recalculation and the application is sixty-nine thousand, four hundred and fifty-three (69,453) chick placements.

W. Friesen Enterprises Application

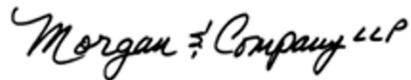

We recalculated the total for the "*W. Friesen Chick Placements for BC BHEC*" report produced by W. Friesen for the number of chicks placed in the four year period from January 1, 2009 to December 31, 2012 contained in the W. Friesen Application and computed a total of seven hundred and seventy thousand, four hundred and forty-seven (878,123) **(Exhibit #5)** chicks placed and found the total not to be in agreement with the W. Friesen Enterprises Application. The W. Friesen Enterprises Application total was reported as nine hundred and thirty-four thousand, four hundred and seven (934,407) and the difference between our recalculation and the application is fifty-six thousand two hundred and eighty-four (56,284) chick placements.

The W. Friesen Enterprises Application also included the production of chicks placed by weight in kilograms in copies of reports to the BC Chicken Marketing Board. We agreed the W. Friesen Enterprises Application chicken processed numbers to the reports submitted to the BC Chicken Marketing Board and calculated the four year total to be one hundred and ninety-four thousand, one hundred and six (194,106) kilograms for Foo Kan & Yuk Ying Yan and three hundred and forty-five thousand, four hundred and seventy (345,470) kilograms for William Friesen and Lillian Fehr. The total production of chicks placed by weight in kilograms for both producers was five hundred and thirty-nine thousand, five hundred and seventy-six (539,576) kilograms **(Exhibit #5)**. We also note that on one of the reports to the BC Chicken Marketing Board for license # 2004 there is two hundred and sixteen thousand, one hundred and sixty-five (216,165) kilograms of chick production in the January 1, 2009 to September 30, 2009 period that is not found the "*W. Friesen Chick Placements for BC BHEC*" report **(Exhibit #5)**.

* * * * *

The performance of the specified procedures and the issuance of our report thereon are solely for the use of the BCBHEC and those to whom our report is specifically addressed by us. We acknowledge that our report may be disclosed by the BCBHEC to the applicants, to the BC Farm Industry Review Board, and to the public generally. We make no representations of any kind to any third party in respect of the information and our factual findings and we accept no responsibility for their use by any third party.

Yours truly,

Morgan & Company LLP

PM/ad

¹ On December 22, 2010, Skye Hi Farms sold specialty broiler hatching chicks to W. Friesen (Tab 2(2)). The eggs were picked up by Rosstown Hatchery from Skye Hi Farms and invoiced to W. Friesen (Tab 2(3)). This arrangement allowed W. Friesen to meet its placement obligations. In turn, W. Friesen paid for the chicks purchased by Skye Hi Farms to supply its own growing needs (Tab B(4)).

² On May 25, 2011, Skye Hi Farms sold specialty broiler hatching chicks to W. Friesen (Tab B(2)). The eggs were picked up by Rosstown Hatchery from Skye Hi Farms and invoiced to W. Friesen (Tab B(5),(6)). This arrangement allowed W. Friesen to meet its placement obligations. In turn, W. Friesen paid for the number of chicks purchased by Skye Hi Farms to supply its own growing needs (Tab B(4)).

** discrepancy not identified in PBC documents

6. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 107,571.4. Now produced and shown to me and marked collectively as Exhibit "D" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012. -Forth coming

7. The number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012 is 0. Now produced and shown to me and marked collectively as Exhibit "E" to this my Statutory Declaration are photocopies of documents evidencing the said number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by me that have been exported outside the Province between January 1, 2009 and December 31, 2012.

8. I am financially able to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

I have owned and operated my hatching egg business as a farm since 2010.

Now produced and shown to me and marked collectively as Exhibit "F" to this my Statutory Declaration are photocopies of documents material to my financial ability to maintain an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs.

9. I have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs. Particulars of my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs are as follows:

Contracted supply of TC chicks to licensed BCCMB Specialty growers

Now produced and shown to me and marked collectively as Exhibit "G" to this my Statutory Declaration are photocopies of documents material to my economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

10. My Independent Production Unit is within economic access of a licensed Hatchery. Particulars of the proximity of my Independent Production Unit to the licensed Hatchery are as follows:

Yarrow, BC, hatchery already picks up regularly (30 min drive)

This working paper is a recalculation using the Sales Invoices in the document named "PBC COASTLINE CHICKS SALES Application Materials" in order to reconcile the amounts recorded in the BCBHEC and BCCMB reports also in that document.

12. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of your financial ability to maintain or to establish an acceptable Independent Production Unit for the production of Silkie or Taiwanese Broiler Hatching Eggs;
13. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof that your Independent Production Unit is within economic access of a licensed Hatchery;
14. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
15. **Subject to providing a duly sworn Statutory Declaration**, you have provided proof of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are incomplete or that otherwise require further particulars and/or documentation:

1. You have completed a Statutory Declaration, but it has not yet been duly sworn before a Commissioner for Oaths. You must provide a duly sworn Statutory Declaration.
2. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012. It is also incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been exported outside the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 **1** 2,300,759.

Your application also states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been exported outside the Province between January 1, 2009 and December 31, 2012 is **2** 2,895,540.

You have provided copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province, or exported outside the Province, between January 1, 2009 and December 31, 2012. This is very helpful.

However, we ask that you also provide:

- (a) **A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were**

September 11, 2014

Stephanie Nelson
General Manager
BC Broiler Hatching Egg Commission
#180 – 32160 South Fraser Way
Abbotsford, BC V2T 1W5

Dear Stephanie:

RE: W Friesen Hatching Statistics 2009 to 2012

In keeping with the conclusions of the stakeholders meeting in August 2014, please find our 'evidence' of hatching for the BC Chicken Marketing Board (BCCMB) sales 2009 to 2012.

The W. Friesen operation included both BCCMB License 2004 for Friesen, Wilhelm & Fehr, Lillian and License 2040 for Foo Kan & Yuk Ying Yan (Foon Kan). BCCMB quota was sold and bought during that timeframe. The operation included both chickens classified as "TC" and "Silkie". The time from chick placement to sale ranges from 90 to 120 days. The average weight for "TC" is estimated at 1.9 KG's per bird and for Silkie 1.0 KG's per bird. You will note that our average production rate has increased over time as we our production of Silkie has decreased.

Enclosed are the summary statistics from W. Friesen and copies of the relevant:

- Hatching records from Rosstown Hatchery
- Chick sales from W Friesen
- W Friesen and Foon Kan chick placements
- BC Chicken Marketing Board production W Friesen 2009, 2010, 2013
- BC Chicken Marketing Board production Foon Kan 2010, 2011, 2012
- The total number of chicks placed for BCCMB production was 878123.

Agreed to amount recalculated.

We trust that everything is in order and self explanatory but please contact us, should there be any question about the data.

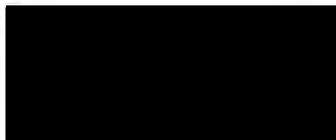

Regards

W. Bill Friesen

Lillian Fehr

RECEIVED
12 Sept 14

Enc:

12. You have provided proof (by way of statutory declaration) that your Independent Production Units are within economic access of a licensed Hatchery;
13. You have provided proof (by way of statutory declaration) of your ability to directly order and arrange for the placement of day-old Silkie or Taiwanese broiler breeder pullets; and
14. You have provided proof (by way of statutory declaration) of arrangements with a licensed Hatchery in good standing with the Commission for the hatching of day-old Silkie or Taiwanese broiler Chicks from your production.

However, there are some aspects of your application that are incomplete or that otherwise require further particulars and/or documentation:

1. You indicate that Wilhelm Friesen and Lillian Fehr carry on business as a partnership, but state that the name of the business is "W. Friesen Enterprises dba W. Friesen". It is not clear whether your business name is "W. Friesen Enterprises" or "W. Friesen" and we ask that you clarify this point.
2. It is incumbent on you to provide proof that you have economically viable plans to sustain the production of Silkie or Taiwanese Broiler Hatching Eggs.

Your application states that your economically viable plans are "based upon the continuation of the level of production established for 2014."

Please confirm whether your operations were economically viable based on the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that had been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

3. It is incumbent on you to provide proof of the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012.

Your application states that the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012 is 934,407.

Difference of \$56,284

We ask that you provide:

- (a) A "Hatchery Placement Detail Report" prepared by the BCCMB which summarizes the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that were placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012;
- (b) Copies of the BCCMB's "Weekly Chick Placement and Sales Reports" (Form BC200) to corroborate the number of Silkie or Taiwanese Chicks hatched from Broiler Hatching Eggs produced by you that are claimed to have been placed with licensed chicken growers within the Province between January 1, 2009 and December 31, 2012; and

^ Accountant's Recalculation

February 27, 2015

To the Applicants of the Historically Non-Compliant Program:

The Commission is writing to all of the applicants under the *Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program* to communicate its decisions with respect to the allotment of Regularized Producer Chick Quota and the issuance of temporary, revocable, non-transferrable export permit.

Processing the applications was time-consuming, and was delayed in part by the recent outbreak of AI. Given the delay, the Commission has decided that it would be prudent to communicate its decisions in an abbreviated manner with detailed written reasons to follow.

Based in part on a review of the applications conducted by an independent accounting firm, the Commission makes the following decisions:

1. Bradner Farms will be allotted 4,420,644 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. This is 81,395 units more than Bradner Farms requested. Their application total was reported as 8,678,498, and the difference between the independent accounting firm's tally and the application was 162,789 chick placements;
2. Unger's Chick Sales (1974) Ltd. will be allotted 1,151,090 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. Unger's Chick Sales (1974) Ltd. will also be issued 1,482,497 units of temporary, revocable, non-transferrable export permit. This amounts to 0.5 Silkie or Taiwanese Chicks per Quota Period for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant that have been exported outside the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. Both numbers are very slightly higher than what was sought by Unger's Chick Sales (1974) Ltd. as they apparently under-reported by 4,110 chick placements and 69,453 chick exports.

3. W. Friesen Enterprises will be allotted 439,062 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. Note that this allocation reflects an acceptance of the "special circumstances" application, *but only to the extent that their numbers included chick placements from the Foon Kan Farm leased by the applicant*. The Commission has decided that it will not grant an extraordinary allocation to the applicant based on any of the other grounds advanced by it as "extraordinary circumstances".
4. V3 Farms will be allotted 66,488 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. The Commission is prepared to receive and consider further submissions from V3 Farms and the other applicants concerning a supplemental allotment to V3 Farms as may be necessary to ensure a "minimum efficient farm size". The Commission has decided that it will not grant an extraordinary allocation to the applicant based on any of the other grounds advanced by it as "extraordinary circumstances".
5. Skye Hi Farms Inc. will be allotted 48,072 units of Regularized Producer Chick Quota. This amounts to 0.5 units of Regularized Producer Chick Quota for every Silkie or Taiwanese Chick hatched from Broiler Hatching Eggs produced by the applicant and placed with licensed chicken growers within the Province between January 1, 2009 to December 31, 2012, as tallied by the independent accounting firm. The Commission will reject the "special circumstances" application. The Commission is prepared to receive and consider further submissions from Skye Hi Farms Inc. and the other applicants concerning a supplemental allotment to Skye Hi Farms Inc. as may be necessary to ensure a "minimum efficient farm size". The Commission has decided that it will not grant an extraordinary allocation to the applicant based on any of the other grounds advanced by it as "extraordinary circumstances".
6. W. Friesen Enterprises asked that its allocation be made retroactively and retrospectively so that it is not subject to the weight of the surrender assessment rules. The Commission will defer making any decision on the application of the surrender assessment rules at this time. If and when W. Friesen Enterprises applies to transfer some or all of its quota, it may make an application for dispensation of the usual surrender assessment rules at that time.
7. The Commission will consult with the successful applicants and will consider increasing or decreasing the allocations on a pro rata basis to best reflect the

current, aggregate market conditions if it is thought necessary or desirable to do so.

Thank you for your attention to this matter.

Regards,

Telephone: (604) 891-2403		E-Mail: chunter@litigationchambers.com
B. Grounds for Appeal		
I am aggrieved or dissatisfied by the decision of the British Columbia Broiler Hatching Egg Commission with respect to the allotment of "Regularized Producer Chick Quota" pursuant to the <i>Regularization of Historically Non-Complaint Silkie and Taiwanese Producers Program</i> .		Date of Decision: February 27, 2015
Of the: British Columbia Broiler Hatching Egg Commission ("Commission")		
Specify why the decision should be changed and state the outcome (BCFIRB decision) requested:		
The decision does not comply with the BCFIRB September 1, 2005 "Specialty Market and New Entrant Submissions Policy, Analysis, Principles and Directions" or with sound marketing policy because it does not provide for sufficient quota to allow the Appellant to meet its current contractual commitments to supply registered specialty chicken growers,		

including its own farm, or to operate at an efficient or economically viable farm level.

The process undertaken by the Commission in determining how to allot quota pursuant to Amending Order 11 does not comply with the BCFIRB 6 Higher-Level Principles – Definitions and Guidance, September 2011, and was unfair to the Appellant.

The Appellant seeks a stay of the Commission’s decision until the appeal is determined or, alternatively, until the Commission has completed its decision-making process in respect of the allotment of quota pursuant to Amending Order 11.

The Appellant seeks an order directing the Commission to allot quota to the Appellant in an amount that would allow it to meet its current and ongoing contractual commitments.

Dear Sirs and Mesdames:

**RE: Skye Hi Farms Inc. and Casey Van Ginkel dba V3 Farms v. British Columbia
Broiler Hatching Egg Commission – Application for a Stay of the February 27, 2015
Quota Allotment Decision**

On March 5, 2015, the British Columbia Farm Industry Review Board (BCFIRB) received a further appeal and application for a stay from Skye Hi Farms Inc. and Casey Van Ginkel dba V3 Farms (the appellants) with respect to a February 27, 2015 decision of the British Columbia Broiler Hatching Egg Commission (Commission) allotting quota pursuant to Amending Order 11 (Appeal #2). The appellants are seeking a stay of the decision until such time as the appeal is determined or alternatively, until the Commission has completed its decision-making process in respect of the allotment of quota pursuant to Amending Order 11.

By way of background, the appellants previously appealed the November 23, 2013 decision of the Commission to enact Amending Order 11 (Schedule 9, *Regularization of Historically Non-compliant Silkie and Taiwanese Producers Program Rules*) and applied for a stay (Appeal #1).

The stay application was dismissed in a decision dated March 6, 2014 where the then presiding member held in part:

43. it is speculative at this point to know how the Commission will treat the appellants' application. The program as designed has a base component and a discretionary component which may or may not give the appellants the market share that they have gained since December 2012. Further, the Commission has the authority to make "special directions" to recognize in some fashion the appellants' business model of a "virtual hatchery". In short, the program may or may not cause the appellants irreparable harm. On this point, I agree with the Commission, that in the absence of a decision on the application, there is a factual vacuum.
44. Once the Commission makes a decision on these significant issues with respect to the appellants or any other application, a person aggrieved by or dissatisfied with that decision could bring an appeal and a stay application on short notice. While any such stay application may be more complicated in that the implications of any other allocation applications would need to be addressed, the Provincial board would have the benefit of the Commission's considered views on the merits of the application concerned, which BCFIRB expects would take into consideration the impact on other affected stakeholders. An application and arguments related to irreparable harm would then have a factual underpinning.
45.While I accept that the appellants are in a good position to offer opinions about certain aspects of the businesses they operate and make projections about how the Decision *might* affect their businesses, until a decision on the appellants' application has been made by the Commission, these are speculations at best.

Appeal #1 was subsequently adjourned generally at the request of the Commission. While the presiding member expressed concern regarding the length of time the Commission had taken to process applications, in her July 10, 2014 adjournment decision she held that it was in the public interest that the allotments made pursuant to Amending Order 11 be "fair, transparent and applicable to all" and granted the adjournment application.

On February 27, 2015, the Commission issued its decision (the February decision) allotting quota to the appellants based on the "default provisions" of Amending Order 11 and denying additional allotments of quota based on "exceptional circumstances". The Commission made its decision with "reasons to follow". Subsequently, the Commission invited all quota applicants including the appellants to make submissions in relation to 'minimum efficient farm size' and the prospect of increasing or decreasing allocations on a pro rata basis to best reflect the current aggregate market conditions. This submission process will not be concluded until April 3, 2015 and it is uncertain when any further Commission decisions will be made or when its written reasons will be released.

Given the appellants' position that there was urgency in having the stay application heard as they are obligated to sign supply contracts by March 13, 2015, I directed a truncated submission schedule for the appellants, the Commission and those parties identified as interveners in Appeal #1 (BC Chicken Growers' Association, Coastline Chicks, Bradner Farms and W Friesen Enterprises dba W Friesen). I have had an opportunity to review these submissions, as well as the affidavit evidence submitted by the appellants in support of their application. I note as well

that in my earlier correspondence, I had indicated that Daphne Stancil would be presiding over this preliminary matter however as she is unavailable, that responsibility falls to me.

I am mindful of the urgency surrounding this application and I wish to be clear that I have considered the arguments of the parties in their entirety although it is not my intention to refer to all of them in the course of my decision.

The Stay Application

The test for whether it is appropriate to grant a stay is set out in *RJR-MacDonald Inc. v Canada (A.G.)*, [1994] 1 S.C.R. 311. This test is also set out in Rule 7(1)(b) of the Rules of Practice and Procedure for Appeals under the *Natural Products Marketing (B.C.) Act* which provides that an appellant who applies to BCFIRB for a stay of a decision under appeal must specify

- (i) Whether the appeal raises a serious issue(s) to be considered;
- (ii) What harm to the applicant, that cannot be remedied, would occur if a stay is not granted;
- (iii) Why the harm to the applicant outweighs the harm that would occur to others, or to the public interest, if BCFIRB grants the stay.

Submissions of Parties

The appellants argue that this appeal raises serious issues (relating to procedural fairness and sound marketing policy) to be tried. They further allege that failure to grant a stay will result in irreparable harm as the amount of quota allotted to them by the Commission to date is inadequate to meet planned contractual commitments. Further, the Commission's determination of quota allotment in stages places the appellants in a difficult position as it is unknown what quota will be allotted to them upon the Commission's completion of its submission process. The appellants rely on the affidavit evidence of specialty broiler breeder and president of Skye Hi Farms, Trevor Allen, in support of this position. As for the balance of convenience, the appellants say that it is not in the public interest to arbitrarily and suddenly impose a quota regime without advance notice, thereby creating chaos and removing producers from the market. Second, market diversity, sustainability and innovation are policy objectives of both the province and BCFIRB and these objectives will be harmed if a stay is not granted. Third, the February decision has the effect of excluding new entrants (the appellants) from the market. Fourth, a stay permits the appellants to continue to supply chicken growers who have chosen to work with them and with whom they have developed excellent relationships. Finally, the appellants say that a stay will allow the Commission to complete its decision making and allow for the appeals to be heard in an orderly way. In the absence of reasons, it is impossible to know why the Commission has made the decision it did and why it has chosen to engage in "decision-making in slices".

The Commission chose not to address the three part test for a stay or the issues raised by the appellants. Instead, the Commission characterises this application as an attempt by the appellants to obtain an unfettered right to produce broiler hatching eggs without quota, pending

further decisions of the Commission or the hearing of the appeal. The Commission says its decision to allot quota should not be confused with a decision to cancel quota where an affected party might seek a stay. It says that if a stay is granted of the decision to allot quota, the appellants would simply not receive their allotment of quota. The stay does not give them an unfettered right to produce broiler hatching eggs without an allotment quota. The Commission also says that this application must not be confused with how the appellants would potentially oppose enforcement proceedings in Supreme Court if such proceedings were in fact taken by the Commission. The Commission says that if the appellants are not seeking to pre-emptively block enforcement proceedings under the guise of a stay application on a decision allotting quota to them, then they should clearly state that they are seeking a declaration from BCFIRB that they have an unfettered right to produce broiler hatching eggs without quota.

The Commission says the history of regulated marketing is “littered with unsuccessful attempts to argue past unlawful production gives rise to a legal right to be grandfathered into the regulated marketing system”. The Commission says that it would vigorously oppose the granting of such a declaration. The Commission urges BCFIRB to dismiss this application for a stay and state clearly and definitively that the absence of quota cannot and does not give rise to an unfettered right to produce broiler hatching eggs stating that if the appellants had some inherent right to engage in production without quota, the Regularization Program itself would be an exercise in futility.

The appellants made three points in reply. First, the status quo here is an absence of regulation of specialty hatching egg production. In the first stay application, the Commission made a similar argument, characterizing the notion that the appellants have a “right” to continue to produce specialty broiler hatching eggs at current production levels as “complete nonsense” given that section 37 of the Consolidated Order prohibits the appellants from producing hatching eggs without an allotment of quota and the Commission’s ability to enforce that prohibition through an injunction obtained in the Supreme Court. The appellants disagree with the Commission’s attempt to again characterize the period leading up to the February decision as one of non-compliance by the appellants. Rather, they say the Commission was aware of BCFIRB’s 2005 Specialty Review and its directions to boards and commissions to designate specialty classes of quota and establish new entrant programs, as well as the resulting decision of the British Columbia Chicken Marketing Board to commence issuing specialty chicken quota. Despite this, the Commission failed to implement a quota program for specialty hatching eggs, thereby creating a situation where the market needs of chicken growers could only be met by producers without quota. It was in this environment, with the full knowledge and acquiescence of the Commission, that the appellants commenced production of specialty hatching eggs to supply their own registered chicken farms in 2010 and, in 2012, began operating T&C Chick Sales, a chick broker licensed with the Chicken Board.

The appellants’ second point is that the arbitrariness of the Commission decision favours a stay. Given the Commission’s long standing refusal to regulate specialty chicken, the appellants say they had a legitimate expectation for high levels of procedural fairness. Instead, the Commission has provided no rationale for any aspect of its decisions, in relation to Amending Order 11, the February decision, the process chosen, the timing of the decision after a multi-year delay and the

failure to complete its decision making before aspects of the decision take effect. The failure to give reasons is exacerbated by the Commission choosing not to file any evidence in support of its position on either this stay application or the stay application for Appeal #1. The February decision does not accord with BCFIRB's higher-level principles (Strategic, Accountable, Fair, Effective, Transparent, Inclusive (SAFETI)) and the Commission's apparent failure to consider the interests of the appellants is not inclusive. There is no rationale offered in support of using 2009-2012 production levels to set quota allocations for 2015 especially when the appellants alone were new entrants in 2010. Despite a lengthy adjournment to permit the Commission to finish its decision making, this decision making process is incomplete. In light of the foregoing, the appellants say there is no public interest in implementing a partial decision now as opposed to after the Commission's decision making process is complete.

The third point identified by the appellants is that in the absence of a stay there will be a shortage of chicks for chicken growers. The BCCGA raised the issue of the potential shortage of chicks for specialty chicken growers as a reason in support of a stay (see below). The appellants argue that the implementation of the February decision without prior notice or lead time to adjust to the re-apportioning of market share as between hatching egg producers will result in disruption of chick supply. They say it is curious that the Commission has not addressed this issue nor has it provided any assurance that it has considered whether there are sufficient and appropriate hatching eggs to meet grower demands. The unchallenged evidence of Mr. Allen is that the appellants need to place 471,500 chicks between January 2015 and November 2015 to meet the needs of their chicken growers and they have already expended resources selecting and raising breeders to meet these requirements. If the February decision is implemented and the appellants' operations are rendered unviable, there will need to be significant adjustments by other growers to meet the gap in production left by the appellants.

Position of Interveners

The Interveners in Appeal #1 made brief submissions. The BCCGA state that if the quota allocated under the February decision results (or has the capacity to result) in a shortage of chicks for chicken growers, it supports a stay. Lillian Fehr and Bill Friesen say that the partial decision of the Commission without any further information leaves them in a difficult position. They understand the traumatic position the appellants are in and say they may soon be in a similar situation. They support a fair and workable conclusion.

Bradner Farms, a competitor of the appellants, opposes the granting of a stay as it will allow "illegitimate specialty chick producers ... to continue with the existing state of affairs". They allege that the appellants have abused the system and wasted no time in trying to increase market share in an attempt to get more breeder quota, undercutting market price without consideration to other producers and causing irreversible harm. Bradner Farms indicates that they can supply the chicks required by the specialty market without the appellants' continued overproduction.

Decision

Before considering whether the appellant has satisfied the three part test for a stay, I want to address the substance of the Commission's response – that this application is a transparent attempt by the appellants to secure an extraordinary pre-emptive order in the wrong venue under the guise of a stay application. In my view, the Commission's characterization of the appellants as non-compliant producers is an oversimplification. As pointed out by the appellants, this approach was rejected in the stay decision issued in Appeal #1 where the presiding member stated as follows:

I have also considered the Commission's submission that the appellants have never had a right to produce without a license or quota based strictly on s. 37 of the Consolidated Order. However, in my view it would not be fair to characterize the period leading up to the Decision as one in which the Commission did not enforce the requirement under its Order that producers have quota. By way of a notice to producers dated March 2010, the Commission advised specialty producers of its intention to regularize their operations and assured them that it would not include the requirement to hold quota. [emphasis added]

I agree that under the *British Columbia Broiler Hatching Egg Scheme*, the Commission has the authority to regulate all broiler breeder flocks, broiler hatching eggs, and chicks in BC. However, in the past the Commission has not actively regulated Silkie and Asian broiler breeder flocks such as those of the appellants, even though there are no exemptions for this production either in the *Scheme* or the Commission's Consolidated Orders.

The Amending Order created a system to regularize producers such as the appellants through an application process. The February decision challenged in this appeal is the Commission's first determination of the appellants' appropriate allotment of quota based on past production. Other determinations may follow. In my view, the appellants' request for a stay to preserve the status quo in existence prior to the February decision is properly before me.

I turn now to consider the three part test for whether it is appropriate to issue a stay in these circumstances.

Serious Issue to be Tried: The appellants raise several issues on this appeal. They argue that the allotment of regularized quota granted to them pursuant to Amending Order 11 does not accord with BCFIRB's 2005 Specialty Review or sound marketing policy. They also take issue with the process undertaken by the Commission to determine how to allot quota and say this process does not comply with SAFETI and say it was unfair.

In the stay application in Appeal #1, both parties agreed that the appeal of the Amending Order 11 raised serious issues of procedural fairness and sound marketing policy. In the absence of any argument from the Commission to the contrary, I am satisfied that the appeal raises serious issues to be tried.

Irreparable Harm: Under the second branch of the test, the appellants must satisfy the burden of proving that they would suffer irreparable harm if the Commission's decision is not stayed pending appeal. The appellants rely on the uncontroverted affidavit evidence of Mr. Allen who strongly asserts that the allotment of regularized quota issued to the appellants in the February decision is wholly inadequate. He asserts that they have not been allotted sufficient quota to meet the current needs of their own specialty chicken operations let alone their current commitments to provide specialty eggs to other specialty chicken producers. The Commission has not challenged this evidence.

In the first stay application, the Commission argued and the presiding member accepted that a stay was premature as it was unclear the appellants would suffer irreparable harm in the absence of the considered decision of the Commission on the merits of the application. She held that to do so would be to render a decision in a "factual vacuum". While a decision has now been made on the appellants' application, I find that this lack of reliable factual information persists. I say this because I do not have the benefit of the Commission's considered views on the merits of the application, nor do I have its views on the test for a stay or any evidence in support of either. I do not know the Commission's view as to the implications of a stay on any other allocation applications which may need to be addressed. The issue of a potential shortage of chicks was raised both by the BCCGA in its submission and in the affidavit of Mr. Allen, but was clearly disputed in Bradner Farms' submission. I do not, however, know the Commission's position on the possibility of such a shortage or the potential for disruption should the stay be denied.

Balance of Convenience: Under the third branch of the test, there is a presumption that legislation promotes the public interest and that a stay of that legislation would harm the public interest. As such, the onus is on the appellants to demonstrate that there would be a benefit to the public interest in staying the legislation. In this case, the appellants argue that the balance of convenience favours a return to the status quo (the circumstances as they existed prior to the February decision) until such time as the appeal is heard or alternatively until the Commission issues reasons for its February decision and makes the further allotments of quota to reflect 'minimum efficient farm size' and adjustments to reflect the current aggregate market conditions (to be completed by April 3, 2015)

I have considered the extensive evidence presented by the appellants and accept that there is a risk of irreparable harm to its business as well as potential disruption in the market place if a stay is not granted. While I note Bradner Farms' stated position that market demand for specialty chicks can be met without the appellants' current production levels, I am overall of the view that the balance of convenience favours the appellants in the circumstances. As already stated, the Commission has yet to provide reasons for its decision and has chosen not to introduce any evidence or respond directly to the issues raised by the appellants in their stay application or the submissions of the intervener, despite being given an opportunity to do so in the March 6, 2015 process letter. I would also note that the lengthy delay of the Commission in making its decision followed by the sudden institution of a partial quota regime without lead time in the absence of any reasons have all contributed to a climate of uncertainty.

It is the Commission's responsibility as the first instance regulator to determine, through a defensible process and clear rationale, what manner of regulation is effective and strategic in order to meet their roles, responsibilities and objectives in the interests of both the industry and the public. To date, this has not happened with respect to the regularization process.

The Commission may have followed proper processes in enacting Amending Order 11 and in issuing its allotment decisions. Having made the decision to regularize specialty broiler chick production, the Commission was tasked with creating a fair process (incorporating SAFETI principles) to determine the size of the "pie" and the size of each "slice" to be allotted to appropriate candidates. But that decision making process is not yet complete; the Commission has not issued reasons for its February decision and it has further allotment decisions to make.

I recognize that we are dealing with living creatures and not "widgets" and production life cycles require planning decisions to be made well in advance to ensure production levels meet demand. In these circumstances, it is in my opinion appropriate to grant the appellants' request for a stay until such time as Appeal #1 and #2 can be heard. However, the appellants should not assume that the circumstances preserved by this stay are anything but short term. Depending on the evidence heard following a hearing on the merits, and given BCFIRB's previous statements regarding its minimum expectation for the regulation of specialty production for the purposes of biosecurity and food safety, the appellants need to be aware that there is a full range of possible outcomes on these appeals. Such outcomes include but are not limited to determinations of whether a quota regime in general or an allotment of quota in particular are in fact consistent with sound marketing policy. The appellants could therefore end up with the same allotment, something more, less or nothing at all and as such, they should be mindful of these potential outcomes during this interim period.

It is in the interests of all concerned that these appeals be heard on an expedited basis. BCFIRB will be in contact with the parties to arrange a pre-hearing conference to address procedural matters and set this matter down for hearing. In the interim and in the interest of certainty, the Commission needs to issue its reasons for the February decision and complete its further allotment processes and provide reasons no later than April 3, 2015, as planned. The issuance of these further decisions and reasons may trigger further appeals. On this point, I observe that a notice of appeal was received from K&R Farms Ltd. on March 10, 2015 also challenging the February decision.

Andreas Dolberg, Vice Chair

CORRIGENDUM

Released: March 18, 2015

[1] This is a corrigendum to the decision of March 13, 2015. The last paragraph on page 3 of the decision should have read as follows:

The Commission chose not to address the three part test for a stay or the issues raised by the appellants in its reply submission dated March 6, 2015, relying instead on its submissions made in response to the first stay application dated February 13, 2014. The Commission characterises this application as an attempt by the appellants to obtain an unfettered right to produce broiler hatching eggs without quota, pending further decisions of the Commission or the hearing of the appeal.

[2] The first full paragraph on page 7 of the decision should have read as follows:

In the first stay application, the Commission argued and the presiding member accepted that a stay was premature as it was unclear the appellants would suffer irreparable harm in the absence of the considered decision of the Commission on the merits of the application. She held that to do so would be to render a decision in a “factual vacuum”. While a decision has now been made on the appellants’ application, I find that this lack of reliable factual information persists. I say this because I do not have the benefit of the Commission’s considered views on the merits of the application, nor do I have its views on the test for a stay in the specific circumstances of this application or any evidence in support of either. I do not know the Commissions’ view as to the implications of a stay on any other allocation applications which may need to be addressed.

BRITISH COLUMBIA FARM INDUSTRY REVIEW BOARD

MEMO

TO: All Regularized Hatching Egg Producers

STATUS: Immediate

FROM: Stephanie Nelson

DATE: March 4, 2015

SUBJECT: Submissions Re: "Minimum Efficient Farm Size" and Pro-Rata Increases or Decreases to Allocations

Good Afternoon,

On Friday February 27, 2015 you received a letter detailing the Commission's decisions with respect to the allotment of Regularized Producer Chick Quota and the issuance of temporary, revocable, non-transferrable export permit.

In that decision, the Commission stated that it is prepared to receive and consider further submissions from V3 Farms and Skye Hi Farms Inc., together with submissions from the other applicants, concerning the "minimum efficient farm size".

The Commission also indicated that it would consult with the successful applicants and will consider increasing or decreasing the allocations on a pro rata basis to best reflect the current, aggregate market conditions if it is thought necessary or desirable to do so.

The purpose of this communication is to ask each of you to provide any submissions that you may have concerning the "minimum efficient farm size" and the prospect of increasing or decreasing the allocations on a pro rata basis to best reflect the current, aggregate market conditions.

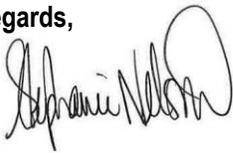

These submissions must be made in writing and must be received by the Commission not later than March 19, 2015. It would be useful if your submissions touched on the following points:

1. What is the minimum efficient farm size for the production of Silkie or Taiwanese Chicks expressed in chicks per year?

2. What are the details of the economic analysis to support your submission concerning minimum efficient farm size?
3. If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?
4. Are the allocation made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis t best reflect the current, aggregate market conditions? If so, what percentage increase or decrease is recommended?

These submissions will be circulated among the applicants, and applicants will be given until April 3, 2015 to reply in writing to any submission made by any other applicant.

Regards,

A handwritten signature in black ink, appearing to read 'Stephanie Nelson', written in a cursive style.

March 18, 2015

BC Broiler Hatching Egg Commission
180-32160 South Fraser Way,
Abbotsford, V2T 1W5

Dear Members of the Board,

This letter is a response to your letter dated March 04, 2015 related to the "minimum efficient farm size".

1. What is the minimum efficient farm size for the production of Silkie or Taiwanese Chicks expressed in chicks per year?

We think the Commission recent quota allocation should be respected since it's based on historical sales. It will be in the best interest of the specialty chicken industry to avoid imposing a minimum farm size. To our knowledge, Skye Hi Farms and V3 Farms have always operated as a production unit and therefore, they should be treated likewise and not as two separated farm units.

2. What are the details of the economic analysis to support your submission concerning minimum efficient farm size?

In the past there have been new breeds of specialty that have created a demand for new markets. The creation of a minimum farm size would be detrimental for the development of new niche markets.

3. If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?

We don't agree to a minimum farm size because of the reasons explained above.

4. Are the allocations made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis to best reflect the current, aggregate market conditions? If so, what % increase or decrease is recommended?

We believe the Commission should increase allocations on a pro rata basis to meet actual market demand. The current annual market demand for specialty chicks is about 3,800,000 excluding Farm Fed Silkie production. The recent allocation made by the Commission adds up to about 3,062,678. We agree with the idea to allocate the difference on a prorated basis to all the producers.

Sincerely,

Rob Donaldson and Kelly Boonstra

Bradner Farms and Unger's Chick Sales (1974) Ltd.

Dear Gloria:

**RE: Submissions Re: "Minimum Efficient Farm Size" and Pro-Rata
Increases or Decreases to Allocations**

1. What is the minimum efficient farm size for the production of
Silkie or Taiwanese Chicks expressed in chicks per year?

**The BC BHEC determined the viable Minimum Farm size in
2005. While we do not have the resources to conduct
this type of study, our experience re-enforces their
decision.**

**We started into the specialty chicken market in response
to specific requirements from potential customers. For
years we have invested in different breeds of chicken and
feeding programs to develop the specific quality of
chicken to satisfy the discerning palate of the Asian
market. Once we found the breed that both satisfies the
customer and was also feasible to grow we have stayed
with it.**

**Since the BC HEC had the Minimum Farm Size assessed,
costs for feed and housing have increased. Our mixed
farming operation allowed us to supplement our hatching
egg operation as we grew the business. Our experience
leads us to believe that the Minimum Farm size as
determined by BC HEC is absolutely the minimum farm
size required for specialty chicken.**

The question remains as to how the Minimum Farm Size based upon breeders can be translated to chicks. The financial viability of any farm is based upon revenues and expenses. Since our product is the Chick to the Grower, not the Egg to the Hatchery, additional considerations need to be addressed.

2. What are the details of the economic analysis to support your submission concerning minimum efficient farm size?

In addition to the standard challenges of Regular Broiler farms, we must deal with the following conditions which have a negative impact on our bottom line.

- **In order to keep flocks at the optimum size for the specialty growers orders, our eggs are shipped to the hatchery every 2 or 3 weeks not twice a week. This reduces the fertility for TC and more significantly for silkies.**
- **Because our business has been built on the quality of the bird, we maintain parent and grandparent stock for both TC and Silkies. This adds significantly to our costs.**
- **Under the proposed plan, there is not a profitable or even economical way to deal with the excess eggs.**
- **Currently some costs are offset by the sale of spent breeders. The question arises whether this will be allowed to continue?**
- **How are the allocations for chicks vs eggs factored in?**

3. If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?

Yes, since the BC HEC has determined the efficient farm size, then the applicant should be allotted additional quota and allocation.

4. Are the allocation made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis t best reflect the current, aggregate market conditions? If so, what percentage increase or decrease is recommended?

The BC HEC is used to working with live 'widgets". While chickens are live, in Specialty they are not all the same. Simply lumping TC and Silkie into one allocation is not practical. When have any of us purchased a Silkie for a meal? Why did we have a specialty super market wanting to exclusively purchase all of our product? Why do growers prefer to purchase our chicks?

We developed a product to meet the requirements of both the consumer and grower. To suggest that chicks can be purchased to ship to a grower and processor and be equal, indicates a lack of understanding on the specialty market.

The BC HEC has chosen to use out dated statistics to determine the initial allocation. Since Specialty producers were told there would be no quota, and their business were developed based on market requirements, allocations should be made based upon the business they have developed in conjunction with the BC Chicken Marketing Board. Only once all producers have obtained sufficient quota and allocation to meet their current commitments, should increases and decreases be determined.

Respectfully Submitted

Abbotsford, BC V2T 1W5

Attention: Stephanie Nelson, Executive Director

Dear Sirs/Mesdames:

Re: Submissions Re: “Minimum Efficient Farm Size” and Pro-Rata Increases or Decreases to Allocations

We write on behalf of Skye Hi Farms Inc. (“Skye Hi”) and Casey van Ginkel dba V3 Farms (“V3”), in response to the Commission’s Memo of March 4, 2015 inviting submissions concerning “minimum efficient farm size” and whether it is necessary or desirable to increase or decrease the allocations on a pro rata basis to best reflect the current, aggregate market conditions.

These submissions are further to their applications filed February 5, 2014 and our letter of April 4, 2014 setting out the particulars of their exceptional circumstances, including in respect of minimum efficient farm size. As you know, Skye Hi and V3 have filed notices of appeal in respect of the Commission’s decisions to make Amending Order 11 and its February 27, 2015 decision allotting quota pursuant to that Amending Order and those appeals remain outstanding. Skye Hi and V3 make these submissions without prejudice to those appeals.

In response to the questions posed by the Commission in the March 4, 2015 memo, Skye Hi and V3’s submissions are as follows:

1. ***What is the minimum efficient farm size for the production of Silkie or Taiwanese Chicks expressed in chicks per year?***

V3 and Skye Hi submit that the minimum efficient farm size for production of Silkie or Taiwanese chicks expressed in chicks per year is 580,000 chicks (or 1,160,000 chicks per two year quota period). This number is based on 10,000 breeder pullets per quota period. The calculation of the number of chicks is 10,000 x 145 eggs per breeder pullet x 80% hatchability.

The rationale for the use of the 10,000 breeder pullet number is based on the position taken by the Commission in its submissions to the British Columbia Farm Industry Review Board (“BCFIRB”) as part of the 2005 Specialty Market and New Entrant Submissions Policy,

Analysis, Principles and Directions (“2005 Specialty Review”). In that submission the Commission proposed a new entrant grower program equivalent to a notional quota allotment of 10,000 units per quota period on the basis that this amount “was determined as being required to establish an economically viable farm unit” (Appendix 1 Response to BCBHEC Specialty and New Entrant Submission at p. 4, section 2.6).

While ultimately the Commission established the new producer program¹ with a 5,000 broiler pullet entry level (Consolidated Order, Schedule 1) as an exception to the Commission’s ordinary minimum farm size of 12,000 broiler breeder pullets set out in para. 8(2)(d) of the Consolidated Orders, this minimum farm level evolved out of BCFIRB’s direction to balance the minimum efficient farm size estimated by the Commission with the length of time it would take to build up sufficient quota to invite a new entrant producer to participate in the program. The proposal of the Commission in 2005 was to establish a transfer assessment, to hold the quota collected pursuant to the assessment in a new entrant quota account, and to make new entrant placement quota available when 10,000 units were in the new entrant quota account. As BCFIRB noted in its assessment of the Commission’s proposal, the Commission ordinarily

requires a minimum farm size of 12,000 units and therefore an incentive of 10,000 units would require the new entrant to purchase 2,000 units of Placement Quota. However, since quota does not usually trade openly it can be difficult for new producers to find quota to purchase regardless of the price. Accordingly, the Commission in proposing to provide an exception in its Orders for new entrants by allowing them to have a minimum farm size of 10,000 quota units compared to the existing regulations of 12,000 units.

Noting that setting the minimum farm size at 10,000 units would take a long time to raise sufficient units to provide a new entrant invitation, BCFIRB went on to state that the Commission

could consider relaxing its minimum farm size for new entrants or re-examining ways quota could be made available for new entrants by transfer. While there is no easy answer, the size of the incentive and the time required to raise sufficient units to provide a new entrant invitation suggest that more thinking should be done concerning how smaller holdings might work in the industry and how quota might be made available to new entrants.

The issue of balancing the time it would take to bring in a new entrant with the minimum efficient farm size in setting the level of quota allotment for new producers does not arise where—as here—a class of quota is being issued for the first time.

¹ A small lot innovative self-marketer program was also later established with a 5,000 breeder pullet minimum was also established (Schedule 8)

Skye Hi and V3 are not aware of any reason that the analysis as to the number of breeder pullets required to establish an economically viable hatching egg farm would be any smaller in the production of Asian and Taiwanese hatching eggs than they are in mainstream. Accordingly, it is submitted that the Commission's analysis that 10,000 breeder pullets is necessary to establish an economically viable farm should be applied here to set the minimum efficient farm size for the production of Silkie or Taiwanese chicks.

2. *What are the details of the economic analysis to support your submission concerning minimum efficient farm size?*

The production of Silkie or Taiwanese chick hatching eggs is similar to the production of mainstream hatching eggs. Both require similar infrastructure such as feed delivery, egg pick up, pullet catching, vaccinating, hauling and the use of hatcheries. Accordingly, it is submitted that the minimum efficient farm size for mainstream hatching eggs determined by the Commission in its 2005 submissions to BCFIRB is an appropriate guide for the establishment of a minimum efficient farm size for specialty hatching eggs.

The formula employed to convert breeder hen placements to chicks is based on 80% hatchability, which T&C Chick Sales (the joint venture chick broker through which Skye Hi and V3 operate) uses as a low average based on experience for business planning purposes.

If the Commission does not believe that its 2005 analysis that 10,000 breeder pullets per quota period are "required to establish an economically viable farm unit" is readily transferable to the specialty context and further economic analysis is required, Skye Hi and V3 submit that it would be sound marketing policy for the Commission to retain a consultant who is qualified to conduct a more detailed economic analysis in order to determine minimum efficient farm size for the specialty hatching egg industry.

3. *If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?*

Yes, it is sound marketing policy that all market participants be allotted sufficient quota to make their farm units economically viable.

4. *Are the allocation (sic) made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis t[o] best reflect the current, aggregate market conditions? If so, what percentage increase or decrease is recommended?*

The quota allocations made by the Commission are not appropriate having regard to current, aggregate market conditions because they are based on historical market share, which bears no relationship to the current market conditions, particularly in respect of Skye Hi and V3

who commenced production part way through the historical period used. As set out in our previous submissions, the starting point for quota allocations for new classes of specialty quota should be production volumes for the most recent twelve month period or nearest applicable period.

Skye Hi and V3 propose that the quota allocations should be adjusted to permit the smaller producers, Skye Hi, V3 and Mr. Friesen, to continue to meet current contractual commitments, which amounts—at least in respect of Skye Hi and V3—are below the 10,000 breeder hen minimum efficient farm size level described above. If quota were allocated using Bradner and Coastline’s historical production and using our proposed industry-acknowledged 10,000 bird-based chick quota placement equivalent for Skye Hi, V3 and Mr. Friesen, all industry participants would be over allocated at a 100% allocation level. Skye Hi and V3 propose that using this quota allotment as a base, each participant should be allocated production based on current market contracts.

The specialty hatching egg market is dynamic and evolving. Accordingly, the market demands of today are not properly represented by market demands prior to the commencement of the regularization of the historically non-compliant producers. This quota allocation should allow for the market of specialty chicken growers to be able to continue to access the specialty product that they have chosen and the market presently demands. It is important that all specialty producers have sufficient quota allocation so that chick customers may continue to source chicks that they desire in order to meet the demands of consumers with the end product being offered to the market.

In the applicants’ submission, to set a proper allocation that meets the controlled market of the British Columbia Chicken Marketing Board (the “Chicken Board”), the Commission should consider using the Chicken Board’s records of annualization to determine appropriate quota allocation levels. The annualization requests are to be submitted and approved prior to the start of the year and the projections are derived by both the specialty chicken growers and the processors that purchase and market the product, thus reflecting actual current market needs and desires. Because the Chicken Board requires all specialty producers to submit their planned chick placement date and quantity and this information is submitted by the grower and must be approved by the processor, these records are the best records of which Skye Hi and V3 are aware that reflect current market conditions.

Yours truly,

Hunter Litigation Chambers

Dear Gloria:

**RE: Submissions Re: "Minimum Efficient Farm Size" and Pro-Rata
Increases or Decreases to Allocations**

1. What is the minimum efficient farm size for the production of Silkie or Taiwanese Chicks expressed in chicks per year?

The BC BHEC determined the viable Minimum Farm size in 2005. While we do not have the resources to conduct this type of study, our experience re-enforces their decision.

We started into the specialty chicken market in response to specific requirements from potential customers. For years we have invested in different breeds of chicken and feeding programs to develop the specific quality of chicken to satisfy the discerning palate of the Asian market. Once we found the breed that both satisfies the customer and was also feasible to grow we have stayed with it.

Since the BC HEC had the Minimum Farm Size assessed, costs for feed and housing have increased. Our mixed farming operation allowed us to supplement our hatching egg operation as we grew the business. Our experience leads us to believe that the Minimum Farm size as determined by BC HEC is absolutely the minimum farm size required for specialty chicken.

The question remains as to how the Minimum Farm Size based upon breeders can be translated to chicks. The financial viability of any farm is based upon revenues and expenses. Since our product is the Chick to the Grower, not the Egg to the Hatchery, additional considerations need to be addressed.

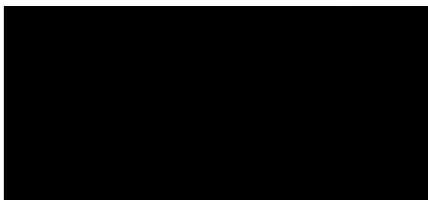

2. What are the details of the economic analysis to support your submission concerning minimum efficient farm size?

In addition to the standard challenges of Regular Broiler farms, we must deal with the following conditions which have a negative impact on our bottom line.

- **In order to keep flocks at the optimum size for the specialty growers orders, our eggs are shipped to the hatchery every 2 or 3 weeks not twice a week. This reduces the fertility for TC and more significantly for silkies.**
- **Because our business has been built on the quality of the bird, we maintain parent and grandparent stock for both TC and Silkies. This adds significantly to our costs.**
- **Under the proposed plan, there is not a profitable or even economical way to deal with the excess eggs.**
- **Currently some costs are offset by the sale of spent breeders. The question arises whether this will be allowed to continue?**
- **How are the allocations for chicks vs eggs factored in?**

3. If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?

Yes, since the BC HEC has determined the efficient farm size, then the applicant should be allotted additional quota and allocation.

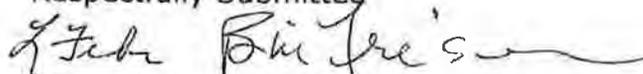

4. Are the allocation made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis t best reflect the current, aggregate market conditions? If so, what percentage increase or decrease is recommended?

The BC HEC is used to working with live 'widgets". While chickens are live, in Specialty they are not all the same. Simply lumping TC and Silkie into one allocation is not practical. When have any of us purchased a Silkie for a meal? Why did we have a specialty super market wanting to exclusively purchase all of our product? Why do growers prefer to purchase our chicks?

We developed a product to meet the requirements of both the consumer and grower. To suggest that chicks can be purchased to ship to a grower and processor and be equal, indicates a lack of understanding on the specialty market.

The BC HEC has chosen to use out dated statistics to determine the initial allocation. Since Specialty producers were told there would be no quota, and their business were developed based on market requirements, allocations should be made based upon the business they have developed in conjunction with the BC Chicken Marketing Board. In response to the questions posed by the Commission in the March 4, 2015 memo, Skye Hi and V3’s submissions are as follows:

1. *What is the minimum efficient farm size for the production of Silkie or Taiwanese Chicks expressed in chicks per year?*

V3 and Skye Hi submit that the minimum efficient farm size for production of Silkie or Taiwanese chicks expressed in chicks per year is 580,000 chicks (or 1,160,000 chicks per two year quota period). This number is based on 10,000 breeder pullets per quota period. The calculation of the number of chicks is 10,000 x 145 eggs per breeder pullet x 80% hatchability.

The rationale for the use of the 10,000 breeder pullet number is based on the position taken by the Commission in its submissions to the British Columbia Farm Industry Review Board (“BCFIRB”) as part of the 2005 Specialty Market and New Entrant Submissions Policy,

Analysis, Principles and Directions (“2005 Specialty Review”). In that submission the Commission proposed a new entrant grower program equivalent to a notional quota allotment of 10,000 units per quota period on the basis that this amount “was determined as being required to establish an economically viable farm unit” (Appendix 1 Response to BCBHEC Specialty and New Entrant Submission at p. 4, section 2.6).

While ultimately the Commission established the new producer program¹ with a 5,000 broiler pullet entry level (Consolidated Order, Schedule 1) as an exception to the Commission’s ordinary minimum farm size of 12,000 broiler breeder pullets set out in para. 8(2)(d) of the Consolidated Orders, this minimum farm level evolved out of BCFIRB’s direction to balance the minimum efficient farm size estimated by the Commission with the length of time it would take to build up sufficient quota to invite a new entrant producer to participate in the program. The proposal of the Commission in 2005 was to establish a transfer assessment, to hold the quota collected pursuant to the assessment in a new entrant quota account, and to make new entrant placement quota available when 10,000 units were in the new entrant quota account. As BCFIRB noted in its assessment of the Commission’s proposal, the Commission ordinarily

requires a minimum farm size of 12,000 units and therefore an incentive of 10,000 units would require the new entrant to purchase 2,000 units of Placement Quota. However, since quota does not usually trade openly it can be difficult for new producers to find quota to purchase regardless of the price. Accordingly, the Commission in proposing to provide an exception in its Orders for new entrants by allowing them to have a minimum farm size of 10,000 quota units compared to the existing regulations of 12,000 units.

Noting that setting the minimum farm size at 10,000 units would take a long time to raise sufficient units to provide a new entrant invitation, BCFIRB went on to state that the Commission

could consider relaxing its minimum farm size for new entrants or re-examining ways quota could be made available for new entrants by transfer. While there is no easy answer, the size of the incentive and the time required to raise sufficient units to provide a new entrant invitation suggest that more thinking should be done concerning how smaller holdings might work in the industry and how quota might be made available to new entrants.

The issue of balancing the time it would take to bring in a new entrant with the minimum efficient farm size in setting the level of quota allotment for new producers does not arise where—as here—a class of quota is being issued for the first time.

¹ A small lot innovative self-marketer program was also later established with a 5,000 breeder pullet minimum was also established (Schedule 8)

Skye Hi and V3 are not aware of any reason that the analysis as to the number of breeder pullets required to establish an economically viable hatching egg farm would be any smaller in the production of Asian and Taiwanese hatching eggs than they are in mainstream. Accordingly, it is submitted that the Commission's analysis that 10,000 breeder pullets is necessary to establish an economically viable farm should be applied here to set the minimum efficient farm size for the production of Silkie or Taiwanese chicks.

2. *What are the details of the economic analysis to support your submission concerning minimum efficient farm size?*

The production of Silkie or Taiwanese chick hatching eggs is similar to the production of mainstream hatching eggs. Both require similar infrastructure such as feed delivery, egg pick up, pullet catching, vaccinating, hauling and the use of hatcheries. Accordingly, it is submitted that the minimum efficient farm size for mainstream hatching eggs determined by the Commission in its 2005 submissions to BCFIRB is an appropriate guide for the establishment of a minimum efficient farm size for specialty hatching eggs.

The formula employed to convert breeder hen placements to chicks is based on 80% hatchability, which T&C Chick Sales (the joint venture chick broker through which Skye Hi and V3 operate) uses as a low average based on experience for business planning purposes.

If the Commission does not believe that its 2005 analysis that 10,000 breeder pullets per quota period are "required to establish an economically viable farm unit" is readily transferable to the specialty context and further economic analysis is required, Skye Hi and V3 submit that it would be sound marketing policy for the Commission to retain a consultant who is qualified to conduct a more detailed economic analysis in order to determine minimum efficient farm size for the specialty hatching egg industry.

3. *If the minimum efficient farm size requires production in volumes greater than that provided for under the quota allotted to any applicant, should that applicant be allotted additional quota?*

Yes, it is sound marketing policy that all market participants be allotted sufficient quota to make their farm units economically viable.

4. *Are the allocation (sic) made by the Commission appropriate having regard to current, aggregate market conditions? If not, should the allocations made by the Commission be increased or decreased on a pro rata basis t[o] best reflect the current, aggregate market conditions? If so, what percentage increase or decrease is recommended?*

The quota allocations made by the Commission are not appropriate having regard to current, aggregate market conditions because they are based on historical market share, which bears no relationship to the current market conditions, particularly in respect of Skye Hi and V3

who commenced production part way through the historical period used. As set out in our previous submissions, the starting point for quota allocations for new classes of specialty quota should be production volumes for the most recent twelve month period or nearest applicable period.

Skye Hi and V3 propose that the quota allocations should be adjusted to permit the smaller producers, Skye Hi, V3 and Mr. Friesen, to continue to meet current contractual commitments, which amounts—at least in respect of Skye Hi and V3—are below the 10,000 breeder hen minimum efficient farm size level described above. If quota were allocated using Bradner and Coastline’s historical production and using our proposed industry-acknowledged 10,000 bird-based chick quota placement equivalent for Skye Hi, V3 and Mr. Friesen, all industry participants would be over allocated at a 100% allocation level. Skye Hi and V3 propose that using this quota allotment as a base, each participant should be allocated production based on current market contracts.

The specialty hatching egg market is dynamic and evolving. Accordingly, the market demands of today are not properly represented by market demands prior to the commencement of the regularization of the historically non-compliant producers. This quota allocation should allow for the market of specialty chicken growers to be able to continue to access the specialty product that they have chosen and the market presently demands. It is important that all specialty producers have sufficient quota allocation so that chick customers may continue to source chicks that they desire in order to meet the demands of consumers with the end product being offered to the market.

In the applicants’ submission, to set a proper allocation that meets the controlled market of the British Columbia Chicken Marketing Board (the “Chicken Board”), the Commission should consider using the Chicken Board’s records of annualization to determine appropriate quota allocation levels. The annualization requests are to be submitted and approved prior to the start of the year and the projections are derived by both the specialty chicken growers and the processors that purchase and market the product, thus reflecting actual current market needs and desires. Because the Chicken Board requires all specialty producers to submit their planned chick placement date and quantity and this information is submitted by the grower and must be approved by the processor, these records are the best records of which Skye Hi and V3 are aware that reflect current market conditions.

Yours truly,

Hunter Litigation Chambers

Dear Sirs/Mesdames:

Re: Reply Submissions Re: “Minimum Efficient Farm Size” and Pro-Rata Increases or Decreases to Allocations

We write on behalf of Skye Hi Farms Inc. (“Skye Hi”) and Casey van Ginkel dba V3 Farms (“V3”), in reply to the submissions made by W. Friesen Enterprises, dated March 18, 2015, and Bradner Farms, dated March 18, 2015, responding to the Commission’s Memo of March 4, 2015.

In reply to Bradner Farms’ submissions that (1) it is in the best interest of the specialty chicken industry to not impose a minimum efficient farm size and (2) that the imposition of a minimum efficient farm size would be detrimental for the development of new niche markets, those opinions are unresponsive to the questions posed by the Commission and are not supported by any evidence or explanation.

Skye Hi and V3 reiterate that it is sound marketing policy for both specialty hatching egg producers and specialty broiler producers to have farms that are economically viable. It is apparent that Bradner Farms’ submissions contradict the policy principles set out in the 2005 Specialty Market and New Entrant Submissions Policy, Analysis, Principles and Directions (“2005 Specialty Review”), being: to ensure that BC industry can serve the developing demand for specialty product and to establish new entrant programs with new entrant quota incentives funded by transfer assessments and growth in provincial allocation (pp. 1, 4). It is further contrary to the Commission’s expressed view that specialty hatching egg producer farms must be economically viable, as reflected in its previously stated position that the new entrant incentive would be determined by what was required to establish an economically viable farm unit in the 2005 Specialty Review (Appendix 1, p. 4). Finally, failing to impose a minimum efficient farm size will stymie innovation in new products, as operating at an efficient farm size creates operational stability for farms and allows a farm to participate in new market programs.

In reply to Bradner Farms’ submission that to its knowledge, Skye Hi and V3 have always operated as a production unit and should be treated likewise, Skye Hi and V3 say that while

they have worked together through their joint venture T&C Chick Sales to market chicks, they have always in the past and will continue in the future to operate as individual hatching egg production units, which is reflected in their separate applications for quota in the Regularization of Historically Non-Compliant Silkie and Taiwanese Producers Program.

In reply to Bradner Farms' latter point, that the Commission should increase allocations of quota on a pro rata basis to meet actual market demand, Skye Hi and V3 agree in principle with the submission that allocations should be increased to meet actual market demand, noting the 2005 Specialty Review's policy regarding allocation, being that provincial allocation should be based on market need (p. 2). Skye Hi and V3 submit that a pro rata increase should only be made if the British Columbia Chicken Marketing Board confirms that an allocation increase to meet market demand is necessary. Allotments ought to be made to those producers who are producing at a level below the 10,000 breeder hen minimum farm size first in order to top up their quota to reach minimum farm size.

However, Skye Hi and V3 do not agree that the increase should be pro rata based on the allotments of quota as currently set out in the February 27, 2015 decision. Those allotments to V3 and Skye Hi do not reflect their current market share and are based on numbers from an arbitrary historical period, including, in part, a period prior to Skye Hi and V3's entry into the market. The allotments to Skye Hi and V3 would render their farms inefficient and economically unviable. Even with a pro rata increase from their historical numbers, Skye Hi and V3 will still be left inefficient and uneconomical. Further, if adjustments were made on a pro rata basis, because of the use of market share from that historical period, the pro rata allocation will unfairly result in the pro rata division of V3, Skye Hi and W. Friesen Enterprises' customer base between the larger market participants. Bradner Farms will gain in market share beyond its historical production levels.

Yours truly,

Hunter Litigation Chambers

Dear Members of the Board:

RE: Request to Respond to Submissions on "the minimum efficient farm size"

Thank you for the opportunity to respond.

Bradner Farms submission:

- 1) In our opinion historical data based on random time frame, does not indicate efficiency. Expecting two independent farms to operate as one would appear to be inefficient.
- 2) Minimum farm size would encourage not discourage new breeds. There is nothing to indicate a farm can only have one breed.
- 3) We disagree.
- 4) We would like the BC BHEC and BCCMB to provide statistics and do not understand the rationale for pro rata increases without considering current market needs.

Skye Hi Farms Inc. and Casey van Ginkel submission

- 1) In addition to points raised, if the Commission determined 12,000 units was the minimum size for efficiency, and there is no reason to reduce this number in the current situation; then the 12,000 unit minimum should remain.
- 2) We agree
- 3) We agree
- 4) We agree

Respectfully

Lillian Fehr

Wilhelm Bill Friesen
